(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2021

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-40874

Cingulate Inc.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

86-3825535

(I.R.S. Employer
Identification No.)

**1901 W. 47th Place
Kansas City, KS**

(Address of principal executive offices)

66205

(Zip Code)

(913) 942-2300

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of exchange on which registered
Common Stock, par value \$0.0001 per share	CING	The Nasdaq Stock Market LLC (Nasdaq Capital Market)
Warrants, exercisable for one share of common stock	CINGW	The Nasdaq Stock Market LLC (Nasdaq Capital Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 30, 2021, the last business day of the registrant's most recently completed second fiscal quarter, there was no established public market for the registrant's common stock. The registrant's common stock began trading on the NASDAQ Capital Market on December 8, 2021. Accordingly, the aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant computed by reference to the price of the registrant's common stock as of the registrant's most recently completed second fiscal quarter cannot be determined.

The number of shares outstanding of the registrant's common stock, par value of \$0.0001 per share, as of March 21, 2022 was 11,309,412.

DOCUMENTS INCORPORATED BY REFERENCE

None.

CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

This annual report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are generally identified by the use of such words as “may,” “could,” “should,” “would,” “believe,” “anticipate,” “forecast,” “estimate,” “expect,” “intend,” “plan,” “continue,” “outlook,” “will,” “potential” and similar statements of a future or forward-looking nature. These forward-looking statements speak only as of the date of filing this annual report with the SEC and include, without limitation, statements about the following:

- our lack of operating history;
- our plans to develop and commercialize our product candidates;
- the timing of our planned clinical trials for CTx-1301, CTx-1302, and CTx-2103;
- the timing of our NDA submissions for CTx-1301, CTx-1302, and CTx-2103;
- the timing of and our ability to obtain and maintain regulatory approvals for CTx-1301, CTx-1302, CTx-2103, or any other future product candidate;
- the clinical utility of our product candidates;
- our commercialization, marketing and manufacturing capabilities and strategy;
- our expected use of cash;
- our competitive position and projections relating to our competitors or our industry;
- our ability to identify, recruit, and retain key personnel;
- the impact of laws and regulations;
- our expectations regarding the time during which we will be an emerging growth company under the JOBS Act;
- our plans to identify additional product candidates with significant commercial potential that are consistent with our commercial objectives; and
- our estimates regarding future revenue, expenses and needs for additional financing.

Because forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified and some of which are beyond our control, you should not rely on these forward-looking statements as predictions of future events. The events and circumstances reflected in our forward-looking statements may not be achieved or occur and actual results could differ materially from those projected in the forward-looking statements. You should refer to the “Risk Factors” section of this annual report for a discussion of important factors that may cause our actual results to differ materially from those expressed or implied by our forward-looking statements. We operate in an evolving environment and new risk factors and uncertainties may emerge from time to time. It is not possible for management to predict all risk factors and uncertainties. As a result of these factors, we cannot assure you that the forward-looking statements in this annual report will prove to be accurate. Except as required by applicable law, we do not plan to publicly update or revise any forward-looking statements contained herein, whether as a result of any new information, future events, changed circumstances or otherwise. You should review the factors and risks and other information we describe in the reports we will file from time to time with the SEC.

PART I

ITEM 1. BUSINESS

Overview

We are a clinical stage biopharmaceutical company using our proprietary Precision Timed Release (PTR) drug delivery platform technology to build and advance a pipeline of next-generation pharmaceutical products designed to improve the lives of patients suffering from frequently diagnosed conditions characterized by burdensome daily dosing regimens and suboptimal treatment outcomes. We are initially focusing our efforts on the treatment of Attention Deficit/Hyperactivity Disorder (ADHD). Our PTR platform incorporates a proprietary Erosion Barrier Layer (EBL) designed to allow for the release of drug substance at specific, pre-defined time intervals, unlocking the potential for once-daily, multi-dose tablets.

We are initially targeting the ADHD stimulant-based treatment market, with an estimated US market size of \$15.3 billion in 2020. Stimulants are the most commonly prescribed class of medications for ADHD and account for more than 90% of all ADHD medication prescriptions in the United States, where approximately 70 million stimulant prescriptions were written last year alone. By contrast, non-stimulant medications are typically employed only in the second-line or adjunctive therapy setting and account for 9-10% of all ADHD medication prescriptions. Extended-release, or long-acting, dosage forms of stimulant medications are most frequently deployed as the first-line treatment for ADHD and constitute approximately 60% of ADHD stimulant prescriptions by volume and nearly 85% of the dollars. Most of these extended-release dosage forms are approved for once-daily dosing in the morning and were designed to eliminate the need for re-dosing during the day. However, with the current 'once-daily' extended-release dosage forms, most patients still receive a second or "booster" dose for administration later in the day (typically in the early afternoon) to achieve entire active-day coverage and suffer from a multitude of unwanted side effects as a result. We believe there is a significant, unmet need within the current treatment paradigm for true once-daily ADHD stimulant medications with lasting duration and a superior side effect profile to better serve the needs of patients throughout their entire active-day.

Our two proprietary, first-line stimulant medications: CTx-1301 (dexamethylphenidate) and CTx-1302 (dextroamphetamine), are being developed for the treatment of ADHD, in the three main patient segments: children (ages 6 -12), adolescents (ages 13-17), and adults (ages 18+). Both CTx-1301 and CTx-1302 are designed to address the key shortcomings of currently approved stimulant therapies by: providing an immediate onset of action (within 30 minutes); offering 'entire active-day' duration; eliminating the need for a 'booster/recovery' dose of short-acting stimulant medications; minimizing or eliminating the rebound/crash symptoms associated with early medication 'wear-off;' and providing favorable tolerability with a controlled descent of drug blood levels. Furthermore, by eliminating the 'booster' dose used by up to 60% of ADHD patients in conjunction with their primary medication, we believe our product candidates will provide important societal and economic benefits: reducing the abuse and diversion associated with short-acting stimulant medications; allowing physicians to prescribe one medication versus two; allowing patients to pay for one medication versus two; and allowing payers to reimburse one medication versus two.

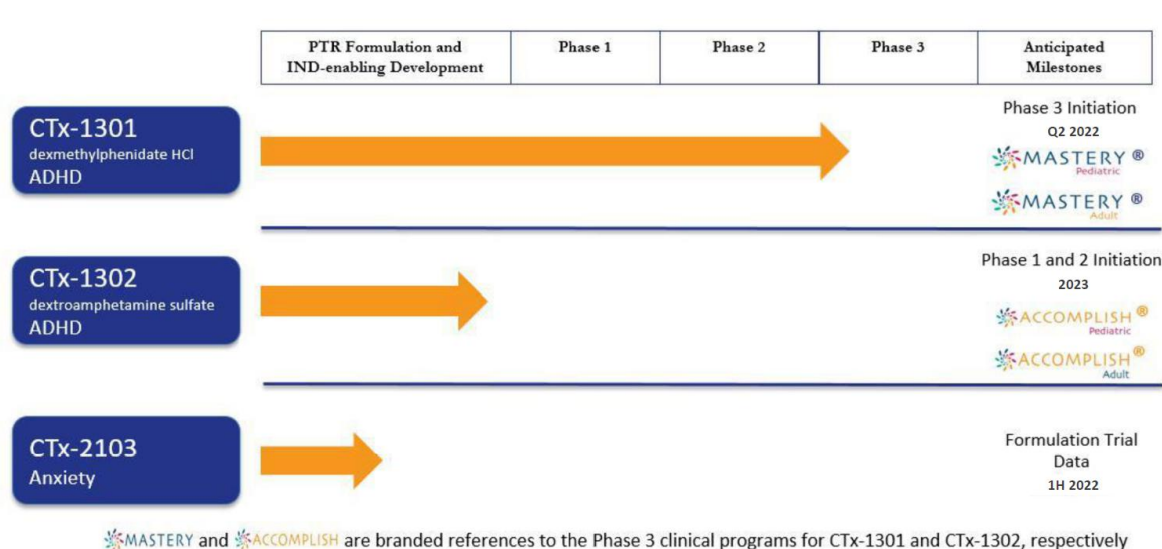

We completed a proof-of-concept trial in human subjects to validate our PTR platform and in October 2020, announced positive results from a Phase 1/2 study of CTx-1301 in ADHD patients establishing tolerability, comparative bioavailability, and dose proportionality of CTx-1301 versus Focalin® XR. We plan to initiate Phase 3 trials in the second quarter of 2022 for CTx-1301 with results expected in late 2022. Assuming we receive positive clinical results from our pivotal Phase 3 trial for CTx-1301, we plan to submit a new drug application (NDA) for CTx-1301 using an accelerated approval pathway under Section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act in the second half of 2023. In addition, we plan to initiate a Phase 1/2 bioavailability study in ADHD patients for CTx-1302 in 2023 and, if the results from this study are successful, we plan to initiate pivotal Phase 3 clinical trials in all patient segments for CTx-1302 in late 2023 with results expected in late 2024.

We believe that our PTR platform has the potential to provide patients and physicians with differentiated pharmaceutical treatment options that will enhance patient compliance and improve health outcomes in several additional therapeutic areas. We intend to leverage our PTR platform technology to expand and augment our clinical-stage pipeline by identifying and developing additional assets in other therapeutic areas where one or more or more active pharmaceutical ingredients (API) need to be delivered several times a day at specific, pre-defined time intervals and released in a manner that would offer significant improvement over existing therapies. Our criteria for the selection of additional, future pipeline candidates will include the potential for \$1 billion or more in peak annual sales, the potential to deliver a clearly differentiated therapeutic advantage and the potential to overcome unmet medical needs. Recently, we embarked on a tablet formulation and an early clinical development program for CTx-2103 (buspirone hydrochloride), bolstering the PTR platform within the anxiety therapeutic category. In 2020, United States sales for this API accounted for over \$2 billion of sales in the \$5.2 billion anxiety market. CTx-2103 will be designed as a once-daily, multi-dose tablet with clear differentiation and compelling advantages over standard treatment options. Further indications we intend to evaluate include insomnia, non-opioid pain, eating disorders, post-traumatic stress disorder, epilepsy, Alzheimer’s, hypothyroidism, psychosis, depression, cardiovascular disorders, Parkinson’s disease, migraine, oral oncology, and bipolar disorder, among others.

Initial Public Offering

On December 10, 2021, we completed our initial public offering of 4,166,666 shares of common stock and accompanying warrants to purchase 4,166,666 shares of common stock at a combined public offering price of \$6.00 per share and accompanying warrant, with gross proceeds of \$25 million before underwriting discounts and commissions and estimated offering expenses (the “IPO”). Each share of common stock was sold together with one warrant to purchase one share of common stock with an exercise price of \$6.00. We granted the underwriters a 45-day over-allotment option to purchase up to an additional 624,999 shares of common stock and/or warrants to purchase up to an additional 624,999 shares of common stock at the initial public offering price. On December 10, 2021, we issued warrants to purchase 624,999 shares of common stock pursuant to the partial exercise of the underwriters’ over-allotment option. The shares of common stock and the warrants began trading on the Nasdaq Capital Market under the ticker symbols “CING” and “CINGW,” respectively, on December 8, 2021.

Our Clinical Development Pipeline

Our Strategy

Our goal is to be a leading, innovative biopharmaceutical company focused on the development, manufacturing and commercialization of next generation pharmaceutical products that utilize our PTR drug delivery platform technology to create dosing schedules and drug release profiles that will improve the lives of patients suffering from a multitude of frequently diagnosed conditions. Key initial elements of our business strategy to achieve this goal are to:

- **Complete development and obtain regulatory approval for CTx-1301 for the treatment of ADHD.** In October 2020, we announced positive results from a Phase 1/2 bioavailability study in ADHD patients for CTx-1301. We plan to initiate Phase 3 clinical trials for CTx-1301 in the second quarter of 2022 with results expected in late 2022. Assuming we receive positive clinical results from our pivotal Phase 3 trial and additional planned supplementary trial, we plan to submit an NDA for CTx-1301 in the second half of 2023 under the Section 505(b)(2) pathway.
- **Advance development of CTx-1302 for the treatment of ADHD.** We plan to initiate a Phase 1/2 bioavailability study in ADHD patients for CTx-1302 in 2023 and, if the results from this study are successful, we plan to initiate pivotal Phase 3 clinical trials in all patient segments for CTx-1302 in late 2023 with results expected in late 2024.
- **Successfully commercialize CTx-1301 and CTx-1302 ADHD product candidates.** If we receive FDA approval for our CTx-1301 and CTx-1302 product candidates, we plan to commercialize our lead candidates either independently or via strategic partners with resources to address the pediatric and family practice markets in addition to the critical neurology and psychiatry practices.
- **Advance clinical trials for CTx-2103 for the treatment of anxiety.** We plan to initiate a clinical trial for our anxiety medication, CTx-2103, in the first half of 2022 to broaden the potential of our platform technology and provide a solution for patients in another indication where multiple daily doses are required. CTx-2103 will be designed as a once-daily, multi-dose tablet with what we believe will be clear differentiation and compelling advantages over standard treatment options.
- **Maximize the potential of our PTR platform to develop additional product candidates in new indications with significant unmet medical need and billion-dollar revenue potential.** We intend to use our PTR drug delivery platform technology and the expedited 505(b)(2) development pathway to develop additional therapeutic assets in other therapeutic areas where two or more active pharmaceutical ingredients need to be administered several times a day at specific, pre-defined time intervals and released in a manner that would offer significant improvement over existing therapies. We believe this will lead to improved patient compliance and better health outcomes. Further indications we intend to evaluate include insomnia, non-opioid pain, eating disorders, post-traumatic stress disorder, epilepsy, Alzheimer's, hypothyroidism, psychosis, depression, cardiovascular disorders, Parkinson's disease, migraine, oral oncology, and bipolar disorder, among others.
- **Acquire or in-license additional assets or programs complement our portfolio or leverage our technology.** We continuously evaluate potential partnering opportunities or asset acquisitions that can bolster our current product candidate portfolio and provide substantial value to our organization. We intend to focus on early to mid-stage development product candidates to generate clinical data and potentially move to later stages of development and ultimately on to commercialization.
- **Further strengthen our intellectual property portfolio.** We intend to continue to manage and expand our diverse intellectual property portfolio and maintain our trade secrets and know-how focused on our PTR platform, current and future pipeline candidates, and proprietary manufacturing process. We believe these activities will be critical to protect our platform and product candidates from potential competitors that may try to compete with our therapeutic assets and compression tableting approach.
- **Capitalize on our existing cGMP Manufacturing Expertise.** We have developed a proprietary, reliable, high output, specialized manufacturing equipment train with the potential for real-time testing and release that is employed by our third-party manufacturing partner. Our process has been designed to allow for the creation of a platform that can incorporate other drug substances thus permitting expansion into additional indications and therapeutic areas. We expect that our investment in these manufacturing capabilities and equipment will substantially reduce our development timelines and overall development costs for current and future assets. We currently utilize commercial manufacturing equipment and will not require technology transfer or large scale-up processes to meet clinical or commercial manufacturing needs.

Our Team

Our founders and management team have many years of experience in the biopharmaceutical space, holding management positions at leading biopharmaceutical companies, including Pfizer Inc., Novartis International AG, DuPont de Nemours, Inc. and Sanofi S.A., among others. Our team possesses substantial experience and expertise across the spectrum of drug development and commercialization of pharmaceutical products, including multiple psychiatric and nervous system products.

Shane J. Schaffer, our Co-Founder, Chairman and Chief Executive Officer, has held senior leadership roles at Pfizer Inc., Novartis International AG and Sanofi S.A. and has over 25 years of experience in drug development and commercialization. Dr. Matthew Brams, our Co-Founder and Chief Medical Officer, has over 30 years of clinical experience managing patients in the field of adult and child psychiatry and has been involved in the research, development, and evaluation of multiple ADHD medications. Dr. Raul R. Silva, our Co-Founder and Chief Science Officer is a practicing child and adolescent psychiatrist who has served as Associate Professor and Vice Chairman of Child and Adolescent Psychiatry at NYU School of Medicine in New York City. Laurie A. Myers, our Chief Operating Officer, has held leadership positions for leading global pharmaceutical companies, including Pfizer Inc., Novartis International AG, DuPont de Nemours, Inc. and Sanofi S.A. and has over 25 years of experience in drug development, marketing and commercialization.

ADHD Overview and Drawbacks of Current Therapies

ADHD is a chronic neurobehavioral and developmental disorder that affects millions of children, adolescents and adults. In the United States, approximately 6.4 million, or 11%, of children and adolescents aged 4-17 have been diagnosed with ADHD. Among this group, 80% receive treatment and 65% demonstrate clinical ADHD symptoms that persist into adulthood. Adult ADHD prevalence in the United States is estimated at approximately 11 million patients, or 4.4%, of the population, almost double the size of the child and adolescent segment combined. Currently, approximately 20% of the adult ADHD population receives treatment, however an increasing number of adult patients are being diagnosed and seeking treatment causing the adult ADHD market to grow approximately 10% year over year. Total ADHD medication sales in the United States have grown approximately 8% each year since 2010 with sales of all ADHD medications reaching approximately \$18.3 billion in 2020.

ADHD is marked by an on-going pattern of inattention and/or hyperactivity-impulsivity that interferes with functioning and/or development. According to the American Academy of Child and Adolescent Psychiatry, common manifestations of ADHD in children and adolescents include:

Hyperactivity: Children always seem to be in motion. A child who is hyperactive may move around touching or playing with whatever is around, or talk continually. During story time or school lessons, the child might squirm around, fidget, or get up and move around the room. Some children wiggle their feet or tap their fingers. A teenager or adult who is hyperactive may feel restless and need to stay busy all the time.

Impulsivity: Children often blurt out comments without thinking first. They may often display their emotions without restraint. They may also fail to consider the consequences of their actions. Such children may find it hard to wait in line or take turns. Impulsive teenagers and adults tend to make choices that have a small immediate payoff rather than working toward larger delayed rewards.

Inattentiveness: Inattentive children may quickly get bored with an activity if it's not something they really enjoy. Organizing and completing a task or learning something new is difficult for them. As students, they often forget to write down a school assignment or bring a book home. Completing homework can be huge challenge. At any age, an inattentive person may often be easily distracted, make careless mistakes, forget things, have trouble following instructions, or skip from one activity to another without finishing anything

Adult ADHD patients typically suffer from restlessness, impulsivity, difficulty with time management, trouble regulating emotions and difficulty managing finances. Adults with ADHD report experiencing an internal sense of fidgetiness and restlessness and experience greater difficulty communicating with others. Upon entering the job market, many adults have difficulty gaining employment and are at increased risk of termination due to repeated tardiness or absenteeism. Adults with ADHD earn approximately 30% less and are 10% less likely to be employed versus their unaffected peers. Additionally, adults with ADHD are more likely to exhibit a variety of comorbidities including drug and alcohol abuse, social anxiety and depression.

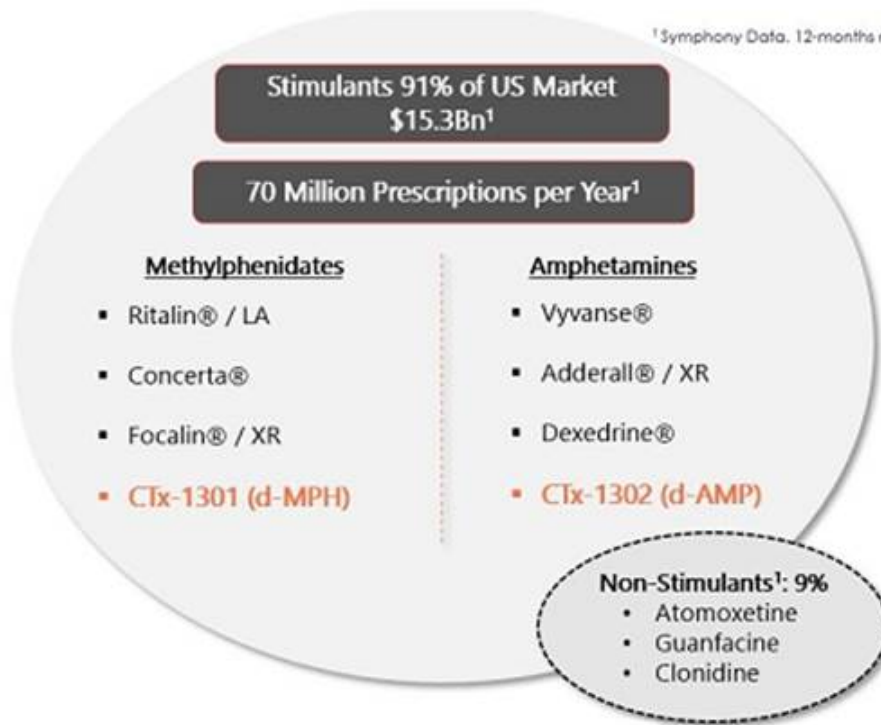

ADHD in both children and adults has an impact not only on the individual but on their families, friends and peers and because of its prevalence as one of the most commonly diagnosed behavioral disorders, a critical impact on society, the healthcare system and the economy at large. On a societal level, versus control groups, ADHD patients experience a greater than 40% higher rate of vehicle accidents, 2x greater divorce rate, have a 2-fold greater incidence of accidental death, and research from prospective studies indicates that children and adults with ADHD have approximately twice the incarceration rate. On an economic level, in the United States alone, national annual incremental cost of ADHD ranged from \$143 to \$266 billion.

Although there is no single medical, physical, or genetic test for ADHD, qualified mental health care professionals and physicians are able to provide a diagnostic evaluation after gathering information from multiple sources including ADHD symptom checklists, standardized behavior rating scales, detailed histories of past and current functioning, and information obtained from close family members or significant others. Some practitioners will also conduct tests of cognitive ability and academic achievement in order to rule out a possible learning disability.

Stimulants are the most commonly prescribed class of medications for ADHD, accounting for more than 90% of all ADHD medication prescriptions. Stimulants are Schedule II controlled substances and are believed to work by enhancing the effects of dopamine and norepinephrine neurotransmitters in the brain. Approximately 70 million stimulant prescriptions were written in 2020. In contrast, non-stimulant medications are typically deployed as second line or adjunctive therapies and account for 9-10% of all ADHD medication prescriptions. Currently, the ADHD market is dominated by four main stimulant medications: Vyvanse®, Adderall® XR, Concerta®, and Focalin® XR. These products were approved and became available between 2000 and 2007 and were believed to revolutionize the ADHD treatment paradigm by finally providing a solution to avoid the late morning second dose of stimulant medication then required by ADHD patients. These four medications today account for nearly \$12 billion or 75% of the spending in the stimulant category and 54% of all stimulant prescriptions.

\$18 Billion US ADHD Market Dominated by Stimulants

¹ Symphony Data, 12-months rolling through Feb 2021

Unfortunately, as designed, all four of the mostly commonly prescribed stimulant drugs deliver all the drug substance during the morning hours. As a result, most patients still require additional medication to cover the remainder of their active day. Currently, 60% of ADHD patients require an afternoon 'booster/recovery' dose due to lack of duration, slow onset of efficacy, and the crash or rebound effects in the early afternoon. Additionally, their PK-PD release profiles are such that they leave patients significantly impaired by crash and rebound effects even while on therapy.

Patients and practitioners report, that an ideal ADHD stimulant medication would provide **all** of the following characteristics: entire active-day duration (14-16 hours); immediate onset of action (within 30 minutes); ability to minimize or avoid crash / rebound effects associated with rapid decline in medication blood levels; and elimination of the need for short-acting stimulant booster/recovery doses.

ADHD Market Currently Dominated by 4 Stimulant Products

Major Unmet Medical Needs Persist

ADHD BRANDS	Approved	ATTRIBUTES		UNMET NEEDS			
		Onset	Duration (less onset)	Fast Onset of Action ≤ 30 min	Entire Active-Day Efficacy*	Minimize Crash/Rebound	Avoid Booster
Vyvanse®	2007	2 hours	12 hours	✗	✗	Data Not Available	✗
Adderall® XR	2001	1½ hours	10½ hours	✗	✗	Data Not Available	✗
Concerta®	2000	2 hours	10 hours	✗	✗	Data Not Available	✗
Focalin® XR	2005	30 mins	11½ hours	✓	✗	Data Not Available	✗

* Entire-active day efficacy defined as less than or equal to a 30 min onset of action with 14-16 hours of duration vs. placebo

The chart above is based upon the Package Inserts and Summary Basis of Approvals for the approved products.

ADHD Market Leaders Do Not Provide “Built-In Booster”

Market Leaders Stop Delivery of Medication 4-5 Hours After Administration

ADHD BRANDS	ATTRIBUTES		RELEASE PROFILES		
	Onset	Duration (less onset)	DOSE 1 / STYLE / TIME	DOSE 2 / STYLE / TIME	DOSE 3 / STYLE / TIME
Vyvanse®	2 hours	12 hours	100% PRODRUG SUSTAINED RELEASE OVER 2 – 3 HOURS	0	0
Adderall® XR (and generics)	1½ hours	10½ hours	50% IMMEDIATE RELEASE	50% IMMEDIATE RELEASE AT HOUR 4	0
Concerta® (and generics)	2 hours	10 hours	22% IMMEDIATE RELEASE	78% SUSTAINED RELEASE OVER 4-5 HOURS	0
Focalin® XR (and generics)	30 mins	11½ hours	50% IMMEDIATE RELEASE	50% IMMEDIATE RELEASE AT HOUR 4	0

The chart above is based upon the Package Inserts and Summary Basis of Approvals for the approved products.

In recent years, the FDA has approved additional stimulant medications that were designed to meet some of the remaining unmet needs. Chewables, liquids, oral disintegrating tablets have come to market as has one product with an evening dosing schedule intended to provide early morning onset. None of these products have been able to meet all of the unmet needs of ADHD patients and prescribers and consequently all have failed to gain traction as first-line agents. Furthermore, these recent stimulant medications, based on their market share, appear to offer little advantage over widely available generic products for healthcare practitioners and their patients. They have proven to be niche remedies occupying a combined 2.0% of the total ADHD prescriptions written in the United States in 2020. Thus, there is an unmet need for a true once-daily dose providing a fast onset of action, minimization or elimination of the crash/rebound, elimination of the booster/recovery dose, and most importantly, providing entire active-day efficacy.

Recent Launches Lack Meaningful Clinical Innovation

Niche Delivery Platforms Have Also Failed to Overcome ALL Unmet Needs

ADHD BRANDS	ATTRIBUTES		UNMET NEEDS			
Product	Onset	Duration	Fast Acting (≤ 30 min)	Entire Active-Day Efficacy	Avoid Crash/Rebound	Avoid Booster
Quillivant / Chew® XR	60 mins	8 hours	✗	✗	✗	✗
Mydayis®	2 or 4 hrs	16+ hours	✗	✗	✗	Potentially
Adzenys® ER/ODT	60 mins	8-9 hours	✗	✗	✗	✗

Our Solution: Our Proprietary Precision Timed Release Drug Delivery Platform Technology

We are developing ADHD medications capable of achieving true once-daily dosing using our internally developed PTR drug delivery platform technology. Our CTx-1301 and CTx-1302 drug candidates both contain three releases of active pharmaceutical ingredient combined into one small tablet dosage form (smaller than many comparable single dose ADHD products). Each release of API is separated with a proprietary EBL, a functional excipient that is designed to gradually erode throughout the day to provide controlled drug release at specific time intervals, allowing for a target efficacious period of up to 16 hours.

Illustration of Our PTR Platform Film-Coated Tablet

We believe our PTR technology affords our drug candidates the following advantages over currently available ADHD treatments:

Fast Onset. Many currently available therapies often take up to 60 minutes or longer to start working and thus can leave patients with long gaps between dosing and onset. In an effort to minimize this onset gap, patients will often wake up early to take their medication and attempt to go back to sleep until the medication takes effect. We have designed our drug candidates to be fast-acting so they can be taken in the morning when the patient starts their day, not predawn while they wait for onset.

Elimination of Need For Short-Acting Stimulant Boosters. With entire active-day coverage up to a 16-hour period, we believe our technology will eliminate the need for patients to take afternoon booster doses when their currently prescribed therapies wear off. By eliminating the need for a booster dose, we believe our candidates will cause less embarrassment for patients, especially child and adolescent patients who are often forced to take a second dose while at school surrounded by classmates and increase patient compliance especially in the ADHD population where patients are prone to forget to take the additional dose they need to get through their active day.

Lower Abuse Potential. We believe our fast onset and entire active-day solution for ADHD patients, if approved, will lower the incidence of short-acting stimulant drug abuse and diversion. We believe by eliminating the need for the short-acting stimulant booster dose, the potential for illicit sales and recreational use that often comes as a result of patients carrying short-acting Schedule II controlled substances to school or work for afternoon dosing will decrease.

Elimination Crash and Rebound Symptoms. Patients on currently available therapies may report adverse effects or a flare of ADHD symptoms as their medications wear off; these effects are termed “crash” and “rebound.” Using our precise timing, ratio, and style of drug delivery, we believe our candidates provide a controlled descent of blood levels, eliminating this uncomfortable experience for patients.

Lower Cost. By providing entire active-day efficacy, our drug candidates eliminate the need for doctors to prescribe more than one medication lowering the overall cost of the condition to individual patients and within the healthcare system at large. Furthermore, generic medications in the stimulant ADHD category are not tremendously less expensive as they are in other categories of non-controlled medications. Generic stimulant medications cost anywhere from 55%-90% of the cost of their brand counterparts. We believe, if approved, our drug candidates will offer a much more cost-effective solution to patients.

Significantly Improved Tolerability. Because of the PK and PD profile of our drug, we believe patients will experience fewer treatment related adverse events associated with existing stimulant therapies including insomnia, appetite suppression, and feelings of extreme restlessness, dysphoria, irritability, fatigue, and flattening of affect.

Availability in Eight Dosage Strengths at Launch and Single-Enantiomer API Selection. Our CTx-1301 and CTx-1302 product candidates are both round film-coated tablets that we intend to provide in eight matching dosage strengths. We believe providing practitioners with the ability to properly titrate and optimize their patients' daily dosing needs is critical. By having eight dosage strengths at launch, practitioners will not have to constantly switch their patients to other medications or supplement patients with more short-acting booster medications. Medications that have launched with three dosage strengths are often ignored or avoided until at least six or seven strengths are available. Both CTx-1301 and CTx-1302 contain APIs that are Schedule II controlled substances. The APIs of both product candidates utilize just one of the multiple enantiomers, which may result in improvements in potency, adverse events (Aes), and drug interactions profiles along with an enhanced therapeutic index.

Our Lead Candidate CTx-1301: Dexmethylphenidate for the Treatment of ADHD in 6 Years and Older

We believe our most advanced drug product candidate, CTx-1301, will be the first true once-daily dexmethylphenidate tablet for the treatment of ADHD, providing onset-of-action within 30 minutes and efficacy for the entire active day (14 to 16 hours versus placebo). CTx-1301 is a trimodal extended-release tablet, based on tablet-in-tablet technology, which provides three releases of dexmethylphenidate hydrochloride at precise times, ratio, and modality of release. Our CTx-1301 release profile is as follows:

Release #1: An initial immediate-release, or IR, dose providing 35% of the total daily dose beginning within five to six minutes after administration and designed to achieve therapeutic efficacy within 30 minutes; and

Release #2: Three hours after the administration of the dosage form, the first delayed, sustained release (DR1) provides 45% of the total daily dose released over 90 minutes; and

Release #3: Seven hours after the administration of the dosage form, a second delayed, immediate release (DR2, the built-in-booster) provides 20% of the total daily dose released over approximately 30 minutes.

Release Comparison of CTx-1301 versus Focalin XR (Reference Listed Drug)

Our proprietary, trimodal release profile is engineered to provide patients with a rapid onset of relief from symptoms and to maintain that relief throughout the entire active day. Further, we believe CTx-1301 will demonstrate a more favorable tolerability profile that results from this specialized design and unique 35%-45%-20% release profile, compared to the currently available 33%-33%-33% release profile that would be produced if a patient were to take three individual doses of dexamethylphenidate in the same milligram strengths. CTx-1301 delivers a release profile that cannot be replicated with commercially available short and long-acting formulations and was precisely engineered and designed to meet the specific needs of ADHD patients and providers.

We expect CTx-1301 film-coated tablets to be available in eight dosage strengths ranging from 6.25mg to 50mg of dexamethylphenidate. All excipients are compendial and/or non-novel, well established for use in oral formulations, and are present in the drug product at levels well below their maximum potencies listed in FDA's inactive ingredient database (IID).

Our CTx-1301 Clinical Development Program

The proposed clinical program for CTx-1301 consists of two Phase 1/2 clinical pharmacology studies and our Phase 3 Mastery clinical efficacy and safety trials.

Our Phase 1/2 Bioavailability Trial Results

In October 2020, we announced positive results from a Phase 1/2 comparative bioavailability study in ADHD subjects, under fasted conditions, and demonstrated similar bioavailability to our Reference Listed Drug (RLD), Focalin XR. Adjusted geometric mean ratios of primary exposure parameters (C_{max} , AUC_{0-inf} , and AUC_{last}) between CTx-1301 and Focalin XR were within the required 80% to 125% range, both at the high and the low doses, demonstrating a bridge to the RLD as well as dose proportionality. There were no unexpected adverse events, no serious adverse events, no deaths, and no other safety signals observed during this study.

Key Findings

Bridged to Focalin® XR

- Confirmed similar bioavailability to Focalin XR and confirmation of our ability to utilize the 505(b)2 pathway
- Demonstrated dose proportionality, allowing us to avoid the need to evaluate all individual strengths *in vivo*

- Eliminated any requirement for nonclinical studies and ability to utilize existing safety from the Focalin XR label, potentially resulting in a faster pathway to market

Demonstrated Plasma Levels at 16 hours versus Focalin® XR at 12 hours

- CTx-1301 blood levels demonstrated the potential for an extended duration of action, up to 16 hours
- Performed as designed, with its precise 20% 'built-in-booster' 3rd delivery confirming that if approved, CTx-1301 would eliminate patients need for short-acting stimulants and avoid the potential for non-ideal blood levels that could impact normal sleep and appetite

Demonstrated Plasma Levels Equal to Focalin® XR at 30 and 60 Minutes

- Confirmed similar Fast Onset of Action to Focalin XR

Demonstrated Controlled Descent of Plasma Levels versus Focalin® XR

- Precise 20% 3rd delivery stopped the mid-afternoon plummeting of blood levels, controlling the decline until early evening

Demonstrated Significantly Lower Treatment Emergent Adverse Events

- Patients received 25% more medication via the PTR Platform in a precisely timed, unique ratio
- CTx-1301 patients experienced a 28.6% reduction of TEAE's related to study drug versus Focalin XR

Our comparative bioavailability data study versus Focalin XR is presented in Figure 1, Figure 2, and Figure 3

Figure 1: Comparative Bioavailability Study of CTx-1301 versus Focalin XR in Adult ADHD subjects under Fasted Conditions (low dose comparison)

Figure 2: Comparative Bioavailability Study of CTx-1301 versus Focalin XR in Adult ADHD subjects under Fasted Conditions (high dose)

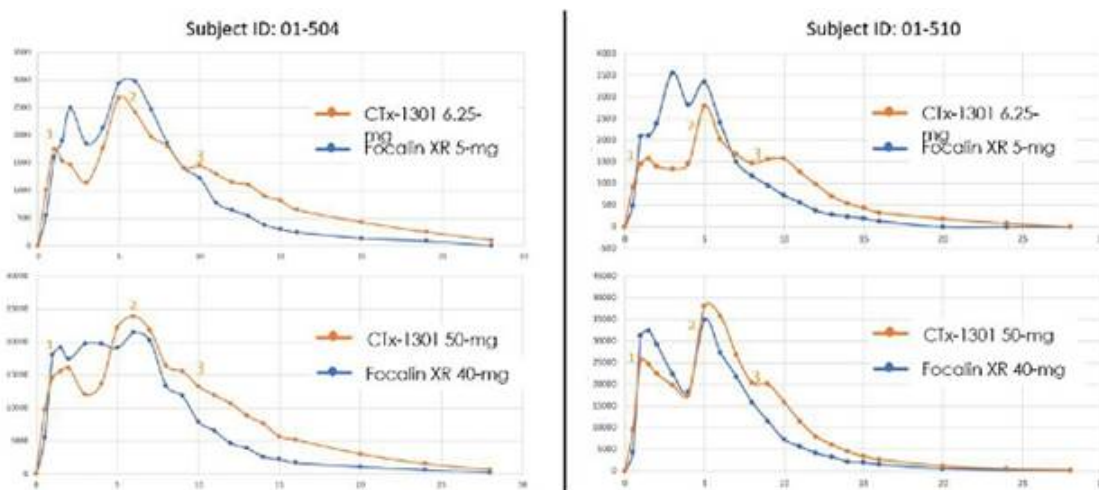

Figure 3: Comparative Bioavailability Study of CTx-1301 versus Focalin XR in individual Adult ADHD subjects under Fasted Conditions (low and high dose)

Our Additional Planned Phase 1 Study

We plan to initiate a Phase 1 Food Effect study in 2022, concurrently with our Phase 3 Mastery trials.

Fast-Fed Study

- A Phase 1, open-label, randomized, single-dose, two-period, two-treatment (fed vs fasted), two-sequence, crossover study in healthy adult subjects to assess the effect of food on the absorption and bioavailability of CTx-1301. The objectives of this study are to assess the effect of food on the rate and extent of absorption and the overall bioavailability, to provide pharmacokinetic data on blood plasma levels of CTx-1301 in both a fasted and fed state, and evaluate the safety of a single dose of CTx-1301 50 mg.

Our Planned Phase 3 MASTERY Trials

We plan to initiate Phase 3 trials in the second quarter of 2022 and to file an NDA in the second half of 2023. Our entire Phase 3 clinical plan will include approximately 350 patients. Based on the results of our Phase 1/2 clinical trial and communications with the FDA, we expect the 505(b)(2) NDA filing for CTx-1301 will use Focalin XR as a reference drug, using as a basis for approval that drug's efficacy and safety data on file at FDA, together with bioavailability/bioequivalence data and efficacy/safety data from our CTx-1301 clinical program.

The Proposed Phase 3 CTx-1301 safety and efficacy studies will utilize diagnostic tools and ADHD evaluations including the ADHD-RS-5, the CGI-S, and the PERM-P. These tools and evaluations are commonly used as study endpoints in support of an NDA filing.

- The ADHD-RS, or ADHD Rating Scale is an 18-item scale based on Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5) (American Psychiatric Association 2013) which evaluates the criteria of ADHD and rates symptoms on a 4-point scale. Each item is scored using a combination of severity and frequency ratings from zero (reflecting no symptoms or a frequency of never or rarely) to three (reflecting severe symptoms or a frequency of very often), so that the total ADHD-RS-5 scores range from zero to 54.
- The CGI-S is the Clinical Global Impressions (Severity) Scale, a single-item scale that measures the severity of psychopathology from 1-7.
- The PERM-P, or Permanent Product Measure of Performance, is a skill-adjusted math test. The PERM-P score is the sum of the number of math problems attempted plus the number of math problems answered correctly in a 10-minute session. The scores range from 0-800 with higher scores indicating better performance.

Our proposed Phase 3 CTx-1301 clinical safety and efficacy studies include:

- *A Phase 3, fixed-dose, parallel-design, placebo-controlled, 5-week study in children and adolescent patients (6-17 y/o).* The primary efficacy endpoint is the ADHD-RS-5. The Clinical Global Improvement Severity Scale (CGI-S) will be evaluated as a secondary endpoint.
- *A Phase 3, dose titration safety and efficacy study in pediatrics (6-12 years):* The primary efficacy endpoint is the PERM-P. Time to onset and duration of effect will also be evaluated as key secondary endpoints.

Important exploratory endpoints included in the Phase 3 protocol will define and evaluate the unique benefits and satisfaction of optimized treatment with CTx-1301 against prior therapies using patient reported outcomes (PRO). The PRO evaluation will include:

- Subjects required use of “booster” doses for entire active-day efficacy, avoidance of wear-off effect, crash/rebound, and abuse/diversion of short-acting stimulants.
- Compare overall treatment satisfaction of prior therapies versus CTx-1301.
- Compare adverse events of prior therapies versus CTx-1301.
- Evaluate importance of a true, once-daily treatment for ADHD.
- Evaluate the incidence of abuse and/or diversion of short-acting booster doses.
- Evaluate important differentiators for patients requiring ADHD treatment by providing a complete solution with entire active-day efficacy, fast onset of action, avoiding crash/rebound, and eliminating the required short-acting stimulant booster/recovery dose.

These exploratory measures will not only provide critical information for the FDA and clinicians but also provide important data to payers and market access teams.

CTx-1302: Dextroamphetamine for the treatment of ADHD in 6 years and older

We believe our second drug product candidate, CTx-1302, will be the first true once-daily dextroamphetamine tablet for the treatment of ADHD, providing onset-of-action within 30 minutes and efficacy for the entire active day, up to 16 hours. CTx-1302 is a trimodal extended-release tablet, based on tablet-in-tablet technology, that provides three releases of dextroamphetamine at precise times, ratio, and modality of release. Our CTx-1302 release profile is as follows:

- Release #1: An initial immediate-release, or IR, dose providing 45% of the total daily dose begins within five to six minutes after administration is designed to achieve therapeutic efficacy within 30 minutes; and
- Release #2: Three hours after the administration of the dosage form, the DR1 provides 35% of the total daily dose released over 90 minutes; and
- Release #3: Seven hours after the administration of the dosage form, a DR2, the built-in-booster provides 20% of the total daily dose released over approximately 30 minutes.

We expect CTx-1302 tablets will be available in eight dosage strengths ranging from 6.25mg to 50mg of dextroamphetamine. All excipients are compendial and/or non-novel, well established for use in oral formulations, and are present in the drug product at levels well below their maximum potencies listed in FDA's IID.

Our CTx-1302 Clinical Development Program

Our proposed clinical program for CTx-1302 consists of multiple Phase 1 clinical pharmacology studies and multiple Phase 3 clinical efficacy and safety trials. We plan to initiate a Phase 1/2 bioavailability study in ADHD patients for CTx-1302 in 2023 and, if the results from this study are successful, we plan to initiate pivotal Phase 3 clinical trials, the branded ACCOMPLISH trials, in all patient segments for CTx-1302 in late 2023 with results expected in late 2024. Our Phase 1 trials will include approximately 100 patients and Phase 3 clinical plan will include approximately 500 patients.

Our Planned Phase 1 Trials

Our proposed Phase 1 CTx-1302 clinical pharmacology studies include:

- *Phase 1/2 Comparative Bioavailability Study*: To evaluate and compare the pharmacokinetic profile of CTx-1302 to the RLD, Dexedrine Spansule in adults with ADHD (18+ y/o).
- *Phase 1 Food Effect Study*: To evaluate the pharmacokinetic profile of CTx-1302 under fed and fasted conditions in adults (18+ y/o).
- *Phase 1 Single-Dose, Fully-Replicate Crossover Study*: To evaluate the intra-subject variability of the in vivo pharmacokinetic profile of CTx-1302 to the RLD, Dexedrine Spansule in adults (18+ y/o).

The Proposed Phase 3 CTx-1302 safety and efficacy studies will utilize diagnostic tools and ADHD evaluations including the ADHD-RS-5, the CGI-S, and the PERM-P. These tools and evaluations are commonly used and described above.

Our Planned Phase 3 ACCOMPLISH Trials

- *A Phase 3, fixed-dose, parallel-design, placebo-controlled, 5-week study in children and adolescent patients (6-17 y/o)*. The primary efficacy endpoint is the ADHD-RS-5. The Clinical Global Improvement Severity Scale (CGI-S) will be evaluated as a secondary endpoint.

- *A Phase 3, analog workplace efficacy and safety study in adults (18+)*: The primary efficacy endpoint is the PERM-P. Time to onset and duration of effect will also be evaluated as key secondary endpoints.
- *A long-term dose-optimization safety study will evaluate safety of the pediatric population (6-17 y/o) for six months*. This study will collect and monitor any adverse events that occur during the timeframe of the study.

Important exploratory endpoints included in the analog Phase 3 protocols will define and evaluate the unique benefits and satisfaction of optimized treatment with CTx-1302 against prior therapies using patient reported outcomes (PRO) are similar to those from the CTx-1301 Phase 3 plan.

We expect the 505(b)(2) NDA filing for CTx-1302 will use Dexedrine® Spansule® as a reference drug, using as a basis for approval that drug's efficacy and safety data on file at FDA, together with bioavailability/bioequivalence data and efficacy/safety data from our CTx-1302 clinical program.

Commercialization

Given our stage of development, we do not currently have any internal sales, marketing, or distribution infrastructure or capabilities. If CTx-1301 and/or CTx-1302 are approved, we plan to pursue one of two courses of action for commercialization of our product candidates in the United States, which we expect will be the first country in which we receive market authorization. We are actively seeking commercial collaboration or strategic partners to benefit from an established pharmaceutical company's ability to provide us with more immediate access to marketing, sales, market access and distribution infrastructure. Alternatively, we may build our own internal commercial infrastructure. In the United States, we believe a scientifically oriented, specialty sales force of 125-150 sales professionals could communicate with the majority of the high-volume neurology and psychiatry prescribers of ADHD medications. Additionally, we believe that another 125-150 sales professionals will be required, especially at launch, to communicate with high prescribing ADHD pediatricians and family practice providers.

In addition, we would expect to use multi-channel tactics, including non-personal strategies, to reach physicians, payers, patients and patient caregivers with the right frequency to help drive behavior. In addition to personal promotion, we intend to reach physicians through medical education, direct marketing, journal advertising and electronic health record communication. Advocacy groups, patients and caregivers are extremely active and vocal in the ADHD space. We expect that a direct-to-patient strategy would allow us to access this social group through focused education and advertising, as well as by employing appropriate social media listening and engagement to inform these patients and caregivers.

Manufacturing

Overview

We do not currently own or operate a manufacturing facility. We utilize a contract development and manufacturing organization, Pharmaceutical Manufacturing Research Services, Inc. (PMRS) for the manufacture of our products used in pre-clinical research and clinical trials and we will continue to utilize PMRS for the near term for the commercial manufacturing of our drug product, if our drug product candidates are approved.

Currently, we do not have a commercial supply agreement with our contract manufacturer. We intend to enter into an agreement with such manufacturer prior to commercialization. Under the supply agreement, we retain sole ownership of our product assets. In addition, we are responsible for product development, including formulation, clinical trials, regulatory approval, and commercialization.

Any current and future third-party manufacturers, facilities, and all lots of drug substance and drug products used in our clinical trials are required to be in compliance with current good manufacturing practices (cGMPs). The cGMP regulations include requirements relating to organization of personnel, buildings and facilities, equipment, control of components and drug product containers and closures, production and process controls, packaging and labeling controls, holding and distribution, laboratory controls, records and reports, and returned or salvaged products. The manufacturing facilities where our products are produced must meet cGMP requirements and FDA satisfaction before any product is approved and we can manufacture commercial products. Any current and future third-party manufacturers are also subject to periodic inspections of facilities by the FDA and other authorities, including procedures and operations used in the testing and manufacture of our products to assess our compliance with applicable regulations. In addition, our drug products are classified as Class II controlled substances which requires any future third-party manufacturers to be approved and regulated by the DEA.

Drug Substance

We currently purchase the APIs used in CTx-1301 (Dexmethylphenidate) and CTx-1302 (Dextroamphetamine) and excipients from USA based third-party manufacturers. We anticipate entering into commercial supply agreements with many of these manufacturers in the future. Both drug substances are classified as controlled under U.S. federal law. Dexmethylphenidate, and dextroamphetamine are classified by the DEA as Schedule II controlled substances. As with all stimulate medications, there is a potential for abuse. Consequently, our procurements, manufacturing, shipping, dispensing and storing of our product candidates will be subject to regulation, as described in more detail under the “DEA Regulation” section included elsewhere in this annual report.

Intellectual Property

Proprietary protection

Our commercial success depends in part on our ability to obtain and maintain proprietary protection for our drug candidates, manufacturing and process discoveries and other know-how, to operate without infringing the proprietary rights of others, and to prevent others from infringing on our proprietary rights. We have been building and continue to build our intellectual property portfolio relating to our ADHD drug candidates, and our innovative proprietary PTR drug delivery platform technology, and our technology platform. Our policy is to seek to protect our proprietary position by, among other methods, filing U.S. and certain foreign patent applications related to our proprietary technology, inventions and improvements that are important to the development and implementation of our business. We also intend to rely on trade secrets, know-how, continuing technological innovation, and potential in-licensing opportunities to develop and maintain our proprietary position. We cannot be sure that patents will be granted with respect to any of our pending patent applications or with respect to any patent applications filed by us in the future, nor can we be sure that any of our existing patents or any patents that may be granted to us in the future will be commercially useful in protecting our technology.

Patent rights

We own or have licensed from BDD Pharma five patents and four patent applications in the United States and 85 patents and 17 patent applications in foreign countries and regions. In addition to the United States, we have patents issued or applications pending in Australia, Brazil, Canada, China, Egypt, Europe (with pending applications before the European Patent Office and patents validated with certain member states of the European Patent Organization), Hong Kong, Israel, India, Japan, Mexico, Russia, Saudi Arabia and South Korea. The patents and patent applications describe and claim certain features of our product candidates, our PTR drug delivery platform technology and our EBL, including claims to the product candidates, methods of making the product candidates and treatment methods using the product candidates.

We have and will continue to actively protect our intellectual property, including filing patent applications for our innovations, prosecuting our pending patent applications, and maintaining and enforcing our issued patents. No assurances can be given that pending patent applications will result in the issuance of a patent or that the examination process will not require us to narrow our claims. In addition, issued patents may be circumvented by third parties, or found unenforceable or invalid if contested before a court or administrative agency. Thus, we may not be able to successfully enforce our patent rights against third parties. No assurance can be given that others will not independently develop a similar or competing technology or design around any patents that may be issued to us.

Patent life determination depends on the date of filing of the application and other factors as promulgated under the patent laws, such as patent term adjustments and extensions. In most countries, including the United States, the patent term is generally 20 years from the earliest claimed filing date of a non-provisional patent application in the applicable country. The patents and, if granted, patent applications owned or licensed to us have expiry dates ranging from 2031 to 2036.

Our owned and in-licensed patents and patent applications are summarized below.

<u>Family/PCT Application</u>	<u>"Title"/(Type of Patent Protection)</u>	<u>Applicant/Owner</u>	<u>Pending Applications</u>	<u>Issued Patents</u>	<u>Patent Expiry</u>
WO2011107750	"Delayed Prolonged Drug Delivery" (A press-coated tablet formulation for a delayed, followed by a prolonged release of an active agent)	DRUG DELIVERY INTERNATIONAL LTD		Germany, Great Britain, France, Japan, Switzerland, United States	March 2031
WO2011107749	"Pulsatile Drug Release" (A press-coated tablet formulation for a delayed, followed by a pulsed release of an active agent)	DRUG DELIVERY INTERNATIONAL LTD		Austria, Belgium, Bulgaria, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Greece, Hungary, Ireland, Italy, Japan, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, United States	March 2031

WO2011107755	“Immediate Delayed Release” (A press-coated tablet formulation for a delayed, followed by a pulsed release of an active agent)	DRUG DELIVERY INTERNATIONAL LTD	United States	Austria, Belgium, Bulgaria, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Greece, Hungary, Ireland, Italy, Japan, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, United States	March 2031
WO2016075496	“Pharmaceutical Processing” (A method for making a controlled release material)	DRUG DELIVERY INTERNATIONAL LTD	Europe, United States		November 2035 (when issued)
WO2016075495	“Compositions” (A press coated tablet for delayed release of an active ingredient)	DRUG DELIVERY INTERNATIONAL LTD	Brazil, Canada, China, Egypt, India, South Korea	Australia, Austria, Belgium, Bulgaria, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Greece, Hong Kong, Hungary, Ireland, Italy, Japan, Mexico, Netherlands, Norway, Poland, Portugal, Romania, Russia, Saudi Arabia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, United States	November 2035
WO2016075497	“Tablet” (A sustained release tablet comprising a wax, a disintegrant and a therapeutic agent)	DRUG DELIVERY INTERNATIONAL LTD	Europe	United States	November 2035
WO2016138440	“Tripulse Release Stimulant Formulations”	CINGULATE THERAPEUTICS LLC	Australia, Canada, China, Europe, Hong Kong, India, Israel, Japan, Korea, United States		February 2036 (when issued)

US PROVISIONAL 63/187,037	“Trimodal, Precision-Timed Pulsatile Release Tablet”	CINGULATE THERAPEUTICS LLC	United States	May 2042 (when issued)
US PROVISIONAL 63/310,677	“Trimodal, Precision-Timed Release Tablet”	CINGULATE THERAPEUTICS LLC	United States	Feb 2043 (when issued)

Trade secret and other protection

In addition to patented intellectual property, we also rely on trade secrets and proprietary know-how to protect our technology and maintain our competitive position, especially when we do not believe that patent protection is appropriate or can be obtained. Our policy is to require each of our employees, consultants and advisors to execute a confidentiality and inventions assignment agreement before beginning their employment, consulting or advisory relationship with us. The agreements generally provide that the individual must keep confidential and not disclose to other parties any confidential information developed or learned by the individual during the course of the individual’s relationship with us except in limited circumstances. These agreements generally also provide that we shall own all inventions conceived by the individual in the course of rendering services to us.

Other intellectual property rights

We seek trademark protection in the United States when appropriate. We have filed for trademark protection for the Cingulate, Cingulate Therapeutics trade dress and mark, which we use with our pharmaceutical research and development as well as products, as well as trade names that could be used with our potential products. We currently have registered trademarks for Cingulate Therapeutics in the United States as well as for our PTR technology.

From time to time, we may find it necessary or prudent to obtain licenses from third party intellectual property holders.

Competition

Our industry has been exemplified by advancing technologies, intense competition, and a strong emphasis on proprietary products. We may face competition from both pharmaceutical as well as generic drug companies as there are several short acting and extended-release branded products with various formulations, some quite innovative as well as generic versions of these that have yet to satisfy the unmet medical need. We believe the key competitive factors that will affect the development and commercial success of our product candidates include oral administration, therapeutic efficacy which includes immediate onset and entire active day duration, safety and tolerability profiles, market access and pricing. Some competitors have substantially greater financial, technical and human resources than we do; however, we believe the level of branded competition is diminishing and will continue to decline with the loss of exclusivity for Vyvanse. In addition, our prospective competitors may also have more experience and expertise in obtaining marketing approvals from the FDA and foreign regulatory authorities. In addition to product development, testing, approval and promotion, other competitive factors in the pharmaceutical industry include consolidation, product quality and price, product technology, reputation, customer service and access to technical information. As a result, our prospective competitors may be able to develop competing or superior products and compete more aggressively and sustain their competitive advantage over a longer period of time than us. Our products may be rendered obsolete or may lack economic viability in the face of competition.

If approved, both CTx-1301 and CTx-1302 will compete against currently marketed, branded, and generic methylphenidate and amphetamine products for the treatment of ADHD. Some of these currently available products include Janssen’s Concerta, Novartis’ Focalin XR and Takeda’s Adderall XR and Vyvanse, which will lose exclusivity in 2023.

In recent years the ADHD market has seen the entrance of many innovative but niche-focused ADHD products that have not commanded the market share of previous oral stimulants, in particular the extended-release oral stimulants. We are aware that we face competition from small biotechnology companies focused in ADHD with niche products including Aytu, Tris, Corium, Ironshore, and Rhodes. However, we do not consider most of these companies to be significant competitors as their products are only capable of capturing small subsets of the overall market and do not employ substantial commercial efforts; whereas we believe our product candidates offer the potential to overcome longstanding unmet needs for the majority of ADHD patients. In addition, Cingulate, along with a potential commercialization partner, plans to employ appropriate resources to successfully commercialize its assets.

The FDA recently issued revised guidance for bioequivalence testing of generic extended-release methylphenidate. This new guidance makes it more difficult for new generic products to demonstrate bioequivalence to reference products. We believe this will limit generic competition in the methylphenidate market. It may be difficult for a generic product to show bioequivalence to a new branded, extended-release dexamethylphenidate drug with entire active day duration of effect, such as CTx-1301.

Government Regulation

Government authorities in the United States at the federal, state and local levels and in other countries regulate, among other things, the research, development, testing, manufacturing, quality control, approval, labeling, packaging, storage, record-keeping, promotion, advertising, distribution, post-approval monitoring and reporting, marketing and export and import of drug products. Generally, before a new drug can be marketed, considerable data demonstrating its quality, safety and efficacy must be obtained, organized into a format specific for each regulatory authority, submitted for review and ultimately approved by the applicable regulatory authority.

U.S. Drug Development

In the United States, the FDA regulates drugs under the Federal Food, Drug, and Cosmetic Act, or FDCA, and its implementing regulations. Drugs are also subject to other federal, state, and local statutes and regulations. The process of obtaining regulatory approval and maintaining subsequent compliance with applicable federal, state and local statutes and regulations requires the expenditure of substantial time, personnel, and financial resources. These agencies and other federal, state and local entities regulate research and development activities and the testing, manufacture, quality control, labeling, storage, packaging, recordkeeping, tracking, approval, import, export, distribution, advertising and promotion of pharmaceutical products. Failure to comply with the applicable U.S. regulatory requirements at any time during product development, the approval process, or after approval may subject an applicant to administrative or judicial sanctions. These sanctions could include, among other actions, the FDA's refusal to approve pending applications, withdrawal of an approval, a clinical hold, untitled or warning letters, voluntary product recalls or market withdrawals, product seizures, total or partial suspension of production or distribution injunctions, fines, consent decrees, refusals of government contracts, restitution, disgorgement, or civil and criminal penalties. Any agency or judicial enforcement action could have a material adverse effect on us.

Pharmaceutical product candidates must be approved by the FDA through the NDA process before they may be legally marketed and sold in the United States. Cingulate intends to submit our NDAs under the 505(b)(2) regulatory approval pathway. Development and approval of drugs generally involves the following:

- Completion of preclinical laboratory tests, animal studies and formulation studies according to Good Laboratory Practice (GLP) regulations or other applicable regulations;
- Submission to the FDA of an investigational new drug application (IND), which must become effective before clinical trials involving humans may begin;
- Approval by an independent institutional review board (IRB) or ethics committee at each clinical trial site before a trial may be initiated at that site;

- Performance of adequate and well-controlled human clinical trials in accordance with applicable IND regulations, other good clinical practices (GCPs) and other clinical-trial related regulations to evaluate the safety and efficacy of the investigational product for each proposed indication;
- Compiling of information demonstrating that the product can be properly formulated, manufactured and stored;
- Submission of an NDA to the FDA for marketing approval, including payment of application user fees;
- Satisfactory completion of an FDA pre-approval inspection of the manufacturing facility or facilities where the drug is produced to assess compliance with cGMPs and assure that the facilities, methods and controls are adequate to preserve the drug's identity, strength, quality and purity;
- Possible FDA audit of the clinical trial sites to assure compliance with GCPs and the integrity of the clinical data submitted in support of the NDA; and
- FDA review and approval of the NDA, including satisfactory completion of an FDA advisory committee review of the product candidate, where appropriate or if applicable, prior to any commercial marketing or sale of the product in the United States.

Preclinical Studies

Before testing any drug product candidate in humans, it must undergo rigorous preclinical testing. The preclinical developmental stage generally involves laboratory evaluations of drug chemistry, formulation and stability, as well as studies to evaluate toxicity in animals, which support subsequent clinical testing. The sponsor must submit the results of the preclinical studies, together with manufacturing information, analytical data, any available clinical data or literature and a proposed clinical protocol, to the FDA as part of the IND. An IND is a request for authorization from the FDA to administer an investigational product to humans, and must become effective before human clinical trials may begin.

Preclinical studies include laboratory evaluation of product candidate chemistry and formulation, as well as in vitro and animal studies, to assess the potential for adverse events and in some cases to establish a rationale for therapeutic use. The conduct of preclinical studies is subject to federal regulations and requirements, including GLP regulations for safety and toxicology studies. Some long-term preclinical testing, such as animal tests of reproductive adverse events and carcinogenicity, may continue after an IND for an investigational drug candidate is submitted to the FDA and human clinical trials have been initiated.

In the case of testing data to support a 505(b)(2) NDA, some or all of the necessary preclinical data may be referenced in literature or the FDA's previous findings of safety and efficacy for an RLD.

Clinical Trials

All clinical trials must be conducted under the supervision of qualified investigators. Clinical trials are conducted under protocols detailing the objectives of the study, the parameters to be used in monitoring the safety and effectiveness criteria to be evaluated. Each protocol must be submitted to the FDA as part of the IND. Study subjects must sign an informed consent form before participating in a clinical trial. There are also requirements governing the reporting of on-going clinical trials and clinical trial results to public registries. An IND automatically becomes effective 30 days after receipt by the FDA, unless before that time the FDA raises concerns or questions related to one or more proposed clinical trials and places the clinical trial on a clinical hold. In such a case, the IND sponsor and the FDA must resolve any outstanding concerns before the clinical trial can begin. As a result, submission of an IND may not result in the FDA allowing clinical trials to commence. Clinical holds may also be imposed by the FDA at any time before or during studies due to safety concerns or non-compliance.

In addition, an IRB representing each institution that is participating in the clinical trial must review and approve the plan for any clinical trial before it commences at that institution, and the IRB must thereafter conduct a continuing review and reapprove the trial at least annually. The IRB must review and approve, among other things, the trial protocol and informed consent information to be provided to clinical trial subjects. An IRB must operate in compliance with FDA regulations. Information about certain clinical trials, including details of the protocol and eventually study results, also must be submitted within specific timeframes to the National Institutes of Health for public dissemination on the ClinicalTrials.gov data registry. Information related to the product, patient population, phase of investigation, study sites and investigators and other aspects of the clinical trial is made public as part of the registration of the clinical trial. Sponsors are also obligated to disclose the results of their clinical trials after completion. Disclosure of the results of these trials can be delayed in some cases for up to two years after the date of completion of the trial. Failure to timely register a covered clinical study or to submit study results as provided for in the law can give rise to civil monetary penalties and also prevent the non-compliant party from receiving future grant funds from the federal government. The NIH's Final Rule on ClinicalTrials.gov registration and reporting requirements became effective in 2017, and both NIH and FDA have signaled the government's willingness to begin enforcing those requirements against non-compliant clinical trial sponsors.

Clinical trials conducted to support an NDA are generally conducted in three sequential phases that may overlap or be combined.

- Phase 1 - clinical trials generally involve a relatively small number of healthy volunteers who are initially exposed to a single dose or multiple doses of the product candidate. The primary purpose of these clinical trials is to assess the safety, dosage tolerance, structure-activity relationships, mechanism of action, absorption, metabolism, distribution, and excretion in healthy volunteers or subjects with the target disease or condition. Changes to this general format that are suitable to a product candidate or a specific patient population may occur but usually are agreed to in advance with the FDA.
- Phase 2 - clinical trials typically involve studies in a limited patient population to identify possible adverse effects and safety risks, to preliminarily evaluate the efficacy of the product for specific targeted diseases and to determine dosage tolerance and optimal dosage.
- Phase 3 - clinical trials are undertaken in larger subject populations to further evaluate dosage, clinical efficacy and safety in an expanded patient population, often at geographically dispersed clinical study sites. These studies are intended to establish the overall risk-benefit ratio of the product candidate and provide, if appropriate, an adequate basis for product labeling. These trials may include comparisons with placebo and/or other comparator treatments. The duration of treatment is often extended to mimic the actual use of a product during marketing. These trials may be done globally to support global registrations so long as the global sites are also representative of the U.S. population and the conduct of the study at global sites comports with FDA regulations and guidance, such as compliance with GCPs.

By following the 505(b)(2) regulatory approval pathway, the applicant may reduce some of the burden of developing a drug by relying on investigations not conducted by the applicant and for which the applicant has not obtained a right of reference, such as prior investigations involving the RLD. In such cases, some clinical trials may not be required or may be otherwise limited; however, Phase 1 trials to establish bioavailability and pharmacokinetic characteristics of the product candidate and at least one Phase 3 pivotal trial are usually required to support a 505(b)(2) NDA.

Post-approval trials, sometimes referred to as Phase 4, may be conducted after initial marketing approval. These trials are used to gain additional experience from the treatment of patients in the intended therapeutic indication. In certain instances, the FDA may mandate the performance of Phase 4 clinical trials as a condition of approval of an NDA.

During the development of a new drug product, sponsors have the opportunity to meet with the FDA at certain points, including prior to submission of an IND, at the end of phase 2, and before submission of an NDA. These meetings can provide an opportunity for the sponsor to share information about the data gathered to date, for the FDA to provide advice, and for the sponsor and the FDA to reach agreement on the next phase of development. Sponsors typically meet with the agency before initiating Phase 3 clinical trials to present their plans for the pivotal trial that they believe will support approval of the new drug product.

Concurrent with clinical trials, companies usually complete additional animal studies and must also develop additional information about the physical characteristics of the drug product and finalize a process for manufacturing the product in commercial quantities in accordance with cGMP requirements. The manufacturing process must be capable of consistently producing quality batches of the product candidate and, among other things, the manufacturer must develop methods for testing the identity, strength, quality, and purity of the final drug product. Additionally, appropriate packaging must be selected and tested, and stability studies must be conducted to demonstrate that the product candidate does not undergo unacceptable deterioration over its shelf life.

NDA and FDA Review Process

Assuming successful completion of the required clinical testing, the results of the preclinical studies and clinical trials, along with detailed descriptions of the product's chemistry, manufacturing, and controls, proposed labeling and other relevant information are submitted to the FDA as part of an NDA requesting approval to market the product. The cost of preparing and submitting an NDA is substantial. Under federal law, the submission of most NDAs is additionally subject to a substantial application user fee, currently over \$3.1 million for an NDA with clinical information, and the manufacturer and/or sponsor under an approved NDA is also subject to an annual program fee, currently over \$370,000. These fees are typically increased annually. Fee waivers or reductions are available in certain circumstances. One such fee waiver is available for applicants that are small businesses, meaning the applicant (including any affiliates) employs fewer than 500 employees, does not have an approved marketing application for a product that has been introduced or delivered for introduction into interstate commerce, and is submitting its first marketing application.

Section 505(b)(1) and Section 505(b)(2) of the FDCA are the provisions governing the type of NDAs that may be submitted under the FDCA. Section 505(b)(1) is the traditional pathway for new chemical entities when no other new drug containing the same active pharmaceutical ingredient or active moiety, which is the molecule or ion responsible for the action of the drug substance, has been approved by the FDA. As an alternate pathway to FDA approval for new or improved formulations of previously approved products, a company may file a Section 505(b)(2) NDA. Section 505(b)(2) permits the submission of an NDA where at least some of the information required for approval comes from studies not conducted by or for the applicant and for which the applicant has not obtained a right of reference.

Once the FDA receives an application, it has 60 days to review the NDA to determine if it is substantially complete to permit a substantive review, before it accepts the application for filing and may request additional information rather than accepting the applications. Once the submission is accepted for filing, the FDA begins an in-depth review of the NDA. Under the goals and policies agreed to by the FDA under the Prescription Drug User Fee Act (PDUFA) VI, the agency seeks to review applications for standard review drug products within 10 months from the filing acceptance date, and applications for priority review drugs within six months from the filing acceptance date. PDUFA VI expires in September 2022 but Congress, FDA and other interested parties are currently negotiating PDUFA VII. The FDA may grant a priority review designation to drugs that are intended to treat a serious condition and that the agency determines offer major advances in treatment, or provide a treatment where no adequate therapy exists. The FDA does not always meet its PDUFA goal dates for standard and priority NDAs, and the review process for both standard and priority reviews may be extended by FDA for three additional months to consider additional, late-submitted information, or information intended to clarify information already provided in the submission in response to FDA review questions.

Before approving an NDA, the FDA will typically conduct a pre-approval inspection of the manufacturing facilities for the product candidate to determine whether they comply with cGMPs, unless the facility has recently had an FDA inspection. The FDA will not approve the product unless it determines that the manufacturing processes and facilities are in compliance with cGMP requirements and adequate to assure consistent production of the product to specifications. Additionally, the FDA may refer applications for novel drug products or drug products which present difficult questions of safety or efficacy to an advisory committee, typically a panel that includes clinicians and other experts, for review, evaluation and a recommendation regarding whether the application should be approved and, if so, under what conditions. The FDA is not bound by the recommendations of an advisory committee, but it considers them carefully when making decisions. NDAs submitted under Section 505(b)(2) are typically not referred to an Advisory Panel for consideration unless new safety information is revealed in the review cycle.

As part of the NDA review process, the FDA likely will re-analyze the clinical trial data, which could result in extensive discussions between the FDA and the applicant. Additionally, the FDA will typically inspect one or more clinical sites to assure compliance with GCPs and the IND protocol requirements and to assure the integrity of the clinical data submitted to the FDA. The review and evaluation of an NDA by the FDA is extensive and time consuming and may take longer than originally planned to complete, and we may not receive a timely approval, if at all.

After the FDA evaluates an NDA, it will issue either an approval letter or a complete response letter (CRL). An approval letter authorizes the commercial marketing of the drug with prescribing information for specific indications. A CRL indicates that the review cycle of the application is complete, and that the application will not be approved in its present form. A CRL generally describes the deficiencies in the NDA identified by the FDA and may require substantial additional clinical data or other significant and time-consuming requirements related to clinical trials, nonclinical studies or manufacturing. Additionally, the CRL may include recommended actions that the applicant might take to place the application in a condition for approval. If a CRL is issued, the applicant may either resubmit the NDA, addressing all of the deficiencies identified in the letter, or withdraw the application. If, or when, those deficiencies have been addressed to the FDA's satisfaction in a resubmission of the NDA, the FDA will issue an approval letter to the applicant. The FDA has committed to reviewing such resubmissions in response to an issued CRL in either two or six months depending on the type of information included. Even with the submission of this additional information, however, the FDA may decide that the NDA does not satisfy the regulatory criteria for approval. Data obtained from clinical trials are not always conclusive, and the FDA may interpret data differently than the sponsor interprets the same data.

There is no assurance that the FDA will approve a product candidate for marketing, and the sponsor may encounter significant difficulties or costs during the review process. Even if a product receives marketing approval, the approval may be significantly limited to specific diseases and dosages or the indications for use may otherwise be limited, which could restrict the commercial value of the product. Further, the FDA may require that certain contraindications, warnings or precautions be included in the product labeling, or it may condition approval on changes to the proposed labeling. The FDA also may condition approval on the development of adequate controls and specifications for manufacturing and a commitment to conduct post-marketing testing and surveillance to monitor the potential effects and efficacy. For example, the FDA may require Phase 4 trials designed to further assess a drug's safety and efficacy.

The FDA may also place restrictions and conditions on product distribution, prescribing, or dispensing in the form of a risk evaluation and mitigation strategy (REMS) plan in addition to the approved labeling, to help ensure that the benefits of the drug outweigh its risks. A REMS could include medication guides for patients, communication plans for health care professionals, and/or elements to assure safe use (ETASU). ETASU can include, but are not limited to, special training or certification for prescribing or dispensing, restricted distribution requirements, dispensing only under certain circumstances, special monitoring, and the use of patient registries. The FDA determines the requirement for a REMS, as well as the specific REMS provisions, on a case-by-case basis. If the FDA concludes a REMS plan is needed, the sponsor of the NDA must submit a proposed REMS plan. The FDA will not approve the NDA without an approved REMS, if required. Based on the required warnings included in the approved labeling of drug products containing the same drug substance as our product candidates (dexmethylphenidate and dextroamphetamine), we expect that as part of the NDA review and approval process, FDA will require at least some of our product candidates, in particular CTx-1301 and CTx-1302, to include black box warnings as part of their labeling.

Any of the above-mentioned limitations on approval or marketing could restrict the commercial promotion, distribution, prescription or dispensing of products and therefore limit commercial success. Marketing approval may be withdrawn for non-compliance with regulatory requirements or if problems occur following initial marketing.

After NDA approval, some types of changes to the approved product, such as adding new indications, manufacturing changes and additional labeling claims, are subject to further testing requirements, FDA notification, and FDA review and approval. Further, should new safety information arise, additional testing, product labeling or FDA notification may be required.

Hatch-Waxman Act and New Drug Marketing Exclusivity

Under the Drug Price Competition and Patent Term Restoration Act of 1984, otherwise known as the Hatch-Waxman Amendments to the FDCA, Congress authorized the FDA to approve generic drugs that are the same as drugs previously approved by the FDA under the NDA provisions of the statute and also enacted Section 505(b)(2) of the FDCA. To obtain approval of a generic drug, an applicant must submit an abbreviated new drug application (ANDA), to the agency. In support of such applications, a generic manufacturer may rely on the preclinical and clinical testing conducted for a drug product previously approved under an NDA, known as the RLD. Specifically, in order for an ANDA to be approved, the FDA must find that the generic version is identical to the RLD with respect to the active ingredients, the route of administration, the dosage form, and the strength of the drug. In contrast, Section 505(b)(2) permits the filing of an NDA where at least some of the information required for approval comes from studies not conducted by or for the applicant and for which the applicant has not obtained a right of reference. A Section 505(b)(2) applicant may eliminate the need to conduct certain preclinical or clinical studies, if it can establish that reliance on studies conducted for a previously-approved product is scientifically appropriate. Unlike the ANDA pathway used by developers of bioequivalent versions of innovator drugs, which does not allow applicants to submit new clinical data other than bioavailability or bioequivalence data, the 505(b)(2) regulatory pathway does not preclude the possibility that a follow-on applicant would need to conduct additional clinical trials or nonclinical studies; for example, they may be seeking approval to market a previously approved drug for new indications or for a new patient population that would require new clinical data to demonstrate safety or effectiveness. The FDA may then approve the new product for all or some of the label indications for which the RLD has been approved, or for any new indication sought by the Section 505(b)(2) applicant, as applicable.

In seeking approval of an NDA or a supplement thereto, the NDA sponsor is required to list with the FDA each patent with claims that cover the sponsor's product or an approved method of using the product. Upon approval of an NDA, each of the patents listed in the application for the drug is published in the FDA publication Approved Drug Products with Therapeutic Equivalence Evaluations, commonly known as the Orange Book. When an ANDA applicant submits its application to the FDA, the applicant is required to certify to the FDA concerning any patents listed in the Orange Book for the RLD, except for patents covering methods of use for which the follow-on applicant is not seeking approval. To the extent a Section 505(b)(2) applicant is relying on studies conducted for an already approved product, such an applicant is also required to certify to the FDA concerning any patents listed for the approved product in the Orange Book to the same extent that an ANDA applicant would.

Specifically, any applicant who subsequently files an ANDA or 505(b)(2) NDA that references the drug listed in the Orange Book must certify to the FDA that with respect to each published patent, (i) the required patent information has not been filed by the original applicant of the RLD; (ii) the listed patent already has expired; (iii) the listed patent has not expired, but will expire on a specified date and approval is sought after patent expiration; or (iv) the listed patent is invalid, unenforceable or will not be infringed by the manufacture, use or sale of the new product. These are known as Paragraph I, II, III, and IV certifications, respectively.

If a Paragraph I or II certification is filed, the FDA may make approval of the application effective immediately upon completion of its review. If a Paragraph III certification is filed, the approval may be made effective on the patent expiration date specified in the application, although a tentative approval may be issued before that time. If an application contains a Paragraph IV certification, a series of events will be triggered, the outcome of which will determine the effective date of approval of the ANDA or 505(b)(2) application.

A certification that the new product will not infringe the RLD's listed patents or that such patents are invalid is called a Paragraph IV certification. If the follow-on applicant has provided a Paragraph IV certification to the FDA, the applicant must also send notice of the Paragraph IV certification to the NDA and patent holders for the RLD once the applicant's NDA has been accepted for filing by the FDA. The NDA and patent holders may then initiate a legal challenge to the Paragraph IV certification. The filing of a patent infringement lawsuit within 45 days of their receipt of a Paragraph IV certification automatically prevents the FDA from approving the ANDA or 505(b)(2) NDA until the earlier of 30 months after the receipt of the Paragraph IV notice, expiration of the patent or a decision in the infringement case that is favorable to the ANDA or 505(b)(2) applicant. Alternatively, if the listed patent holder does not file a patent infringement lawsuit within the required 45-day period, the follow-on applicant's ANDA or 505(b)(2) NDA will not be subject to the 30-month stay.

In addition, under the Hatch-Waxman Amendments, the FDA may not approve an ANDA or 505(b)(2) NDA until any applicable period of non-patent exclusivity for the referenced RLD has expired. These market exclusivity provisions under the FDCA also can delay the submission or the approval of certain applications. The FDCA provides a five-year period of non-patent marketing exclusivity within the United States to the first applicant to gain approval of a NDA for a drug containing a new chemical entity. A drug is a new chemical entity if the FDA has not previously approved any other new drug containing the same active moiety, which is the molecule or ion responsible for the action of the drug substance. During the exclusivity period, the FDA may not accept for review an ANDA or a 505(b)(2) NDA submitted by another company for another version of such drug where the applicant does not own or have a legal right of reference to all the data required for approval. However, an application may be submitted after four years if it contains a certification of patent invalidity or non-infringement.

The FDCA also provides three years of marketing exclusivity for a NDA, 505(b)(2) NDA or supplement to an existing NDA if new clinical investigations, other than bioavailability studies, that were conducted or sponsored by the applicant are deemed by the FDA to be essential to the approval of the application, for example, new indications, dosages or strengths of an existing drug. This three-year exclusivity covers only the conditions of use associated with the new clinical investigations and does not prohibit the FDA from approving follow-on applications for drugs containing the original active agent. Five-year and three-year exclusivity also will not delay the submission or approval of a traditional NDA filed under Section 505(b)(1) of the FDCA. However, an applicant submitting a traditional NDA would be required to either conduct or obtain a right of reference to all of the preclinical studies and adequate and well-controlled clinical trials necessary to demonstrate safety and effectiveness.

Patent Term Extension

After NDA approval, owners of relevant drug patents may apply for up to a five-year patent term extension. The allowable patent term extension is calculated as half of the drug's testing phase – the time between when the IND becomes effective and NDA submission – and all of the review phase – the time between NDA submission and approval, up to a maximum of five years. The time can be shortened if FDA determines that the applicant did not pursue approval with due diligence. The total patent term after the extension may not exceed 14 years. For patents that might expire during the application phase, the patent owner may request an interim patent extension. An interim patent extension increases the patent term by one year and may be renewed up to four times. For each interim patent extension granted, the post-approval patent extension is reduced by one year. The director of the Patent and Trademark Office (PTO) must determine that approval of the drug covered by the patent for which a patent extension is being sought is likely. Interim patent extensions are not available for a drug for which an NDA has not been submitted.

Pediatric Clinical Trials and Exclusivity

Under the Pediatric Research Equity Act (PREA), an NDA or certain types of supplements to an NDA must contain data to assess the safety and efficacy of the drug for the claimed indications in all relevant pediatric subpopulations and to support dosing and administration for each pediatric subpopulation for which the product is safe and effective. The FDA may grant deferrals for submission of pediatric data or full or partial waivers.

For purposes of satisfying the requirements of PREA, the appropriate age ranges to be studied may vary, depending on the pharmacology of the drug or biological product, the manifestations of the disease in various age groups, and the ability to measure the response to therapy. PREA requires pediatric assessments to be gathered “using appropriate formulations for each age group for which the assessment is required” (section 505B(a)(2)(A) of the Act). Under PREA, applicants must submit requests for approval of the pediatric formulation used in their pediatric studies, and failure to submit such a request may render the product misbranded (section 505B(d) of the Act). FDA interprets the language “request for approval of a pediatric formulation” to mean that applicants must submit an application or supplemental application for any not previously approved formulation(s) used to conduct their pediatric studies.

The Food and Drug Administration Safety and Innovation Act, which was signed into law on July 9, 2012, amended the FDCA to require that a sponsor who is planning to submit an NDA for a new active ingredient, new indication, new dosage form, new dosing regimen or new route of administration submit an initial Pediatric Study Plan (iPSP) within 60 days of an end-of-Phase 2 meeting or, if there is no such meeting, as early as practicable before the initiation of the Phase 3 or Phase 2/3 trial. The initial PSP must include an outline of the pediatric trial(s) that the sponsor plans to conduct, including objectives and design, age groups, relevant endpoints and statistical approach, or a justification for not including such information, and any request for a deferral of pediatric assessments or a full or partial waiver of the requirement to provide data from pediatric trials along with supporting information. The FDA and the sponsor must reach an agreement on the PSP, but the sponsor can submit amendments to an agreed-upon initial PSP at any time if changes to the pediatric plan need to be considered based on data collected from nonclinical studies, early phase clinical trials, and other clinical development programs. We have submitted our iPSP, and it was accepted. We continue to be in discussions with the FDA regarding our PREA obligations.

The Best Pharmaceuticals for Children Act provides NDA holders a six-month extension of any exclusivity – patent or non-patent – for a drug if certain conditions are met, including satisfaction of a pediatric trial(s) agreed with FDA as a Pediatric Written Request. Conditions for pediatric exclusivity include the FDA's determination that information relating to the use of a new drug in the pediatric population may produce health benefits in that population, the FDA making a written request for pediatric clinical trials, and the applicant agreeing to perform, and reporting on, the requested clinical trials within the statutory timeframe. This six-month exclusivity may be granted if an NDA sponsor submits pediatric data that fairly respond to the written request from the FDA for such data. Those data do not need to show the product to be effective in the pediatric population studied; rather, if the clinical trial is deemed to fairly respond to the FDA's request, the additional protection is granted. Although this is not a patent term extension, it effectively extends the regulatory period during which the FDA cannot approve another application.

Disclosure of Clinical Trial Information

Sponsors of clinical trials of FDA-regulated products are required to register and disclose certain clinical trial information on the website www.clinicaltrials.gov. Information related to the product, patient population, phase of investigation, trial sites and investigators, and other aspects of a clinical trial are then made public as part of the registration. Sponsors are also obligated to disclose the results of their clinical trials after completion. Disclosure of the results of clinical trials can be delayed in certain circumstances for up to two years after the date of completion of the trial. Competitors may use this publicly available information to gain knowledge regarding the progress of clinical development programs as well as clinical trial design.

Post-Approval Requirements

Following approval of a drug product, the manufacturer and the approved drug product are subject to pervasive and continuing regulation by the FDA, including, among other things, monitoring and record-keeping activities, reporting of adverse experiences with the product, product sampling and distribution restrictions, complying with promotion and advertising requirements, which include restrictions on promoting drugs for unapproved uses or patient populations (i.e., "off-label use") and limitations on industry-sponsored scientific and educational activities. Although physicians may prescribe legally available products for off-label uses, manufacturers may not market or promote such uses. The FDA and other agencies actively enforce the laws and regulations prohibiting the promotion of off-label uses, and a company that is found to have improperly promoted off-label uses may be subject to significant liability, including adverse publicity, enforcement action by the FDA, corrective advertising, consent decrees and the full range of civil and criminal penalties available to the FDA. Prescription drug promotional materials also must be submitted to the FDA in conjunction with their first use. Further, if there are any modifications to the approved drug product, including changes in indications, labeling or manufacturing processes or facilities, the applicant may be required to submit and obtain FDA approval of a new NDA or NDA supplement, which may require the applicant to develop additional data or conduct additional preclinical studies or clinical trials.

FDA regulations require that products be manufactured in specific approved facilities and in accordance with cGMPs. The cGMP regulations include requirements relating to organization of personnel, buildings and facilities, equipment, control of components and drug product containers and closures, production and process controls, packaging and labeling controls, holding and distribution, laboratory controls, records and reports and returned or salvaged products. The manufacturing facilities for our product candidates must meet cGMP requirements and satisfy the FDA or comparable foreign regulatory authorities' satisfaction before any product is approved and our commercial products can be manufactured. These manufacturers must comply with cGMPs that require, among other things, quality control and quality assurance, the maintenance of records and documentation and the obligation to investigate and correct any deviations from cGMP. Manufacturers and other entities involved in the manufacture and distribution of approved drugs are required to register their establishments with the FDA and certain state agencies, and are subject to periodic unannounced inspections by the FDA and certain state agencies for compliance with cGMP requirements and other laws. Accordingly, manufacturers must continue to expend time, money and effort in the area of production and quality control to maintain compliance with cGMPs. The discovery of violative conditions, including failure to conform to cGMPs, could result in enforcement actions including cessation of manufacturing activities. The discovery of problems with a product after approval may result in restrictions on a product, manufacturer or holder of an approved NDA, including recalls and product seizures.

Further, changes to the manufacturing process are strictly regulated and often require prior FDA approval before being implemented, or FDA notification. If there are any modifications to the drug, including changes to indications, labeling, or manufacturing processes or facilities, the applicant may be required to submit and obtain FDA approval of a supplemental NDA or new NDA, which may require the applicant to develop additional data or conduct additional pharmaceutical development/formulation studies, nonclinical studies or clinical trials.

Once an approval of a prescription drug is granted, the FDA may withdraw the approval if compliance with regulatory requirements and standards is not maintained or if problems occur after the product reaches the market. Later discovery of previously unknown problems with a product, including adverse events of unanticipated severity or frequency, or with manufacturing processes, or failure to comply with regulatory requirements, may result in mandatory revisions to the approved labeling to add new safety information; imposition of post-market or clinical trials to assess new safety risks; or imposition of distribution or other restrictions under a REMS program. Other potential consequences include, among other things:

- restrictions on the marketing or manufacturing of the product, complete withdrawal of the product from the market or product recalls;
- fines, warning letters or other enforcement-related letters or clinical holds on post-approval clinical trials;
- refusal of the FDA to approve pending NDAs or supplements to approved NDAs, or suspension or revocation of product approvals;
- product seizure or detention, or refusal to permit the import or export of products;
- injunctions or the imposition of civil or criminal penalties;
- consent decrees, corporate integrity agreements, debarment, or exclusion from federal health care programs; and
- mandated modification of promotional materials and labeling and the issuance of corrective information.

In addition, the distribution of prescription pharmaceutical products, including samples, is subject to the Prescription Drug Marketing Act (PDMA), which regulates the distribution of drugs and drug samples at the federal level, and sets minimum standards for the registration and regulation of drug distributors by the states. Both the PDMA and state laws regulate the distribution of prescription pharmaceutical product samples and impose requirements to ensure accountability in distribution.

Moreover, the Drug Supply Chain Security Act (DSCA) was enacted in 2013 with the aim of building an electronic system to identify and trace certain prescription drugs distributed in the United States. The DSCA mandates phased-in and resource-intensive obligations for pharmaceutical manufacturers, wholesale distributors, and dispensers over a 10-year period that is expected to culminate in November 2023. From time to time, new legislation and regulations may be implemented that could significantly change the statutory provisions governing the approval, manufacturing and marketing of prescription drug products regulated by the FDA. It is impossible to predict whether further legislative or regulatory changes will be enacted, or FDA regulations, guidance or interpretations changed or what the impact of such changes, if any, may be.

DEA Regulation

The active ingredients in our current drug product candidates are listed by the U.S. Drug Enforcement Administration, or DEA, as controlled substances under the Controlled Substances Act of 1970 (CSA). The CSA and its implementing regulations establish a closed chain of distribution for entities handling controlled substances and impose registration, record-keeping and reporting, security, storage, procurement, manufacturing, distribution, importation, exportation, labeling, packaging, and other requirements on such entities. The DEA requires individuals or entities that handle controlled substances to comply with these requirements to ensure legitimate use and prevent diversion of controlled substances to illicit channels of commerce.

The CSA categorizes controlled substances into one of five schedules, Schedule I, II, III, IV or V, depending on the potential for abuse and physical or psychological dependence. Schedule I substances by definition have a high potential for abuse, have no currently accepted medical use in treatment in the U.S. and lack accepted safety for use under medical supervision. They may not be marketed or sold for dispensing to patients in the U.S. Pharmaceutical products having a currently accepted medical use and that are otherwise approved for marketing may be listed as Schedule II, III, IV, or V substances, with Schedule II substances presenting the highest potential for abuse and physical or psychological dependence, and Schedule V substances presenting the lowest relative potential for abuse and dependence. Schedule II substances (as well as substances defined as narcotics in any Schedule) are subject to the strictest requirements for registration, security, recordkeeping and reporting, and the distribution and dispensing of these substances are highly regulated. For example, all Schedule II drug prescriptions must be signed by a physician, physically presented to a pharmacist in most situations, unless they are electronically prescribed pursuant to DEA regulations, and may not be refilled. The active ingredients in our product candidates (dexamethylphenidate and dextroamphetamine) are Schedule II controlled substances and are under various restrictions. Consequently, the procurement, manufacturing, shipping, storage, sales and use of the products, if approved, will be subject to a high degree of regulation.

Facilities that manufacture, distribute, import or export controlled substances must register annually with the DEA. The registration is specific to the particular location, activity and controlled substance schedule. For example, separate registrations are needed for import and manufacturing, and each registration will specify which schedules of controlled substances are authorized. Similarly, separate registrations are also required for separate facilities.

The DEA inspects manufacturers, distributors, importers, and exporters to review compliance with the CSA and DEA regulations, including security, record keeping and reporting prior to issuing a controlled substance registration and on a periodic basis. The specific security requirements vary by the type of business activity and the schedule and quantity of controlled substances handled by the registrant, with the most stringent requirements applying to Schedule I and Schedule II substances. Required security measures include background checks on employees and physical control of inventory through measures such as vaults and inventory reconciliations. Manufacturers and distributors must also submit regular reports to the DEA of the distribution of Schedule I and II controlled substances, Schedule III narcotic substances, and other designated substances. Records must be maintained for the handling of all controlled substances, for example, a complete and accurate record of each substance manufactured, received, sold, delivered, or otherwise disposed of. All DEA registrants must also report any controlled substance thefts or significant losses and must obtain authorization to destroy or dispose of controlled substances. In addition to maintaining an importer and/or exporter registration, importers and exporters of controlled substances must obtain a permit for every import or export of a Schedule I or II substance and a narcotic substance in Schedule III, IV and V. For all other drugs in Schedule III, IV and V, importers and exporters must submit an import or export declaration.

In addition, a DEA quota system controls and limits the availability and production of controlled substances in Schedule I or II. The DEA establishes annually an aggregate quota for how much of a controlled substance may be produced in total in the United States based on the DEA's estimate of the quantity needed to meet legitimate scientific and medicinal needs. The limited aggregate number of opioids and stimulants that the DEA allows to be produced in the United States each year is allocated among individual companies, which must submit applications annually to the DEA for individual production and procurement quotas. We must receive an annual quota from the DEA in order to produce or procure our Schedule II substance for use in manufacturing of our product and product candidates. The DEA may adjust aggregate production quotas and individual production and procurement quotas from time to time during the year, although the DEA has substantial discretion in whether or not to make such adjustments. Distributions of any Schedule I or II controlled substance must also be accompanied by special order forms, with copies provided to the DEA.

Failure to maintain compliance with applicable DEA requirements, particularly as manifested in loss or diversion or controlled substances, can result in administrative, civil or criminal enforcement action. The DEA may seek civil penalties, refuse to renew necessary registrations, or initiate administrative proceedings to revoke those registrations. In some circumstances, violations could lead to criminal prosecution.

The various states and the District of Columbia, also regulate controlled substances and impose similar licensing, recordkeeping, and reporting requirements on entities that handle controlled substances. Entities must independently comply with the various state requirements in addition to the federal controlled substance requirements.

Pharmaceutical Coverage, Pricing and Reimbursement

Significant uncertainty exists as to the coverage and reimbursement status of any product candidates for which we may obtain regulatory approval. In the United States, sales of pharmaceutical products depend in significant part on the availability of coverage and adequate reimbursement by third-party payors, such as state and federal governmental authorities, including those that administer the Medicare and Medicaid programs, managed care organizations and private insurers. Decisions regarding the extent of coverage and amount of reimbursement to be provided for each of our product candidates will be made on a plan-by-plan basis. The Medicare and Medicaid programs are often used as models by private payors and other governmental payors to develop their coverage and reimbursement policies for drugs. However, one payor's determination to provide coverage for a product does not assure that other payors will also provide coverage, and adequate reimbursement, for the product. Each third-party payor determines whether or not it will provide coverage for a drug, what amount it will pay providers for the drug, and on what tier of its formulary the drug will be placed. These decisions are influenced by the existence of multiple drug products within a therapeutic class and the net cost to the plan, including the amount of the prescription price, if any, rebated by the drug's manufacturer. Typically, generic versions of drugs are placed in a preferred tier. The position of a drug on the formulary generally determines the co-payment that a patient will need to make to obtain the drug and can strongly influence the adoption of a drug by patients and physicians. Patients who are prescribed treatments for their conditions and providers performing the prescribed services generally rely on third-party payors to reimburse all or part of the associated healthcare costs. Patients are unlikely to use our products unless coverage is provided, and reimbursement is adequate to cover a significant portion of the cost of our products. Additionally, a third-party payor's decision to provide coverage for a drug does not imply that an adequate reimbursement rate will be approved. Also, third-party payors are developing increasingly sophisticated methods of controlling healthcare costs. As a result, coverage, reimbursement and placement determinations are complex and are often the subject of extensive negotiations between the payor and the owner of the drug.

Unless we enter into a strategic collaboration under which our collaborator assumes responsibility for seeking coverage and reimbursement for a given product, we will be responsible for negotiating coverage, reimbursement and placement decisions for our product candidates. Coverage, reimbursements and placement decisions for a new product are based on many factors including the coverage, reimbursement and placement of already marketed branded drugs for the same or similar indications, the safety and efficacy of the new product, availability of generics for similar indications, the clinical need for the new product and the cost-effectiveness of the product.

Within the Medicare program, CTx-1301 and CTx-1302, which, if approved would likely be self-administered drugs, would likely be reimbursed under the expanded prescription drug benefit known as Medicare Part D. This program is a voluntary Medicare benefit administered by private plans that operate under contracts with the federal government. These plans develop formularies that determine which products are covered and what co-pay will apply to covered drugs. The plans have considerable discretion in establishing formularies and tiered co-pay structures, negotiating rebates with manufacturers and placing prior authorization and other restrictions on the utilization of specific products, subject to review by the Centers for Medicare and Medicaid Services (CMS) for discriminatory practices. These Part D plans negotiate discounts with drug manufacturers, which are passed on, in whole or in part, to each of the plan's enrollees through reduced premiums.

If a drug product is reimbursed by Medicare or Medicaid, pricing and rebate programs must comply with, as applicable, the Medicare Prescription Drug Improvement and Modernization Act of 2003 as well as the Medicaid rebate requirements of the Omnibus Budget Reconciliation Act of 1990 (OBRA) and the Veterans Health Care Act of 1992, each as amended. Among other things, the OBRA requires drug manufacturers to pay rebates on prescription drugs to state Medicaid programs and empowers states to negotiate rebates on pharmaceutical prices, which may result in prices for our future products that will likely be lower than the prices we might otherwise obtain. If products are made available to authorized users of the Federal Supply Schedule of the General Services Administration, additional laws and requirements apply.

Third-party payors, including the U.S. government, continue to apply downward pressure on the reimbursement of pharmaceutical products. Also, the trend towards managed health care in the United States and the concurrent growth of organizations such as health maintenance organizations may result in lower reimbursement for pharmaceutical products. We expect that these trends will continue as these payors implement various proposals or regulatory policies, including various provisions of the recent health reform legislation that affect reimbursement of these products. There are currently, and we expect that there will continue to be, a number of federal and state proposals to implement controls on reimbursement and pricing, directly and indirectly.

Other Healthcare Laws and Compliance Requirements

As we are commercializing our product candidates, if they are approved by the FDA or comparable foreign regulatory agencies for marketing, we will be subject to additional healthcare statutory and regulatory requirements and enforcement by federal government and the states and foreign governments in the jurisdictions in which we conduct our business. Healthcare providers, physicians and third-party payors will play a primary role in the recommendation and prescription of any other product candidates for which we obtain marketing approval. Our arrangements with third-party payors and customers expose us to broadly applicable fraud and abuse and other healthcare laws and regulations that constrain the business or financial arrangements and relationships through which we market, sell and distribute any products for which we obtain marketing approval.

Restrictions under applicable federal and state healthcare laws and regulations include the following:

- The federal Anti-Kickback Statute prohibits, among other things, any person from knowingly and willfully offering, soliciting, receiving or providing remuneration, directly or indirectly, to induce either the referral of an individual, for an item or service or the purchasing or ordering of a good or service, for which payment may be made under federal healthcare programs such as the Medicare and Medicaid programs. The federal Anti-Kickback Statute is subject to evolving interpretations. In the past, the government has enforced the federal Anti-Kickback Statute to reach large settlements with healthcare companies based on sham consulting and other financial arrangements with physicians. A person or entity does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation. In addition, the government may assert that a claim including items or services resulting from a violation of the federal Anti-Kickback Statute constitutes a false or fraudulent claim for purposes of the civil False Claims Act;
- The federal civil and criminal false claims laws, including the civil False Claims Act, and civil monetary penalty laws, prohibit, among other things, knowingly presenting or causing the presentation of a false, fictitious or fraudulent claim for payment to the U.S. government, knowingly making, using, or causing to be made or used a false record or statement material to a false or fraudulent claim to the U.S. government, or from knowingly making a false statement to avoid, decrease or conceal an obligation to pay money to the U.S. government. Actions under these laws may be brought by the Attorney General or as a qui tam action by a private individual in the name of the government. The federal government uses these laws, and the accompanying threat of significant liability, in its investigation and prosecution of pharmaceutical and biotechnology companies throughout the U.S., for example, in connection with the promotion of products for unapproved uses and other allegedly unlawful sales and marketing practices;

- The U.S. federal Health Insurance Portability and Accountability Act of 1996 (HIPAA) created new federal, civil and criminal statutes that prohibit among other actions, knowingly and willfully executing, or attempting to execute, a scheme to defraud any healthcare benefit program, including private third-party payors, knowingly and willfully embezzling or stealing from a healthcare benefit program, willfully obstructing a criminal investigation of a healthcare offense, and knowingly and willfully falsifying, concealing or covering up a material fact or making any materially false, fictitious or fraudulent statement in connection with the delivery of or payment for healthcare benefits, items or services. Similar to the federal Anti-Kickback Statute, a person or entity does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation;
- The Physician Payments Sunshine Act, enacted as part of the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (collectively, PPACA), among other things, imposes reporting requirements on manufacturers of FDA-approved drugs, devices, biologics and medical supplies covered by Medicare, Medicaid, or the Children’s Health Insurance Program to report, on an annual basis, to CMS information related to payments and other transfers of value to physicians (defined to include doctors, dentists, optometrists, podiatrists, chiropractors and, beginning in 2022 for payments and other transfers of value provided in the previous year, certain advanced non-physician health care practitioners), teaching hospitals, as well as ownership and investment interests held by physicians and their immediate family members;
- HIPAA, as amended by the Health Information Technology for Economic and Clinical Health Act (HITECH) and their respective implementing regulations impose specified requirements relating to the privacy, security and transmission of individually identifiable health information. Among other things, HITECH makes HIPAA’s privacy and security standards directly applicable to “business associates,” defined as independent contractors or agents of covered entities, which include certain healthcare providers, health plans, and healthcare clearinghouses, that create, receive, maintain or transmit protected health information in connection with providing a service for or on behalf of a covered entity. HITECH also increased the civil and criminal penalties that may be imposed against covered entities, business associates and possibly other persons, and gave state attorneys general new authority to file civil actions for damages or injunctions in federal courts to enforce HIPAA and seek attorneys’ fees and costs associated with pursuing federal civil actions;
- Analogous state and foreign laws and regulations, such as state anti-kickback and false claims laws, that may apply to sales or marketing arrangements and claims involving healthcare items or services reimbursed by non-governmental third-party payors, including private insurers;
- State laws that require pharmaceutical companies to comply with the pharmaceutical industry’s voluntary compliance guidelines and the relevant compliance guidance promulgated by the federal government and may require drug manufacturers to report information related to payments and other transfers of value to physicians and other healthcare providers or marketing expenditures to the extent that those laws impose requirements that are more stringent than the Physician Payments Sunshine Act, as well as state and local laws that require the registration of pharmaceutical sales representatives; and
- State laws and foreign laws and regulations (particularly European Union laws regarding personal data relating to individuals based in Europe) that govern the privacy and security of health information in certain circumstances, many of which differ from each other in significant ways, thus complicating compliance efforts.

In November 2020, HHS finalized significant changes to the regulations implementing the Anti-Kickback Statute, with the goal of offering the healthcare industry more flexibility and reducing the regulatory burden associated with those fraud and abuse laws, particularly with respect to value-based arrangements among industry participants.

Ensuring that our current and future business arrangements with third parties comply with applicable healthcare laws and regulations involves substantial costs. It is possible that governmental authorities may conclude that our business practices may not comply with current or future statutes, regulations, agency guidance or case law involving applicable fraud and abuse or other healthcare laws and regulations. If our operations are found to be in violation of any of these laws or any other governmental regulations that may apply to us, we may be subject to significant civil, criminal and administrative penalties, including monetary damages, fines, disgorgement, imprisonment, loss of eligibility to obtain approvals from the FDA, exclusion from participation in government contracting, healthcare reimbursement or other government programs, including Medicare and Medicaid, reputational harm, diminished profits and future earnings, or additional reporting requirements if we become subject to a corporate integrity agreement or other agreement to resolve allegations of non-compliance with any of these laws, and the curtailment or restructuring of our operations. If any of the physicians or other healthcare providers or entities with whom we expect to do business is found to be not in compliance with applicable laws, they may be subject to criminal, civil or administrative sanctions, including exclusions from government funded healthcare programs.

Healthcare Reform and Potential Changes to Healthcare Laws

The United States and some foreign jurisdictions are considering or have enacted a number of legislative and regulatory proposals to change the healthcare system in ways that could affect our ability to sell our future products profitably. Among policy makers and payors in the United States and elsewhere, there is significant interest in promoting changes in healthcare systems with the stated goals of containing healthcare costs, improving quality or expanding access. In the United States, the pharmaceutical industry has been a particular focus of these efforts and has been significantly affected by major legislative initiatives. The FDA's and other regulatory authorities' policies may change and additional government regulations may be enacted that could prevent, limit or delay regulatory approval of our product candidates. If we are slow or unable to adapt to changes in existing requirements or the adoption of new requirements or policies, or if we are not able to maintain regulatory compliance, we may lose any marketing approval that we otherwise may have obtained and we may not achieve or sustain profitability, which would adversely affect our business, prospects, financial condition and results of operations. Moreover, among policy makers and payors in the United States and elsewhere, there is significant interest in promoting changes in healthcare systems with the stated goals of containing healthcare costs, improving quality and/or expanding access.

By way of example, PPACA was enacted in March 2010 and has had a significant impact on the health care industry in the United States. PPACA expanded coverage for the uninsured while at the same time containing overall healthcare costs. With regard to biopharmaceutical products, PPACA, among other things, addressed a new methodology by which rebates owed by manufacturers under the Medicaid Drug Rebate Program are calculated for drugs that are inhaled, infused, instilled, implanted or injected, increased the minimum Medicaid rebates owed by manufacturers under the Medicaid Drug Rebate Program and extended the rebate program to individuals enrolled in Medicaid managed care organizations, established annual fees on manufacturers of certain branded prescription drugs, and created a new Medicare Part D coverage gap discount program.

As another example, the 2021 Consolidated Appropriations Act signed into law on December 27, 2020, incorporated extensive healthcare provisions and amendments to existing laws, including a requirement that all manufacturers of drugs and biological products covered under Medicare Part B report the product's average sales price to the Department of Health and Human Services (DHHS) beginning on January 1, 2022, subject to enforcement via civil money penalties.

In addition, other legislative changes have been proposed and adopted in the United States since the PPACA that affect health care expenditures. These changes include aggregate reductions to Medicare payments to providers of up to 2% per fiscal year pursuant to the Budget Control Act of 2011, which began in 2013 and will remain in effect through 2030 unless additional Congressional action is taken. The Coronavirus Aid, Relief, and Economic Security Act, (CARES Act), which was signed into law on March 27, 2020 and was designed to provide financial support and resources to individuals and businesses affected by the COVID-19 pandemic, suspended the 2% Medicare sequester from May 1, 2020 through December 31, 2020, and extended the sequester by one year, through 2030, in order to offset the added expense of the 2020 cancellation. The 2021 Consolidated Appropriations Act was subsequently signed into law on December 27, 2020 and extended the CARES Act suspension period to March 31, 2021. The most recently enacted pandemic-relief legislation, the American Rescue Plan Act of 2021, which was signed into law on March 11, 2021, also includes significant healthcare system reforms and programs intended to strengthen the insurance marketplace established under the PPACA, among others.

Moreover, there has been heightened governmental scrutiny over the manner in which manufacturers set prices for their marketed products, which has resulted in several Congressional inquiries and proposed and enacted federal and state legislation designed to, among other things, bring more transparency to product pricing, review the relationship between pricing and manufacturer patient programs, and reform government program reimbursement methodologies for drug products. DHHS has solicited feedback on some of various measures intended to lower drug prices and reduce the out of pocket costs of drugs and implemented others under its existing authority. For example, in May 2019, DHHS issued a final rule to allow Medicare Advantage plans the option to use step therapy for Part B drugs beginning January 1, 2020. This final rule codified a DHHS policy change that was effective January 1, 2019. Congress and the executive branch have each indicated that it will continue to seek new legislative and/or administrative measures to control drug costs, making this area subject to ongoing uncertainty.

Individual states in the United States have also increasingly passed legislation and implemented regulations designed to control pharmaceutical product pricing, including price or patient reimbursement constraints, discounts, restrictions on certain product access and marketing cost disclosure and transparency measures, and, in some cases, designed to encourage importation from other countries and bulk purchasing. In December 2020, the U.S. Supreme Court held unanimously that federal law does not preempt the states' ability to regulate pharmaceutical benefit managers (PBMs) and other members of the health care and pharmaceutical supply chain, an important decision that may lead to further and more aggressive efforts by states in this area.

The FDA's and other regulatory authorities' policies also may change and additional government regulations may be enacted that could prevent, limit or delay regulatory approval of our drug candidates. For example, in December 2016, the 21st Century Cures Act (Cures Act) was signed into law. The Cures Act, among other things, is intended to modernize the regulation of drugs and devices and to spur innovation, but its ultimate implementation is uncertain. In addition, in August 2017, the FDA Reauthorization Act was signed into law, which reauthorized the FDA's user fee programs and included additional drug and device provisions that build on the Cures Act. In addition, the next cycle of Congressional reauthorization for FDA's prescription drug, biologic, and medical device user fee programs must be completed by mid-2022 and that periodic must-pass legislation is typically used as a vehicle to implement federal policy changes or other substantive amendments to the FDCA. If we are slow or unable to adapt to changes in existing requirements or the adoption of new requirements or policies, we may not achieve or sustain profitability, which would adversely affect our business, prospects, financial condition and results of operations.

We expect that the PPACA, as well as other healthcare reform measures that may be adopted in the future, may result in more rigorous coverage criteria and lower reimbursement, and in additional downward pressure on the price that we receive for any approved product. Any reduction in reimbursement from Medicare or other government-funded programs may result in a similar reduction in payments from private payors. The implementation of cost containment measures or other healthcare reforms may prevent us from being able to generate revenue, attain profitability or commercialize our drugs, once regulatory approval is obtained. We cannot predict the likelihood, nature or extent of government regulation that may arise from future legislation or administrative or executive action, either in the United States or abroad. We expect that additional state and federal healthcare reform measures will be adopted in the future, any of which could limit the amounts that federal and state governments will pay for healthcare products and services, including any future pharmaceutical products for which we secure marketing approval.

Data Privacy and the Protection of Personal Information

We are regulated by laws and regulations governing data privacy, security, and the protection of personal information, including health information, that are applicable to our business and associated data processing activities. The legislative and regulatory landscape for privacy and data protection continues to evolve, and there has been an increasing focus on privacy and data protection issues globally which will continue to affect our business. In the United States, we may be subject to state security breach notification laws, state laws protecting the privacy and security of health and personal information and federal and state consumer protections laws which regulate the collection, use, disclosure and transmission of personal information. These laws may overlap and conflict with each other, and each of these laws is subject to varying interpretations by courts and government agencies, creating complex compliance issues for us. If we fail to comply with applicable data protection laws and regulations we could be subject to penalties or sanctions, including criminal penalties. Our current and future customers and research partners must comply with laws governing the privacy and security of health information, including HIPAA and state health information privacy laws. If we knowingly obtain health information that is protected under HIPAA, called “protected health information,” without observing the correct protocols which may include execution of a business associate agreement, implementation of privacy or security measures, and other obligations, our customers or research collaborators may be subject to enforcement actions, and we may have direct liability for the unlawful receipt of protected health information or for aiding and abetting a HIPAA violation.

State laws protecting health and personal information are becoming increasingly stringent. For example, California has implemented the California Confidentiality of Medical Information Act, which imposes restrictive requirements regulating the use and disclosure of health information and other personally identifiable information, and in 2020 California implemented the California Consumer Privacy Act of 2018 (CCPA). The CCPA reflects several key concepts included in the EU General Data Protection Regulation (GDPR). The CCPA establishes a new privacy framework for covered businesses by creating an expanded definition of personal information, establishing new data privacy rights for consumers in the State of California, imposing special rules on the collection of consumer data from minors, and creating a new and potentially severe statutory damages framework for violations of the CCPA and for businesses that fail to implement reasonable security procedures and practices to prevent data breaches. Additionally, a new privacy law, the California Privacy Rights Act (CPRA), was approved by California voters in the election on November 3, 2020. The CPRA will modify the CCPA significantly, potentially resulting in further uncertainty, additional costs and expenses in an effort to comply and additional potential for harm and liability for failure to comply. Other states in the U.S. are considering privacy laws similar to CCPA. Nevada already has a data protection law (which was amended in 2021), and Virginia and Colorado recently passed new state data protection laws, with the Virginia Consumer Data Protection Act entering into force on January 1, 2023, and the Colorado Privacy Act becoming effective on July 1, 2023. Most recently, Utah legislators passed the Utah Consumer Privacy Act, which is expected to take effect on December 31, 2023.

When we do business and/or conduct clinical trials in the UK, we are subject to the European Union’s General Data Protection Regulation (“GDPR”), as saved into United Kingdom law by virtue of section 3 of the United Kingdom’s European Union (Withdrawal) Act 2018, and the UK’s Data Protection Act 2018 (“DPA 2018”) (the “UK GDPR”). The UK GDPR applies to business colleagues, employees, service providers, trial participants and other individuals like investigators or CRO employees who are residents of the UK or EEA (i.e. the EU plus Liechtenstein, Norway and Iceland). Violations of the UK GDPR and/or the GDPR can carry hefty fines of up to £17.5 million or 4% of the total annual worldwide revenue in the preceding financial year, whichever is higher.

U.S. Foreign Corrupt Practices Act

In general, the Foreign Corrupt Practices Act of 1977, as amended, or the FCPA, prohibits offering to pay, paying, promising to pay, or authorizing the payment of money or anything of value to a foreign official in order to influence any act or decision of the foreign official in his or her official capacity or to secure any other improper advantage in order to obtain or retain business for or with, or in order to direct business to, any person. The prohibitions apply not only to payments made to “any foreign official,” but also those made to “any foreign political party or official thereof,” to “any candidate for foreign political office” or to any person, while knowing that all or a portion of the payment will be offered, given, or promised to anyone in any of the foregoing categories. “Foreign officials” under the FCPA include officers or employees of a department, agency, or instrumentality of a foreign government. The term “instrumentality” is broad and can include state-owned or state-controlled entities. Importantly, United States authorities deem most healthcare professionals and other employees of foreign hospitals, clinics, research facilities and medical schools in countries with public healthcare and/or public education systems to be “foreign officials” under the FCPA. When we interact with foreign healthcare professionals and researchers in testing and marketing our products abroad, should any of our product candidates receive foreign regulatory approval in the future, we must have policies and procedures in place sufficient to prevent us and agents acting on our behalf from providing any bribe, gift or gratuity, including excessive or lavish meals, travel or entertainment in connection with marketing our products and services or securing required permits and approvals. The FCPA also obligates companies whose securities are listed in the United States to comply with accounting provisions requiring us to maintain books and records that accurately and fairly reflect all transactions of the corporation, including international subsidiaries, and to devise and maintain an adequate system of internal accounting controls for international operations.

Material Agreements

Master Services Agreement with Pharmaceutical Manufacturing Research Services, Inc.

Effective August 20, 2019, we entered into a master services agreement with PMRS (the “Manufacturing Agreement”). Pursuant to the Manufacturing Agreement, PMRS performs manufacturing services for our clinical supply of both CTx-1301 and CTx-1302. Such services are performed under agreed statements of work. Under the terms of the Manufacturing Agreement, we have agreed to pay fees for PMRS’ performance of services as provided in each applicable statement of work.

The Manufacturing Agreement terminates in August 2024, unless terminated earlier. The term of each statement of work terminates upon completion of the services under such statement of work, unless terminated earlier. The term of the Manufacturing Agreement is automatically extended to conform to the term of any statement of work and may be extended by mutual consent. We may terminate the Manufacturing Agreement or any statement of work upon prior written notice to PMRS. The Manufacturing Agreement may be terminated by either party for breach, unless the breaching party has remedied such breach within thirty (30) days from the receipt by it of written notice thereof from the non-breaching party.

The Manufacturing Agreement includes customary terms relating to, among others, indemnification, intellectual property protection, confidentiality, remedies and warranties.

Patent and Know-How License Agreement with BDD Pharma Limited

We entered into a patent and know-how license agreement with BDD Pharma Limited (“BDD Pharma”) in August 2018, which we refer to as the BDD Pharma License Agreement. Pursuant to the BDD Pharma License Agreement, we have an exclusive license under technology, patents and know-how owned or controlled by BDD Pharma and relating to a barrier layer for controlled drug release in order to develop, manufacture, market, use, import, sell or otherwise supply and commercialize products that (i) deliver three distinct doses of dextroamphetamine, dexmethylphenidate or any methylphenidate based or any amphetamine based drug, (ii) have an extended release in vitro over a period of more than eight hours or (iii) are otherwise covered by the patents or are made, developed or used in accordance with the know-how. We also have the right to apply for marketing approvals and carry out clinical trials for the purpose of obtaining marketing approvals of such products. The rights granted to us are worldwide and exclusive in the field of the treatment of any disease or disorder in humans amenable to treatment with a methylphenidate based or amphetamine based drug or mixture or combination thereof. We have the right to sublicense the rights granted to us, subject to certain conditions.

BDD Pharma was entitled to a payment of \$198,625 in connection with execution of the BDD Pharma License Agreement. We may be required to pay BDD Pharma aggregate milestone payments of \$750,000 for each product in connection with clinical trial and regulatory milestones, with different dose strengths of a product being considered the same product for purposes of milestone payments. We may be required to pay BDD Pharma low to mid-single digit royalties on aggregate net sales of products. We may also be required to pay BDD Pharma low to mid-single digit royalties on aggregate net receipts of products based on sales made by our sublicensees and non-royalty sublicensing consideration that we receive.

Unless terminated earlier, the term of the BDD Pharma License Agreement continues until the later of the expiration of the last-to-expire of all the patents licensed to us or the last-to-expire of all of our payment obligations. Our royalty payment obligations expire on a product-by-product and country-by-country basis upon the later of 10 years from the first commercial sale of a product in a country or expiration of the last-to-expire patent covering the manufacture, use or sale of the product in a country. Currently, the last-to expire patent licensed from BDD Pharma expires in November of 2035. Upon expiration of our royalty payment obligations, the licenses granted to us become fully-paid, irrevocable and perpetual.

We, or BDD Pharma, may terminate the BDD Pharma License Agreement if there is an uncured material breach by the other party or in connection with the other party's insolvency. BDD Pharma may terminate the BDD Pharma License Agreement immediately upon written notice if we, any sublicensee or related party or affiliate directly challenges, or assists a third party in challenging, the validity or enforcement of the patents owned by BDD Biopharma or the secret nature of the know-how.

Human Capital Resources

To achieve our goals, it is crucial that we attract and retain talented employees. To facilitate this, we strive to maintain a safe and rewarding workplace, with opportunities for our employees to grow and develop in their careers, supported by competitive pay, comprehensive benefits and health and wellness programs, and programs that build connections among our employees. Our compensation program includes the granting of stock options to attract, retain, and incentivize employees.

As of December 31, 2021, we employed 16 full-time employees. Of these, seven are engaged in full-time research and development and manufacturing activities, and nine in full-time general and administrative functions. All of our employees are located in the United States. We utilize outside consultants and independent contractors to supplement our full-time workforce. None of our employees are represented by a labor organization or are under a collective-bargaining arrangement. We consider our employee relations to be good.

Corporate Information

Cingulate Inc. is a Delaware corporation that was formed in May 2021 to serve as a holding company. Cingulate Therapeutics LLC (CTx) is a Delaware limited liability company that was formed in November 2012. In connection with the consummation of our IPO, on September 29, 2021, Cingulate Inc. acquired Cingulate Therapeutics LLC (CTx) through the merger of a wholly owned acquisition subsidiary of Cingulate Inc. with and into CTx (the "Reorganization Merger"). As a result of the Reorganization Merger, CTx became a wholly-owned subsidiary of Cingulate Inc. Unless otherwise stated or the context otherwise requires, all information in this annual report reflects the consummation of the Reorganization Merger and the IPO.

Our primary executive offices are located at 1901 West 47th Place, Kansas City, Kansas 66205 and our telephone number is (913) 942-2300. Our website address is www.cingulate.com. The information contained in, or accessible through, our website does not constitute a part of this annual report. We have included our website address in this annual report solely as an inactive textual reference.

ITEM 1A. RISK FACTORS

Our future operating results could differ materially from the results described in this annual report due to the risks and uncertainties described below. You should consider carefully the following information about risks in evaluating our business. If any of the following risks actually occur, our business, financial condition, results of operations and future growth prospects would likely be materially and adversely affected. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may impair our business operations in these circumstances, the market price of our securities would likely decline. In addition, we cannot assure investors that our assumptions and expectations will prove to be correct. Important factors could cause our actual results to differ materially from those indicated or implied by forward-looking statements. See "Forward Looking Statements" for a discussion of some of the forward-looking statements that are qualified by these risk factors. Factors that could cause or contribute to such differences include those factors discussed below.

Summary of Risks

The following summarizes key risks and uncertainties that could materially adversely affect us. You should read this summary together with the more detailed description of each risk factor contained below.

- We are a clinical stage biopharmaceutical company with a limited operating history.

- We have incurred a history of operating losses and expect to continue to incur substantial costs for the foreseeable future. We are not currently profitable, and we may never achieve or sustain profitability.
- We will need to raise additional capital to complete the development and commercialization efforts for CTx-1301 and CTx-1302 and the product formulation and development for CTx-2103. If we are unable to raise capital when needed, we could be forced to delay, reduce or terminate certain of our development programs or other operations.
- A pandemic, epidemic, or outbreak of an infectious disease, such as COVID-19 could cause a disruption to the development of our product candidates.
- We are dependent primarily on the successful development and commercialization of our lead products candidates, CTx-1301 and CTx-1302 for the treatment of Attention Deficit Hyperactivity Disorder, which are in product development (CTx-1302) and clinical development (CTx-1301) and are not yet approved. We cannot give any assurance that we will receive regulatory approval for such product candidates or any other product candidates (i.e., CTx-2103), which is necessary before they can be commercialized.
- Even if we obtain regulatory approval for CTx-1301, CTx-1302 and/or CTx-2103, such approval may be limited, and we will be subject to stringent, ongoing government regulation. The commercial success of our product candidates, if approved, depends partially upon attaining market acceptance by physicians, patients, third-party payors, and the medical community.
- Social issues around the abuse of opioids and stimulants, including law enforcement concerns over diversion and regulatory efforts to combat abuse, could decrease the potential market for our product candidates.
- Our business is subject to extensive regulatory requirements, and our product candidates that obtain approval will be subject to ongoing and continued regulatory review, which may result in significant expense and limit our ability to commercialize such products.
- We rely on limited sources of supply for CTx-1301, CTx-1302, and/or CTx-2103 as these are scheduled products, and any disruption in the chain of supply may impact production and sales of CTx-1301, CTx-1302, and/or CTx-2103 and cause delays in developing and commercializing our product candidates and currently manufactured and commercialized product.
- We expect to rely on third parties to conduct our clinical trials and our regulatory submissions for our product candidates, and those third parties may not perform satisfactorily, including failing to meet deadlines for the completion of such trials and/or regulatory submissions.
- We may rely on third parties to perform many essential services for any products that we commercialize, including distribution, customer service, accounts receivable management, cash collection and adverse event reporting. If these third parties fail to perform as expected or to comply with legal and regulatory requirements, our ability to commercialize CTx-1301, CTx-1302, and/or CTx-2103 will be significantly impacted and we may be subject to regulatory sanctions.
- We will need to further increase the size and complexity of our organization in the future, and we may experience difficulties in executing our growth strategy and managing any growth.
- Our research and development is focused on discovering and developing product candidates, which may not make it to the market.
- We are increasingly dependent on information technology, and our systems and infrastructure face certain risks, including cybersecurity and data leakage risks.
- If our intellectual property related to our products or product candidates is not adequate, we may not be able to compete effectively in our market.
- An active trading market for our common stock or warrants may not be sustained.

Risks Related to Our Financial Position and Need for Capital

We are a clinical stage biopharmaceutical company with a limited operating history.

We are a clinical stage specialty pharmaceutical company with a limited operating history upon which you can evaluate our business and prospects. We must complete clinical studies and receive regulatory approval before commercial sales of a product can commence. The likelihood of success of our business plan must be considered in light of the problems, substantial expenses, difficulties, complications and delays frequently encountered in connection with developing and expanding early-stage businesses and the regulatory and competitive environment in which we operate. Pharmaceutical product development is a highly speculative undertaking, involves a substantial degree of risk and is a capital-intensive business.

Accordingly, you should consider our prospects in light of the costs, uncertainties, delays and difficulties frequently encountered by companies in the early stages of development, especially early-stage clinical pharmaceutical companies such as ours. Potential investors should carefully consider the risks and uncertainties that a company with a limited operating history will face. In particular, potential investors should consider that we cannot assure you that we will be able to, among other things:

- successfully implement or execute our business plan, and we cannot assure you that our business plan is sound;
- successfully complete product development/formulation, and clinical trials for CTx-1301, CTx-1302, and/or CTx-2103 as well as for the marketing of any or all products;
- successfully manufacture or have manufactured clinical product and establish commercial drug supply;
- secure adequate intellectual property protection for our products;
- attract and retain an experienced management and advisory team;
- raise sufficient funds in the capital markets or otherwise to effectuate our business plan, including the preparation and completion of our Phase 3 clinical program for CTx-1301;
- secure acceptance of our drug candidates in the medical community and with third-party payors and consumers;
- launch commercial sales of our drug candidates, whether alone or in collaboration with others;
- comply with post-marketing regulatory requirements; and
- utilize the funds that we do have and/or raise in the future to efficiently execute our business strategy.

If we cannot successfully execute any one of the foregoing, our business, financial condition, results of operations and future growth prospects would be materially and adversely affected.

We have incurred a history of operating losses and expect to continue to incur substantial costs for the foreseeable future. We are not currently profitable, and we may never achieve or sustain profitability.

We have never generated revenue from operations, are unlikely to generate revenues for several years, and are currently operating at a loss and expect our operating costs will increase significantly as we incur costs related to formulation/manufacturing development, the clinical trials for our drug candidates and operating as a public company. We expect to incur expenses without corresponding revenues unless and until we are able to obtain regulatory approval and successfully commercialize our lead product candidates, CTx-1301 and CTx-1302, and our third asset CTx-2103. We may never be able to obtain regulatory approval for the marketing of our drug candidates in any indication in the United States or internationally. Even if we obtain regulatory approval for CTx-1301 and/or CTx-1302, development expenses will continue to increase for CTx-2103 and any future assets. As CTx-1301 advances to clinical trials and pursuit of FDA approval, we will incur additional clinical development expenses.

We have incurred recurring losses since inception and had an accumulated deficit of approximately \$31.0 million as of December 31, 2020 and \$51.7 million as of December 31, 2021.

As of December 31, 2021, we had capital resources consisting of cash and cash equivalents of \$16.5 million. We will continue to expend substantial cash resources for the foreseeable future for the clinical development of our product candidates and development of any other indications and product candidates we may choose to pursue. These expenditures will include costs associated with manufacturing and clinical development, such as conducting clinical trials, manufacturing operations and product candidate supply, as well as marketing and selling any products approved for sale. In particular, our Phase 3 human trials in the United States will require substantial funds to complete. Because the conduct and results of any clinical trial are highly uncertain, we cannot reasonably estimate the actual amounts necessary to successfully complete the development and commercialization of our current and any future product candidates.

We are uncertain when or if we will be able to achieve or sustain profitability. If we achieve profitability in the future, we may not be able to sustain profitability in subsequent periods. Failure to become and remain profitable would impair our ability to sustain operations and adversely affect the price of our securities and our ability to raise capital.

We will need to raise additional capital to complete the development and commercialization efforts for CTx-1301 and CTx-1302 and the product formulation and development for CTx-2103. If we are unable to raise capital when needed, we could be forced to delay, reduce or terminate certain of our development programs or other operations.

We believe that our existing cash and cash equivalents, together with interest thereon, will be sufficient to fund our operations through late 2022. We have based these estimates, however, on assumptions that may prove to be wrong, and we could spend our available capital resources much faster than we currently expect or require more capital to fund our operations than we currently expect. If our currently anticipated expenditures for the development of our product candidates exceed our existing cash and cash equivalents, we will need to raise additional capital to fund our operations and continue to support our planned development and commercialization activities. The amount and timing of our future funding requirements will depend on many factors, including:

- the timing, rate of progress and cost of any clinical trials and other manufacturing/product development activities for our current and any future product candidates that we develop, in-license or acquire;
- the results of the clinical trials for our product candidates in the United States and any foreign countries;
- the timing of, and the costs involved in, FDA approval and any foreign regulatory approval of our product candidates, if at all;
- the number and characteristics of any additional future product candidates we develop or acquire;
- our ability to establish and maintain strategic collaborations, licensing, co-promotion or other arrangements and the terms and timing of such arrangements;
- the cost of commercialization activities if our current or any future product candidates are approved for sale, including manufacturing, marketing, sales and distribution costs;
- the degree and rate of market acceptance of any approved products;
- costs under our third-party manufacturing and supply arrangements for our current and any future product candidates and any products we commercialize;

- costs and timing of completion of any additional outsourced commercial manufacturing or supply arrangements that we may establish;
- costs of preparing, filing, prosecuting, maintaining, defending and enforcing any patent claims and other intellectual property rights associated with our product candidates;
- costs associated with prosecuting or defending any litigation that we are or may become involved in and any damages payable by us that result from such litigation;
- costs associated with any product recall that could occur;
- costs of operating as a public company;
- the emergence, approval, availability, perceived advantages, relative cost, relative safety and relative efficacy of alternative and competing products or treatments;
- costs associated with any acquisition or in-license of products and product candidates, technologies or businesses; and
- personnel, facilities and equipment requirements.

We cannot be certain that additional funding will be available on acceptable terms, or at all. In addition, future debt financing into which we may enter may impose upon us covenants that restrict our operations, including limitations on our ability to incur liens or additional debt, pay dividends, redeem our stock, make certain investments and engage in certain merger, consolidation or asset sale transactions.

If we are unable to raise additional capital when required or on acceptable terms, we may be required to significantly delay, scale back or discontinue the development or commercialization of one or more of our product candidates, restrict our operations or obtain funds by entering into agreements on unattractive terms, which would likely have a material adverse effect on our business, stock price and our relationships with third parties with whom we have business relationships, at least until additional funding is obtained. If we do not have sufficient funds to continue operations, we could be required to seek bankruptcy protection or other alternatives that would likely result in our securityholders losing some or all of their investment in us. In addition, our ability to achieve profitability or to respond to competitive pressures would be significantly limited.

In addition, if we are unable to secure sufficient capital to fund our operations, we may have to enter into strategic collaborations that could require us to share commercial rights to CTx-1301, CTx-1302, and/or CTx-2103 with third parties in ways that we currently do not intend or on terms that may not be favorable to us or our securityholders.

Raising additional capital may cause dilution to our stockholders restrict our operations or require us to relinquish rights to our product candidates.

Until such time, if ever, as we can generate substantial product revenue, we expect to finance our cash needs through public or private equity or debt financings, third-party funding, marketing and distribution arrangements, as well as other collaborations, strategic alliances and licensing arrangements, or any combination of these approaches. We do not have any committed external source of funds. To the extent that we raise additional capital through the sale of equity or convertible debt securities, your ownership interest in our company may be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect your rights as a stockholder. Debt and equity financings, if available, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as redeeming our shares, making investments, incurring additional debt, making capital expenditures, declaring dividends or placing limitations on our ability to acquire, sell or license intellectual property rights.

If we raise additional capital through future collaborations, strategic alliances or third-party licensing arrangements, we may have to relinquish valuable rights to our intellectual property, future revenue streams, research programs or product candidates, or grant licenses on terms that may not be favorable to us. If we are unable to raise additional capital when needed, we may be required to delay, limit, reduce or terminate our product candidates' development or future commercialization efforts, or grant rights to develop and market product candidates that we would otherwise develop and market ourselves.

Changes in tax laws may materially adversely affect our business, financial condition, results of operations and cash flows.

We are subject to tax laws, regulations and policies of the jurisdictions in which we do business, which may include U.S. federal, state, and local governments and taxing authorities in foreign jurisdictions. Changes in tax laws, as well as other factors, could cause us to experience fluctuations in our tax obligations and otherwise adversely affect our tax positions and/or our tax liabilities. The income tax rules in the jurisdictions in which we operate are constantly under review by taxing authorities and other governmental bodies. Changes to tax laws (which changes may have retroactive application) could adversely affect us or our stockholders. We are unable to predict what tax proposals may be proposed or enacted in the future or what effect such changes would have on our business, but such changes, to the extent they are brought into tax legislation, regulations, policies or practices, could affect our financial position and overall effective tax rates in the future in jurisdictions where we have operations, and increase the complexity, burden, and cost of tax compliance.

Our ability to use our net operating losses to offset future taxable income may be subject to certain limitations.

Our net operating loss carryforwards ("NOLs"), and certain other tax attributes could expire unused and be unavailable to offset future income tax liabilities because of their limited duration or because of restrictions under U.S. tax law. Under the Tax Cuts and Jobs Act, or the TCJA, federal NOLs generated in tax years ending after December 31, 2017 may be carried forward indefinitely. Under the CARES Act, NOL carryforwards arising in tax years beginning after December 31, 2017 and before January 1, 2021 may be carried back to each of the five tax years preceding the tax year of such loss. Because we did not have any revenue in such preceding tax years, such provision of the CARES Act is not relevant to us. The deductibility of federal NOLs, particularly for tax years beginning after December 31, 2020, may be limited. It is uncertain if and to what extent various states will conform to TCJA or the CARES Act.

In addition, Sections 382 and 383 of the Code, contain rules that limit the ability of a corporation that undergoes an "ownership change" (generally, any change in ownership of more than 50% of the corporation's stock over a three-year period) to utilize its pre-change NOLs and tax credit carryforwards to offset future taxable income. These rules generally operate by focusing on ownership changes involving stockholders owning directly or indirectly 5% or more of the stock of a corporation and any change in ownership arising from a new issuance of stock by the company. Generally, if an ownership change occurs, the yearly taxable income limitation on the use of NOLs and tax credit carryforwards and certain built-in losses is equal to the product of the applicable long-term, tax-exempt rate and the value of the corporation's stock immediately before the ownership change. As a result, following any such ownership change, we might be unable to offset our taxable income with losses, or our tax liability with credits, before such losses and credits expire, in which event we could incur larger federal and state income tax liabilities than we would have had we not experienced an ownership change.

The report of our independent registered public accounting firm for the fiscal years ended December 31, 2021 and 2020 contains an explanatory paragraph regarding substantial doubt about our ability to continue as a going concern.

The report of our independent registered public accounting firm on our financial statements as of and for the years ended December 31, 2021 and December 31, 2020 includes an explanatory paragraph indicating that there is substantial doubt about our ability to continue as a going concern. Since inception, we have experienced recurring operating losses and negative cash flows, and we expect to continue to generate operating losses and consume significant cash resources for the foreseeable future. Without additional financing, these conditions raise substantial doubt about our ability to continue as a going concern, meaning that we may be unable to continue operations for the foreseeable future or realize assets and discharge liabilities in the ordinary course of operations. If we are unable to obtain funding, we will be forced to delay, reduce or eliminate some or all of our research and development programs, product portfolio expansion or commercialization efforts, or we may be unable to continue operations. Although we continue to pursue these plans, there can be no assurance that we will be successful in obtaining sufficient funding on terms acceptable to us to fund continuing operations, if at all.

Risks Related to Development, Clinical Testing, Manufacturing and Regulatory Approval

A pandemic, epidemic, or outbreak of an infectious disease, such as COVID-19 could cause a disruption to the development of our product candidates.

Public health crises such as pandemics or similar outbreaks could adversely impact our business. In December 2019, a novel strain of a virus named SARS-CoV-2 (severe acute respiratory syndrome coronavirus 2), or coronavirus, which causes COVID-19 (coronavirus disease 2019), surfaced in Wuhan, China and has since spread worldwide. The coronavirus pandemic is evolving, and to date has led to the implementation of various responses, including government-imposed quarantines, travel restrictions and other public health safety measures. The extent to which the coronavirus impacts our operations or those of our third-party partners, including our development studies or clinical trial operations, will also depend on future occurrences, which are highly uncertain and cannot be predicted with confidence, including the duration of the outbreak, new information that will emerge concerning the severity of the coronavirus and the actions to contain the coronavirus or treat its impact, among others. Although the majority of our operations are conducted in the United States, the continued spread of COVID-19 globally could adversely impact our product candidate development or clinical trial operations in the United States and abroad, including our ability to recruit and retain patients and principal investigators and site staff who, as healthcare providers, may have heightened exposure to COVID-19. For example, similar to other biopharmaceutical companies, we may experience delays in enrolling our clinical trials currently planned for 2022 (CTx-1301 and CTx-1302). COVID-19 may also affect employees of third-party clinical research organizations (CROs) located in affected geographies that we rely upon to carry out our clinical trials. In addition, the patient populations that our lead and other core product candidates target may be particularly susceptible to COVID-19, which may make it more difficult for us to identify patients able to enroll in our future clinical trials and may impact the ability of enrolled patients to complete any such trials. Any negative impact COVID-19 has to patient enrollment or treatment or the execution of our product candidates could cause costly delays to clinical trial activities, which could adversely affect our ability to obtain regulatory approval for and to commercialize our product candidates, increase our operating expenses, and have a material adverse effect on our financial results.

Additionally, timely enrollment in planned clinical trials is dependent upon clinical trial sites which will be adversely affected by global health matters, such as pandemics. We plan to conduct clinical trials for our product candidates in geographies that are currently being affected by the coronavirus. Some factors from the coronavirus outbreak that may delay or otherwise adversely affect enrollment in the clinical trials of our product candidates, as well as our business generally, include:

- the potential diversion of healthcare resources away from the conduct of clinical trials to focus on pandemic concerns, including the attention of physicians serving as our clinical trial investigators, hospitals serving as our clinical trial sites and hospital staff supporting the conduct of our prospective clinical trials;
- limitations on travel that could interrupt key trial and business activities, such as clinical trial site initiations and monitoring, domestic and international travel by employees, contractors or patients to clinical trial sites, including any government-imposed travel restrictions or quarantines that will impact the ability or willingness of patients, employees or contractors to travel to our clinical trial sites or secure visas or entry permissions, a loss of face-to-face meetings and other interactions with potential partners, any of which could delay or adversely impact the conduct or progress of our prospective clinical trials;
- the potential negative effect on the operations of our third-party manufacturers;
- interruption in United States or global shipping, affecting the transport of raw materials for our products, clinical trial materials, such as patient samples, investigational drug product and conditioning drugs and other supplies used in our prospective clinical trials; and
- business disruptions caused by potential workplace, laboratory and office closures and an increased reliance on employees working from home, disruptions to or delays in ongoing laboratory experiments and operations, staffing shortages, travel limitations or mass transit disruptions, any of which could adversely impact our business operations or delay necessary interactions with local regulators, ethics committees and other important agencies and contractors.

We have taken temporary precautionary measures intended to help minimize the risk of the virus to our employees, including allowing our employees to work remotely, suspending all non-essential travel worldwide for our employees and discouraging employee attendance at industry events and in-person work-related meetings, which could negatively affect our business.

We are dependent primarily on the successful development and commercialization of our lead product candidates, CTx-1301 and CTx-1302 for the treatment of Attention Deficit / Hyperactivity Disorder (“ADHD”), which are in product development (CTx-1302) and clinical development (CTx-1301) and are not yet approved. We cannot give any assurance that we will receive regulatory approval for such product candidates or any other product candidates (e.g., CTx-2103), which is necessary before they can be commercialized.

We are still in the early stages of development of our two lead product candidates and have not completed development of and/or obtained regulatory approval for any of our product candidates. Development will require the commitment of substantial financial resources, extensive product candidate development, and clinical trials. This process takes years of effort without any assurance of ultimate success.

Our ability to generate revenue from our product candidates, which we do not expect will occur for several years, if ever, will depend heavily on their successful development, regulatory approval, and eventual commercialization. The success of our product candidates will depend on many factors, including, but not limited to:

- successful completion of product development and requisite clinical trials;
- successful completion and achievement of endpoints in our clinical trials;
- demonstration that the risks involved with our product candidates are outweighed by the benefits;
- successful development of our manufacturing processes for our product candidates, including entering into and maintaining arrangements with third-party manufacturers;
- successful completion of an FDA preapproval inspection of the facilities used to manufacture our product candidates, as well as select clinical trial sites;
- receipt of timely marketing approvals from applicable regulatory authorities, including the determination by the United States Drug Enforcement Administration (the “DEA”) of the controlled substance schedule for a product candidate, taking into account the recommendation of the FDA;
- obtaining and maintaining patent, trademark and trade secret protection and regulatory exclusivity for our product candidates and otherwise protecting our rights in our intellectual property portfolio;
- maintaining compliance with regulatory requirements, including current good manufacturing practices, or cGMPs;
- launching commercial sales of product candidates, if and when approved, whether alone or in collaboration with others;
- acceptance of our drug product candidates, if approved, by patients, the medical community and third-party payors;
- competing effectively with other therapies;
- obtaining and maintaining healthcare coverage and adequate reimbursement; and
- maintaining a continued acceptable safety and efficacy profile of the drug products following approval.

If we are unable to achieve one or more of the above factors, many of which are beyond our control, in a timely manner or at all, we could experience significant delays and increased costs or an inability to obtain regulatory approvals or commercialize our product candidates. Even if regulatory approvals are obtained, we may never be able to successfully commercialize any of our product candidates. Accordingly, we cannot assure you that we will be able to generate sufficient revenue through the sale of our product candidates or any future product candidates to continue operations.

Our product development efforts with respect to CTx-1301, CTx-1302 and/or CTx-2103 may fail for many reasons, including but not limited to:

- the failure of the product candidate in clinical studies;
- adverse patient reactions to the product candidate or indications of other safety concerns;
- insufficient clinical trial data to support the effectiveness or superiority of the product candidate;
- the inability to manufacture sufficient quantities of the product candidate for development or commercialization activities in a timely and cost-efficient manner; and
- changes in the regulatory environment, including pricing and reimbursement, that make development of a new product or of an existing product for a new indication no longer attractive.

Premarket review of our product candidates by the FDA or other regulatory authorities is a lengthy and uncertain process and approval may be delayed, limited or denied, any of which would adversely affect our ability to generate operating revenues.

We are not permitted to market our drug product candidates in the United States until we receive the respective approval of an NDA from the FDA. The time required to obtain approval, if any, by the FDA is unpredictable, but typically takes multiple years following the commencement of clinical trials, and depends upon numerous factors, including the substantial discretion of the regulatory authorities and the type, complexity and novelty of the product candidates involved. We have not submitted a marketing application such as an NDA to the FDA or any similar application to any other regulatory authority in any jurisdiction.

The FDA has substantial discretion in the drug approval process, including the ability to delay, limit or deny approval of a product candidate for many reasons. For example, the FDA:

- could determine that we cannot rely on the 505(b)(2) regulatory approval pathway for CTx-1301, CTx-1302, CTx-2103 or any other product candidate that we may identify and develop;
- could determine that the information provided by us as part of an IND or NDA is inadequate, contains clinical deficiencies or otherwise fails to demonstrate safety and effectiveness of any of our product candidates for any indication;
- may not find the data from bioequivalence studies and/or clinical trials sufficient to support the submission of an NDA or to obtain marketing approval in the United States, including any findings that the safety risks outweigh clinical and other benefits of our product candidates;
- may disagree with our clinical trial designs or our interpretation of data from product development manufacturing data, bioequivalence studies and/or clinical trials, or may change the requirements for approval even after it has reviewed and commented on the design for our trials;
- may determine that we inappropriately relied on a certain listed drug or drugs for our 505(b)(2) NDA or that approval of our applications for CTx-1301, CTx-1302, CTx-2103 or any other product candidate is blocked by patent or non-patent exclusivity of the listed drug or drugs;

- may identify deficiencies in the manufacturing processes or facilities of third-party manufacturers with which we enter into agreements for the supply of the API used in our product candidates;
- may identify deficiencies in our own manufacturing processes or our proposed scale-up of the manufacturing processes or facilities for the production of our product candidates;
- may approve our product candidates for fewer or more limited indications than we request, or may grant approval contingent on the performance of costly post-approval clinical trials;
- may change its approval policies or adopt new regulations; or
- may not approve the labeling claims that we believe are necessary or desirable for the successful commercialization of our product candidates.

The time and expense of the approval process, as well as the unpredictability of future clinical trial results and other contributing factors, may result in our failure to obtain regulatory approval to market, in the United States or other jurisdictions, CTx-1301, CTx-1302, our discovery stage programs, or any other drug candidates we are developing or may seek to develop in the future, which would significantly harm our business, results of operations and prospects. In such case, we may also not have the resources to conduct new clinical trials and/or we may determine that further clinical development of any such drug candidate is not justified and may discontinue any such programs.

Clinical testing is expensive, difficult to design and implement, can take many years to complete and is outcome uncertain. We may incur additional costs or experience delays in completing, or ultimately be unable to complete, the commercialization of our product candidates.

It is impossible to predict when or if any of our product candidates will prove effective or safe in humans and will receive regulatory approval. Before obtaining marketing approval from regulatory authorities for the sale of any product candidate, we must complete product/manufacturing development and then conduct clinical trials to demonstrate the safety and efficacy of our product candidates in humans. Clinical trials are expensive, difficult to design and implement, can take many years to complete and is uncertain as to outcome. A failure of one or more clinical trials can occur at any stage of development. The outcome of early clinical trials may not be predictive of the success of later clinical trials, and interim results of a clinical trial do not necessarily predict final results. Interpretation of results from early, usually smaller, studies that suggest positive trends in some subjects, requires caution. Results from later stages of clinical trials enrolling more subjects may fail to show the desired safety and efficacy results or otherwise fail to be consistent with the results of earlier trials of the same product candidates. Later clinical trial results may not replicate earlier clinical trials for a variety of reasons, including differences in trial design, different trial endpoints, or lack of trial endpoints in studies, subject population, number of subjects, subject selection criteria, trial duration, drug dosage and formulation and lack of statistical power in the earlier studies. Moreover, clinical data are often susceptible to varying interpretations and analyses, and many companies that have believed their product candidates performed satisfactorily in early and later stage clinical trials have nonetheless failed to obtain marketing approval of their products.

We may experience numerous unforeseen events during, or as a result of, clinical trials that could delay or prevent our ability to receive marketing approval or commercialize our product candidates, including but not limited to:

- inability to generate satisfactory preclinical, toxicology or other in vivo or in vitro data capable of supporting the initiation or continuation of clinical trials;
- regulators or institutional review boards may not authorize us or our investigators to commence a clinical trial, conduct a clinical trial at a prospective trial site or amend clinical trial protocols as needed;
- we may experience delays in reaching, or fail to reach, agreement on acceptable clinical trial contracts or clinical trial protocols with prospective trial sites and contract research organizations, or CROs;

- inability, delay or failure in identifying and maintaining a sufficient number of trial sites, many of which may already be engaged in other clinical programs;
- clinical trials of our product candidates may produce negative or inconclusive results, including failure to demonstrate statistical significance in cases where that is required, and we may decide, or regulators may require us, to conduct additional clinical trials or abandon drug development programs;
- the number of subjects required for clinical trials of our product candidates may be larger than we anticipate, enrollment in these clinical trials may be slower than we anticipate, or participants may drop out of these clinical trials at a higher rate than we anticipate;
- failure of patients to complete a trial or return for post-treatment follow-up;
- inability to monitor patients adequately during or after treatment;
- clinical sites and investigators deviating from trial protocols, failing to conduct the trial in accordance with regulatory requirements or dropping out of a trial;
- our third-party contractors may fail to comply with regulatory requirements or trial protocols, or meet their contractual obligations to us in a timely manner, or at all;
- regulators or institutional review boards may require that we or our investigators suspend or terminate clinical research for various reasons, including noncompliance with regulatory requirements or a finding that the participants are being exposed to unacceptable health risks;
- the cost of clinical trials of our product candidates may be greater than we anticipate, including if we are not able to pursue the 505(b)(2) NDA pathway for approval of our product candidates;
- failure to initiate or delay of or inability to complete a clinical trial as a result of a clinical hold imposed by the FDA or comparable regulatory authority due to observed safety findings or other reasons;
- regulatory authorities may not agree with our trial design or implementation;
- inability to manufacture sufficient quantities of a drug candidate of acceptable quality for use in clinical trials; and
- our product candidates may have undesirable side effects or other unexpected characteristics, causing us or our investigators, regulators or institutional review boards to suspend or terminate the trials.

If we are required to conduct additional clinical trials or other testing of our product candidates beyond those that we currently contemplate, if we are unable to successfully complete clinical trials of our product candidates or other testing, if the results of these trials or tests are not positive or are only modestly positive or if there are safety concerns, we may:

- be delayed in obtaining marketing approval for our product candidates;
- not obtain marketing approval at all;
- obtain approval for indications or patient populations that are not as broad as intended or desired;
- obtain approval but without the claims necessary for us to successfully commercialize our product candidates;
- obtain approval with labeling that includes significant use or distribution restrictions or safety warnings;
- be subject to additional post-marketing testing, surveillance, or other requirements; or

- have the product removed from the market after obtaining marketing approval.

Our development costs may also increase if we experience delays in testing, clinical trials or obtaining marketing approvals. We do not know whether any of our clinical trials will begin as planned, will need to be restructured or will be completed on schedule, or at all. Significant product manufacturing or clinical trial delays also could shorten any periods during which we may have the exclusive right to commercialize our product candidates or allow our competitors to bring products to market before we do and impair our ability to successfully commercialize our product candidates.

Obtaining regulatory approval for clinical trials of CTx-1301 and CTx-1302 in children and adolescents may require additional studies and/or longer duration of studies since the requirements for regulatory approval for the pediatric populations are more stringent.

Pediatric drug development may require additional studies to determine safe dosing and long-term monitoring. These additional studies may require investment of significant additional resources beyond those required for regulatory approval of the drugs in adults. Approval of CTx-1301 and CTx-1302 may be delayed due to these additional requirements and this may have an adverse effect on the commercial prospects of CTx-1301 and CTx-1302, as well as delay our ability to generate product revenue, possibly materially. In addition, as a result of COVID-19 (or other potential pandemics), there may be a smaller pool of children from which we can enroll for our clinical trials. We cannot guarantee that we will receive regulatory approval to commercialize our product candidates in the pediatric populations or the adult population.

Changes in methods of product candidate manufacturing or formulation may result in additional costs or delay.

As product candidates are developed through nonclinical testing and early to late-stage clinical trials towards potential approval and commercialization, various aspects of the development program, such as manufacturing methods and formulation, may be altered along the way in an effort to optimize processes and results. Such changes may not achieve these intended objectives. Any of these changes could cause our product candidates to perform differently and affect the results of planned clinical trials or other future clinical trials conducted with the altered materials, or they may alter the safety or risk profile of the product candidate that could involve further FDA or other regulatory agency inquiries. Such changes may also require additional testing, FDA notification or FDA approval. This could delay completion of clinical trials, require the performance of bridging clinical trials or the repetition of one or more clinical trials, increase clinical trial costs, delay approval of our product candidates and jeopardize our ability to commence product sales and generate revenue.

Our lead product candidates CTx-1301 and CTx-1302 contain controlled substances, the manufacture, use, sale, importation, exportation, prescribing and distribution of which are subject to regulation by the DEA.

Before we can commercialize our product candidates, the DEA will need to determine the controlled substance schedule, taking into account the recommendation of the FDA. This may be a lengthy process that could delay our marketing of a product candidate and could potentially diminish any regulatory exclusivity periods for which we may be eligible. Our CTx-1301 and CTx-1302 products, if approved, will be regulated as “controlled substances” as defined in the Controlled Substances Act of 1970 (CSA) and the implementing regulations of the DEA, which establish registration, security, recordkeeping, reporting, storage, distribution, importation, exportation, inventory, quota and other requirements administered by the DEA. These requirements are applicable to us, our contract manufacturers and distributors, as well as prescribers and dispensers of our product candidates. The DEA regulates the handling of controlled substances through a closed chain of distribution. This control extends to the equipment and raw materials used in the manufacturing and packaging, in order to prevent loss and diversion into illicit channels of commerce. A number of states and foreign countries also independently regulate these drugs as controlled substances.

The DEA regulates controlled substances as Schedule I, II, III, IV or V substances. An approved pharmaceutical product may be listed as Schedule II, III, IV or V, depending on the potential for abuse and physical or psychological dependence, with Schedule II substances considered to present the highest risk of abuse and Schedule V substances the lowest relative risk of abuse among such substances. Schedule II drugs are those that meet the following characteristics:

- the drug has a high potential for abuse;
- the drug has a currently accepted medical use in treatment in the United States or a currently accepted medical use with severe restrictions; and
- abuse of the drug may lead to severe psychological or physical dependence.

The active pharmaceutical ingredients in CTx-1301 and CTx-1302 (dexamethylphenidate and dextroamphetamine) are currently listed as Schedule II products. We expect that some of our future product candidates may also be listed by the DEA as Schedule II controlled substances under the CSA. Consequently, the manufacturing, shipping, storing, selling and using of the products, if approved, will be subject to a high degree of regulation. Schedule II drugs are subject to the strictest requirements for registration, security, recordkeeping and reporting, and the distribution, prescribing and dispensing of these drugs are highly regulated.

Annual registration is required for any facility that manufactures, distributes, dispenses, imports or exports any controlled substance. The registration is specific to the particular location, activity and controlled substance schedule.

In addition, a DEA quota system controls and limits the availability and production of controlled substances, and our products may be subject to the DEA's production and procurement quota scheme. The DEA establishes an aggregate quota for how much of a controlled substance may be produced in total in the United States based on the DEA's estimate of the quantity needed to meet legitimate scientific and medicinal needs. Manufacturers of controlled substances are required to apply for quotas on an annual basis. If we or our contract manufacturers or suppliers do not obtain a sufficient quota from DEA, we may not be able to obtain sufficient quantities of these controlled substances in order to complete our clinical trials or meet commercial demand, if our product candidates are approved for marketing.

Because of their restrictive nature, these laws and regulations could limit commercialization of our product candidates containing controlled substances. Failure to comply with these laws and regulations could also result in withdrawal of our DEA registrations, disruption in manufacturing and distribution activities, consent decrees, criminal and civil penalties and state actions, among other consequences.

If we experience delays or difficulties in the enrollment of subjects in clinical trials, our receipt of necessary regulatory approvals could be delayed or prevented.

We may not be able to initiate or continue clinical trials for our product candidates if we are unable to locate and enroll a sufficient number of eligible subjects to participate in these trials as required by the FDA or similar regulatory authorities outside the United States. We cannot predict how successful we will be at enrolling subjects in future clinical trials. If we are not successful at enrolling subjects in one clinical trial, it may affect when we are able to initiate our next clinical trial, which could result in significant delays in our efforts to pursue regulatory approval of and commercialize our product candidates. In addition, some of our competitors have ongoing clinical trials to treat the same indications as our product candidates, and subjects who would otherwise be eligible for our clinical trials may instead enroll in clinical trials of our competitors. Subject enrollment is affected by other factors including, but not limited to:

- the size and nature of the subject population specified in the trial protocol;
- the eligibility criteria for the study in question;
- the perceived risks and benefits of the product candidate under study;
- the fact that the product candidate may be a controlled substance;
- severe or unexpected drug-related adverse events experienced by subjects in a clinical trial;

- the availability of drugs approved to treat the diseases or conditions under study;
- the extent of efforts to facilitate timely enrollment in clinical trials;
- the patient referral practices of physicians;
- the ability to obtain and maintain subject informed consent;
- the ability to retain subjects in the clinical trial and their return for follow-up;
- the clinical trial design, including required tests, procedures and follow-up;
- the ability to monitor subjects adequately during and after treatment;
- delays in adding new investigators and clinical sites;
- withdrawal of clinical trial sites from clinical trials;
- the presence of other drug candidates in clinical development for the same indication; and
- the proximity and availability of clinical trial sites for prospective subjects.

Our inability to enroll a sufficient number of subjects for clinical trials would result in significant delays and could require us to abandon one or more clinical trials altogether. Enrollment delays in these clinical trials may result in increased development costs for our product candidates, which could cause our value to decline and limit our ability to obtain additional financing.

Our clinical trials may fail to demonstrate the safety and efficacy of our product candidates, or serious adverse or unacceptable side effects may be identified during the development of our product candidates, which could prevent or delay regulatory approval and commercialization, increase our costs or necessitate the abandonment or limitation of the development of some or all of our product candidates.

Before obtaining regulatory approvals for the commercial sale of our product candidates, we must demonstrate thorough, lengthy, complex and expensive product development and clinical trials that our product candidates are both safe and effective for use in each target indication, and failures can occur at any stage of development. Clinical trials often fail to demonstrate safety and efficacy of the product candidate studied for the target indication.

As with many pharmaceutical products, treatment with our product candidates may produce undesirable side effects or adverse reactions or events. Although our product candidates contain active pharmaceutical ingredients that have already been approved, meaning that the side effects arising from the use of the active pharmaceutical ingredient or class of drug in our product candidates are generally known, our product candidates still may cause undesirable side effects.

If our product candidates are associated with serious side effects in clinical trials or have characteristics that are unexpected, we may need to limit development to more narrow uses or subpopulations in which the side effects or other characteristics are less prevalent, less severe or more acceptable from a risk-benefit perspective. The FDA or an institutional review board may also require that we suspend, discontinue, or limit our clinical trials based on safety information to limit potential serious harm to enrolled subjects. Such findings could further result in regulatory authorities failing to provide marketing authorization for our product candidates.

Our product candidates may cause adverse effects or have other properties that could delay or prevent their regulatory approval or limit the scope of any approved label or market acceptance, or result in significant negative consequences following marketing approval, if any.

If any of our products cause serious or unexpected side effects after receiving market approval, a number of potentially significant negative consequences could result, including, but not limited to:

- the FDA may require additional clinical testing or clinical trials or costly post-marketing testing and surveillance to monitor the safety and efficacy of the product;
- regulatory authorities may withdraw their approval of the product or impose restrictions on its distribution;
- we may be required to create a medication guide outlining the risks of such side effects for distribution to patients, or we may be required to implement a Risk Evaluation and Mitigation Strategy (REMS) to ensure that the benefits of the product outweigh the risks;
- regulatory authorities may require the addition of labeling statements, such as warnings or contraindications;
- we may be required to change the way the product is distributed or administered;
- we may need to voluntarily recall our products;
- we could be sued and held liable for harm caused to individuals exposed to or taking our product candidates; or
- our reputation may suffer.

Any of these events could prevent us from achieving or maintaining market acceptance of the affected product or product candidate and could substantially increase the costs of commercializing our products and product candidates.

If the FDA does not conclude that our product candidates are sufficiently bioequivalent, or have comparable bioavailability, to approved reference drugs, or if the FDA does not allow us to pursue the 505(b)(2) NDA pathway as anticipated, the approval pathway for our product candidates will likely take significantly longer, cost significantly more and entail significantly greater complications and risks than anticipated, and the FDA may not ultimately approve our product candidates.

Section 505(b)(2) of the FDCA permits the filing of an NDA where at least some of the information required for approval comes from investigations that were not conducted by or for the applicant and for which the applicant has not obtained a right of reference or use from the person by or for whom the investigations were conducted. The FDA interprets Section 505(b)(2) of the FDCA, for the purposes of approving an NDA, to permit the applicant to rely, in part, upon published literature or the FDA's previous findings of safety and efficacy for an approved product. The FDA may also require the applicant to perform additional clinical trials or measurements to support any deviation from the previously approved product. The FDA may then approve the new product candidate for all or some of the label indications for which the referenced product has been approved, as well as for any new indication sought by the Section 505(b)(2) applicant. The FDA may require an applicant's product label to have all or some of the limitations, contraindications, warnings or precautions included in the reference product's label, including a black box warning, or may require the label to have additional limitations, contraindications, warnings or precautions. A key element of our strategy is to seek FDA approval for our current product candidates, CTx-1301, CTx-1302, and CTx-2103, through the 505(b)(2) NDA pathway. If the FDA determines that our product candidates do not meet the requirements of Section 505(b)(2), or if we cannot demonstrate bioequivalence or comparable bioavailability of our product candidates to approved products, we may need to conduct additional clinical trials, provide additional data and information, and meet additional standards for regulatory approval applicable to a traditional NDA submitted pursuant to Section 505(b)(1). Moreover, even if the FDA does allow us to pursue the 505(b)(2) NDA pathway, depending on the product candidate, we may still need to conduct additional clinical trials, including clinical trials to assess product safety or efficacy. If this were to occur, the time and financial resources required to obtain FDA approval for our product candidates, and complications and risks associated with our product candidates, would likely substantially increase.

Moreover, an inability to pursue the 505(b)(2) NDA pathway could result in new competitive products reaching the market more quickly than our product candidates, which could hurt our competitive position and our business prospects. Even if we are allowed to pursue the 505(b)(2) NDA pathway, we cannot assure that our product candidates will receive the requisite approvals for commercialization on a timely basis, if at all. Other companies may achieve product approval of similar products before we do, which would delay our ability to obtain product approval, and expose us to greater competition.

In addition, notwithstanding the approval of a number of products by the FDA under 505(b)(2) over the last few years, some pharmaceutical companies and others have objected to the FDA's interpretation of 505(b)(2) of the FDCA to allow reliance on the FDA's prior findings of safety and effectiveness. If the FDA changes its interpretation of Section 505(b)(2), or if the FDA's interpretation of 505(b)(2) is successfully challenged in court it could delay or even prevent the FDA from approving any 505(b)(2) NDA that we submit in the future. Moreover, the FDA has adopted an interpretation of the three-year exclusivity provisions whereby a 505(b)(2) application can be blocked by exclusivity even if it does not rely on the previously-approved drug that has exclusivity (or any safety or effectiveness information regarding that drug). Under the FDA's interpretation, the approval of one or more of our product candidates may be blocked by exclusivity awarded to a previously-approved drug product that shares certain innovative features with our product candidates, even if our 505(b)(2) application does not identify the previously-approved drug product as a listed drug or rely upon any of its safety or efficacy data. Any failure to obtain regulatory approval of our product candidates would significantly limit our ability to generate revenues, and any failure to obtain such approval for all of the indications and labeling claims we deem desirable could reduce our potential revenues.

Even if our product candidates are approved under 505(b)(2) regulatory pathway, the approval may be subject to limitations on the indicated uses for which the products may be marketed, including more limited subject populations than we request, may require that contraindications, warnings or precautions be included in the product labeling, including a black box warning, may be subject to other conditions of approval, or may contain requirements for costly post-marketing clinical trials, testing and surveillance to monitor the safety or efficacy of the products, or other post-market requirements, such as a REMS. The FDA also may not approve a product candidate with a label that includes the labeling claims necessary or desirable for the successful commercialization of that product candidate.

Obtaining and maintaining regulatory approval of our product candidates in one jurisdiction does not mean that we will be successful in obtaining regulatory approval of our product candidates in other jurisdictions.

Even if we obtain and maintain regulatory approval of our product candidates in one jurisdiction, such approval does not guarantee that we will be able to obtain or maintain regulatory approval in any other jurisdiction, but a failure or delay in obtaining regulatory approval in one jurisdiction may have a negative effect on the regulatory approval process in others. For example, even if the FDA grants marketing approval of a product candidate, comparable regulatory authorities in foreign jurisdictions must also approve the manufacturing, marketing and promotion of the product candidate in those countries. Approval procedures vary among jurisdictions and can involve requirements and administrative review periods different from those in the United States, including additional nonclinical studies or clinical trials as investigations conducted in one jurisdiction may not be accepted by regulatory authorities in other jurisdictions.

Obtaining foreign regulatory approvals and compliance with foreign regulatory requirements could result in significant delays, difficulties and costs for us and could delay or prevent the introduction of our products in certain countries. If we fail to comply with the regulatory requirements in international markets and/or to receive applicable marketing approvals, our target market will be reduced and our ability to realize the full market potential of our product candidates will be harmed.

Moreover, the acceptance of study data from clinical trials conducted outside the United States or another jurisdiction by the FDA or applicable foreign regulatory authority may be subject to certain conditions. In cases where data from foreign clinical trials are intended to serve as the basis for marketing approval in the United States, the FDA will generally not approve the application on the basis of foreign data alone unless (i) the data are applicable to the U.S. population and U.S. medical practice and (ii) the trials were performed by clinical investigators of recognized competence and pursuant to GCP regulations. Additionally, the FDA's clinical trial requirements, including sufficient size of patient populations and statistical powering, must be met. Many foreign regulatory bodies have similar approval requirements. In addition, any foreign trials would be subject to the applicable local laws of the foreign jurisdictions where the trials are conducted. There can be no assurance that the FDA or any applicable foreign regulatory authority will accept data from trials conducted outside of the United States or the applicable jurisdiction.

We may be unable to successfully complete our Phase 3 clinical trials for CTx-1301 or any future clinical trials for any other product candidates.

The conduct of a Phase 3 clinical trial is a complicated process. Although members of our management team have conducted Phase 3 clinical trials in the past while employed at other companies, we as a company have not conducted a Phase 3 clinical trial before, and as a result may require more time and incur greater costs than we anticipate. Failure to include the correct treatment regimen, complete, or delays in, our Phase 3 clinical trials, could prevent us from or delay us in commencing future clinical trials for CTx-1301, obtaining regulatory approval of and commercializing our product candidates, which would adversely impact our financial performance. In addition, some of our competitors are currently conducting clinical trials for product candidates that treat the same indications as CTx-1301, and patients who are otherwise eligible for our clinical trials may instead enroll in clinical trials of our competitors' product candidates.

Patient enrollment is affected by other factors including:

- the severity of the disease under investigation;
- the eligibility criteria for the study in question;
- the perceived risks and benefits of the product candidate under study;
- the efforts to facilitate timely enrollment in clinical trials;
- the patient referral practices of physicians;
- the ability to monitor patients adequately during and after treatment;
- the proximity and availability of clinical trial sites for prospective patients; and
- factors we may not be able to control, such as potential pandemics that may limit subjects, principal investigators or staff or clinical site availability (e.g., the outbreak of COVID-19).

Even if we obtain regulatory approval for CTx-1301, CTx-1302, and/or CTx-2103, such approval may be limited, and we will be subject to stringent, ongoing government regulation.

Even if regulatory authorities approve CTx-1301, CTx-1302, and/or CTx-2103 for commercialization, the FDA could approve less than the full scope of indications or labeling claims that we seek or may otherwise require special warnings or other restrictions on their use or marketing. Regulatory authorities may limit the segments of the target population to which we or others may market CTx-1301, CTx-1302, and/or CTx-2103 or limit the target population for our other product candidates. The advantages of CTx-1301, CTx-1302, and/or CTx-2103 may not be agreed to by the FDA or other regulatory authorities or such authorities may otherwise object to the inclusion of related claims in product labeling or advertising and, as a result CTx-1301, CTx-1302, and/or CTx-2103 may not have our expected competitive advantages when compared to other similar products. Any new legislation addressing drug safety issues could result in delays in product development or commercialization, or increased costs to assure compliance.

If we obtain regulatory approval for any of our product candidates, activities such as the manufacturing processes, labeling, packaging, distribution, adverse event reporting, storage, advertising, promotion and record keeping for the products will be subject to extensive and ongoing regulatory requirements. These requirements include submissions of safety and other post-marketing information and reports, registration, as well as continued compliance with cGMPs. The FDA or comparable regulatory authorities may also impose requirements for costly post-marketing nonclinical studies or clinical trials (often called “Phase 4 trials”) and post-marketing surveillance to monitor the safety or efficacy of the product. If we or a regulatory authority discover previously unknown problems with a product, such as adverse events of unanticipated severity or frequency, production problems or issues with the facility where the product is manufactured or processed, such as product contamination or significant not-compliance with applicable cGMPs, a regulator may impose restrictions on that product, the manufacturing facility or us. Accordingly, we and our contract manufacturing organizations (CMOs) will be subject to continual review and inspections to assess compliance with cGMP and adherence to commitments made in any NDA submission to the FDA or any other type of domestic or foreign marketing application. If we or our third-party providers, including our contract manufacturing organizations, or CMOs, fail to comply fully with applicable regulations, then we may be required to initiate a recall or withdrawal of our products.

In addition, later discovery of previously unknown problems with a product, including adverse events of unanticipated severity or frequency, or with our third-party manufacturers or manufacturing processes, or failure to comply with regulatory requirements, may result in the following, among other things:

- restrictions on the manufacturing of the product, the approved manufacturers or the manufacturing process;
- restrictions on the labeling or marketing of a product;
- restrictions on product distribution or use;
- requirements to conduct post-marketing studies or clinical trials;
- withdrawal of the product from the market;
- product recalls;
- warning or untitled letters from the FDA or comparable notice of violations from foreign regulatory authorities;
- refusal of the FDA or other applicable regulatory authority to approve pending applications or supplements to approved applications;
- fines, restitution or disgorgement of profits or revenues;
- suspension or withdrawal of marketing approvals;
- suspension of any of our ongoing clinical trials;
- product seizure or detention or refusal to permit the import or export of products; and
- consent decrees, injunctions or the imposition of civil or criminal penalties.

In addition, the FDA’s or other regulatory authorities’ policies may change and additional government regulations may be enacted that could prevent, limit or delay regulatory approval of our drug candidates. If we are slow or unable to adapt to changes in existing requirements or the adoption of new requirements or policies, or if we are otherwise not able to maintain regulatory compliance, we may lose any marketing approval that we may have obtained, which would adversely affect our business, prospects and ability to achieve or sustain profitability.

The FDA’s policies may change and additional government regulations may be enacted that could prevent, limit or delay marketing approval of our product candidates. If we are slow or unable to adapt to changes in existing requirements or the adoption of new requirements or policies, or if we are not able to maintain regulatory compliance, we may lose any marketing approval that we may have obtained, which would adversely affect our business, prospects and ability to achieve or sustain profitability.

Our employees, independent contractors, principal investigators, consultants, vendors, CROs, CMOs and any partners with which we may collaborate may engage in misconduct or other improper activities, including noncompliance with regulatory standards and requirements.

We are exposed to the risk that our employees, independent contractors, principal investigators, consultants, vendors, CROs, CMOs, and any partners with which we may collaborate may engage in fraudulent or other illegal activity. Misconduct by these persons could include intentional, reckless or negligent conduct or unauthorized activity that violates laws or regulations, including those laws requiring the reporting of true, complete and accurate information to the FDA or other regulatory authorities; manufacturing standards; federal, state and foreign healthcare fraud and abuse laws; data privacy laws and regulations; or laws that require the true, complete and accurate reporting of financial information or data. In particular, sales, marketing and other business arrangements in the healthcare industry are subject to extensive laws intended to prevent fraud, kickbacks, self-dealing and other abusive practices. These laws may restrict or prohibit a wide range of business activities, including research, manufacturing, distribution, pricing, discounting, marketing and promotion, sales commission, customer incentive programs and other business arrangements. Activities subject to these laws also involve the improper use or misrepresentation of information obtained in the course of clinical trials, or illegal misappropriation of drug product, which could result in regulatory sanctions or other actions or lawsuits stemming from a failure to be in compliance with such laws or regulations, and serious harm to our reputation. In addition, federal procurement laws impose substantial penalties for misconduct in connection with government contracts and require certain contractors to maintain a code of business ethics and conduct. Additionally, we are subject to the risk that a person or government could allege such fraud or other misconduct, even if none occurred. If any such actions are instituted against us, and we are not successful in defending ourselves or asserting our rights, those actions could have a material and adverse impact on our business, financial condition, results of operations and prospects including the imposition of civil, criminal and administrative penalties, damages, monetary fines, disgorgement, imprisonment, loss of eligibility to obtain marketing approvals from the FDA, possible exclusion from participation in Medicare, Medicaid and other federal healthcare programs, contractual damages, reputational harm, diminished profits and future earnings, additional reporting requirements if subject to a corporate integrity agreement or other agreement to resolve allegations of non-compliance with any of these laws, and curtailment or restructuring of our operations, any of which could adversely affect our ability to operate our business and our operating results.

We may be required to modify our business practices, pay fines and significant expenses or experience other losses due to governmental investigations or other enforcement activities.

We may become subject to litigation or governmental investigations in the United States and foreign jurisdictions that may arise from the conduct of our business. Like many companies in our industry, we may from time to time receive inquiries and subpoenas and other types of information requests from government authorities and we may be subject to claims and other actions related to our business activities.

While the ultimate outcome of investigations and legal proceedings are difficult to predict, adverse resolutions or settlements of those matters could result in, among other things:

- significant damage awards, fines, penalties or other payments, and administrative remedies, such as exclusion and/or debarment from government programs, or other rulings that preclude us from operating our business in a certain manner;
- changes to our business operations to avoid risks associated with such litigation or investigations;
- product recalls;
- reputational damage and decreased demand for our products; and
- expenditure of significant time and resources that would otherwise be available for operating our business.

While we maintain insurance for certain risks, the amount of our insurance coverage may not be adequate to cover the total amount of all adverse resolutions and settlements of claims and liabilities. It also is not possible to obtain insurance to protect against all potential risks and liabilities.

We or our current and prospective partners may be subject to product recalls in the future that could harm our brand and reputation and could negatively affect our business.

We or our current and prospective partners may be subject to product recalls, withdrawals or seizures if any of our product candidates, if approved for marketing, fail to meet specifications or are believed to cause injury or illness or if we are alleged to have violated governmental regulations including those related to the manufacture, labeling, promotion, sale or distribution. Any recall, withdrawal or seizure in the future could materially and adversely affect consumer confidence in our brands and lead to decreased demand for our approved products. In addition, a recall, withdrawal or seizure of any of our approved products would require significant management attention, would likely result in substantial and unexpected expenditures and would harm our business, financial condition and operating results.

We will need to obtain FDA approval of any proposed names for our product candidates that gain marketing approval, and any failure or delay associated with such naming approval may adversely impact our business.

Any name we intend to use for our product candidates will require approval from the FDA regardless of whether we have secured a formal trademark registration from the U.S. Patent and Trademark Office (USPTO). The FDA typically conducts a review of proposed product names, including an evaluation of whether proposed names may be confused with other product names. The FDA may object to any product name we submit if it believes the name inappropriately implies medical claims. If the FDA objects to any of our proposed product names, we may be required to adopt an alternative name for our product candidates, which could result in further evaluation of proposed names with the potential for additional delays and costs.

Disruptions at the FDA and other government agencies caused by funding shortages or global health concerns could hinder their ability to hire, retain or deploy key leadership and other personnel, or otherwise prevent new or modified products and services from being developed, approved or commercialized in a timely manner, which could negatively impact our business.

The ability of the FDA to review and approve new products can be affected by a variety of factors, including government budget and funding levels, ability to hire and retain key personnel and accept the payment of user fees, statutory, regulatory, and policy changes and other events that may otherwise affect FDA's ability to perform routine functions. Average review times at the agency have fluctuated in recent years as a result. In addition, government funding of other government agencies that fund research and development activities is subject to the political process, which is inherently fluid and unpredictable.

Disruptions at the FDA and other agencies may also slow the time necessary for new drugs to be reviewed and/or approved or cleared by necessary government agencies, which would adversely affect our business. For example, over the last several years, the U.S. government has shut down several times and certain regulatory agencies, such as the FDA, have had to furlough critical FDA employees and stop critical activities.

Separately, in response to the global pandemic of COVID-19 and public health emergency declaration in the United States, on March 10, 2020, the FDA announced its intention to temporarily postpone most inspections of foreign manufacturing facilities and products, and it subsequently postponed routine surveillance inspections of domestic manufacturing facilities and provided guidance regarding the conduct of clinical trials. As of May 2021, the FDA noted it was continuing to ensure timely reviews of applications for prescription drug products during the COVID-19 pandemic in line with its user fee performance goals and conducting mission-critical domestic and foreign inspections to ensure compliance of manufacturing facilities with FDA quality standards. Utilizing a rating system to assist in determining when and where it is safest to conduct such inspections based on data about the virus's trajectory in a given state and locality and the rules and guidelines that are put in place by state and local governments, the FDA is either continuing to, on a case-by-case basis, conduct only mission-critical inspections, or, where possible to do so safely, resuming prioritized domestic inspections, which generally include pre-approval inspections. Foreign pre-approval inspections that are not deemed mission-critical remain postponed, while those deemed mission-critical will be considered for inspection on a case-by-case basis. The FDA will use similar data to inform resumption of prioritized operations abroad as it becomes feasible and advisable to do so. The FDA may not be able to maintain this pace and delays or setbacks are possible in the future.

Should FDA determine that an inspection is necessary for NDA approval and an inspection cannot be completed during the review cycle due to restrictions on travel, the FDA has stated that it generally intends to issue a complete response letter. Further, if there is inadequate information to make a determination on the acceptability of a facility, the FDA may defer action on the application until an inspection can be completed. Additionally, regulatory authorities outside the United States may adopt similar restrictions or other policy measures in response to the COVID-19 pandemic. If a prolonged government shutdown or slowdown occurs, or if global health concerns continue to prevent the FDA or other regulatory authorities from conducting their regular inspections, reviews, or other regulatory activities, it could significantly impact the ability of the FDA or other regulatory authorities to timely review and process regulatory submissions, which could have a material adverse effect on our business. Further, future government shutdowns could impact our ability to access the public markets and obtain necessary capital in order to properly capitalize and continue our operations.

Our future growth depends, in part, on our ability to penetrate foreign markets, where we would be subject to additional regulatory burdens and other risks and uncertainties.

Our future profitability will depend, in part, on our ability to commercialize our product candidates in foreign markets for which we intend to rely on collaborations with third parties. If we commercialize our other product candidates in foreign markets, we would be subject to additional risks and uncertainties, including:

- our customers' ability to obtain market access and appropriate reimbursement for our product candidates in foreign markets;
- our inability to directly control commercial activities because we are relying on third parties;
- the burden of complying with complex and changing foreign regulatory, tax, accounting and legal requirements;
- different medical practices and customs in foreign countries affecting acceptance in the marketplace;
- import or export licensing requirements;
- longer accounts receivable collection times;
- longer lead times for shipping;
- language barriers for technical training;
- reduced protection of intellectual property rights in some foreign countries;
- foreign currency exchange rate fluctuations; and
- the interpretation of contractual provisions governed by foreign laws in the event of a contract dispute.

Foreign sales of our product candidates could also be adversely affected by the imposition of governmental controls, political and economic instability, trade restrictions and changes in tariffs, any of which may adversely affect our results of operations.

Risks Related to Commercialization

Recently enacted and future policies and legislation may increase the difficulty and cost for us to obtain marketing approval of and commercialize our product candidates and may affect the reimbursement made for any product candidate for which we receive marketing approval.

Legislative and regulatory actions affecting government prescription drug procurement and reimbursement programs occur relatively frequently. In the United States, the Patient Protection and Affordable Care Act (PPACA) was enacted in 2010 to expand healthcare coverage. Since then, numerous efforts have been made to repeal, amend or administratively limit the PPACA in whole or in part. For example, the Tax Cuts and Jobs Act (TCJA), signed into law in 2017, repealed the individual health insurance mandate, which is considered a key component of the PPACA. In December 2018, a U.S. District Court Judge in the Northern District of Texas ruled that the individual mandate was a critical and inseparable feature of the PPACA, and therefore, because it was repealed as part of the TCJA, the remaining provisions of the PPACA were invalid and the law in its entirety was unconstitutional. In December 2019, the U.S. Court of Appeals for the Fifth Circuit upheld the District Court ruling that the individual mandate was unconstitutional but remanded the case back to the District Court to determine whether other reforms enacted as part of the PPACA but not specifically related to the individual mandate or health insurance could be severed from the rest of the PPACA so as not to be declared invalid as well. On March 2, 2020, the United States Supreme Court granted the petitions for writs of certiorari to review this case and allocated one hour for oral arguments, which occurred on November 10, 2020. In June 2021, the Supreme Court reversed the Fifth Circuit and upheld the PPACA. It is unclear how other efforts to repeal and replace the PPACA will impact the implementation of the PPACA, the pharmaceutical industry more generally, and our business. Complying with any new legislation or reversing changes implemented under the PPACA could be time-intensive and expensive, resulting in a material adverse effect on our business.

Efforts to control prescription drug prices could also have a material adverse effect on our business. Among other pharmaceutical manufacturer industry-related proposals, Congress has proposed bills to change the Medicare Part D benefit to impose an inflation-based rebate in Medicare Part D and to alter the benefit structure to increase manufacturer contributions in the catastrophic phase. The volume of drug pricing-related bills proposed by Congress has dramatically increased, and the resulting impact on our business is uncertain and could be material.

In addition, many states have proposed or enacted legislation that seeks to indirectly or directly regulate pharmaceutical drug pricing, such as by requiring biopharmaceutical manufacturers to publicly report proprietary pricing information or to place a maximum price ceiling on pharmaceutical products purchased by state agencies. For example, in 2017, California's governor signed a prescription drug price transparency state bill into law, requiring prescription drug manufacturers to provide advance notice and explanation for price increases of certain drugs that exceed a specified threshold. Both Congress and state legislatures are considering various bills that would reform drug purchasing and price negotiations, allow greater use of utilization management tools to limit Medicare Part D coverage, facilitate the import of lower-priced drugs from outside the U.S. and encourage the use of generic drugs. Such initiatives and legislation may cause added pricing pressures on our products.

Changes to the Medicaid program at the federal or state level could also have a material adverse effect on our business. Proposals that could impact coverage and reimbursement of our products, including giving states more flexibility to manage drugs covered under the Medicaid program and permitting the re-importation of prescription medications from Canada or other countries, could have a material adverse effect by limiting our products' use and coverage. Furthermore, state Medicaid programs could request additional supplemental rebates on our products as a result of an increase in the federal base Medicaid rebate. To the extent that private insurers or managed care programs follow Medicaid coverage and payment developments, they could use the enactment of these increased rebates to exert pricing pressure on our products, and the adverse effects may be magnified by their adoption of lower payment schedules.

We cannot predict the likelihood, nature or extent of government regulation that may arise from future legislation or administrative or executive action, either in the United States or abroad. We expect that additional state and federal health care reform measures will be adopted in the future, any of which could limit the amounts that federal and state governments will pay for health care products and services. Moreover, the Biden Administration, including the Secretary of DHHS, has indicated that lowering prescription drug prices is a priority, but we do not yet know what steps the administration will take or whether such steps will be successful.

Other proposed regulatory actions affecting manufacturers could have a material adverse effect on our business. It is difficult to predict the impact, if any, of any such proposed legislative and regulatory actions or resulting state actions on the use and reimbursement of our products in the U.S., but our results of operations may be adversely affected.

Unfavorable pricing regulations, third-party reimbursement practices or healthcare reform initiatives could harm our business in the future.

There is increasing pressure on pharmaceutical companies to reduce healthcare costs. In the United States, these pressures come from a variety of sources, such as managed care groups and institutional and government purchasers. Increased purchasing power of entities that negotiate on behalf of federal healthcare programs and private sector beneficiaries could increase pricing pressures in the future. Such pressures may also increase the risk of litigation or investigation by the government regarding pricing calculations. The pharmaceutical industry will likely face greater regulation and political and legal actions in the future.

Adverse pricing limitations may hinder our ability to recoup our investment in one or more future product candidates, even if our future product candidates obtain regulatory approval. Adverse pricing limitations prior to approval will also adversely affect us by reducing our commercial potential. Our ability to commercialize any potential products successfully also will depend in part on the extent to which coverage and reimbursement for these products and related treatments becomes available from third-party payors, including government health administration authorities, private health insurers and other organizations. Third-party payors decide which medications they will pay for and establish reimbursement levels. Similar challenges to obtaining coverage and reimbursement, applicable to pharmaceutical products, will apply to companion diagnostics.

A significant trend in the U.S. healthcare industry and elsewhere is cost containment. Third-party payors have attempted to control costs by limiting coverage and the amount of reimbursement for particular medications. Increasingly, third-party payors are requiring that companies provide them with predetermined discounts from list prices and are challenging the prices charged for medical products. We cannot be sure that coverage and reimbursement will be available for any product that we commercialize in the future and, if reimbursement is available, what the level of reimbursement will be. Reimbursement may impact the demand for, or the price of, any product for which we obtain marketing approval in the future. If reimbursement is not available or is available only to limited levels, we may not be able to successfully commercialize any product candidate that we successfully develop.

There may be significant delays in obtaining reimbursement for approved products, and coverage may be more limited than the purposes for which the product is approved by the FDA or regulatory authorities in other countries. Moreover, eligibility for reimbursement does not imply that any product will be paid for in all cases or at a rate that covers our costs, including research, development, manufacture, sale and distribution. Interim payments for new products, if applicable, may also not be sufficient to cover our costs and may not be made permanent. Payment rates may vary according to the use of the product and the clinical setting in which it is used, may be based on payments allowed for lower cost products that are already reimbursed and may be incorporated into existing payments for other services. Net prices for products may be reduced by mandatory discounts or rebates required by third-party payors and by any future relaxation of laws that presently restrict imports of products from countries where they may be sold at lower prices than in the United States. Third-party payors often rely upon Medicare coverage policy and payment limitations in setting their own reimbursement policies, but also have their own methods and approval process apart from Medicare coverage and reimbursement determinations. Accordingly, one third-party payor's determination to provide coverage for a product does not assure that other payors will also provide coverage for the product. Our inability to promptly obtain coverage and adequate reimbursement from third-party payors for approved products could have a material adverse effect on our operating results, our ability to raise capital needed to commercialize potential products and our overall financial condition.

We may expend our limited resources to pursue a particular product candidate or indication and fail to capitalize on product candidates or indications that may be more profitable or for which there is a greater likelihood of success.

Because we have limited financial and management resources, we focus on development programs and product candidates that we identify for specific indications. As a result, we may forego or delay pursuit of opportunities with other product candidates or for other indications that later prove to have greater commercial potential. Our resource allocation decisions may cause us to fail to capitalize on viable commercial drugs or profitable market opportunities. Our spending on current and future research and development programs and product candidates for specific indications may not yield any commercially viable products. If we do not accurately evaluate the commercial potential or target market for a particular product candidate, we may relinquish valuable rights to that product candidate through collaboration, licensing or other royalty arrangements in cases in which it would have been more advantageous for us to retain sole development and commercialization rights to such product candidate.

The commercial success of our product candidates, if approved, depends partially upon attaining market acceptance by physicians, patients, third-party payors, and the medical community.

Our ability to generate product revenue will depend significantly on our ability to successfully obtain final marketing approval for and commercialize our product candidates.

Even if any of our product candidates CTx-1301, CTx-1302, and/or CTx-2103 obtain regulatory approval, they may not gain sufficient market acceptance among physicians, patients, third-party payors, and the healthcare community. Failure to achieve market acceptance would limit our ability to generate revenue and would affect our results of operations. The degree of market acceptance of CTx-1301, CTx-1302, and/or CTx-2103 will depend on many factors, including:

- the efficacy and potential advantages of CTx-1301, CTx-1302, and/or CTx-2103 and compared to alternative treatments or competitive products;
- the effectiveness of our third-party collaborators' efforts to educate physicians and patients about the potential benefits and advantages of CTx-1301, CTx-1302, and/or CTx-2103;
- the willingness of the healthcare community and patients to adopt new technologies;
- the size of the market for such drug candidate, based on the size of the patient populations we are targeting, in the territories for which we gain regulatory approval and have commercial rights;
- the prevalence and severity of any side effects;
- the safety of the drug candidate as demonstrated through broad commercial distribution;
- the ability to offer our product candidates for sale at competitive prices;
- cost-effectiveness of our product relative to competing products;
- the ability to manufacture all our products CTx-1301, CTx-1302 as well as CTx-2103 in sufficient quantities and yields;
- perceptions of physicians, patients and the healthcare community, including third-party payors, regarding the safety, efficacy and potential benefits of CTx-1301, CTx-1302 and/or CTx-2103 compared to competing products or therapies;
- the timing of any such marketing approval in relation to other product approvals;
- any restrictions on concomitant use of other medications;
- support from patient advocacy groups;
- relative convenience and ease of administration compared to alternative treatments; and
- the availability of adequate coverage and reimbursement from governmental health programs and third-party payors and pricing relative to other competing products and therapies.

If our drug candidates are approved but fail to achieve an adequate level of acceptance by key market participants, we will not be able to generate significant revenues, and we may not become or remain profitable, which may require us to seek additional financing.

Our ability to negotiate, secure and maintain third-party coverage and reimbursement for our product candidates may be affected by political, economic and regulatory developments in the United States and other jurisdictions. Governments continue to impose cost containment measures, and third-party payors are increasingly challenging prices charged for medicines and examining their cost effectiveness, in addition to their safety and efficacy. These and other similar developments could significantly limit the degree of market acceptance of any product candidate of ours that receives marketing approval in the future.

We may face significant competition from other pharmaceutical companies, and our operating results will suffer if we fail to compete effectively.

The pharmaceutical industry is intensely competitive and subject to rapid and significant technological change. If we fail to stay at the forefront of technological change, we may be unable to compete effectively. Technological advances or products developed by our competitors may render our technologies or product candidates obsolete, less competitive or not economical.

We expect to have competitors both in the United States and internationally, including major multinational pharmaceutical companies. For example, amphetamine XR is currently marketed in the United States by Shire under the brand name Adderall XR, and methylphenidate is marketed in the United States by Janssen under the brand name Concerta, and by Novartis under the brand names Focalin XR and Ritalin LA. Further, makers of branded drugs could also enhance their own formulations in a manner that competes with our enhancements of these drugs. Many of our competitors have substantially greater financial, technical and other resources, such as larger research and development staff and more experienced marketing and manufacturing organizations. Mergers and acquisitions in the biotechnology and pharmaceutical industries may result in even more resources being concentrated in our competitors. As a result, these companies may obtain regulatory approval more rapidly than we are able and may be more effective in selling and marketing their products as well. Smaller or early-stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large, established companies. Competition may increase further as a result of advances in the commercial applicability of technologies and greater availability of capital for investment in these industries. Our competitors may succeed in developing, acquiring or licensing on an exclusive basis drug products or drug delivery technologies that are more effective or less costly than our PTR platform, or any product candidate that we are currently developing or that we may develop. In addition, our competitors may file citizens petitions with the FDA in an attempt to persuade the FDA that our products, or clinical trials that support their approval, contain deficiencies or that new regulatory requirements be placed on the product candidate or drug class of the product candidate. Such actions by our competitors could delay or even prevent the FDA from approving any NDA that we submit under Section 505(b)(2).

Even if we are successful in achieving regulatory approval to commercialize a product candidate ahead of our competitors, our future pharmaceutical products may face direct competition from generic and other follow-on drug products. Any of our product candidates that may achieve regulatory approval in the future may face competition from generic products earlier or more aggressively than anticipated, depending upon how well such approved products perform in the United States prescription drug market. Our ability to compete also may be affected in many cases by insurers or other third-party payors seeking to encourage the use of generic products. Generic products are expected to become available over the coming years. Even if our product candidates achieve marketing approval, they may be priced at a significant premium over competitive generic products, if any have been approved by then.

In addition to creating the 505(b)(2) NDA pathway, the Hatch-Waxman Amendments to the FDCA authorized the FDA to approve generic drugs that are the same as drugs previously approved for marketing under the NDA provisions of the statute pursuant to ANDAs. An ANDA relies on the preclinical and clinical testing conducted for a previously approved reference listed drug (RLD) and must demonstrate to the FDA that it is “bioequivalent” to the RLD. The FDA is prohibited by statute from approving an ANDA when certain marketing or data exclusivity protections apply to the RLD. If any such competitor or third party is able to demonstrate bioequivalence without infringing our patents, then this competitor or third party may then be able to introduce a competing generic product onto the market.

We believe that our ability to successfully compete will depend on, but is not limited to:

- the efficacy and safety of our product and product candidates, including as relative to marketed products and product candidates in development by third parties;
- the time it takes for our product candidates to complete clinical development and receive marketing approval;
- the ability to maintain a good relationship with regulatory authorities;
- the ability to commercialize and market any of our product candidates that receive regulatory approval;
- the price of our product and product candidates that receive regulatory approval, including in comparison to branded or generic competitors;
- whether coverage and adequate levels of reimbursement are available under private and governmental health insurance plans, including Medicare;
- the ability to protect intellectual property rights related to our product and product candidates;
- the ability to manufacture on a cost-effective basis and sell commercial quantities of our product and product candidates that receive regulatory approval; and
- acceptance of any of our products and product candidates that receive regulatory approval by physicians and other healthcare providers.

If our competitors market products that are more effective, safer or less expensive than our product, if any, or that reach the market sooner than our products, if any, we may enter the market too late in the cycle and may not achieve commercial success, or we may have to reduce our price, which would impact our ability to generate revenue and obtain profitability.

In addition, successful commercialization will also depend on whether we can adequately protect against and effectively respond to any claims by holders of patents and other intellectual property rights that our products infringe their rights, whether any unanticipated adverse effects or unfavorable publicity develops in respect of our products, as well as the emergence of new or existing products as competition, which may be proven to be more clinically effective and cost-effective. If we are unable to successfully complete these tasks, we may not be able to commercialize in a timely manner, or at all, in which case we may be unable to generate sufficient revenues to sustain and grow our business.

We cannot predict the interest of potential follow-on competitors or how quickly others may seek to come to market with competing products, whether approved as a direct ANDA competitor or as a 505(b)(2) NDA referencing one of our future drug products. If the FDA approves generic versions of our drug candidates in the future, should they be approved for commercial marketing, such competitive products may be able to immediately compete with us in each indication for which our product candidates may have received approval, which could negatively impact our future revenue, profitability and cash flows and substantially limit our ability to obtain a return on our investments in those product candidates.

Social issues around the abuse of opioids and stimulants, including law enforcement concerns over diversion and regulatory efforts to combat abuse, could decrease the potential market for our product candidates.

Media stories regarding prescription drug abuse and the diversion of opioids, stimulants, and other controlled substances are commonplace. Law enforcement and regulatory agencies may apply policies that seek to limit the availability of opioids and stimulants. Such efforts may inhibit our ability to commercialize our product candidates. Aggressive enforcement and unfavorable publicity regarding opioid drugs, the limitations of abuse-deterrent formulations, public inquiries and investigations into prescription drug abuse, litigation or regulatory activity, sales, marketing, distribution or storage of our products could harm our reputation. Such negative publicity could reduce the potential size of the market for our product candidates and decrease the revenue we are able to generate from their sale, if approved.

Additionally, current and future efforts by Congress, state legislatures, the FDA and other regulatory bodies to combat abuse of opioids and stimulants may negatively impact the market for our product candidates. It is possible that lawmakers or the FDA will announce new legislation or regulatory initiatives at any time that may increase the regulatory burden or decrease the commercial opportunity for our product candidates.

Risks Related to Our Dependence on Third Parties

If we fail to produce our product or product candidates in the volumes that are required on a timely basis, or fail to comply with stringent regulations applicable to pharmaceutical drug manufacturers, we may face regulatory penalties and delays in the development and commercialization of our product candidates.

We currently depend on third-party suppliers for the supply of the APIs and excipients for our product candidates. Any shortages in the availability of raw materials could result in production or other delays with consequent adverse effects on us. In addition, because regulatory authorities must generally approve raw material sources for pharmaceutical products, changes in raw material suppliers may result in production delays or higher raw material costs. Any such delays could trigger penalties, which would have a negative impact on our business. If our raw material manufacturers were to encounter difficulties or otherwise fail to comply with their obligations to us, our ability to obtain FDA approval and market our product and product candidates would be jeopardized. In addition, any delay or interruption in the supply of clinical trial supplies could delay or prohibit the completion of our bioequivalence and/or clinical trials, increase the costs associated with conducting our bioequivalence and/or clinical trials and, depending upon the period of delay, require us to commence new trials at significant additional expense or to terminate a trial.

The manufacture of pharmaceutical products requires significant expertise and capital investment, including the development of advanced manufacturing techniques and process controls. Pharmaceutical companies may encounter difficulties in manufacturing scale up of production. These problems include manufacturing difficulties relating to production costs and yields, quality control, including stability of the product and quality assurance testing, shortages of qualified personnel, as well as compliance with federal, state and foreign regulations. We may also need to purchase additional equipment, some of which can take several months or more to procure, setup and validate, and increase our software and computing capacity to meet increased demand. Failure to manage this growth or transition could result in turnaround time delays, higher product costs, declining product quality, or slower responses to competitive challenges. A failure in any one of these areas could make it difficult for us to meet market expectations for our products and could damage our reputation and the prospects for our business.

Manufacturers of pharmaceutical products need to comply with cGMP requirements enforced by the FDA through the agency's facility inspection programs. The cGMP requirements include, among other things, quality control, quality assurance, the maintenance of records and documentation, and the obligation to investigate and correct any deviations from regulatory requirements. A failure to comply with these requirements may result in fines and civil penalties, suspension of production, suspension or delay in product approval, product seizure or voluntary recall, or withdrawal of product approval. If the safety of any of our products or product candidates is compromised due to failure to adhere to applicable laws or for other reasons, we may not be able to obtain, or to maintain once obtained, regulatory approval for such product candidate or successfully commercialize such products or product candidates, and we may be held liable for any injuries sustained as a result. Any of these factors could cause a delay in clinical developments, regulatory submissions, approvals or commercialization of our products or product candidates, entail higher costs or result in our being unable to effectively commercialize our product candidates.

We rely on limited sources of supply for CTx-1301, CTx-1302, and/ or CTx 2103 as these are scheduled products, and any disruption in the chain of supply may impact production and sales of CTx-1301, CTx-1302, and/ or CTx-2103 and cause delays in developing and commercializing our product candidates and currently manufactured and commercialized product.

The NDAs we plan to submit for CTx-1301, CTx-1302, and/ or CTx-2103 will include our proposed manufacturing process for each product candidate. Any change to our manufacturing process, facilities or suppliers could require that we amend our NDA. Any change to our manufacturing process, facilities or suppliers could require that we amend our NDA. Also, because of our proprietary processes for manufacturing our product candidates, we cannot immediately transfer manufacturing activities for our drug products to an alternate supplier, and a change of manufacturing facilities would be a time-consuming and costly endeavor. This would also require us to supplement our NDA filings to include the change of manufacturing site. Identifying an appropriately qualified source of alternative supply for any one or more of the component substances for our product candidates or product could be time consuming, and we may not be able to do so without incurring material delays in the development and commercialization of our product candidates. Any alternative vendor would also need to be qualified through an NDA supplement and may need to undergo an FDA inspection before the supplement can be approved, which could result in further delay, including delays related to additional clinical trials.

These factors could cause the delay of clinical trials, regulatory submissions, required approvals or commercialization of our product candidates, cause us to incur higher costs and prevent us from commercializing them successfully. Furthermore, if our suppliers fail to deliver the required commercial quantities of components and APIs on a timely basis and at commercially reasonable prices, including if our suppliers did not receive adequate DEA quotas for the supply of certain scheduled components, and we are unable to secure one or more replacement suppliers capable of production at a substantially equivalent cost, commercialization of our lead product candidates, and clinical trials of future potential product candidates, may be delayed or we could lose potential revenue and our business, financial condition, results of operation and reputation could be adversely affected.

We rely and expect to continue to rely completely on third parties to formulate and manufacture our preclinical, clinical trial and commercial drug supplies. The development and commercialization of any of our drug candidates could be stopped, delayed or made less profitable if those third parties fail to provide us with sufficient quantities of such drug supplies or fail to do so at acceptable quality levels, including in accordance with applicable regulatory requirements or contractual obligations, and our operations could be harmed as a result.

We do not currently have, nor do we plan to acquire, the infrastructure or capability internally, such as our own manufacturing facilities, to manufacture our preclinical and clinical drug supplies for our clinical trials and preclinical studies or commercial quantities of any drug candidates that may obtain regulatory approval. We procure bulk drug substance from a sole source, third-party supplier and have contracted with a CMO to produce our drug candidates at its facilities, and we anticipate that we will continue to do so for the foreseeable future. Therefore, we lack the resources and expertise to formulate or manufacture our own drug candidates, and our reliance on third parties increases the risk that we will not have sufficient quantities of bulk drug substances or our product candidates, in such quantities at an acceptable cost, which could delay, prevent or impair our ability to timely conduct our clinical trials or our other development or commercialization efforts.

We have entered into an agreement with a CMO for the clinical-stage manufacturing of our drug candidate, CTx-1301, and we plan to enter into agreements with one or more manufacturers to manufacture, supply, store, and distribute drug supplies for our current and future clinical trials and/or commercial sales. We intend to establish or continue those relationships for the supply of our drug candidates; however, there can be no assurance that we will be able to retain those relationships on commercially reasonable terms, if at all. If we are unable to maintain those relationships, we could experience delays in our development efforts as we locate and qualify new CMOs. If any of our current drug candidates or any drug candidates we may develop or acquire in the future receives regulatory approval, we will rely on one or more CMOs to manufacture the commercial supply of such drugs.

Even if we are able to maintain our existing third-party relationships or establish any such agreements with other third-party manufacturers, reliance on third-party manufacturers entails additional risks, including, but not limited to:

- reliance on the third party for FDA and DEA regulatory compliance and quality assurance;
- the possible misappropriation of our proprietary information, including our trade secrets and know-how;
- disruption and costs associated with changing suppliers, including additional regulatory filings;
- the possible breach, termination or nonrenewal of the agreement by the third party at a time that is costly or inconvenient for us;

- a delay or inability to procure or expand sufficient manufacturing capacity;
- the inability to negotiate manufacturing agreements with third parties under commercially reasonable terms;
- termination or nonrenewal of manufacturing agreements with third parties in a manner or at a time that is costly or damaging to us; and
- the reliance on a limited number of sources, and in some cases, single sources for product components, such that if we are unable to secure a sufficient supply of these product components, we will be unable to manufacture and sell our product candidates in a timely fashion, in sufficient quantities or under acceptable terms.

Each of these risks could delay our clinical trials, the approval, if any, of our drug candidates or the commercialization of our drug candidates, could result in higher costs or could deprive us of potential product revenues. Some of these events could be the basis for FDA action, including injunction, recall, seizure or total or partial suspension of production.

While we are ultimately responsible for the manufacture of our product candidates, we do not manufacture our products ourselves and are dependent on our CMOs for compliance with cGMPs. Our agreements with our CMOs require them to perform according to certain CGMP requirements such as those relating to quality control, quality assurance and qualified personnel, but we cannot control the conduct of our CMOs to implement and maintain these standards. If our CMOs cannot successfully manufacture material that conforms to our specifications and the strict regulatory requirements of the FDA or other regulatory authorities, we would be prevented from obtaining regulatory approval for our drug candidates unless and until we engage a substitute CMO that can comply with such requirements, which we may not be able to do. Any such failure by any of our CMOs would significantly impact our ability to develop, obtain marketing approval for or market our product candidates, if approved.

Further, if our product candidates are approved, our suppliers will be subject to regulatory requirements, covering manufacturing, testing, quality control and record keeping relating to our product candidates, and subject to ongoing inspections by the regulatory agencies. Failure by any of our suppliers to comply with applicable regulations may result in long delays and interruptions to our manufacturing capacity while we seek to secure another supplier that meets all regulatory requirements, as well as market disruption related to any necessary recalls or other corrective actions.

Third-party manufacturers may not be able to comply with cGMP regulations or similar regulatory requirements outside the United States. Our failure, or the failure of our third-party manufacturers, to comply with applicable regulations could result in sanctions being imposed on us, including warning letters, clinical holds or termination of clinical trials, fines, injunctions, restitution, disgorgement, civil penalties, delays, suspension or withdrawal of approvals or other permits, FDA refusal to approve pending applications, product detentions, FDA consent decrees placing significant restrictions on or suspending manufacturing and distribution operations, debarment, refusal to allow import or export, product detentions, adverse publicity, dear-health-care-provider letters or other warnings, license revocation, seizures or recalls of product candidates, operating restrictions, refusal of government contracts or future orders under existing contracts and civil and criminal liability, including False Claims Act liability, exclusion from participation in federal health care programs, and corporate integrity agreements among other consequences, any of which could significantly and adversely affect supplies of our products.

Failure by our third-party contract manufacturer to maintain DEA regulations as pertain to controlled substances may cause their license to be revoked and production of our products and product candidates may be interrupted or stopped. This would impact our ability to develop, obtain marketing approval for or market our product candidates, if approved.

Our product candidates and any drugs that we may develop may compete with other product candidates and drugs for access to manufacturing facilities, and we may be unable to obtain access to these facilities on favorable terms.

There are a limited number of manufacturers that operate under cGMP regulations and possess a DEA license to procure, hold and work with controlled substances. Any performance failure on the part of our existing or future manufacturers could delay clinical development or marketing approval. We do not currently have arrangements in place for redundant supply or a second contract manufacturer. If our current contract manufacturer cannot perform as agreed, we may be required to replace such manufacturer and we may incur added costs and delays in identifying and qualifying any such replacement.

We expect to rely on third parties to conduct our clinical trials and our regulatory submissions for our product candidates, and those third parties may not perform satisfactorily, including failing to meet deadlines for the completion of such trials and/or regulatory submissions.

We expect to engage CROs for our planned clinical trials and our regulatory submissions of our product candidates. We expect to rely on CROs, as well as other third parties, such as clinical data management organizations, regulatory strategists, medical institutions and clinical investigators, to conduct our planned clinical trials, prepare the appropriate regulatory submissions for our product candidates, and assist with ensuring compliance with applicable regulatory requirements. Agreements with such third parties might terminate for a variety of reasons, including a failure to perform by the third parties. If we need to enter into alternative arrangements, our drug development activities would be delayed.

Our reliance on these third parties for clinical development activities may reduce our control over these activities but will not relieve us of our responsibilities. For example, we will remain responsible for ensuring that each of our clinical trials is conducted in accordance with the general investigational plan and protocols for the trial. Moreover, the FDA requires us to comply with regulatory standards, commonly referred to as good clinical practices, or GCPs, for conducting, recording and reporting the results of clinical trials to assure that data and reported results are credible and accurate and that the rights, integrity and confidentiality of trial participants are protected. Regulatory authorities enforce these GCPs through periodic inspections of trial sponsors, principal investigators and trial sites. We also are required to register specified ongoing clinical trials and post the results of completed clinical trials on a government-sponsored database, ClinicalTrials.gov, within specified timeframes. In addition, we must conduct our clinical trials with product produced under cGMP requirements. Failure to comply with these regulations may require us to repeat clinical trials, which would delay the regulatory approval process. Failure to comply with the applicable requirements related to clinical investigations by us, our CROs or clinical trial sites can also result in clinical holds and termination of clinical trials, debarment, FDA refusal to approve applications based on the clinical data, warning letters, withdrawal of marketing approval if the product has already been approved, fines and other monetary penalties, delays, adverse publicity and civil and criminal sanctions, among other consequences.

Furthermore, these third parties may also have relationships with other entities, some of which may be our competitors. If these third parties do not successfully carry out their contractual duties, meet expected deadlines or conduct our clinical trials in accordance with regulatory requirements or our stated protocols, we will not be able to obtain, or may be delayed in obtaining, marketing approvals for our product candidates and will not be able to, or may be delayed in our efforts to, successfully commercialize our product candidates.

In addition, principal investigators for our clinical trials may serve as scientific advisors or consultants to us from time to time and may receive cash or equity compensation in connection with such services. If these relationships and any related compensation result in perceived or actual conflicts of interest, or the FDA concludes that the financial relationship may have affected the interpretation of the study, the integrity of the data generated at the applicable clinical trial site may be questioned and the utility of the clinical trial itself may be jeopardized, which could result in the delay or rejection of any NDA we submit by the FDA. Any such delay or rejection could prevent us from commercializing our product candidates. Further, our arrangements with principal investigators are also subject to scrutiny under other health care regulatory laws, such as the federal Anti-Kickback Statute.

We also expect to rely on other third parties to store and distribute product supplies for our clinical trials. Any performance failure or noncompliance with applicable regulatory requirements, including those of the FDA or DEA, on the part of our distributors could delay clinical development or marketing approval of our product candidates or commercialization of our products, producing additional losses and depriving us of potential product revenue.

If the third parties with whom we contract do not successfully carry out their contractual duties or obligations or meet expected deadlines or if the quality or accuracy of the clinical data they obtain is compromised due to the failure to adhere to our clinical protocols or regulatory requirements or for other reasons, our clinical trials may be extended, delayed or terminated, we may need to conduct additional trials, and we may not be able to obtain regulatory approval for or successfully commercialize our product candidates. As a result, the commercial prospects for our product candidates would be harmed, our costs could increase and our ability to generate revenue could be delayed. To the extent we are unable to successfully identify and manage the performance of third-party service providers in the future, our business may be adversely affected.

We may seek collaborations with third parties for the development or commercialization of our product candidates. If those collaborations are not successful, we may not be able to capitalize on the market potential of these product candidates.

We may seek third-party collaborators for the development and commercialization of our product candidates, including for the commercialization of any of our product candidates that are approved for marketing outside the United States. Our likely collaborators include regional, national and international large and mid-size pharmaceutical companies. If we do enter into any collaboration arrangements with any third parties, we will likely have limited control over the amount and timing of resources that our collaborators dedicate to the development or commercialization of our product candidates. Our ability to generate revenue from these arrangements will depend on our collaborators' abilities to successfully perform the functions assigned to them in these arrangements. Collaborations involving our product candidates would pose the following risks, including but not limited to:

- collaborators have significant discretion in determining the efforts and resources that they will apply to these collaborations;
- collaborators may not perform their obligations as expected;
- collaborators may not pursue development and commercialization of any product candidates that achieve regulatory approval or may elect not to continue or renew development or commercialization programs based on clinical trial results, changes in the collaborators' strategic focus or available funding, or external factors, such as an acquisition, that divert resources or create competing priorities;
- collaborators may delay clinical trials, provide insufficient funding for a clinical trial program, stop a clinical trial or abandon a product candidate, repeat or conduct new clinical trials or require a new formulation of a product candidate for clinical testing;
- product candidates discovered in collaboration with us may be viewed by our collaborators as competitive with their own product candidates or products, which may cause collaborators to cease to devote resources to the commercialization of our product candidates;
- a collaborator with marketing and distribution rights to one or more of our product candidates that achieve regulatory approval may not commit sufficient resources to the marketing and distribution of such products;
- disagreements with collaborators, including disagreements over proprietary rights, contract interpretation or the preferred course of development, might cause delays or termination of the research, development or commercialization of product candidates, might lead to additional responsibilities for us with respect to product candidates, or might result in litigation or arbitration, any of which would be time-consuming and expensive;
- collaborators may not properly maintain or defend our or their intellectual property rights or may use our or their proprietary information in such a way as to invite litigation that could jeopardize or invalidate such intellectual property or proprietary information or expose us to potential litigation;
- collaborators may infringe the intellectual property rights of third parties, which may expose us to litigation and potential liability; and
- collaborations may be terminated for the convenience of the collaborator and, if terminated, we could be required to raise additional capital to pursue further development or commercialization of the applicable product candidates.

Collaboration agreements may not lead to development or commercialization of product candidates in the most efficient manner or at all. If a present or future collaborator of ours were to be involved in a business combination, the continued pursuit and emphasis on our drug development or commercialization program could be delayed, diminished or terminated.

If we are not able to establish collaborations, we may have to alter our development and commercialization plans.

The development of our product candidates and clinical programs and the potential commercialization will require substantial additional capital. For some of our product candidates, we may need to collaborate with pharmaceutical companies for the development and potential commercialization of those product candidates.

We face significant competition in seeking appropriate collaborators. Whether we reach a definitive agreement for a collaboration will depend, among other things, upon our assessment of the collaborator's resources and expertise, the terms and conditions of the proposed collaboration and the proposed collaborator's evaluation of a number of factors. Those factors may include the design or results of clinical trials, the likelihood of approval by the FDA or similar regulatory authorities outside the United States, the potential market for the subject product candidate, the costs and complexities of manufacturing and delivering such product candidate to patients, the potential of competing products, the existence of uncertainty with respect to our ownership of technology, which can exist if there is a challenge to such ownership without regard to the merits of the challenge, and industry and market conditions generally. The collaborator may also consider alternative product candidates or technologies for similar indications that may be available to collaborate on and whether such a collaboration could be more attractive than the one with us for our product candidate.

We may not be able to negotiate collaborations on a timely basis, on acceptable terms, or at all. If we are unable to do so, we may have to curtail the development of product candidates, reduce or delay one or more of our development programs, delay potential commercialization or reduce the scope of any sales or marketing activities, or increase our expenditures and undertake development or commercialization activities at our own expense. If we elect to increase our expenditures to fund development or commercialization activities on our own, we may need to obtain additional capital, which may not be available to us on acceptable terms, or at all. If we do not have sufficient funds, we may not be able to further develop our product candidates or bring them to market and generate product revenue.

We may rely on third parties to perform many essential services for any products that we commercialize, including distribution, customer service, accounts receivable management, cash collection and adverse event reporting. If these third parties fail to perform as expected or to comply with legal and regulatory requirements, our ability to commercialize CTx-1301, CTx-1302, and/or CTx-2103 will be significantly impacted and we may be subject to regulatory sanctions.

We may retain third-party service providers to perform a variety of functions related to the sale and distribution of any or all of our products CTx-1301, CTx-1302, and CTx-2103, if approved, key aspects of which will be out of our direct control. These service providers may provide key services related to distribution, customer service, accounts receivable management and cash collection. We would substantially rely on these third-party providers to perform services for us. If these third-party service providers fail to comply with applicable laws and regulations, fail to meet expected deadlines, or otherwise do not carry out their contractual duties to us, our ability to deliver product to meet commercial demand may be significantly impaired. In addition, we may engage third parties to perform various other services for us relating to adverse event reporting, safety database management, fulfillment of requests for medical information regarding our product candidates and related services. If the quality or accuracy of the data maintained by these service providers is insufficient or if they fail to comply with various requirements, we could be subject to regulatory sanctions.

If we are unable to achieve and maintain adequate levels of coverage and reimbursement for our product or product candidates, if approved, their commercial success may be severely hindered.

Successful sales of our product and any product candidates that receive regulatory approval depend on the availability of adequate coverage and reimbursement from third-party payors. Patients who are prescribed medications for the treatment of their conditions generally rely on third-party payors to reimburse all or part of the costs associated with their prescription drugs. Adequate coverage and reimbursement from governmental healthcare programs, such as Medicare and Medicaid, and commercial payors is critical to new product acceptance. Coverage decisions may depend upon clinical and economic standards that disfavor new drug products when more established or lower cost therapeutic alternatives are already available or subsequently become available. Assuming we obtain coverage for a given product, the resulting reimbursement payment rates might not be adequate or may require co-payments that patients find unacceptably high. Patients are unlikely to use our products unless coverage is provided and reimbursement is adequate to cover a significant portion of the cost of our products.

In addition, the market for CTx-1301, CTx-1302, and CTx-2103 will depend significantly on access to third-party payors' drug formularies or lists of medications for which third-party payors provide coverage and reimbursement. The industry competition to be included in such formularies often leads to downward pricing pressures on pharmaceutical companies. Also, third-party payors may refuse to include a particular branded drug in their formularies or otherwise restrict patient access through formulary controls or otherwise to a branded drug when a less costly generic equivalent or other alternative is available.

Third-party payors, whether foreign or domestic, or governmental or commercial, are developing increasingly sophisticated methods of controlling healthcare costs. In addition, in the United States, no uniform policy requirement for coverage and reimbursement for drug products exists among third-party payors. Therefore, coverage and reimbursement for drug products can differ significantly from payor to payor. As a result, the coverage determination process is often a time-consuming and costly process that will require us to provide scientific and clinical support for the use of our products to each payor separately, with no assurance that coverage and adequate reimbursement will be applied consistently or obtained in the first instance.

Further, we believe that future coverage and reimbursement will likely be subject to increased restrictions both in the United States and in international markets. Third party coverage and reimbursement for our product candidates for which we may receive regulatory approval may not be available or adequate in either the United States or international markets, which could have a material adverse effect on our business, results of operations, financial condition and prospects.

Third-party payors may not adequately cover or reimburse consumers for the purchase of our products.

Our future revenues and ability to generate positive cash flow from operations may be affected by the continuing efforts of governments and third-party payors to contain or reduce the costs of healthcare through various means. In certain foreign markets, the pricing of prescription pharmaceuticals is subject to governmental control. In the United States, there has been, and we expect that there will continue to be, a number of federal and state proposals to implement similar governmental controls. We cannot be certain what legislative proposals will be adopted or what actions federal, state or private payors for healthcare goods and services may take in response to any drug pricing reform proposals or legislation. Such reforms may make it difficult to complete the development and testing of our products, and therefore may limit our ability to generate revenues from sales and achieve profitability. Further, to the extent that such reforms may affect our business and collaborators, our ability to commercialize our products may be harmed.

In the United States and elsewhere, sales of prescription pharmaceutical products still depend in large part on the availability of reimbursement to the consumer from third-party payors, such as governmental and private insurance plans. Third-party payors are increasingly challenging the prices charged for medical products. The market for CTx-1301, CTx-1302, and/or CTx-2103 will depend significantly on whether third-party payors provide coverage and reimbursement. Industry competition to be eligible for reimbursement often leads to downward pricing pressures on pharmaceutical products. Also, third-party payors may refuse to reimburse for a particular branded drug or product when a less costly generic equivalent or other alternative is available. In the United States, no uniform policy of coverage and reimbursement for drug products exists among third-party payors. Because each third-party payor individually approves coverage and reimbursement levels, obtaining coverage and adequate reimbursement is a time-consuming and costly process. We would be required to provide scientific and clinical support for the use of our products to each third-party payor separately with no assurance that approval would be obtained. This process could delay the market acceptance of our products and could have a negative effect on our future revenues and operating results. Even if we succeed in bringing CTx-1301, CTx-1302 and/or CTx-2103 to market, we cannot be certain that it would be considered cost effective or that coverage and adequate reimbursement to patients would be available. Patients may be unlikely to use CTx-1301, CTx-1302 and/or CTx-2103 unless coverage is provided, and reimbursement is adequate to cover a significant portion of its cost.

In addition, in many foreign countries, particularly the countries of the European Union, the pricing of prescription drugs is subject to government control. In some jurisdictions outside the United States, the proposed pricing for a drug must be approved before it may be lawfully marketed. The requirements governing drug pricing vary widely from country to country. For example, the European Union provides options for its member states to restrict the range of medicinal products for which their national health insurance systems provide reimbursement and to control the prices of medicinal products for human use. A member state may approve a specific price for the medicinal product, or it may instead adopt a system of direct or indirect controls on the profitability of the company placing the medicinal product on the market. Moreover, pricing negotiations with governmental authorities in these countries can take considerable time after the receipt of marketing approval for a product. To obtain reimbursement or pricing approval in some countries, we may be required to conduct a clinical trial that compares the cost-effectiveness of our products CTx-1301, CTx-1302, and/or CTx-2103 to other available therapies. We may face competition for CTx-1301 and/or CTx-1302 from lower-priced products in foreign countries that have placed price controls on pharmaceutical products. In addition, there may be importation of foreign products that compete with CTx-1301, CTx-1302, and/or CTx-2103, which could negatively impact our profitability.

We believe CTx-1301, CTx-1302, and CTx-2103 will need to be priced competitively with current therapies to be eligible for full reimbursement in the United States and international markets. If we are unable to obtain coverage of, and adequate payment levels for, CTx-1301, CTx-1302, and/or CTx-2103 from third-party payors, physicians may limit how much or under what circumstances they will prescribe it and patients may decline to purchase it. This in turn could affect our ability to successfully commercialize any or all of our products and harm our business.

If we are unable to support demand for CTx-1301, CTx-1302, and/or CTx-2103, and any future product candidates, including ensuring that we have adequate capacity to meet increased demand, or we are unable to successfully manage the evolution of our drug delivery technology platform, our business could suffer.

As our volume grows, we will need to extend our platform to support product production at a larger scale within expected turnaround times. We may need additional certified laboratory scientists and technical and manufacturing personnel to process higher volumes of CTx-1301, CTx-1302, and/or CTx-2103, if approved. We may also need to purchase additional equipment, some of which can take several months or more to procure, setup and validate. There is no assurance that any of these increases in scale, expansion of personnel, equipment, or process enhancements will be successfully implemented, or that we will have adequate space in our facilities to accommodate such required expansion.

Our relationships with customers and third-party payors are subject to applicable anti-kickback, fraud and abuse and other healthcare laws and regulations, which could expose us to criminal sanctions, civil penalties, contractual damages, reputational harm and diminished profits and future earnings.

For our products and any product candidates that obtain regulatory approval and are marketed in the United States, if any, our arrangements with third-party payors and customers may expose us to broadly applicable fraud and abuse and other healthcare laws and regulations that may constrain the business or financial arrangements and relationships through which we market, sell and distribute any products for which we obtain marketing approval. In addition, we may be subject to health information privacy and security regulation by U.S. federal and state governments and foreign jurisdictions in which we conduct our business. The laws that may affect our ability to operate include:

- the federal Anti-Kickback Statute, which prohibits, among other things, persons from knowingly and willfully soliciting, receiving, offering or paying remuneration, directly or indirectly, to induce, or in return for, either the referral of an individual, or the purchase or recommendation of an item or service for which payment may be made under a federal healthcare program, such as the Medicare and Medicaid programs; a person or entity does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation;
- federal civil and criminal false claims laws and civil monetary penalty laws, including the federal False Claims Act, which impose criminal and civil penalties against individuals or entities for knowingly presenting, or causing to be presented, to the federal government, including the Medicare and Medicaid programs, claims for payment that are false or fraudulent or making a false statement to avoid, decrease or conceal an obligation to pay money to the federal government; actions may be brought by the government or a whistleblower and may include an assertion that a claim for payment by federal health care programs for items and services which results from a violation of the federal Anti-Kickback Statute constitutes a false or fraudulent claim for purposes of the False Claims Act;
- the federal Health Insurance Portability and Accountability Act of 1996 (HIPAA) that imposes criminal and civil liability for executing a scheme to defraud any health care benefit program, or knowingly and willfully falsifying, concealing or covering up a material fact or making any materially false statement in connection with the delivery of or payment for health care benefits, items or services; similar to the U.S. federal Anti-Kickback Statute, a person or entity does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation; HIPAA, as amended by the Health Information Technology and Clinical Health Act of 2009 (HITECH) and their respective implementing regulations, which imposes certain obligations, including mandatory contractual terms, on covered healthcare providers, health plans and healthcare clearinghouses, as well as their business associates, with respect to safeguarding the privacy, security and transmission of individually identifiable health information;
- The Physician Payments Sunshine Act, enacted as part of the PPACA, which requires certain manufacturers of drugs, devices, biologics and medical supplies that are reimbursable under Medicare, Medicaid or the Children's Health Insurance Program to report annually to Centers for Medicare and Medicaid Services, or CMS, information related to payments and other transfers of value to physicians and teaching hospitals, and ownership and investment interests held by physicians and their immediate family members; and
- analogous state and foreign laws and regulations, such as state anti-kickback and false claims laws, which may apply to sales or marketing arrangements and claims involving healthcare items or services reimbursed by non-governmental third-party payors, including private insurers, and state and foreign laws governing the privacy and security of health information in certain circumstances, many of which differ from each other in significant ways and often are not preempted by HIPAA, thus complicating compliance efforts.

Efforts to ensure that our business arrangements with third parties will comply with applicable healthcare laws and regulations may involve substantial costs. It is possible that governmental authorities will conclude that our business practices may not comply with current or future statutes, regulations or case law involving applicable fraud and abuse or other healthcare laws and regulations. If our operations are found to be in violation of any of these laws or any other governmental regulations that may apply to us, we may be subject to significant civil, criminal and administrative penalties, including, without limitation, damages, fines, imprisonment, exclusion from participation in government funded healthcare programs, such as Medicare and Medicaid, and the curtailment or restructuring of our operations. If any of the physicians or other healthcare providers or entities with whom we expect to do business is found to be not in compliance with applicable laws, they may be subject to criminal, civil or administrative sanctions, including exclusions from participation in government funded healthcare programs.

Product liability lawsuits could divert our resources, result in substantial liabilities and reduce the commercial potential of our products.

We face an inherent risk of product liability claims as a result of the clinical testing of our product candidates despite obtaining appropriate informed consents from our clinical trial participants. We will face an even greater risk if we obtain marketing approval for and commercially sell CTx-1301, CTx-1302 and/or CTx-2103, or any other product candidate. For example, we may be sued if any product that we develop allegedly causes injury or is found to be otherwise unsuitable during clinical testing, manufacturing, marketing or sale. Any such product liability claims may include allegations of defects in manufacturing, defects in design, a failure to warn of dangers inherent in the product, negligence, strict liability or a breach of warranties. Claims could also be asserted under state consumer protection acts. If we cannot successfully defend ourselves against product liability claims, we may incur substantial liabilities or be required to limit commercialization of our product candidates. Regardless of the merits or eventual outcome, liability claims may result in:

- reduced resources for our management to pursue our business strategy;
- decreased demand for our product candidates or products that we may develop;
- injury to our reputation and significant negative media attention;
- withdrawal of clinical trial participants;
- initiation of investigations by regulators;
- product recalls, withdrawals or labeling, marketing or promotional restrictions;
- significant costs to defend resulting litigation;
- substantial monetary awards to trial participants or patients;
- loss of revenue; and
- the inability to commercialize any products that we may develop.

If any of our product candidates are approved for commercial sale, we will be highly dependent upon consumer perceptions of us and the safety and quality of our products. We could be adversely affected if we are subject to negative publicity. We could also be adversely affected if any of our products or any similar products manufactured and distributed by other companies prove to be, or are asserted to be, harmful to patients. Because of our dependence upon consumer perceptions, any adverse publicity associated with illness or other adverse effects resulting from patients' use or misuse of our products or any similar products distributed by other companies could have a material adverse impact on our financial condition or results of operations.

Our product liability insurance coverage may not be adequate to cover any and all liabilities that we may incur.

We currently have \$10.0 million in product liability insurance coverage in the aggregate, which may not be adequate to cover any and all liabilities that we may incur. Insurance coverage is increasingly expensive. We may not be able to maintain insurance coverage at a reasonable cost or in an amount adequate to satisfy any liability that may arise. Large judgments have been awarded in class action lawsuits based on drugs that had unanticipated side effects. A successful product liability claim or series of claims brought against us, particularly if judgments exceed our insurance coverage, could decrease our cash and adversely affect our business. In addition, we may not be able to obtain or maintain sufficient insurance coverage at an acceptable cost or otherwise to protect against potential product liability claims, which could prevent or inhibit the commercial production and sale of our products.

If we fail to comply with environmental, health and safety laws and regulations, we could become subject to fines or penalties or incur costs that could have a material adverse effect on the success of our business.

We are subject to numerous environmental, health and safety laws and regulations. Our operations may involve the use of hazardous and flammable materials, including chemicals and biological materials. Our operations produce hazardous waste products. We expect to contract with third parties for the disposal of these materials and wastes. We cannot eliminate the risk of contamination or injury from these materials. In the event of contamination or injury resulting from our use of hazardous materials, we could be held liable for any resulting damages, and any liability could exceed our resources. We also could incur significant costs associated with civil or criminal fines and penalties.

Although we maintain workers' compensation insurance to cover us for costs and expenses we may incur due to injuries to our employees resulting from the use of hazardous materials or other work-related injuries, this insurance may not provide adequate coverage against potential liabilities. In addition, we may incur substantial costs in order to comply with current or future environmental, health and safety laws and regulations. These current or future laws and regulations may impair our research, development or production efforts. Failure to comply with these laws and regulations also may result in substantial fines, penalties or other sanctions.

Risks Related to Managing Our Growth, Our Employees, and Our Operations

We will need to further increase the size and complexity of our organization in the future, and we may experience difficulties in executing our growth strategy and managing any growth.

Our management, personnel, systems, and facilities currently in place are not adequate to support our business plan and near-term future growth. We will need to further expand our chemistry and manufacturing team, clinical team, managerial, operational, financial, and other resources to support our planned research, development and commercialization activities.

To manage our operations, growth and various projects effectively requires that we:

- continue to improve our operational, financial, management and regulatory compliance controls and reporting systems and procedures;
- attract and retain sufficient numbers of talented employees;
- develop a marketing, sales and distribution capability;
- manage our commercialization activities for our product candidates effectively and in a cost-effective manner;
- establish and maintain relationships with development and commercialization partners;
- manage our clinical trials effectively;
- manage our third-party supply and manufacturing operations effectively and in a cost-effective manner, while increasing production capabilities for our current product candidates to commercial levels; and
- manage our development efforts effectively while carrying out our contractual obligations to partners and other third parties.

In addition, historically, we have utilized and continue to utilize the services of part-time outside consultants to perform a number of tasks for us, including tasks related to product development and clinical testing. Our growth strategy may also entail expanding our use of consultants to implement these and other tasks going forward. We rely on consultants for certain functions of our business and will need to effectively manage these consultants to ensure that they successfully carry out their contractual obligations and meet expected deadlines. There can be no assurance that we will be able to manage our existing consultants or find other competent outside consultants, as needed, on economically reasonable terms, or at all. If we are not able to effectively manage our growth and expand our organization by hiring new employees and expanding our use of consultants, we might be unable to implement successfully the tasks necessary to execute effectively on our planned research, development and commercialization activities and, accordingly, might not achieve our research, development and commercialization goals.

If we are unable to establish sales and marketing capabilities or enter into agreements with third parties to market and sell our product candidates, we may be unable to generate any revenue.

We do not currently have an organization for the sale, marketing or distribution of CTx-1301, CTx-1302, or CTx-2103. As a result, we must build this organization, or enter into a marketing collaboration with a third party, in order to commercialize CTx-1301, CTx-1302, and/ or CTx-2103. The establishment and development of our own sales force in the United States to market CTx-1301, CTx-1302, and/ or CTx-2103 will be expensive and time consuming and could delay any product launch. We cannot be certain that we would be able to successfully develop this capacity, and even if we do, the cost of establishing and maintaining such an organization may exceed the benefit of doing so.

There are significant risks involved in building and managing a sales organization, including our ability to hire, retain and incentivize qualified individuals, generate sufficient sales leads, provide adequate training to sales and marketing personnel, effectively manage a geographically dispersed sales and marketing team and successfully negotiate with managed care and third-party payors. Any failure or delay in the development of our internal sales, marketing and distribution capabilities would adversely impact the commercialization of these products.

We intend to enter into strategic partnerships with third parties to commercialize our product candidates outside of the United States and may enter into strategic partnerships with third parties for certain aspects of our commercialization efforts within the United States. We may have difficulty establishing relationships with third parties on terms that are acceptable to us, or in all of the regions where we wish to commercialize our products, or at all. If we are unable to establish adequate sales, marketing and distribution capabilities, whether independently or with third parties, we may not be able to generate sufficient product revenue and may not become profitable. We will be competing with many companies that currently have extensive and well-funded marketing and sales operations and/or ingrained distribution channels. Without an internal team or the support of a third party to perform marketing and sales functions, we may be unable to compete successfully against these more established companies.

If we fail to attract and retain management and other key personnel, we may be unable to continue to successfully develop or commercialize our product candidates or otherwise implement our business plan.

Our ability to compete in the highly competitive pharmaceuticals industry depends upon our ability to attract and retain highly qualified managerial, scientific, medical, sales and marketing and other personnel. We are highly dependent on our management and scientific personnel. The loss of the services of any of these individuals could impede, delay or prevent the successful development of our product pipeline, completion of our planned clinical trials, commercialization of our product candidates or in-licensing or acquisition of new assets and could negatively impact our ability to successfully implement our business plan. If we lose the services of any of these individuals, we might not be able to find suitable replacements on a timely basis or at all, and our business could be harmed as a result. We maintain “key man” insurance policies on the lives of specific individuals but not on the lives of all critical employees. In order to retain valuable employees at our company, in addition to salary and cash incentives, we may provide stock options that vest over time. The value to employees of stock options that vest over time will be significantly affected by movements in our stock price that are beyond our control and may at any time be insufficient to counteract offers from other companies.

We might not be able to attract or retain qualified management and other key personnel in the future due to the intense competition for qualified personnel among biotechnology, pharmaceutical and other businesses. We could have difficulty attracting experienced personnel to our company and may be required to expend significant financial resources in our employee recruitment and retention efforts. Many of the other pharmaceutical companies with whom we compete for qualified personnel have greater financial and other resources, different risk profiles and longer histories in the industry than we do. They also may provide more diverse opportunities and better chances for career advancement. If we are not able to attract and retain the necessary personnel to accomplish our business objectives, we may experience constraints that will harm our ability to implement our business strategy and achieve our business objectives.

In addition, we have scientific and clinical advisors who assist us in formulating our development and clinical strategies. These advisors are not our employees and may have commitments to, or consulting or advisory contracts with, other entities that may limit their availability to us. In addition, our advisors may have arrangements with other companies to assist those companies in developing products or technologies that may compete with ours.

Our research and development is focused on discovering and developing product candidates but these may not make it to the market.

Our development research and clinical development efforts to date have resulted in two product candidates, CTx-1301 and CTx-1302, for the treatment of ADHD. As part of our growth strategy, we intend to identify, develop and market additional product candidates such as CTx-2103, for the treatment of anxiety. We are exploring various therapeutic opportunities for our pipeline and proprietary technologies. We may spend several years completing our development of any particular current or future internal product candidates, and failure can occur at any stage. We may not be able to develop drugs that are bioequivalent, safe and effective and/or that have commercially significant improvements over already approved drugs. The product candidates to which we allocate our resources may not end up being successful. The success of this strategy depends partly upon our ability to identify, select, discover and acquire promising product candidates and products.

The process of proposing, negotiating and implementing a license or acquisition of a product candidate or approved product is lengthy and complex. Other companies, including some with substantially greater financial, marketing and sales resources, may compete with us for the license or acquisition of product candidates and approved products. We have limited resources to identify and execute the acquisition or in-licensing of third-party products, businesses and technologies and integrate them into our current infrastructure. Moreover, we may devote resources to potential acquisitions or in-licensing opportunities that are never completed, or we may fail to realize the anticipated benefits of such efforts. We may not be able to acquire the rights to additional product candidates on terms that we find acceptable, or at all.

In addition, future acquisitions may entail numerous operational and financial risks, including:

- exposure to unknown liabilities;
- higher than expected acquisition and integration costs; and
- difficulty in combining the operations and personnel of any acquired businesses with our operations and personnel.

Further, any product candidate that we acquire may require additional development efforts prior to commercial sale, including extensive clinical testing and approval by the FDA and other regulatory authorities.

If we do not successfully develop and commercialize product candidates based upon our Precision Timed Release platform technology, we will not be able to obtain product revenue in future periods, which likely would result in significant harm to our financial position and adversely affect our stock price.

Our operating results may fluctuate significantly, which makes our future operating results difficult to predict and could cause our operating results to fall below expectations.

Our operations to date have been primarily limited to formulating and developing our product candidates and undertaking clinical trials of our product candidates. We have not yet obtained regulatory approvals for any of our product candidates. Consequently, any predictions about our future success or viability may not be as accurate as they could be if we had a longer operating history or approved products on the market. Furthermore, our operating results may fluctuate due to a variety of other factors, many of which are outside of our control and may be difficult to predict, including the following:

- delays in the commencement, enrollment and the timing of clinical testing for our product candidates;
- the timing and success or failure of clinical trials for our product candidates or competing product candidates, or any other change in the competitive landscape of our industry, including consolidation among our competitors or partners;
- any delays in regulatory review and approval of product candidates in clinical development;

- the timing and cost of, and level of investment in, research and development activities relating to our product candidates, which may change from time to time;
- the cost of manufacturing our product candidates, which may vary depending on FDA guidelines and requirements, and the quantity of production;
- our ability to obtain additional funding to develop our product candidates;
- expenditures that we will or may incur to acquire or develop additional product candidates and technologies;
- the level of demand for our product candidates, should they receive approval, which may vary significantly;
- potential side effects of our product candidates that could delay or prevent commercialization or cause an approved drug to be taken off the market;
- the ability of patients or healthcare providers to obtain coverage of or sufficient reimbursement for our product candidates, if approved;
- our dependency on third-party manufacturers to supply or manufacture our product candidates;
- our ability to establish an effective sales, marketing and distribution infrastructure in a timely manner;
- market acceptance of our product candidates, if approved, and our ability to forecast demand for those product candidates;
- our ability to receive approval and commercialize our product candidates outside of the United States;
- our ability to establish and maintain collaborations, licensing or other arrangements;
- our ability and third parties' abilities to protect intellectual property rights;
- costs related to and outcomes of potential litigation or other disputes;
- our ability to adequately support future growth;
- our ability to attract and retain key personnel to manage our business effectively;
- potential liabilities associated with hazardous materials;
- our ability to maintain adequate insurance policies; and
- future accounting pronouncements or changes in our accounting policies.

Our operating results and liquidity needs could be negatively affected by market fluctuations and economic downturn.

Our operating results and liquidity could be negatively affected by economic conditions generally, both in the United States and elsewhere around the world. The market for discretionary medical products and procedures may be particularly vulnerable to unfavorable economic conditions. Some patients may consider certain of our product candidates to be discretionary, and if full reimbursement for such products is not available, demand for these products may be tied to the discretionary spending levels of our targeted patient populations. Domestic and international equity and debt markets have experienced and may continue to experience heightened volatility and turmoil based on domestic and international economic conditions and concerns. In the event these economic conditions and concerns continue or worsen, and the markets continue to remain volatile, our operating results and liquidity could be adversely affected by those factors in many ways, including weakening demand for certain of our products and making it more difficult for us to raise funds if necessary, and our stock price may decline. Additionally, although we plan to market our products primarily in the United States, our partners have extensive global operations, indirectly exposing us to risk.

Our business and operations would suffer in the event of failures in our internal computer systems.

Despite the implementation of security measures, our internal computer systems and those of our current and any future partners, contractors and consultants are vulnerable to damage from computer viruses, unauthorized access, natural disasters, terrorism, war and telecommunication and electrical failures. While we have not experienced any such material system failure, accident or security breach to date, if such an event were to occur and cause interruptions in our operations, it could result in a material disruption of our manufacturing activities, development programs and our business operations. For example, the loss of manufacturing records or clinical trial data from completed or future clinical trials could result in delays in our regulatory approval efforts and significantly increase our costs to recover or reproduce the data. To the extent that any disruption or security breach were to result in a loss of, or damage to, our data or applications, or inappropriate disclosure of confidential or proprietary information, we could incur liability and the further commercialization and development of our products and product candidates could be delayed.

We are increasingly dependent on information technology, and our systems and infrastructure face certain risks, including cybersecurity and data leakage risks.

Significant disruptions to our information technology systems or breaches of information security could adversely affect our business. In the ordinary course of business, we collect, store and transmit large amounts of confidential information, and it is critical that we do so in a secure manner to maintain the confidentiality and integrity of such confidential information. The size and complexity of our information technology systems, and those of our third-party vendors with whom we contract, make such systems potentially vulnerable to service interruptions and security breaches from inadvertent or intentional actions by our employees, partners or vendors, from attacks by malicious third parties, or from intentional or accidental physical damage to our systems infrastructure maintained by us or by third parties. Maintaining the secrecy of this confidential, proprietary, or trade secret information is important to our competitive business position. While we have taken steps to protect such information and invested in information technology, there can be no assurance that our efforts will prevent service interruptions or security breaches in our systems or the unauthorized or inadvertent wrongful use or disclosure of confidential information that could adversely affect our business operations or result in the loss, dissemination, or misuse of critical or sensitive information. A breach of our security measures or the accidental loss, inadvertent disclosure, unapproved dissemination, misappropriation or misuse of trade secrets, proprietary information, or other confidential information, whether as a result of theft, hacking, fraud, trickery or other forms of deception, or for any other reason, could enable others to produce competing products, use our proprietary technology or information, or adversely affect our business or financial condition. Further, any such interruption, security breach, loss or disclosure of confidential information, could result in financial, legal, business, and reputational harm to us and could have a material adverse effect on our business, financial position, results of operations or cash flow.

Risks Related to Our Intellectual Property

If our intellectual property related to our products or product candidates is not adequate, we may not be able to compete effectively in our market.

We rely upon a combination of patents, trade secret protection and confidentiality agreements to protect the intellectual property related to our products, product candidates and technology. Any disclosure to or misappropriation by third parties of our confidential or proprietary information could enable competitors to duplicate or surpass our technological achievements, thus eroding our competitive position in our market.

Due to legal standards relating to patentability, validity, enforceability and scope of claim, patents covering pharmaceutical and biotechnology inventions involve complex legal, scientific and factual questions. Formulation of drug products such as ours with complex release profiles is an area of intense research, publishing and patenting, which limits the scope of any new patent applications. As a result, our ability to obtain, maintain and enforce patents is uncertain and any rights under any existing patents, or any patents we might obtain or license, may not provide us with sufficient protection for our products and product candidates to afford a commercial advantage against competitive products or processes. The patent applications that we own may fail to result in issued patents in the United States or in foreign countries. Even if patents do successfully issue, third parties may challenge their patentability, validity (e.g., by discovering previously unidentified prior art, or a patent-barring event such as a prior public disclosure, use, sale or offer for sale of the invention), enforceability or scope, which may result in such patents being narrowed, invalidated or held unenforceable. For example, U.S. patents may be challenged by third parties via *inter partes* review, post grant review, derivation or interference proceedings at the USPTO, and European patents may be challenged via an opposition proceeding at the European Patent Office. Furthermore, if we were to assert our patent rights against a competitor, the competitor could challenge the validity and/or enforceability of the asserted patent rights. Although a granted U.S. patent is entitled to a statutory presumption of validity, its issuance is not conclusive as to its validity or its enforceability, and it may not provide us with adequate proprietary protection or competitive advantages against competitors with similar products.

If the breadth or strength of protection provided by the patents and patent applications we hold or pursue with respect to our products and product candidates is successfully challenged, we may face unexpected competition that could have a material adverse impact on our business. Even if they are unchallenged, our patents and patent applications may not adequately protect our intellectual property or prevent others from designing around our claims. For example, a third party may develop a competitive product that provides therapeutic benefits similar to our products or product candidates but is sufficiently different to fall outside the scope of our patent protection.

Furthermore, if we encounter delays in our clinical trials or entry onto the market in a particular jurisdiction, the period of time during which we could market a particular product under patent protection would be reduced.

Even where laws provide protection, costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights, and the outcome of such litigation would be uncertain. If we or one of our future collaborators were to initiate legal proceedings against a third party to enforce a patent covering a product or our technology, the defendant could counterclaim that our patent is invalid and/or unenforceable. In patent litigation in the United States, defendant counterclaims alleging invalidity and/or unenforceability are commonplace. Grounds for a validity challenge could be an alleged failure to meet any of several statutory requirements, including lack of novelty, obviousness, lack of written description, non-enablement or a patent-barring event, such as a public disclosure, use or sale of the invention more than a year before the filing date of the application. Grounds for an unenforceability assertion could, for example, be an allegation that someone connected with prosecution of the patent withheld material information from the USPTO, or made a misleading statement, during prosecution. The outcome following legal assertions of invalidity and unenforceability is unpredictable. With respect to validity, for example, we cannot be certain that there is no invalidating prior art, of which we and the patent examiner were unaware during prosecution, or that a third party challenging one of our patents would not assert that a patent-barring event had occurred. If a plaintiff or a defendant were to prevail on a legal assertion of invalidity and/or unenforceability against one or more of our patents, we would lose at least part, and perhaps all, of the patent protection for one or more of our products or product candidates. Such a loss of patent protection could have a material adverse impact on our business.

Moreover, we may be subject to a third-party pre-issuance submission of prior art to the USPTO, or become involved in reexamination, *inter partes* review, or interference proceedings challenging our patent rights. Patents based on applications that we file in the future may also be subject to derivation and/or post-grant review proceedings. An adverse determination in any such submission, proceeding or litigation could reduce the scope of, or invalidate, our patent rights and allow third parties to commercialize our technology or products and compete directly with us. In addition, if the breadth or strength of protection provided by our patents and patent applications is threatened, it could dissuade companies from collaborating with us to license, develop or commercialize current or future product candidates.

We may not seek to protect our intellectual property rights in all jurisdictions throughout the world, and we may not be able to adequately enforce our intellectual property rights even in the jurisdictions where we seek protection.

Filing, prosecuting and defending patents on product candidates in all countries and jurisdictions throughout the world would be prohibitively expensive, and our intellectual property rights in some countries outside the United States are less extensive than in the United States. In addition, the laws of some foreign countries do not protect intellectual property rights to the same extent as federal and state laws in the United States. Consequently, even where we do elect to pursue patent rights outside the United States, we may not be able to obtain relevant claims and/or we may not be able to prevent third parties from practicing our inventions in all countries outside the United States, or from selling or importing products made using our inventions in and into the United States or other jurisdictions.

Competitors may use our technologies in jurisdictions where we do not pursue and obtain patent protection to develop their own products and further, may possibly export otherwise infringing products to territories where we have patent protection, but enforcement is not as strong as that in the United States. These products may compete with our products and our patents or other intellectual property rights may not be effective or sufficient to prevent them from competing. Even if we pursue and obtain issued patents in particular jurisdictions, our patent claims or other intellectual property rights may not be effective or sufficient to prevent third parties from competing with us.

The laws of some foreign countries do not protect intellectual property rights to the same extent as the laws of the United States. Many companies have encountered significant problems in protecting and defending intellectual property rights in certain foreign jurisdictions. The legal systems of some countries, particularly developing countries, do not favor the enforcement of patents and other intellectual property protection. This could make it difficult for us to stop the infringement of our patents, if obtained, or the misappropriation of our other intellectual property rights. For example, many foreign countries have compulsory licensing laws under which a patent owner must grant licenses to third parties. In addition, many countries limit the enforceability of patents against third parties, including government agencies or government contractors. In these countries, patents may provide limited or no benefit.

Patent protection must ultimately be sought on a country-by-country basis, which is an expensive and time-consuming process with uncertain outcomes. Accordingly, we have, and may in the future, choose not to seek patent protection in certain countries. Furthermore, while we intend to protect our intellectual property rights in certain markets for our products, we cannot ensure that we will be able to initiate or maintain similar efforts in all jurisdictions in which we may wish to market our products. Accordingly, our efforts to protect our intellectual property rights in such countries may be inadequate.

Obtaining and maintaining our patent protection depends on compliance with various procedural, document submission, fee payment and other requirements imposed by governmental patent agencies, and our patent protection could be reduced or eliminated for non-compliance with these requirements.

The USPTO and various foreign governmental patent agencies require compliance with a number of procedural, documentary, fee payment and other provisions during the patent process. There are situations in which noncompliance can result in abandonment or lapse of a patent or patent application, resulting in partial or complete loss of patent rights in the relevant jurisdiction. In such an event, competitors might be able to enter the market earlier than would otherwise have been the case.

If we are sued for infringing intellectual property rights of third parties, it will be costly and time consuming, and an unfavorable outcome in that litigation would have a material adverse effect on our business.

Our commercial success depends upon our ability and the ability of our collaborators to develop, manufacture, market and sell their approved products and our product candidates and use our proprietary technologies without infringing the proprietary rights of third parties. Numerous U.S. and foreign issued patents and pending patent applications, which are owned by third parties, exist in the fields in which we are developing product candidates. As the pharmaceutical industry expands and more patents are issued, the risk increases that our products and product candidates may give rise to claims of infringement of the patent rights of others. There may, for example, be issued patents of third parties of which we are currently unaware, that may be infringed by our products or product candidates, which could prevent us from being able to commercialize our products or product candidates, respectively. Because patent applications can take many years to issue, there may be currently pending applications which may later result in issued patents that our products or product candidates may infringe.

The pharmaceutical industry is rife with patent litigation between patent holders and producers of follow-on drug products. The possibility of blocking FDA approval of a competitor's product for up to 30 months provides added incentive to litigate over Orange Book patents, but suits involving non-Orange Book patents are also common in the ADHD space. There have been multiple patent litigations involving nearly all of the medications for treatment of ADHD. This trend may continue and, as a result, we may become party to legal matters and claims arising in the ordinary course of business.

We may be exposed to, or threatened with, future litigation by third parties alleging that our products or product candidates infringe their intellectual property rights. If one of our products or product candidates is found to infringe the intellectual property rights of a third party, we or our collaborators could be enjoined by a court and required to pay damages and could be unable to commercialize the applicable approved products and product candidates unless we obtain a license to the patent. A license may not be available to us on acceptable terms, if at all. In addition, during litigation, the patent holder could obtain a preliminary injunction or other equitable relief which could prohibit us from making, using or selling our approved products, pending a trial on the merits, which may not occur for several years.

There is a substantial amount of litigation involving patent and other intellectual property rights in the pharmaceutical industry generally. If a third-party claims that we or our collaborators infringe its intellectual property rights, we may face a number of issues, including, but not limited to:

- infringement and other intellectual property claims which, regardless of merit, may be expensive and time-consuming to litigate and may divert our management's attention from our core business;
- third parties bringing claims against us may have more resources than us to litigate claims against us;
- substantial damages for infringement, which we may have to pay if a court decides that the product at issue infringes on or violates the third party's rights, and, if the court finds that the infringement was willful, we could be ordered to pay treble damages and the patent owner's attorneys' fees;
- a court prohibiting us from selling our product or any product candidate approved in the future, if any, unless the third party licenses its rights to us, which it is not required to do;
- if a license is available from a third party, we may have to pay substantial royalties, fees or grant cross-licenses to our intellectual property rights; and
- redesigning any of our products and product candidates so they do not infringe, which may not be possible or may require substantial monetary expenditures and time.

Our drug development strategy relies heavily upon the 505(b)(2) regulatory approval pathway, which requires us to certify that we do not infringe upon third-party patents covering approved drugs. Such certifications routinely result in third-party claims of intellectual property infringement, the defense of which would be costly and time consuming, and an unfavorable outcome in any litigation may prevent or delay our development and commercialization efforts which would harm our business.

Our commercial success depends in large part on our avoiding infringement of the patents and proprietary rights of third parties for existing approved drug products. Because we utilize the 505(b)(2) regulatory approval pathway for the approval of our products and product candidates, we rely in whole or in part on studies conducted by third parties related to those approved drug products. As a result, upon filing with the FDA for approval of our product candidates, we will be required to certify to the FDA that either: (1) there is no patent information listed in the FDA's Orange Book with respect to our NDA; (2) the patents listed in the Orange Book have expired; (3) the listed patents have not expired, but will expire on a particular date and approval is sought after patent expiration; or (4) the listed patents are invalid or will not be infringed by the manufacture, use or sale of our proposed drug product. If we certify to the FDA that a patent is invalid or not infringed, or a Paragraph IV certification, a notice of the Paragraph IV certification must also be sent to the patent owner once our 505(b)(2) NDA is accepted for filing by the FDA. The third party may then initiate a lawsuit against us asserting infringement of the patents identified in the notice. The filing of a patent infringement lawsuit within 45 days of receipt of the notice automatically prevents the FDA from approving our NDA until the earliest of 30 months or the date on which the patent expires, the lawsuit is settled, or the court reaches a decision in the infringement lawsuit in our favor. If the third party does not file a patent infringement lawsuit within the required 45-day period, our NDA will not be subject to the 30-month stay. However, even if the third party does not sue within the 45-day time limit, thereby invoking the 30-month stay, it may still challenge our right to market our product upon FDA approval; therefore, some risk of an infringement suit remains even after the expiry of the 45-day limit.

We may be unable to adequately prevent disclosure of trade secrets and other proprietary information.

We rely on trade secrets to protect our proprietary know-how and technological advances, especially where we do not believe patent protection is appropriate or obtainable. However, trade secrets are difficult to protect. We rely in part on confidentiality agreements with our employees, consultants, outside scientific collaborators, sponsored researchers and other advisors to protect our trade secrets and other proprietary information. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the event of unauthorized disclosure of confidential information. In addition, others may independently discover our trade secrets and proprietary information. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights. Failure to obtain or maintain trade secret protection could enable competitors to use our proprietary information to develop products that compete with our products or cause additional, material adverse effects upon our competitive business position.

We may be subject to claims by third parties asserting that our employees or we have misappropriated their intellectual property or claiming ownership of what we regard as our own intellectual property.

Some of our employees were previously employed at other companies, including actual or potential competitors. We may also engage advisors and consultants who are concurrently employed at other organizations or who perform services for other entities. Although we try to ensure that our employees, advisors and consultants do not use the proprietary information or know-how of others in their work for us, we may be subject to claims that we or our employees, advisors, or consultants have used or disclosed intellectual property, including trade secrets or other proprietary information, of any such party's former employer or in violation of an agreement with or legal obligation in favor of another party. Litigation may be necessary to defend against these claims.

In addition, while we generally require our employees, consultants, advisors and contractors who may be involved in the development of intellectual property to execute agreements assigning such intellectual property to us, we may be unsuccessful in executing such an agreement with each party who in fact develops intellectual property that we regard as our own. Our and their assignment agreements may not be self-executing or may be breached, and we may be forced to bring claims against third parties, or defend claims they may bring against us, to determine the ownership of what we regard as our intellectual property. Similarly, we may be subject to claims that an employee, advisor or consultant performed work for us that conflicts with that person's obligations to a third party, such as an employer or former employer, and thus, that the third party has an ownership interest in the intellectual property arising out of work performed for us. Litigation may be necessary to defend against these claims.

If we fail in prosecuting or defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights or personnel. Even if we are successful in prosecuting or defending against such claims, litigation could result in substantial costs and be a distraction to management.

Our decision to seek approval of CTx-1301, CTx-1302, and/or CTx-2103 and other product candidates under 505(b)(2) may increase the risk that patent infringement suits are filed against us, which would delay the FDA's approval of such product candidates.

In connection with any NDA that we file under the 505(b)(2) regulatory pathway, if there are patents that claim the approved drug contained in our product candidates and referenced in our 505(b)(2) NDA, we must certify to the FDA and notify the patent holder that any patents listed for the approved drug in the FDA's Orange Book publication are invalid, unenforceable or will not be infringed by the manufacture, use or sale of our drug. If a patent infringement lawsuit is filed against us within 45 days of its receipt of notice of our certification, the FDA is automatically prevented from approving our 505(b)(2) NDA until the earliest of 30 months, expiration of the patent, settlement of the lawsuit or a court decision in the infringement case that is favorable to us, or such shorter or longer period as may be ordered by a court. Such actions are routinely filed by patent owners. Accordingly, we may invest significant time and expense in the development of our product candidates only to be subject to significant delay and patent litigation before our product candidates may be commercialized. We may not be successful in defending any patent infringement claim. Even if we are found not to infringe, or a plaintiff's patent claims are found invalid or unenforceable, defending any such infringement claim would be expensive and time-consuming, and would delay launch of our products or our other product candidates and distract management from their normal responsibilities.

Risks Related to the Securities Markets and Ownership of Our Securities

An active trading market for our common stock or warrants may not be sustained.

An active trading market for our common stock or warrants may not be sustained. The lack of an active market for our common stock or warrants may impair investors' ability to sell their common stock or warrants at the time they wish to sell them or at a price that they consider reasonable, may reduce the fair market value of their shares of common stock or warrants and may impair our ability to raise capital to continue to fund operations by selling securities and may impair our ability to acquire additional intellectual property assets by using our securities as consideration.

The prices of our securities may be volatile, which could subject us to securities class action litigation and our stockholders could incur substantial losses.

The market price for our common stock and warrants may be volatile and subject to wide fluctuations in response to factors including the following:

- actual or anticipated fluctuations in our quarterly or annual operating results;
- actual or anticipated changes in the pace of our corporate achievements or our growth rate relative to our competitors;
- failure to meet or exceed financial estimates and projections of the investment community or that we provide to the public;
- issuance of new or updated research or reports by securities analysts;
- share price and volume fluctuations attributable to inconsistent trading volume levels of our common stock or warrants;
- additions or departures of key management or other personnel;
- disputes or other developments related to proprietary rights, including patents, litigation matters, and our ability to obtain patent protection for our technologies;
- announcement or expectation of additional debt or equity financing efforts;
- sales of our common stock or warrants by us, our insiders or our other stockholders; and
- general economic, market or political conditions in the United States or elsewhere (including, without limitation, conditions arising out the COVID-19 pandemic).

In particular, the market prices of clinical-stage companies like ours have been highly volatile due to factors, including, but not limited to:

- any delay or failure in a clinical trial for our product candidates or receive approval from the FDA and other regulatory agents;
- developments or disputes concerning our product's intellectual property rights;
- our or our competitors' technological innovations;
- fluctuations in the valuation of companies perceived by investors to be comparable to us;
- announcements by us or our competitors of significant contracts, acquisitions, strategic partnerships, joint ventures, capital commitments, new technologies or patents;
- failure to complete significant transactions or collaborate with vendors in manufacturing our product; and
- proposals for legislation that would place restrictions on the price of medical therapies.

These and other market and industry factors may cause the market price and demand for our common stock and warrants to fluctuate substantially, regardless of our actual operating performance, which may limit or prevent investors from readily selling their shares of common stock or warrants and may otherwise negatively affect the liquidity of our common stock and warrants. In addition, the stock market in general, and Nasdaq Capital Market and emerging growth companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of these companies. In the past, when the market price of a security has been volatile, holders of that security have instituted securities class action litigation against the company that issued the security. If any of our stockholders brought a lawsuit against us, we could incur substantial costs defending the lawsuit. Such a lawsuit could also divert the time and attention of our management.

Our warrants may not have any value.

There can be no assurance that the market price of our common stock will ever equal or exceed the exercise price of our outstanding warrants. In the event that our common stock price does not exceed the exercise price of the warrants during the period when the warrants are exercisable, the warrants may not have any value.

A warrant does not entitle the holder to any rights as common stockholders until the holder exercises the warrant for a share of our common stock.

Until a warrant holder acquires a share of our common stock upon the exercise of a warrant, the warrant will not provide the holder any rights as a common stockholder. Upon exercise of a warrant, the warrant holder will be entitled to exercise the rights of a common stockholder only as to matters for which the record date occurs after the exercise date.

Certain of the possible adjustments to the warrants may result in a deemed distribution from us to a beneficial owner of a warrant that will be taxable, even though the beneficial owner does not receive a corresponding distribution of cash.

The exercise terms of the warrants may be adjusted in certain circumstances. An adjustment to the number of shares of common stock that will be issued on the exercise of the warrants or an adjustment to the exercise price of the warrants (or, in certain circumstances, a failure to make adjustments) may be treated as a taxable deemed distribution to a holder of the warrants, even if such holder does not receive any cash or other property in connection with the adjustment. Holders of the warrants should consult their tax advisors regarding the proper treatment of any adjustments to the warrants.

We are an “emerging growth company,” and will be able take advantage of reduced disclosure requirements applicable to “emerging growth companies,” which could make our securities less attractive to investors.

We are an “emerging growth company,” as defined in the JOBS Act and, for as long as we continue to be an “emerging growth company,” we intend to take advantage of certain exemptions from various reporting requirements applicable to other public companies but not to “emerging growth companies,” including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. We could be an “emerging growth company” for up to five years, or until the earliest of (i) the last day of the first fiscal year in which our annual gross revenues exceed \$1.07 billion, (ii) the date that we become a “large accelerated filer” as defined in Rule 12b-2 under the Exchange Act, or (iii) the date on which we have issued more than \$1 billion in non-convertible debt during the preceding three year period.

We intend to take advantage of these reporting exemptions described above until we are no longer an “emerging growth company.” Under the JOBS Act, “emerging growth companies” can also delay adopting new or revised accounting standards until such time as those standards apply to private companies. We have irrevocably elected to avail ourselves of this exemption from new or revised accounting standards and, therefore, we will not be subject to the same new or revised accounting standards as other public companies that are not “emerging growth companies.”

We cannot predict if investors will find our securities less attractive if we choose to rely on these exemptions. If some investors find our securities less attractive as a result of any choices to reduce future disclosure, there may be a less active trading market for our securities and the price of our common stock and warrants may be more volatile.

As a public company, we are obligated to develop and maintain proper and effective controls over financial reporting. If we fail to maintain proper and effective internal controls over financial reporting in the future, our ability to produce accurate and timely financial statements could be impaired, which could harm our operating results, investors’ views of us and, as a result, the value of our securities.

Pursuant to Section 404 of Sarbanes-Oxley Act, our management will be required to report upon the effectiveness of our internal control over financial reporting beginning with the annual report for our fiscal year ending December 31, 2022. When we lose our status as an “emerging growth company,” as defined in the JOBS Act, and reach an accelerated filer threshold, our independent registered public accounting firm will be required to attest to the effectiveness of our internal control over financial reporting. However, for so long as we remain an emerging growth company, we intend to take advantage of an exemption available to emerging growth companies from these auditor attestation requirements. The rules governing the standards that must be met for management to assess our internal control over financial reporting are complex and require significant documentation, testing, and possible remediation. To comply with the requirements of being a reporting company under the Exchange Act, we will need to upgrade our systems including information technology; implement additional financial and management controls, reporting systems, and procedures; and hire additional accounting and finance staff. If we or, if required, our auditors are unable to conclude that our internal control over financial reporting is effective, investors may lose confidence in our financial reporting, and the trading price of our common stock or warrants may decline.

We cannot assure you that there will not be material weaknesses or significant deficiencies in our internal control over financial reporting in the future. Any failure to maintain internal control over financial reporting could severely inhibit our ability to accurately report our financial condition, results of operations or cash flows. If we are unable to conclude that our internal control over financial reporting is effective, or if our independent registered public accounting firm determines we have a material weakness or significant deficiency in our internal control over financial reporting once that firm begins its Section 404 reviews, we could lose investor confidence in the accuracy and completeness of our financial reports, the market price of our common stock or warrants could decline, and we could be subject to sanctions or investigations by Nasdaq, the SEC, or other regulatory authorities. Failure to remedy any material weakness or significant deficiencies in our internal control over financial reporting, or to implement or maintain other effective control systems required of public companies, could also restrict our future access to the capital markets.

We will incur significantly increased costs as a result of and devote substantial management time to operating as a public company.

As a newly public company, we will incur significant legal, accounting and other expenses that we did not incur as a private company. For example, we will be subject to the reporting requirements of the Securities Exchange Act of 1934, as amended, and will be required to comply with the applicable requirements of the Sarbanes-Oxley Act and the Dodd-Frank Wall Street Reform and Consumer Protection Act, as well as rules and regulations subsequently implemented by the SEC, including the establishment and maintenance of effective disclosure and financial controls, changes in corporate governance practices and required filing of annual, quarterly and current reports with respect to our business and operating results. These requirements will increase our legal and financial compliance costs and will make some activities more time-consuming and costly. In addition, our management and other personnel will need to divert attention from operational and other business matters to devote substantial time to these public company requirements. We will also need to hire additional accounting and financial staff with appropriate public company experience and technical accounting knowledge and may need to establish an internal audit function. We also expect that operating as a public company will make it more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. This could also make it more difficult for us to attract and retain qualified people to serve on our board of directors, our board committees or as executive officers. In addition, after we no longer qualify as an “emerging growth company,” as defined under the JOBS ACT we expect to incur additional management time and cost to comply with the more stringent reporting requirements applicable to companies that are deemed accelerated filers or large accelerated filers, including complying with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act. We are just beginning the process of compiling the system and processing documentation needed to comply with such requirements. We may not be able to complete our evaluation, testing and any required remediation in a timely fashion. In that regard, we currently do not have an internal audit function, and we will need to hire or contract for additional accounting and financial staff with appropriate public company experience and technical accounting knowledge.

We cannot predict or estimate the amount of additional costs we may incur as a result of becoming a public company or the timing of such costs.

If securities or industry analysts do not publish research or publish inaccurate or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our common stock and warrants will depend in part on the research and reports that securities or industry analysts publish about us or our business. We currently have limited research coverage by securities and industry analysts. If we fail to maintain adequate coverage by securities or industry analysts, the trading price for our stock would be negatively impacted. If one or more of the analysts who covers us downgrades our stock or publishes inaccurate or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts ceases coverage of us or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price and trading volume to decline.

Future sales of our common stock, warrants, or securities convertible into our common stock may depress our stock price.

The price of our common stock or warrants could decline as a result of sales of a large number of shares of our common stock or warrants or the perception that these sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate.

In addition, in the future, we may issue additional shares of common stock, warrants or other equity or debt securities convertible into common stock in connection with a financing, acquisition, litigation settlement, employee arrangements or otherwise. Any such issuance could result in substantial dilution to our existing stockholders and could cause the price of our common stock or warrants to decline.

Our failure to meet the continued listing requirements of Nasdaq could result in a delisting of our common stock and warrants.

If we fail to satisfy the continued listing requirements of Nasdaq, such as the corporate governance requirements or the minimum closing bid price requirement, Nasdaq may take steps to delist our common stock and warrants. Such a delisting would likely have a negative effect on the price of our common stock and warrants and would impair your ability to sell or purchase our common stock and warrants when you wish to do so. In the event of a delisting, we can provide no assurance that any action taken by us to restore compliance with listing requirements would allow our common stock and warrants to become listed again, stabilize the market price or improve the liquidity of our common stock and warrants, prevent our common stock and warrants from dropping below the Nasdaq minimum bid price requirement or prevent future non-compliance with Nasdaq's listing requirements.

Anti-takeover provisions contained in our certificate of incorporation and bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

Our amended and restated certificate of incorporation, bylaws and Delaware law contain provisions which could have the effect of rendering more difficult, delaying or preventing an acquisition deemed undesirable by our board of directors. Our corporate governance documents include provisions:

- classifying our board of directors into three classes;
- authorizing "blank check" preferred stock, which could be issued by our board of directors without stockholder approval and may contain voting, liquidation, dividend, and other rights superior to our common stock;
- limiting the liability of, and providing indemnification to, our directors and officers;
- limiting the ability of our stockholders to call and bring business before special meetings;
- requiring advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and for nominations of candidates for election to our board of directors;
- controlling the procedures for the conduct and scheduling of board of directors and stockholder meetings; and
- providing our board of directors with the express power to postpone previously scheduled annual meetings and to cancel previously scheduled special meetings.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation law, which prevents some stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of substantially all of our outstanding common stock.

Any provision of our amended and restated certificate of incorporation, bylaws or Delaware law that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock or warrants and could also affect the price that some investors are willing to pay for our common stock and warrants.

We do not anticipate paying any cash dividends on our common stock in the foreseeable future.

We do not anticipate paying any cash dividends on our common stock in the foreseeable future. We currently intend to retain any future earnings to finance the operation and expansion of our business, and we do not expect to declare or pay any dividends in the foreseeable future. Consequently, stockholders must rely on sales of their common stock and warrants after price appreciation, which may never occur, as the only way to realize any future gains on their investment. There is no guarantee that shares of our common stock or warrants will appreciate in value or even maintain the price at which stockholders have purchased their shares or warrants.

Our directors, executive officers and principal stockholders have substantial control over us and could delay or prevent a change of corporate control.

As of March 21, 2021, our directors, executive officers and holders of more than 5% of our common stock, together with their affiliates, beneficially own, in the aggregate, approximately 38% of our outstanding common stock. As a result, these stockholders, acting together, would have the ability to control the outcome of matters submitted to our stockholders for approval, including the election of directors and any merger, consolidation or sale of all or substantially all of our assets. In addition, these stockholders, acting together, would have the ability to control the management and affairs of our company. Accordingly, this concentration of ownership could harm the market price of our common stock and warrants by:

- delaying, deferring or preventing a change of control of us;
- impeding a merger, consolidation, takeover or other business combination involving us; or
- discouraging a potential acquiror from making a tender offer or otherwise attempting to obtain control of us.

See “Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters” below for more information regarding the ownership of our outstanding stock by our executive officers, directors and holders of more than 5% of our common stock, together with their affiliates.

Our amended and restated certificate of incorporation designates the Court of Chancery of the State of Delaware as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders, which could limit our stockholders’ ability to obtain a favorable judicial forum for disputes with us or our directors, officers or other employees.

Our amended and restated certificate of incorporation requires that, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will, to the fullest extent permitted by law, be the sole and exclusive forum for each of the following:

- any derivative action or proceeding brought on our behalf;
- any action asserting a claim for breach of any fiduciary duty owed by any director, officer or other employee of ours to the Company or our stockholders;
- any action asserting a claim against us or any director or officer of ours arising pursuant to, or a claim against us or any of our directors or officers, with respect to the interpretation or application of any provision of, the DGCL, our certificate of incorporation or bylaws; or
- any action asserting a claim governed by the internal affairs doctrine;

provided, that, if and only if the Court of Chancery of the State of Delaware dismisses any of the foregoing actions for lack of subject matter jurisdiction, any such action or actions may be brought in another state court sitting in the State of Delaware.

The exclusive forum provision is limited to the extent permitted by law, and it will not apply to claims arising under the Securities Exchange Act of 1934, as amended, or the Exchange Act, or for any other federal securities laws which provide for exclusive federal jurisdiction.

Furthermore, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all such Securities Act actions. Accordingly, both state and federal courts have jurisdiction to entertain such claims. To prevent having to litigate claims in multiple jurisdictions and the threat of inconsistent or contrary rulings by different courts, among other considerations, our amended and restated certificate of incorporation provides that the federal district courts of the United States of America will be the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act. While the Delaware courts have determined that such choice of forum provisions are facially valid, a stockholder may nevertheless seek to bring such a claim arising under the Securities Act against us, our directors, officers, or other employees in a venue other than in the federal district courts of the United States of America. In such instance, we would expect to vigorously assert the validity and enforceability of the exclusive forum provisions of our amended and restated certificate of incorporation.

Although we believe this provision benefits us by providing increased consistency in the application of Delaware law in the types of lawsuits to which it applies, this provision may limit or discourage a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and other employees and may result in increased costs for investors to bring a claim. Alternatively, if a court were to find the choice of forum provision contained in our amended and restated certificate of incorporation to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could adversely affect our business and financial condition.

We note that there is uncertainty as to whether a court would enforce the provision and that investors cannot waive compliance with the federal securities laws and the rules and regulations thereunder. Although we believe this provision benefits us by providing increased consistency in the application of Delaware law in the types of lawsuits to which it applies, the provision may have the effect of discouraging lawsuits against our directors and officers.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Our corporate headquarters is located in Kansas City, Kansas, where we lease approximately 14,205 square feet of office space. Our lease expires in May 2025, with an option to extend. Our manufacturing activities take place at PMRS, our outsourced manufacturing organization in Horsham, Pennsylvania. We believe our current offices, laboratories, and manufacturing spaces are sufficient to meet our needs. We may seek to negotiate new leases or evaluate additional or alternate space to accommodate operations relating to commercialization. We believe that appropriate alternative space is readily available on commercially reasonable terms.

ITEM 3. LEGAL PROCEEDINGS

We are not a party to any material pending legal proceedings. From time to time, we may be subject to legal proceedings and claims arising in the ordinary course of business.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock began trading on the NASDAQ Capital Market under the symbol "CING" on December 8, 2021. Prior to that time, there was no established public trading market for our common stock.

Holders of Record

As of March 21, 2022, we had 282 holders of record of our common stock. The actual number of holders of our common stock is greater than this number of record holders and includes stockholders who are beneficial owners, but whose shares are held in street name by brokers or held by other nominees. This number of holders of record also does not include stockholders whose shares may be held in trust by other entities.

Dividend Policy

Except with respect to the stock dividend that was effective on September 20, 2021 for the purpose of establishing the correct number of shares outstanding based upon our valuation prior to our IPO, we have never declared or paid any dividends on our common stock. We currently intend to retain all available funds and any future earnings, if any, to fund the development and expansion of our business, and we do not anticipate paying any cash dividends in the foreseeable future. Any future determination to pay dividends will be made at the discretion of our board of directors.

Recent Sales of Unregistered Securities

Prior to our IPO, we effected certain organizational transactions described below.

On July 19, 2021, we issued one share of our common stock to CTx.

Effective September 29, 2021, Cingulate Inc. acquired CTx, through the merger of a wholly owned acquisition subsidiary of Cingulate Inc. with and into CTx (the "Reorganization Merger"). As a result of the Reorganization Merger, CTx became a wholly owned subsidiary of Cingulate Inc. and we issued 7,142,746 shares of our common stock to the holders of outstanding CTx units.

We deemed the foregoing issuances of our common stock to be exempt from registration under the Securities Act of 1933, as amended (the "Securities Act"), in reliance on Sections 4(a)(2) of the Securities Act, including Regulation D and Rule 506 promulgated thereunder, relative to transactions by an issuer not involving a public offering.

Use of Proceeds

On December 7, 2021, our registration statement on Form S-1 (Registration No. 333-259408) was declared effective by the SEC for our IPO pursuant to which we issued (i) an aggregate of 4,166,666 shares of our common stock and accompanying warrants to purchase 4,166,666 shares of common stock at a combined purchase price of \$6.00 per share of common stock and accompanying warrant and (ii) warrants to purchase an additional 624,999 shares of common stock at a purchase price of \$0.001 per warrant pursuant to an over-allotment option, resulting in aggregate net proceeds to us of approximately \$20.4 million after deducting underwriting discounts and commissions and other offering expenses of approximately \$4.6 million. Aegis Capital Corp. and Laidlaw & Company (UK) Ltd. acted as the co-lead book-running underwriters for the offering.

On December 14, 2021, we repaid in full a total of \$438,348 of outstanding indebtedness under the Related Party Notes (as defined below). Certain of the repayments were made to Raul R. Silva, our Executive Vice President and Chief Science Officer, and Matthew Brams, our Executive Vice President and Chief Medical Officer. On December 8, 2021 and December 14, 2021, we made payments to employees, including our executive officers, totaling \$1.69 million to satisfy outstanding accrued payroll expenses. Other than with respect to the Related Party Notes and the accrued payroll expenses, no payments were made by us to directors, officers or persons owning ten percent or more of our common stock or to their associates, or to our affiliates. There has been no material change in the planned use of proceeds from our IPO as described in our final prospectus filed with the SEC on December 9, 2021 pursuant to Rule 424(b).

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the consolidated financial statements and related notes included elsewhere in this annual report. Some of the information contained in this discussion and analysis or set forth elsewhere in this annual report, including information with respect to our plans and strategy for our business, includes forward-looking statements that involve risks and uncertainties. You should review the "Risk Factors" section of this annual report for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis.

Overview

We are a clinical stage biopharmaceutical company using our proprietary Precision Timed Release (PTR) drug delivery platform technology to build and advance a pipeline of next-generation pharmaceutical products designed to improve the lives of patients suffering from frequently diagnosed conditions characterized by burdensome daily dosing regimens and suboptimal treatment outcomes. We are initially focusing our efforts on the treatment of Attention Deficit/Hyperactivity Disorder (ADHD). Our PTR platform incorporates a proprietary Erosion Barrier Layer (EBL) designed to allow for the release of drug substance at specific, pre-defined time intervals, unlocking the potential for once-daily, multi-dose tablets. We believe there remains a significant, unmet need within the current treatment paradigm for true once-daily ADHD stimulant medications with lasting duration and a superior side effect profile to better serve the needs of patients throughout their entire active-day.

Since inception in 2012, our operations have focused on developing our product candidates, organizing and staffing our company, business planning, raising capital, establishing our intellectual property portfolio and conducting clinical trials. We do not have any product candidates approved for sale and have not generated any revenue. We have funded our operations through public and private capital raised. Cumulative capital raised from these sources, was approximately \$63.8 million as of December 31, 2021.

We have incurred significant losses since our inception. Our ability to generate product revenue sufficient to achieve profitability will depend on the successful development and commercialization of one or more of our product candidates. Our net losses were \$20.7 million and \$7.2 million for the years ended December 31, 2021 and 2020, respectively. As of December 31, 2021, we had an accumulated deficit of \$51.7 million.

We expect to continue to incur significant expenses and increasing operating losses in the near term. We expect our expenses will increase substantially in connection with our ongoing activities, as we:

- seek regulatory approval for CTx-1301;
- continue research and development activities for our existing and new product candidates, primarily for CTx-1301;
- manufacture supplies for our preclinical studies and clinical trials, primarily for CTx-1301;
- operate as a public company; and
- establish or outsource commercial infrastructure to support sales and marketing for our product candidates.

Our ability to generate product revenue will depend on the successful development, regulatory approval and eventual commercialization of one or more of our product candidates. Until such time as we can generate significant revenue from product sales, if ever, we expect to finance our operations through the sale of equity, debt financings, or other capital sources, including potential collaborations with other companies or other strategic transactions. Adequate funding may not be available to us on acceptable terms, or at all. If we fail to raise capital or enter into such agreements as and when needed, we may have to significantly delay, scale back or discontinue the development and commercialization of our product candidates.

CTx-1301: We have updated our clinical program for CTx-1301 (dexamethylphenidate), our lead investigational asset for the treatment of ADHD, based on FDA feedback regarding our CTx-1301 initial Pediatric Study Plan (iPSP), and longstanding guidance on the accelerated approval pathway under Section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act.

We plan to commence two CTx-1301 Phase 3 clinical studies in 2022: (1) a fixed-dose pediatric and adolescent safety and efficacy study, which will enroll its first patient in the second quarter of 2022, and (2) a pediatric safety and efficacy dose-optimization study to assess the onset and duration of efficacy, which is targeted to begin in the second half of 2022. Results from the fixed dose study are expected in late 2022. Assuming we receive positive clinical results from our Phase 3 trials, we plan to submit an NDA for CTx-1301 in the second half of 2023 under the Section 505(b)(2) pathway.

We believe the updated clinical program for CTx-1301 accelerates the study timeline by condensing the number and design of studies, therefore potentially reducing the time and expense to submission of the NDA for CTx-1301 to the FDA for potential approval.

CTx-1302: We plan to initiate a Phase 1/2 bioavailability study in ADHD patients for CTx-1302 (dextroamphetamine), our second investigational asset for the treatment of ADHD, in 2023 and, if the results from this study are successful, we plan to initiate pivotal Phase 3 clinical trials in all patient segments for CTx-1302 in late 2023 with results expected in late 2024.

CTx-2103: We have embarked on a program to develop CTx-2103 (buspirone), which would expand the PTR platform within the anxiety therapeutic category. We plan to initiate a clinical trial for CTx-2103 in the first half of 2022.

As of December 31, 2021, we had cash and cash equivalents of \$16.5 million. Based on our operating plan, we believe that our cash and cash equivalents will enable us to fund our research and development and general and administrative expenses through late 2022. In addition, in order to achieve the filing of our NDA for CTx-1301 in the second half of 2023 for potential FDA approval, we believe that we will need approximately \$15 million of additional capital. We will also need additional capital to advance our other programs. We are evaluating alternatives to raise additional capital, including equity and debt financing and non-dilutive strategic collaborations in the U.S. and abroad. In addition, we continue to evaluate commercial collaborations and strategic relationships with established pharmaceutical companies, which would provide us with more immediate access to marketing, sales, market access and distribution infrastructure. See "Liquidity and Capital Resources" below.

Impact of the COVID-19 Pandemic

We are continuing to monitor the impact of the COVID-19 pandemic on our business, the extent of which will depend on a number of factors, including, but not limited to, the extent and severity of the impact on our service providers, suppliers, contract research organizations and our preclinical and clinical trials, all of which are uncertain and cannot be predicted.

While the full impact of the pandemic continues to evolve, the financial markets have been subject to significant volatility that may adversely impact our ability to enter into, modify, and negotiate favorable terms and conditions relative to equity and debt financing initiatives. The uncertain financial markets, disruptions in supply chains, mobility restraints, and changing priorities as well as volatile asset values may also affect our ability to enter into collaborations, joint ventures, and license and royalty agreements. The outbreak and government measures taken in response to the pandemic have also had a significant impact, both direct and indirect, on businesses and commerce, as worker shortages have occurred; supply chains have been disrupted; facilities and production have been suspended; and demand for certain goods and services, such as medical services and supplies, have spiked, while demand for other goods and services, such as travel, have fallen. We may face difficulties recruiting or retaining patients in our ongoing and planned preclinical and clinical trials if patients are affected by the virus or are fearful of traveling to our clinical trial sites. We and our third-party contract manufacturers, CROs, and clinical sites may also face disruptions in procuring items that are essential to our research and development activities, including, for example, medical and laboratory supplies used in our clinical trials or preclinical studies, in each case, that are sourced from abroad or for which there are shortages because of ongoing efforts to address the outbreak.

The extent to which the COVID-19 pandemic may in the future impact our financial condition, liquidity or results of operations is uncertain. While the pandemic did not materially affect our financial results and business operations in the year ended December 31, 2021, we are unable to predict the impact that COVID-19 may have on our financial position and operating results in future periods due to numerous uncertainties. Management continues to actively monitor the situation and the possible effects on our financial condition, operations, suppliers, vendors, our workforce and the overall industry. For additional information about risks and uncertainties related to the COVID-19 pandemic that may impact our business, our financial condition or our results of operations, see “Part I, Item 1A—Risk Factors” in this annual report.

Components of Operating Results

Revenue

Since inception, we have not generated any revenue and do not expect to generate any revenue from the sale of products in the near future. If our development efforts for our product candidates are successful and result in regulatory approval, or if we enter into collaboration or license agreements with third parties, we may generate revenue in the future from a combination of product sales or payments from collaboration of license agreements.

Operating Expenses

Research and Development Expenses

Research and development expenses consist of costs incurred in the discovery and development of our product candidates, and primarily include:

- expenses incurred under third party agreements with contract research organizations (CROs), and investigative sites, that conducted or will conduct our clinical trials and a portion of our pre-clinical activities;
- costs of raw materials, as well as manufacturing cost of our materials used in clinical trials and other development testing;
- expenses, including salaries and benefits of employees engaged in research and development activities;
- costs of manufacturing equipment, depreciation and other allocated expenses; and
- fees paid for contracted regulatory services as well as fees paid to regulatory authorities including the US Food and Drug Administration for review and approval of our product candidates.

We expense research and development costs as incurred. Costs for external development activities are recognized based on an evaluation of the progress to completion of specific tasks using information provided to us by our vendors. Payments for these activities are based on the terms of the individual agreements, which may differ from the pattern of costs incurred, and are reflected in our consolidated financial statements as prepaid or accrued costs.

Research and development activities are central to our business model. Excluding the 2021 noncash expense relating to profits interest units as described below, we expect that our research and development expenses will continue to increase for the foreseeable future as we continue clinical development for our product candidates. As products enter later stages of clinical development, they will generally have higher development costs than those in earlier stages of clinical development, primarily due to the increased size and duration of later-stage clinical trials. Historically, our research and development costs have primarily related to the development of CTx-1301. As we advance CTx-1301, CTx-1302, and CTx-2103, as well as identify any other potential product candidates, we will continue to allocate our direct external research and development costs to the products. We expect to fund our research and development expenses from our current cash and cash equivalents and any future equity or debt financings, or other capital sources, including potential collaborations with other companies or other strategic transactions.

General and Administrative Expenses

General and administrative expenses consist primarily of salaries and related costs for our employees in administrative, executive and finance functions. General and administrative expenses also include professional fees for legal, accounting, audit, tax and consulting services, insurance, office, and travel expenses.

Excluding the 2021 noncash expense relating to profits interest units as described below, we expect that our general and administrative expenses will increase in the future as we increase our general and administrative headcount to support our continued research and development and potential commercialization of our product candidates. We also expect to incur increased expenses associated with being a public company, including costs of accounting, audit, legal, regulatory and tax compliance services; director and officer insurance; and investor and public relations costs.

Interest and other income (expense), net

Interest and other income (expense), net consists of interest earned on our short-term investments and interest expense. The primary objective of our investment policy is liquidity and capital preservation.

Interest expense to date has consisted primarily of interest expense on notes payable to related parties, interest charged by certain vendors, and credit card interest. All related party notes were paid in full in December 2021 with proceeds from our IPO.

Critical Accounting Policies and Significant Judgments and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP). The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amounts of expenses during a reporting period. Actual results could differ from estimates.

While our significant accounting policies are described in more detail in Note 2 to our consolidated financial statements, we believe that the following accounting policies are those most critical to the judgements and estimates used in the preparation of our consolidated financial statements.

Research and Development Costs

Research and development costs are expensed as incurred and include all direct and indirect costs associated with the development of the Company's product candidates. These expenses include payments to third parties for research, development and manufacturing services, personnel costs and depreciation on manufacturing equipment. At the end of the reporting period, we compare payments made to third party service providers to the estimated progress toward completion of the research or development objectives. Such estimates are subject to change as additional information becomes available. Depending on the timing of payments to service providers and the progress that we estimate have been made as a result of the service provided, we may record net prepaid or accrued expense relating to these costs.

Profits Interest Units

CTx established and adopted the Cingulate Therapeutics LLC Equity Incentive Plan (the "Plan") to provide for issuance of Class C Profits Interest Units (PIU's) to employees, equity Members, Board members and service providers eligible to receive PIU's as an incentive under the Plan. As defined in the CTx Operating Agreement, all PIU's issued under the Plan entitled the holder to participate pro rata in the profits, if any, of CTx over the stated Distribution Threshold, assuming a cash distribution was generally made to all Members, subject to any preference or priorities of the other classes of Units. The Class C PIU's also held voting rights on a one-for-one basis.

We accounted for these awards under *ASC Topic 718, Compensation – Stock Compensation, Share Based Payment Awards*, as equity classified thus recording compensation expense during the period in which the future achievement of the thresholds and targets to achieve payout was deemed probable. In connection with the Reorganization Merger, 8.5 million PIUs were exchanged for 1,158,008 shares of Cingulate common stock. The exchange of PIUs for common stock created a modification of the terms, character and rights of the PIUs and achievement of performance was considered probable. This resulted in us recognizing a noncash modification charge equal to \$12,738,088, which charge was calculated based on our assessment of the fair value of the shares of Cingulate common stock on the date of the modification. No compensation expense had been recognized relating to the PIUs prior to the Reorganization Merger.

Stock-Based Compensation

Under our 2021 Omnibus Equity Incentive Plan, we granted non-qualified stock options to certain employees and directors in 2021 at the time of our IPO. The options were granted with a strike price of \$6.00 per share, the price that the common shares were issued to the public in connection with the IPO. The term of these options is ten years with a four-year ratable vesting period.

We recorded stock-based compensation expense of \$43,835 during the year ended December 31, 2021, based on the grant-date fair value of the options granted. The fair value of each option grant was estimated as of the date of grant using the Black-Scholes option-pricing model. The fair value is amortized as compensation cost on a straight-line basis over the requisite service period of the awards, which is generally the vesting period.

See footnote 10 to our consolidated financial statements for the assumptions that were used to estimate the fair value of stock options granted using the Black-Scholes option pricing model.

Results of Operations

Comparison of the years ended December 31, 2021 and December 31, 2020

The following table summarizes our results of operations for the years ended December 31, 2021 and 2020:

(in thousands)	Years ended December 31,		Increase (Decrease)	% Increase (Decrease)
	2021	2020		
Operating expenses:				
Research and development	\$ 8,410	\$ 5,093	\$ 3,317	65.1%
General and administrative	12,269	1,991	10,278	516.2%
Loss from operations	(20,679)	(7,084)	(13,595)	581.4%
Interest and other income (expense), net	(31)	(100)	(69)	(69.0)%
Net loss	\$ (20,710)	\$ (7,184)	\$ (13,526)	188.3%

Research and development expenses

The following table summarizes our research and development expenses for the years ended December 31, 2021 and 2020:

(in thousands)	Years ended December 31,		Increase (Decrease)	% Increase (Decrease)
	2021	2020		
Clinical operations	\$ 1,086	\$ 2,277	\$ (1,191)	(52.3)%
Drug manufacturing and formulation	1,429	1,177	252	21.4%
Personnel expenses	5,874	1,293	4,581	354.3%
Regulatory costs	21	346	(325)	(93.9)%
Total research and development expenses	\$ 8,410	\$ 5,093	\$ 3,317	65.1%

Research and development (R&D) expenses were \$8.4 million for the year ended December 31, 2021, an increase of \$3.3 million or 65.1% from the year ended December 31, 2020. This increase was related to the recording of \$4.6 million to R&D expense for a one-time noncash compensation charge for the modification of PIUs which occurred in the third quarter of 2021, offset by a decrease in clinical operations expense of \$1.2 million due to a decrease in clinical activity. In early 2020, we incurred significant clinical costs relating to the completion of the phase 1/2 comparative bioavailability study for CTx-1301. During 2021, clinical activity primarily consisted of study start-up costs for one Phase 3 study for CTx-1301.

General and administrative expenses

The following table summarizes our general and administrative (G&A) expenses for the years ended December 31, 2021 and 2020:

(in thousands)	Years ended December 31,		Increase (Decrease)	% Increase (Decrease)
	2021	2020		
Personnel expenses	\$ 9,729	\$ 917	\$ 8,812	961.0%
Legal and professional fees	1,443	511	932	182.4%
Occupancy	484	371	113	30.5%
Insurance	325	138	187	135.5%
Other	288	54	234	433.3%
Total general and administrative expenses	\$ 12,269	\$ 1,991	\$ 10,278	516.2%

Total G&A expenses were \$12.3 million for the year ended December 31, 2021, an increase of \$10.3 million or 516.2% from the year ended December 31, 2020. This increase was primarily related to the recording of \$8.1 million to G&A personnel expenses of a one-time noncash compensation charge relating to the modification of PIUs which occurred in the third quarter of 2021. In addition, the increase was due to an increase in personnel costs relating to annual compensation increases and the addition of personnel in late 2021, as well as an increase in directors' and officers' insurance costs and professional fees related to legal, consulting, audit and investor relations, as we were preparing to operate as a public company.

Interest and other income (expense), net

The following table summarizes interest and other income (expense), net for the years ended December 31, 2021 and 2020:

(in thousands)	Years ended December 31,		Increase (Decrease)	% Increase (Decrease)
	2021	2020		
Interest and other income (expense), net	\$ (31)	\$ (100)	\$ (69)	(69.0)%

Total interest and other income (expense), net in both 2021 and 2020 primarily relates to interest incurred on outstanding notes payable. In addition, in 2020, interest was charged by certain development vendors on outstanding balances. All notes payable were paid in full in December 2021 with proceeds from our IPO.

Cash Flows

(in thousands)	Year ended December 31,		Increase (decrease)
	2021	2020	
Net cash (used in) operating activities	\$ (10,432)	\$ (6,811)	\$ (3,621)
Net cash (used in) investing activities	(815)	(384)	(431)
Net cash provided by financing activities	26,542	7,974	18,568
Net increase (decrease) in cash and cash equivalents	<u>\$ 15,295</u>	<u>\$ 779</u>	<u>\$ 14,516</u>

Cash Flows from Operating Activities

Net cash used in operating activities was \$10.4 million for the year ended December 31, 2021. Cash used in operating activities was primarily due to the use of funds in our operations to develop our product candidates resulting in a net loss of \$20.7 million, prior to the effects of two significant noncash items, the one-time noncash PIU charge of \$12.7 million and depreciation expense of \$0.7 million. Changes in operating assets and liabilities included a decrease in accounts payable and accrued expenses of \$1.3 million mainly due to the payment in December 2021 of all deferred payroll amounts owed to employees. There was also an increase in prepaid expense of \$1.3 million primarily relating to a down payment on our annual directors and officers insurance premium which increased significantly at the completion of our IPO.

Net cash used in operating activities was \$6.8 million for the year ended December 31, 2020. Cash used in operating activities was primarily due to the use of funds in our operations to develop our product candidates resulting in a net loss of \$7.2 million, offset by depreciation expense of \$0.7 million. Changes in operating assets and liabilities included a decrease in accounts payable and accrued expenses of \$0.4 million mainly due to the timing of payments to our service providers.

Cash Flows from Investing Activities

Net cash used in investing activities for both the years ended December 31, 2021 and December 31, 2020 was related to the purchase of equipment to support our research and development.

Cash Flows from Financing Activities

Net cash provided by financing activities in the year ended December 31, 2021 was primarily related to the issuance of 4,166,666 shares of common stock and accompanying warrants in connection with our IPO at a share price of \$6.00 per share of common stock and accompanying warrant. We received gross proceeds of \$25.0 million and net proceeds of \$20.4 million after deducting underwriter discounts and offering expenses paid by us. We also received \$7.1 million related to the issuance of 3,243,201 equity units of CTx prior to our IPO. We paid \$0.5 million for the repayment of notes payable from related parties in December 2021.

Net cash provided by financing activities in the year ended December 31, 2020 was primarily related to proceeds of the issuance of 5,050,141 equity units of CTx totaling \$7.5 million. In addition, we received \$0.95 million in proceeds from notes payable to related parties, of which \$0.4 million was converted to members' capital, and \$0.1 million was repaid during 2020.

Liquidity and Capital Resources

Sources of Liquidity

Since our inception in 2012 through December 31, 2021, we have not generated any revenue and have incurred significant operating losses and negative cash flow from our operations. Based on our current operating plan, we expect our cash and cash equivalents of \$16.5 million as of December 31, 2021 will be sufficient to fund our operating expenses and capital expenditure requirements through late 2022. In addition, in order to achieve the filing of our NDA for CTx-1301 in the second half of 2023 for potential FDA approval, we believe that we will need approximately \$15 million of additional capital. We will also need additional capital to advance our other programs. However, it is difficult to predict our spending for our product candidates prior to obtaining FDA approval. Moreover, changing circumstances may cause us to expend cash significantly faster than we currently anticipate, and we may need to spend more cash than currently expected because of circumstances beyond our control.

Our policy is to invest any cash in excess of our immediate requirements in investments designed to preserve the principal balance and provide liquidity while producing a modest return on investment. Accordingly, our cash equivalents are invested primarily in money market funds which are currently providing only a minimal return given the current interest rate environment.

We expect to continue to incur substantial additional operating losses for at least the next several years as we continue to develop our product candidates and seek marketing approval and, subject to obtaining such approval, the eventual commercialization of our product candidates. If we obtain marketing approval for our product candidates, we will incur significant sales, marketing and outsourced manufacturing expenses. In addition, we expect to incur additional expenses to add operational, financial and information systems and personnel, including personnel to support our planned product commercialization efforts. We also expect to incur significant costs to comply with corporate governance, internal controls and similar requirements applicable to us as a public company.

Our future use of operating cash and capital requirements will depend on many forward-looking factors, including the following:

- the initiation, progress, timing, costs and results of clinical trials for our product candidates;
- the clinical development plans we establish for each product candidate;
- the number and characteristics of product candidates that we develop or may in-license;
- the terms of any collaboration agreements we may choose to execute;
- the outcome, timing and cost of meeting regulatory requirements established by the FDA or other comparable foreign regulatory authorities;
- the cost of filing, prosecuting, defending and enforcing our patent claims and other intellectual property rights;
- the cost of defending intellectual property disputes, including patent infringement actions brought by third parties against us;
- the cost and timing of the implementation of commercial scale manufacturing activities; and
- the cost of establishing, or outsourcing, sales, marketing and distribution capabilities for any product candidates for which we may receive regulatory approval in regions where we choose to commercialize our products on our own.

To continue to grow our business over the longer term, we plan to commit substantial resources to research and development, clinical trials of our product candidates, and other operations and potential product acquisitions and in-licensing. We have evaluated and expect to continue to evaluate a wide array of strategic transactions as part of our plan to acquire or in-license and develop additional products and product candidates to augment our internal development pipeline. Strategic transaction opportunities that we may pursue could materially affect our liquidity and capital resources and may require us to incur additional indebtedness, seek equity capital or both. In addition, we may pursue development, acquisition or in-licensing of approved or development products in new or existing therapeutic areas or continue the expansion of our existing operations. Accordingly, we expect to continue to opportunistically seek access to additional capital to license or acquire additional products, product candidates or companies to expand our operations, or for general corporate purposes. Strategic transactions may require us to raise additional capital through one or more public or private debt or equity financings or could be structured as a collaboration or partnering arrangement. We have no arrangements, agreements, or understandings in place at the present time to enter into any acquisition, in-licensing or similar strategic business transaction. In addition, we continue to evaluate commercial collaborations and strategic relationships with established pharmaceutical companies, which would provide us with more immediate access to marketing, sales, market access and distribution infrastructure.

If we raise additional funds by issuing equity securities, our stockholders will experience dilution. Debt financing, if available, would result in increased fixed payment obligations and may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends. Any debt financing or additional equity that we raise may contain terms, such as liquidation and other preferences that are not favorable to us or our existing stockholders. If we raise additional funds through collaboration and licensing arrangements with third parties, it may be necessary to relinquish valuable rights to our technologies, future revenue streams or product candidates or to grant licenses on terms that may not be favorable to us.

Contractual Obligations

The following summarizes our contractual obligations as of December 31, 2021 that will affect our future liquidity. Based on our current operating plan, we plan to satisfy the obligations identified below with cash and cash equivalents as of December 31, 2021.

We entered into a patent and know-how licensing agreement with BDD Pharma Limited in August 2018. See “Item 1. Business – Material Agreements” for a description of this agreement. The Company may be required to pay BDD Pharma certain amounts in connection with clinical trial and regulatory milestones. The first milestone payment of \$250,000 will likely become due in the next twelve months based on the dosing of the first patient in the Phase 3 fixed-dose pediatric and adolescent safety and efficacy study for CTx-1301. This payment was accrued in our 2021 financial statements.

We entered into an agreement with a CRO for the Phase 3 fixed-dose pediatric and adolescent safety and efficacy study for CTx-1301, in which we plan to enroll the first patient in the second quarter of 2022. We also entered into agreements with a CMO and other third parties for manufacture of the Phase 3 clinical supply of CTx-1301. These contracts do not contain any minimum purchase commitments and are cancelable by us upon prior written notice. Payments due upon cancellation consist only of payments for services provided or expenses incurred, including noncancelable obligations of our service providers, up to the date of cancellation and in some cases, wind-down costs. The exact amount of such obligations is dependent on the timing of termination and the terms of the related agreement and are not known.

We committed to purchase a piece of manufacturing equipment to be used in development activity. Installment payments on this piece of equipment have been made over the last two years; however, there were two installment payments remaining as of December 31, 2021 in an aggregate amount equal to approximately \$329,000, which amount was paid in March 2022. These payments were accrued in our 2021 consolidated financial statements.

Going Concern

Since inception we have been engaged in organizational activities, including raising capital and research and development activities. We have not generated revenues and have not yet achieved profitable operations, nor have we ever generated positive cash flow from operations. There is no assurance that profitable operations, if achieved, could be sustained on a continuing basis. We are subject to those risks associated with any pre-clinical stage pharmaceutical company that has substantial expenditures for research and development. There can be no assurance that our research and development projects will be successful, that products developed will obtain necessary regulatory approval, or that any approved product will be commercially viable. In addition, we operate in an environment of rapid technological change and is largely dependent on the services of our employees and consultants. Further, our future operations are dependent on the success of our efforts to raise additional capital. These uncertainties raise substantial doubt about our ability to continue as a going concern for one year after the issuance date of our financial statements. The accompanying consolidated financial statements have been prepared on a going concern basis. The consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the possible inability of the company to continue as a going concern, which contemplates the continuation of operations, realization of assets and liquidation of liabilities in the ordinary course of business. We have incurred a net loss for the years ended December 31, 2021 and 2020 and had accumulated losses of \$51.8 million since inception to December 31, 2021. We anticipate incurring additional losses until such time, if ever, that we can generate significant revenue from our product candidates currently in development. Our sources of capital have included private capital raises in various classes of units of CTx prior to the Reorganization Merger and the issuance of equity securities in connection with our IPO. Additional financings will be needed by us to fund our operations, to complete development of and to commercially develop our product candidates. There is no assurance that such financing will be available when needed or on acceptable terms.

Recently Issued Accounting Standards

In June 2016, the FASB issued ASU 2016-13, *Measurement of Credit Losses on Financial Instruments* which significantly changes the way entities recognize impairment of many financial assets by requiring immediate recognition of estimated credit losses expected to occur over their remaining life, instead of when incurred. In November 2018, the FASB issued ASU 2018-19, *Codification Improvements to Topic 326, Financial Instruments—Credit Losses*, which amends Subtopic 326-20 (created by ASU 2016-13) to explicitly state that operating lease receivables are not in the scope of Subtopic 326-20. Additionally, in April 2019, the FASB issued ASU 2019-04, *Codification Improvements to Topic 326, Financial Instruments—Credit Losses, Topic 815, Derivatives and Hedging, and Topic 825, Financial Instruments*; in May 2019, the FASB issued ASU 2019-05, *Financial Instruments—Credit Losses (Topic 326): Targeted Transition Relief*; in November 2019, the FASB issued ASU 2019-10, *Financial Instruments—Credit Losses (Topic 326), Derivatives and Hedging (Topic 815), and Leases (Topic 842): Effective Dates*, and ASU 2019-11, *Codification Improvements to Topic 326, Financial Instruments—Credit Losses*; and in March 2020, the FASB issued ASU 2020-03, *Codification Improvements to Financial Instruments*, to provide further clarifications on certain aspects of ASU 2016-13. The changes (as amended) are effective for the Company for annual and interim periods in fiscal years beginning after December 15, 2022. The Company does not expect the adoption of ASU 2016-13 to have a material effect on its consolidated financial statements.

JOBS Act

On April 5, 2012, the Jumpstart Our Business Startups Act of 2012, or the JOBS Act, was signed into law. The JOBS Act contains provisions that, among other things, reduce certain reporting requirements for an “emerging growth company”. As an “emerging growth company,” we are electing to take advantage of the extended transition period afforded by the JOBS Act for the implementation of new or revised accounting standards, and as a result, we will comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for emerging growth companies.

Subject to certain conditions set forth in the JOBS Act, as an “emerging growth company,” we are not required to, among other things, (i) provide an auditor’s attestation report on our system of internal controls over financial reporting pursuant to Section 404, (ii) provide all of the compensation disclosure that may be required of non-emerging growth public companies under the Dodd-Frank Wall Street Reform and Consumer Protection Act, (iii) comply with any requirement that may be adopted by the Public Company Accounting Oversight Board regarding mandatory audit firm rotation or a supplement to the auditor’s report providing additional information about the audit and the financial statements (auditor discussion and analysis), and (iv) disclose certain executive compensation-related items such as the correlation between executive compensation and performance and comparisons of the chief executive officer’s compensation to median employee compensation. These exemptions will apply until the fifth anniversary of the completion of our IPO or until we no longer meet the requirements for being an “emerging growth company,” whichever occurs first.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our consolidated financial statements, together with the report of our independent registered public accounting firm, appear at pages F-1 through F-24 of this annual report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain a system of disclosure controls and procedures that is designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and that such information is accumulated and communicated to the our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Our Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Exchange Act) as of December 31, 2021, have concluded that our disclosure controls and procedures were effective as of December 31, 2021.

Management’s Annual Report on Internal Control Over Financial Reporting

This annual report does not include a report of management’s assessment regarding internal control over financial reporting or an attestation report of our independent registered public accounting firm due to a transition period established by rules of the SEC for newly public companies.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter ended December 31, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Executive Officers and Directors

The following table provides information regarding our executive officers and directors with their respective ages as of March 28, 2022:

Name	Age	Position
Executive Officers:		
Shane J. Schaffer, PharmD	47	Chief Executive Officer and Chairman of the Board
Louis G. Van Horn, MBA	63	Executive Vice President and Chief Financial Officer
Laurie A. Myers, PhD	65	Executive Vice President and Chief Operating Officer
Craig S. Gilgallon, Esq.	50	Executive Vice President, General Counsel and Secretary
Raul R. Silva, MD	64	Executive Vice President and Chief Science Officer
Matthew Brams, MD	58	Executive Vice President and Chief Medical Officer
Directors:		
Jeff Hargroves	55	Director
Peter J. Werth	83	Director
Jeff Conroy	56	Director
Patrick Gallagher, MBA	57	Director
Gregg Givens	61	Director
Curt Medeiros, MBA	46	Director

Shane J. Schaffer, PharmD co-founded Cingulate in 2012 and has since served as its Chief Executive Officer and Chairman of the Board of Directors. Prior to his work at Cingulate, Dr. Schaffer served as the Managing Director of Sabre Scientific Solutions, from July 2009 through December 2012. Previously, Dr. Schaffer worked as a Director of National Accounts at Pri-Med Access from September 2008 through May 2009, Senior Marketing at Sanofi from February 2004 through December 2007, and as a Marketing Manager at Novartis from June 2001 through October 2003. From July 1999 through June 2001, he served as Chief Fellow of the Rutgers Pharmaceutical Industry Fellowship Program and was Senior Fellow at Warner Lambert/Parke Davis and Pfizer. From June 1997 to July 1999, he worked as a clinical research associate at Hoechst Marion Roussel. Dr. Schaffer has 25 years' experience in drug development, commercialization and biotech commercial operation. Dr. Schaffer received his Doctor of Pharmacy from The University of Kansas School of Pharmacy. We believe that Dr. Schaffer's extensive knowledge of the pharmaceutical industry, his clinical and commercial background in a wide range of therapeutic areas, and his experience serving as our Chief Executive Officer, qualifies him to serve on our Board of Directors.

Louis G. Van Horn, MBA has served as our Executive Vice President and Chief Financial Officer since May 2017. He previously served as a consultant with Tarsus CFO Services, LLC from December 2016 to May 2017. From December 2004 through June 2016, Mr. Van Horn served as Executive Vice President and Chief Financial Officer of Store Financial Services, LLC. Previously, Mr. Van Horn served as Vice President and Comptroller of Kansas City Southern (NYSE: KSU) from June 1988 to December 2003. He previously held financial positions at Yellow Freight Systems and PricewaterhouseCoopers. Mr. Van Horn received his Master of Business Administration from the University of Missouri – Kansas City, and a Bachelor of Arts in Accounting from Westminster College. Mr. Van Horn is a Certified Public Accountant.

Laurie A. Myers, PhD, MBA has served as our Executive Vice President and Chief Operating Officer since April 2018 and previously served as a member of our Board of Directors from June 2013 through April 2018 and as our Senior Vice President of Operations from November 2017 to April 2018. Dr. Myers also serves as a Member of the Board of Advisors of Linea System, LLC, a position she has held since September 2020. Dr. Myers previously served as the Head of Marketing of Fidia Pharma USA Inc., a wholly owned subsidiary of Fidia Farmaceutici from September 2014 through November 2017. Dr. Myers was an Adjunct Professor at the College of New Jersey School of Business from January 2012 through December 2014, and served as President and a Member of the Board of the Hallett David Strategic Group from January 2010 through September 2014. Dr. Myers received her Doctor of Philosophy in Toxicology from Rutgers Medical School and Rutgers School of Pharmacy, her Masters in Business Administration from St. Joseph's University and her Master of Science and Bachelor of Science from the University of Scranton.

Craig S. Gilgallon, Esq. co-founded Cingulate in 2013 and has served as our Executive Vice President, General Counsel and Board Secretary since our inception. Previously, he served as our Director of Operations from March 2017 through November 2017. Since 2012, Mr. Gilgallon has served as a partner at the law firm of Pawar Gilgallon & Rudy, LLC. Prior to that, he served as the owner of the Law Office of Craig S. Gilgallon from October 2004 through August 2012. Mr. Gilgallon received his Juris Doctor from the Thomas Jefferson School of Law and his Bachelor of Science from Ithaca College.

Raul R. Silva, MD co-founded Cingulate in 2013 and has served as our Executive Vice President and Chief Science Officer since January 2018. He has been in private practice since 2009. Previously, Dr. Silva served as Executive Director of Rockland Children's Psychiatric Center from 2006-2009. He also served as Vice Chairman of The New York University Child Study Center 2005 through 2009. Dr. Silva served as Deputy Director of Child Psychiatry at Bellevue Hospital Center from 1999 through 2006. Prior to that, he was Director of Child and Adolescent Psychiatry at St. Luke's/Roosevelt Hospital in New York City from 1995 through 1990. He completed his fellowship in child and adolescent psychiatry at Columbia University's St. Luke's/Roosevelt Hospital Center in 1990. Dr. Silva completed a psychopharmacology research fellowship at New York University Medical Center. Dr. Silva is board certified in general, child and adolescent psychiatry. Dr. Silva received his Doctor of Medicine degree from Ross University and his Bachelor of Science in Biology from Fairleigh Dickinson University.

Matthew N. Brams, MD co-founded Cingulate in 2013 and has served as our Executive Vice President and Chief Medical Officer since January 2018 and served as a director of Cingulate from January 2018 through July 2021. Dr. Brams served as a Principal of Bayou City Research, a position he held from April 1999 to January 2021. Prior to that, he served as a consultant medical director and/or admitting Psychiatrist at numerous medical facilities including Taylor Recover Center (April 2019 to present); Lakeview Health Rehabilitation Center (2018-2019); The Parc, Houston Tx (2012-2015); GeroPsych Unit Gulf Coast Hospital (2009-Present). Dr. Brams has been integral to the research teams for all the major pharmaceutical companies participating in the ADHD clinical arena. Dr. Brams completed residency and fellowship at Baylor College of Medicine in adult and child psychiatry, respectively. He is Board certified in Adult and Child Psychiatry (1994) and is an acting Senior Board Examiner for the American Board of Psychiatry and Neurology. He received his Doctor of Medicine from The University of Texas Science Center and his Bachelor of Arts in Biology from the University of Texas.

Jeff Hargroves has served as a member of our Board of Directors since June 2018. In July 2001, Mr. Hargroves founded ProPharma Group, at which he served as a Board Member through its sale in September 2020. He served as President and Chief Executive Officer of ProPharma Group from its inception until May 2018. Previously, he served as the Director of Production at Ivy Animal Health (subsidiary of Elanco) from 1999 through 2001, and prior to that, as a Director of ALZA (subsidiary of Johnson and Johnson) from 1996 through 1999. Mr. Hargroves earned both his Bachelor of Science in Computer Engineering and Bachelor of Science in Electrical Engineering from the University of Missouri. We believe that Mr. Hargroves' experience in product launch and commercialization in the pharmaceutical industry and his extensive knowledge in financial management and corporate development qualifies him to serve on our Board of Directors.

Peter J. Werth has served on our Board of Directors since June 2018. Mr. Werth is Founder and Chief Executive Officer of ChemWerth Inc., a full-service generic drug development and supply company providing Active Pharmaceutical Ingredients to regulated markets worldwide. Mr. Werth previously served as Vice President at Ganes Chemicals, a subsidiary of Siegfried Chemicals, from March 1975 through May 1982. From 1965 through 1975, Mr. Werth worked in Research and Development for Upjohn Pharmaceuticals, now Pfizer (NYSE: PFE). In addition to serving on the Board of Cingulate, Mr. Werth serves on the Board of Directors of VM Pharma LLC since December 2010, VM Therapeutics LLC since May 2012, Alopexx Vaccines LLC since June 2012, Altos Therapeutics LLC since December 2012, VM Oncology LLC since August 2014, Nuance Designs of CT LLC since January 2015, Perseus Science Group LLC since January 2015, Alzeca Biosciences, Inc. since July 2017, Likarda LLC since August 2017, Tectona LLC since September 2017, Bright Path Pharma/Labs since November 2017, MedRhythms LLC since June 2018 and Bastion Healthcare LLC since September 2020. He earned his Master of Science in Organic Chemistry from Stanford University and his Bachelor of Science in Chemistry and Math from Fort Hays State University. We believe that Mr. Werth's extensive experience in the life sciences industry and his knowledge in business and international markets qualifies him to serve on our Board of Directors.

Jeff Conroy has served on our Board of Directors since May 2018. Mr. Conroy currently serves as the Chairman and Chief Executive Officer of Embody, Inc., a medical device company he co-founded in April 2014. He also has served as a Director of Odyssey Group International, Inc. (OTC: ODYY) since January 2020. Mr. Conroy was the Managing Director of Windward Investments from May 2012 through December 2019. Previously, he was the Managing Director of Adjuvant Partners from January 2000 through May 2012. Mr. Conroy is a Director and Past Chairman of the Virginia Biotechnology Association and serves on the Virginia Bioscience Healthcare Research Corporation's (VBHRC) Board of Directors. Mr. Conroy holds a Bachelor of Science in Business Administration from Providence College. We believe that Mr. Conroy's experience in the life sciences industry and his knowledge in financial and corporate development qualifies him to serve on our Board of Directors.

Patrick Gallagher, MBA, CFA has served as a member of our Board of Directors since January 2014. Mr. Gallagher has served as Senior Managing Director at Laidlaw & Co., and as Managing Partner at Laidlaw Venture Partners, since September 2014. Since January 2018, he has also served as the Chief Executive Officer and as a member of the Board of Directors of Voltron Therapeutics, a privately held biotechnology company. Mr. Gallagher also serves as the Chief Executive Officer and a member of the Board of Directors at PD Theranostics, Inc. positions he has held since April 2018, and has served as Treasurer of Aerwave Medical, Inc. since November 2020. Prior to his current roles, Mr. Gallagher was a founding partner and Chief Executive Officer of BDR Research Group, LLC, from July 2001 through October 2010. Previously, he served as a Management Consultant for CHD Bioscience, Inc. from July 2012 through August 2014. He has served a member of the Board of Directors of BioSig Technologies, Inc. (NASDAQ: BSGM) since July 2014, Evermore Global since June 2015, and Algorithm Sciences, Inc. since May 2019. Mr. Gallagher earned his Master in Business Administration from Penn State University and his Bachelor of Science in Finance from the University of Vermont. We believe that Mr. Gallagher's extensive experience in the life sciences industry qualifies him to serve on our Board of Directors.

Gregg Givens has served on our Board of Directors since July 2021. Mr. Givens currently serves as the Chief Financial Officer at Park University, a position he has held since March 2020. From November 2018 to November 2021, Mr. Givens served as a member of the Board of Directors of Excel Industries, Inc. Previously, Mr. Givens served as a member of the Board of Directors at Asurion, Inc. from January 2006 to July 2007. From May 1996 through April 2018, Mr. Givens served in various positions at DST Systems, Inc. (NYSE: DST), including as Senior Vice President, Chief Financial Officer and Treasurer. Mr. Givens received his Bachelor of Science in Accountancy from the University of Missouri and is a Certified Public Accountant. We believe Mr. Givens' extensive financial and accounting experience qualifies him to serve on our Board of Directors.

Curt Medeiros, MBA has served on our Board of Directors since July 2021. Since January 2022, Mr. Medeiros has served as the Chief Executive Officer and a board member of Ovation.io, Inc., a software and data company in the laboratory and life sciences industry. He has served as a Strategic Advisor to HealthRhythms and DermTech since June 2021. Mr. Medeiros served as the President and Chief Operating Officer at Ontrak, Inc., from December 2019 through June 2021 (NASDAQ: OTRK). From June 2010 to November 2019, he served in various positions at UnitedHealth Group, including President of UnitedHealth Group subsidiaries OPTUM Analytics and OPTUM Life Sciences. Mr. Medeiros received his Bachelor of Science in Chemical Engineering from Massachusetts Institute of Technology and his Master in Business Administration from Harvard Business School. We believe Mr. Medeiros' extensive experience in the life sciences industry qualifies him to serve on our Board of Directors.

Family Relationships

There are no family relationships among any of our directors or executive officers.

Code of Business Conduct and Ethics

Our Board of Directors adopted a Code of Business Conduct and Ethics (the “Code of Conduct”) that applies to our employees, officers and directors. A copy of the Code of Conduct is posted on the Corporate Governance section of the Investor Relations page of our website, which is located at www.cingulate.com/investors. We intend to disclose future amendments to certain provisions of the Code of Conduct, or waivers of such provisions applicable to any principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, and our directors, on our website identified above or in filings with the SEC.

Board Composition

Our Board of Directors currently consists of seven members. Our directors hold office until their successors have been elected and qualified or until the earlier of their resignation or removal.

In accordance with the terms of our amended and restated certificate of incorporation and bylaws, our Board of Directors is divided into three classes, class I, class II and class III, with each class serving staggered three-year terms. Upon the expiration of the term of a class of directors, directors in that class will be eligible to be elected for a new three-year term at the annual meeting of stockholders in the year in which their term expires. Our directors are divided among the three classes as follows:

- The Class I directors are Patrick Gallagher and Peter J. Werth; their terms will expire at the annual meeting of stockholders to be held in 2022.
- The Class II directors are Jeff Conroy, Curt Medeiros, and Gregg Givens; their terms will expire at the annual meeting of stockholders to be held in 2023.
- The Class III directors are Shane J. Schaffer and Jeff Hargroves; their terms will expire at the annual meeting of stockholders to be held in 2024.

We expect that any additional directorships resulting from an increase in the number of directors will be distributed among the three classes so that, as nearly as possible, each class will consist of one-third of the directors. The division of our Board of Directors into three classes with staggered three-year terms may delay or prevent a change of our management or a change in control.

Our amended and restated certificate of incorporation and amended and restated bylaws provide that the authorized number of directors may be changed only by resolution of our Board of Directors. Our amended and restated certificate of incorporation and amended and restated bylaws also provide that our directors may be removed only for cause, and that any vacancy on our Board of Directors, including a vacancy resulting from an enlargement of our Board of Directors, may be filled only by vote of a majority of our directors then in office.

Audit Committee and Audit Committee Financial Expert.

Our Audit Committee consists of Messrs. Givens, Hargroves and Medeiros, with Mr. Givens serving as the Chairman of the Audit Committee. Our Board of Directors has determined that the three directors currently serving on our Audit Committee are independent within the meaning of the NASDAQ Marketplace Rules and Rule 10A-3 under the Exchange Act. In addition, our Board of Directors has determined that Mr. Givens qualifies as an audit committee financial expert within the meaning of SEC regulations and The NASDAQ Marketplace Rules.

ITEM 11. EXECUTIVE COMPENSATION

The following tables and accompanying disclosure set forth information about the compensation earned by our named executive officers during 2021. Our named executive officers include our principal executive officer and the three most highly-compensated executive officers (other than our principal executive officer) serving as executive officers as of December 31, 2021 as set forth below:

- Shane J. Schaffer, Chief Executive Officer and Chairman of the Board;
- Laurie A. Myers, Executive Vice President and Chief Operating Officer;
- Louis G. Van Horn, Executive Vice President and Chief Financial Officer; and
- Craig S. Gilgallon, Esq., Executive Vice President, General Counsel and Secretary.

SUMMARY COMPENSATION TABLE

The following table sets forth information regarding compensation awarded to, earned by or paid to each of our named executive officers for the years shown.

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)(1)	Option Awards (\$)(2)	Non-Equity Incentive Plan Compensation (\$)	All Other Compensation (\$)	Total (\$)
Shane J. Schaffer, <i>Chairman and CEO</i>	2021	475,000	-	3,000	920,799	-	-	1,398,799
	2020	275,000	-	-	-	-	-	275,000
Laurie A. Myers <i>EVP and COO (3)</i>	2021	400,000	-	3,000	345,302	-	-	748,302
Louis G. Van Horn, <i>EVP and CFO</i>	2021	380,000	-	3,000	345,302	-	-	728,302
	2020	238,499	-	-	-	-	-	238,499
Craig S. Gilgallon <i>EVP, GC and Secretary</i>	2021	380,000	-	3,000	345,302	-	-	728,302
	2020	235,000	-	-	-	-	-	235,000

(1) In April 2021, we granted 22,507 Class C profits interests (PIUs) to each named executive officer. These PIUs were intended to constitute profits interests for U.S. federal income tax purposes. We accounted for these awards under ASC Topic 718, *Compensation – Stock Compensation (FASB ASC Topic 718)*, as equity classified awards. In connection with the Reorganization Merger, all outstanding PIU's were exchanged for shares of Cingulate common stock. The exchange of PIU's for common stock created a modification of the terms, character and rights of the PIU's and achievement of performance was considered probable. This resulted in the Company recognizing a noncash modification charge, which charge was calculated based on the Company's assessment of the fair value of the shares of Cingulate common stock on the date of the modification. The dollar value reflected in the table above reflects the fair value of the PIUs granted in 2021. See Note 8 to our consolidated financial statements for the year ended December 31, 2021 for additional information.

During 2020, we granted PIUs to the named executive officers. These PIUs were intended to constitute profits interests for U.S. federal income tax purposes. As the future achievement of the thresholds and targets to achieve payout of the PIUs was not deemed probable, the PIUs were determined to have zero value as of the date of grant. See Note 8 to our consolidated financial statements for the year ended December 31, 2021 for additional information.

(2) The amounts reflect the grant date fair value of the non-qualified stock option awards on December 7, 2021, in accordance with FASB ASC Topic 718. The fair market value of the option awards was determined using the Black-Scholes Model. See Note 10 to our consolidated financial statements for the year ended December 31, 2021 for the assumptions used in calculating the grant date fair value of the option awards.

(3) Ms. Myers was not a named executive officer in 2020; therefore, compensation information is not presented for that year.

Employee Benefit Plans

We currently provide broad-based health and welfare benefits that are available to all of our employees, including our named executive officers, including medical, dental, and vision insurance.

401(k) Plan

We sponsor a 401(k) savings plan (the “401(k) Plan”) for all eligible employees. Under the 401(k) Plan, we do not make matching contributions into the 401(k) Plan other than the annual required safe harbor match.

Employment Arrangements with our Named Executive Officers

Shane J. Schaffer

On September 23, 2021, we entered into an employment agreement with Dr. Schaffer. Under the terms of Dr. Schaffer’s employment agreement, he holds the position of Chief Executive Officer and receives a base salary of \$475,000 annually. In addition, Dr. Schaffer is eligible to receive an annual bonus, with a target amount equal to twenty-five percent (25%) of Dr. Schaffer’s annual base salary. The actual amount of each bonus will be determined by the sole discretion of our Compensation Committee and will be based upon both the Company’s performance and Dr. Schaffer’s individual performance. Pursuant to the terms of his employment agreement, Dr. Schaffer is also eligible to participate in all incentive and deferred compensation programs available to other executives or officers of the Company, and will be eligible to participate in any employee benefit plans and equity plans that we may adopt, which plans may be amended by the Company from time to time in its sole discretion.

We may terminate Dr. Schaffer’s employment at any time without cause upon providing written notice to Dr. Schaffer, and Dr. Schaffer may terminate his employment at any time for any reason, including for Good Reason (as that term is defined in Dr. Schaffer’s employment agreement).

If Dr. Schaffer’s employment is terminated by the Company without cause or by Dr. Schaffer for Good Reason, Dr. Schaffer will be entitled to receive, subject to his signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to one and one half (1 ½) times Dr. Schaffer’s base salary, within 60 days following the date of termination. In addition, all stock options and stock appreciation rights held by Dr. Schaffer, which would have vested if he had remained employed for an additional four (4) months following the date of termination, shall become vested and exercisable as of the date of termination for the remainder of their full term. If Dr. Schaffer’s employment is terminated by the Company without cause or by Dr. Schaffer for Good Reason within twelve (12) months of a Change of Control, Dr. Schaffer will be entitled to receive, subject to his signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to two (2) times Dr. Schaffer’s base salary, within 60 days following the date of termination; provided however, if any payment or benefits would constitute an “parachute payment” as defined in Section 280(G) of the Internal Revenue Code, the payments will be the greater of (i) the largest amount to ensure that no portion of those payments be subject to the excise tax imposed by Section 4999 of the Internal Revenue Code and (ii) the amount of the full payment, less all taxes, including the excise tax imposed by Section 4999 of the Internal Revenue Code. In addition, all stock options and stock appreciation rights held by Dr. Schaffer shall become vested and exercisable as of the date of termination for the remainder of their full term.

Laurie A. Myers

On September 23, 2021, we entered into an employment agreement with Ms. Myers. Under the terms of Ms. Myers’ employment agreement, she holds the positions of Executive Vice President and Chief Operating Officer and receives a base salary of \$400,000 annually. In addition, Ms. Myers is eligible to receive an annual bonus, with a target amount equal to twenty-five percent (25%) of Ms. Myers’ annual base salary. The actual amount of each bonus will be determined by the sole discretion of our Compensation Committee and will be based upon both the Company’s performance and Ms. Myers’ individual performance, as recommended by the Chief Executive Officer. Pursuant to the terms of her employment agreement, Ms. Myers is also eligible to participate in all incentive and deferred compensation programs available to other executives or officers of the Company, and will be eligible to participate in any employee benefit plans and equity plans that we may adopt, which plans may be amended by the Company from time to time in its sole discretion.

We may terminate Ms. Myers' employment at any time without cause upon providing written notice to Ms. Myers, and Ms. Myers may terminate her employment at any time for any reason, including for Good Reason (as that term is defined in Ms. Myers' employment agreement).

If Ms. Myers' employment is terminated by the Company without cause or by Ms. Myers for Good Reason, Ms. Myers will be entitled to receive, subject to her signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to one (1) times Ms. Myers' base salary, within 60 days following the date of termination. In addition, all stock options and stock appreciation rights held by Ms. Myers, which would have vested if she had remained employed for an additional four (4) months following the date of termination, shall become vested and exercisable as of the date of termination for the remainder of their full term. If Ms. Myers' employment is terminated by the Company without cause or by Ms. Myers for Good Reason within twelve (12) months of a Change of Control, Ms. Myers will be entitled to receive, subject to her signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to one (1) times Ms. Myers' base salary, within 60 days following the date of termination; provided however, if any payment or benefits would constitute a "parachute payment" as defined in Section 280(G) of the Internal Revenue Code, the payments will be the greater of (i) the largest amount to ensure that no portion of those payments be subject to the excise tax imposed by Section 4999 of the Internal Revenue Code and (ii) the amount of the full payment, less all taxes, including the excise tax imposed by Section 4999 of the Internal Revenue Code. In addition, all stock options and stock appreciation rights held by Ms. Myers shall become vested and exercisable as of the date of termination for the remainder of their full term.

Louis G. Van Horn

On September 23, 2021, we entered into an employment agreement with Mr. Van Horn. Under the terms of Mr. Van Horn's employment agreement, he holds the positions of Executive Vice President and Chief Financial Officer and receives a base salary of \$380,000 annually. In addition, Mr. Van Horn is eligible to receive an annual bonus, with a target amount equal to twenty-five percent (25%) of Mr. Van Horn's annual base salary. The actual amount of each bonus will be determined by the sole discretion of our Compensation Committee and will be based upon both the Company's performance and Mr. Van Horn's individual performance, as recommended by the Chief Executive Officer. Pursuant to the terms of his employment agreement, Mr. Van Horn is also eligible to participate in all incentive and deferred compensation programs available to other executives or officers of the Company, and will be eligible to participate in any employee benefit plans and equity plans that we may adopt, which plans may be amended by the Company from time to time in its sole discretion.

We may terminate Mr. Van Horn's employment at any time without cause upon providing written notice to Mr. Van Horn, and Mr. Van Horn may terminate his employment at any time for any reason, including for Good Reason (as that term is defined in Mr. Van Horn's employment agreement).

If Mr. Van Horn's employment is terminated by the Company without cause or by Mr. Van Horn for Good Reason, Mr. Van Horn will be entitled to receive, subject to his signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to one (1) times Mr. Van Horn's base salary, within 60 days following the date of termination. In addition, all stock options and stock appreciation rights held by Mr. Van Horn, which would have vested if he had remained employed for an additional four (4) months following the date of termination, shall become vested and exercisable as of the date of termination for the remainder of their full term. If Mr. Van Horn's employment is terminated by the Company without cause or by Mr. Van Horn for Good Reason within twelve (12) months of a Change of Control, Mr. Van Horn will be entitled to receive, subject to his signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to one (1) times Mr. Van Horn's base salary, within 60 days following the date of termination; provided however, if any payment or benefits would constitute a "parachute payment" as defined in Section 280(G) of the Internal Revenue Code, the payments will be the greater of (i) the largest amount to ensure that no portion of those payments be subject to the excise tax imposed by Section 4999 of the Internal Revenue Code and (ii) the amount of the full payment, less all taxes, including the excise tax imposed by Section 4999 of the Internal Revenue Code. In addition, all stock options and stock appreciation rights held by Mr. Van Horn shall become vested and exercisable as of the date of termination for the remainder of their full term.

On September 23, 2021, we entered into an employment agreement with Mr. Gilgallon. Under the terms of Mr. Gilgallon's employment agreement, he holds the positions of Executive Vice President and General Counsel and receives a base salary of \$380,000 annually. In addition, Mr. Gilgallon is eligible to receive an annual bonus, with a target amount equal to twenty-five percent (25%) of Mr. Gilgallon's annual base salary. The actual amount of each bonus will be determined by the sole discretion of our Compensation Committee and will be based upon both the Company's performance and Mr. Gilgallon's individual performance, as recommended by the Chief Executive Officer. Pursuant to the terms of his employment agreement, Mr. Gilgallon is also eligible to participate in all incentive and deferred compensation programs, and other executive retirement plans available to other executives or officers of the Company, and will be eligible to participate in any employee benefit plans and equity plans that we may adopt, which plans may be amended by the Company from time to time in its sole discretion.

We may terminate Mr. Gilgallon's employment at any time without cause upon providing written notice to Mr. Gilgallon, and Mr. Gilgallon may terminate his employment at any time for any reason, including for Good Reason (as that term is defined in Mr. Gilgallon's employment agreement).

If Mr. Gilgallon's employment is terminated by the Company without cause or by Mr. Gilgallon for Good Reason, Mr. Gilgallon will be entitled to receive, subject to his signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to one (1) times Mr. Gilgallon's base salary, within 60 days following the date of termination. In addition, all stock options and stock appreciation rights held by Mr. Gilgallon, which would have vested if he had remained employed for an additional four (4) months following the date of termination, shall become vested and exercisable as of the date of termination for the remainder of their full term. If Mr. Gilgallon's employment is terminated by the Company without cause or by Mr. Gilgallon for Good Reason within twelve (12) months of a Change of Control, Mr. Gilgallon will be entitled to receive, subject to his signing a general release of claims in favor of the Company and related persons and entities within twenty-one (21) days of the date of termination and following the expiration of seven (7) days thereafter, a severance payment of a lump sum amount in cash equal to one (1) times Mr. Gilgallon's base salary, within 60 days following the date of termination; provided however, if any payment or benefits would constitute a "parachute payment" as defined in Section 280(G) of the Internal Revenue Code, the payments will be the greater of (i) the largest amount to ensure that no portion of those payments be subject to the excise tax imposed by Section 4999 of the Internal Revenue Code and (ii) the amount of the full payment, less all taxes, including the excise tax imposed by Section 4999 of the Internal Revenue Code. In addition, all stock options and stock appreciation rights held by Mr. Gilgallon shall become vested and exercisable as of the date of termination for the remainder of their full term.

Outstanding Equity Awards at 2021 Fiscal Year-End

Name	Grant date (1)	Number of securities underlying unexercised options (#) exercisable	Number of securities underlying unexercised options (#) unexercisable	Option exercise price (\$)	Option expiration date
Shane J. Schaffer	12-7-2021	-	179,668	\$ 6.00	12-7-2031
Laurie A. Myers	12-7-2021	-	67,376	\$ 6.00	12-7-2031
Louis G. Van Horn	12-7-2021	-	67,376	\$ 6.00	12-7-2031
Craig S. Gilgallon	12-7-2021	-	67,376	\$ 6.00	12-7-2031

(1) The options vest in four equal annual installments beginning on the one-year anniversary of the grant date.

Director Compensation

In 2021, we did not maintain any standard fee arrangements for the non-employee members of our Board of Directors for their service as a director other than for reimbursement of reasonable expenses incurred in attending meetings of our Board of Directors and committees of the Board of Directors.

2021 Director Compensation Table

Name	Fees earned or paid in cash (\$)	Stock awards (\$)(1)	Option awards (\$)(2)	Total (\$)
Jeff Conroy	—	3,600	46,038	49,638
Patrick Gallagher	—	2,400	46,038	48,438
Gregg Givens	—	—	46,038	46,038
Jeff Hargroves	—	2,400	46,038	48,438
Curt Medeiros	—	—	46,038	46,038
Peter Werth	—	1,500	46,038	47,538

(1) In April 2021, we granted PIUs to Messrs. Conroy (27,009), Gallagher (18,006), Hargroves (18,006) and Werth (11,254). These PIUs were intended to constitute profits interests for U.S. federal income tax purposes. We accounted for these awards under *ASC Topic 718, Compensation – Stock Compensation (FASB ASC Topic 718)*, as equity classified awards. In connection with the Reorganization Merger, all outstanding PIU's were exchanged for shares of Cingulate common stock. The exchange of PIU's for common stock created a modification of the terms, character and rights of the PIU's and achievement of performance was considered probable. This resulted in the Company recognizing a noncash modification charge, which charge was calculated based on the Company's assessment of the fair value of the shares of Cingulate common stock on the date of the modification. The dollar value reflected in the table above reflects the fair value of the PIUs granted in 2021. See Note 8 to our consolidated financial statements for the year ended December 31, 2021 for additional information

(2) The amounts reflect the grant date fair value of the non-qualified stock options awarded on December 7, 2021 in accordance with *FASB ASC Topic 718*. The fair market value of the option awards was determined using the Black-Scholes Model. See Note 10 to our consolidated financial statements for the year ended December 31, 2021 for the assumptions used in calculating the option awards. Each non-employee director held 8,983 non-qualified stock options as of December 31, 2021.

2022 Director Compensation Program

Our Compensation Committee and Board of Directors approved a director compensation program for our non-employee directors, effective beginning January 1, 2022. This program provides for the following annual cash compensation:

- Director retainer - \$35,000
- Committee chair retainer:
 - Audit - \$15,000
 - Compensation - \$10,000
 - Nominating and Corporate Governance - \$8,000
- Committee member retainer:
 - Audit - \$7,500
 - Compensation - \$5,000
 - Nominating and Corporate Governance - \$4,000

If the Board of Directors appoints a lead independent director, that individual would receive an additional annual cash retainer equal to \$20,000. All cash fees will be paid quarterly in arrears and shall be pro-rated based on the number of whole or partial months served during a calendar year. Although directors are not paid meeting fees, the lead independent director, if any, and the Chairman of the Compensation Committee may determine to pay meeting fees for one or more meetings to the extent the number of Board or committee meetings exceeds the typical number of meetings during the year. We will also reimburse non-employee directors for reasonable expenses incurred in connection with attending board of director and committee meetings.

Non-employee directors will receive an annual stock option award, which will vest in a single installment on the first anniversary of the date of grant. Each non-employee director received a non-qualified stock option award of 9,000 options on February 25, 2022. Newly appointed non-employee directors will receive an initial non-qualified stock option award of 12,000 options.

Dr. Schaffer, our Chief Executive Officer, serves as Chairman of our Board of Directors but does not receive additional compensation for his service as a director. See the Summary Compensation Table for a description of Dr. Schaffer's 2021 compensation.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Securities Authorized for Issuance Under Equity Compensation Plans

In September 2021, our Board of Directors and stockholders adopted the 2021 Omnibus Equity Incentive Plan (the “Equity Plan”), which provides for the grant of incentive stock options and non-qualified stock options to purchase shares of our common stock and other types of awards. The general purpose of the Equity Plan is to provide a means whereby eligible employees, officers, non-employee directors and other individual service providers develop a sense of proprietorship and personal involvement in our development and financial success, and to encourage them to devote their best efforts to our business, thereby advancing our interests and the interests of our stockholders.

The following table provides information as of December 31, 2021 with respect to shares of our common stock that may be issued pursuant to our equity compensation plans.

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column a) (c)(2)
Equity compensation plans approved by security holders (1)	523,284	\$ 6.00	562,876
Equity compensation plans not approved by security holders	—	\$ —	—
Total	523,284	\$ 6.00	562,876

(1) The amounts shown in this row include securities under the Equity Plan.

(2) In accordance with the “evergreen” provision in our Equity Plan, an additional 841,650 shares of our common stock were automatically made available for issuance on the first day of 2022, which represents 5% of the number of fully-diluted shares outstanding on December 31, 2021 (rounded to the nearest 1,000 share increment). These shares are excluded from the shares disclosed in the table.

Security Ownership of Certain Beneficial Owners and Management

The following table sets forth information about the beneficial ownership of our common stock as of March 21, 2022 (unless otherwise noted) by:

- each person or group known to us who beneficially owns more than 5% of our common stock;
- each of our directors;
- each of our Named Executive Officers; and
- all of our directors and executive officers as a group.

We have determined beneficial ownership in accordance with the rules of the SEC. Under these rules, beneficial ownership includes any shares of common stock as to which the individual or entity has sole or shared voting power or investment power. In computing the number of shares beneficially owned by an individual or entity and the percentage ownership of that person, shares of common stock subject to options or warrants held by such person that are currently exercisable or will become exercisable within 60 days of March 21, 2022 are considered outstanding, although these shares are not considered outstanding for purposes of computing the percentage ownership of any other person.

Name of Beneficial Owner (1)	Number of Shares Beneficially Owned	Percent of Class (2)
5% or Greater Stockholders		
Sabby Volatility Warrant Master Fund, Ltd. (3)	886,254	7.84%
Matthew Brams, MD (4)	650,240	5.75%
Named Executive Officers and Directors		
Shane J. Schaffer, Pharm.D.	890,828(5)	7.83%
Laurie A. Myers	46,316(6)	*
Louis G. Van Horn, MBA	156,606(7)	1.38%
Craig S. Gilgallon, Esq.	196,287(8)	1.73%
Jeff Conroy	4,949(9)	*
Patrick Gallagher, MBA	68,358(10)	*
Gregg Givens	115,818(11)	1.02%
Jeff Hargroves	54,143(12)	*
Curt Medeiros	17,532(13)	*
Peter J. Werth	901,880(14)	7.97%
All Directors and Executive Officers as a group (12 persons)	3,570,189(15)	31.28%

* Denotes less than 1%.

- (1) Unless noted otherwise, the address of all listed stockholder is 1901 W. 47th Place, Kansas City, KS 66205. Each of the stockholders listed has sole voting and investment power with respect to the shares beneficially owned by the stockholder unless noted otherwise, subject to community property laws where applicable.
- (2) We have determined beneficial ownership in accordance with Rule 13d-3 under the Exchange Act, which is generally determined by voting power and/or investment power with respect to securities. Percentage ownership is based on 11,309,412 shares of common stock issued and outstanding as of March 21, 2022, plus any shares issuable upon exercise of options or warrants that are exercisable within 60 days of March 21, 2022 held by such person.
- (3) Based on the information provided in the Schedule 13G/A filed with the SEC on January 5, 2022. Sabby Management, LLC is the investment manager of Sabby Volatility Warrant Master Fund, Ltd. and shares voting and investment power with respect to these shares in this capacity. As manager of Sabby Management, LLC, Hal Mintz also shares voting and investment power on behalf of Sabby Volatility Warrant Master Fund, Ltd. Each of Sabby Management, LLC and Hal Mintz disclaims beneficial ownership over the securities listed except to the extent of their pecuniary interest therein. The principal address for Sabby Volatility Warrant Master Fund, Ltd. is 89 Nexus Way, Camana Bay, Grand Cayman KY1-9007, Cayman Islands. The principal address for Sabby Management, LLC and Hal Mintz is 10 Mountainview Road, Suite 205, Upper Saddle River, New Jersey 07458.
- (4) Dr. Brams is our Executive Vice President and Chief Medical Officer. Does not include 16,992 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.

- (5) Includes (i) 66,500 shares of our common stock issuable upon exercise of warrants that are currently exercisable and (ii) 807,828 shares of common stock held by Fountainhead Shrugged, LLC. Dr. Schaffer is the manager of Fountainhead Shrugged, LLC and has voting and investment power over the securities held by Fountainhead Shrugged, LLC. Does not include 247,168 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (6) Does not include 97,376 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (7) Includes 141,606 shares of common stock held by Louis G. Van Horn Trust, 12/23/19. Mr. Van Horn is the Trustee of Louis G. Van Horn Trust, 12/23/19 and has voting and investment power over the securities held by Louis G. Van Horn Trust, 12/23/19. Does not include 97,376 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (8) Includes (i) 5,016 shares of our common stock issuable upon exercise of warrants that are currently exercisable and (ii) 185,296 shares of common stock held by The Limerick Group, LLC. Mr. Gilgallon is the sole member of The Limerick Group, LLC and has voting and investment power over the securities held by Limerick Group, LLC. Does not include 97,376 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (9) Does not include 17,983 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (10) Does not include 17,983 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (11) Includes (i) 16,500 shares of our common stock issuable upon exercise of warrants that are currently exercisable and (ii) 30,000 shares of common stock held by Mr. Givens' children. Does not include 17,983 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (12) Includes (i) 8,300 shares of our common stock issuable upon exercise of warrants that are currently exercisable and (ii) 37,543 shares of common stock held by Hargroves Family Investments, LLC. Mr. Hargroves is the manager of Hargroves Family Investments, LLC and has voting and investment power over the securities held by Hargroves Family Investments, LLC. Does not include 17,983 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (13) Does not include 17,983 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (14) Includes (i) 8,300 shares of our common stock issuable upon exercise of warrants that are currently exercisable and (ii) 871,731 shares of common stock held by Werth Family Investment Associates. Mr. Werth is the manager of Werth Family Investment Associates LLC and has voting and investment power over the securities held by Werth Family Investment Associates LLC. Does not include 17,983 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.
- (15) Does not include 674,678 shares of our common stock issuable upon the exercise of stock options that are not exercisable within sixty days of March 21, 2022.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The following is a description of transactions since January 1, 2020 to which we have been a participant in which the amount involved exceeded or will exceed \$120,000 and in which any of our directors, executive officers or holders of more than 5% of our voting securities, or any members of their immediate family, had or will have a direct or indirect material interest, other than compensation arrangements.

Related Party Notes

On February 26, 2020, CTx issued a \$314,000 promissory note (the “February Note”) to Matthew Brams, our Chief Medical Officer. On September 30, 2020, we issued a \$40,000 promissory note (the “September Note”, and together with the February Note, the “Brams Notes”) to Mr. Brams. The Brams Notes accrued interest at the rate of 8% per annum. The principal of the Brams Notes and accrued interest thereon was convertible, at Dr. Brams’ option into preferred units of CTx at a Twenty-Five (25%) Percent discount to the offered unit price at the time of conversion. We had the right to prepay these notes without penalty or premium. On each of December 30, 2020 and July 1, 2020, we made a \$100,000 repayment of the February Note. The February Note, which initially matured on February 24, 2021 was extended for an additional 12 months to February 24, 2022. The September Note, which initially matured on September 30, 2021 was extended to February 24, 2022. On July 1, 2021 we made a \$100,000 payment on the February Note and on August 17, 2021, we made a \$50,000 payment on the February Note. As of closing of our IPO, we owed \$104,000 and \$37,025 in principal and interest, respectively, on the Brams Notes, which were paid in full in December 2021 with IPO proceeds.

On July 25, 2020, CTx issued a \$100,000 promissory note (the “July Note”) to Raul R. Silva, our Executive Vice President and Chief Science Officer. The July Note accrued interest at the rate of 8% per annum. The principal of the July Note and accrued interest thereon was convertible, at Dr. Silva’s option into preferred units of CTx at a Twenty-Five (25%) Percent discount to the offered unit price at the time of conversion. We had the right to prepay this note without penalty or premium. The July Note, which initially matured on July 24, 2021, was extended for an additional seven months to February 24, 2022. As of the closing of our IPO, we owed \$100,000 and \$11,047 in principal and interest, respectively, on the July Note, which was paid in full in December 2021 with IPO proceeds.

On February 1, 2020, CTx issued a \$500,000 promissory note to Dresch, Inc., a former CTx member (the “Member Note”, and together with the Brams Notes and the July Note, the “Related Party Notes”). Principal and interest of the Member Note was convertible upon lender’s notice into preferred units of CTx at the offered unit prices at the time of conversion. On September 30, 2020, \$353,665 was converted to 246,096 Preferred Units of CTx at the current unit price in accordance with the terms of the Member Note leaving a note payable amount of \$146,335. The Member Note, which initially matured on February 1, 2021 was extended for an additional 12 months to February 1, 2022. As of the closing of our IPO, we owed \$146,335 and \$39,941 in principal and interest, respectively, on the Member Note, which was paid in full in December 2021 with IPO proceeds.

Initial Public Offering

Patrick Gallagher, a member of our Board of Directors, is a Senior Managing Director at Laidlaw & Co. and a Managing Partner at Laidlaw Venture Partners. Laidlaw & Company (UK) Ltd. acted as co-lead book-running underwriter for our IPO, which closed December 10, 2021. The discounts and commissions paid to Laidlaw & Company (UK) Ltd. in connection with the IPO were approximately \$500,000.

Indemnification of Officers and Directors

We have entered into indemnification agreements with each of our current directors and executive officers. These agreements require us to indemnify these individuals to the fullest extent permitted under Delaware law against liabilities that may arise by reason of their service to us, and to advance expenses incurred as a result of any proceeding against them as to which they could be indemnified. We also intend to enter into indemnification agreements with our future directors and executive officers.

Policies and Procedures for Related Party Transactions

We adopted policies and procedures for related party transactions that prohibit our executive officers, directors, nominees for election as a director, beneficial owners of more than 5% of any class of our common stock, any members of the immediate family of any of the foregoing persons and any firms, corporations or other entities in which any of the foregoing persons is employed or is a partner or principal or in a similar position or in which such person has a 5% or greater beneficial ownership interest, or related parties, from entering into a transaction with us without the prior consent of our board of directors acting through the Audit committee or, in certain circumstances, the chairman of the Audit committee. Any request for us to enter into a transaction with a related party, in which the amount involved will, or may be expected to, exceed \$100,000 and such related party would have a direct or indirect interest must first be presented to our Audit committee, or in certain circumstances the chairman of our Audit committee, for review, consideration and approval. In approving or rejecting any such proposal, our Audit committee is to consider the material facts of the transaction, including, but not limited to, whether the transaction is on terms no less favorable than terms generally available to an unaffiliated third party under the same or similar circumstances, the extent of the benefits to us, the availability of other sources of comparable products or services and the extent of the related person's interest in the transaction.

Director Independence

Pursuant to Nasdaq rules, a director will only qualify as an "independent director" if, in the opinion of that company's board of directors, that person does not have a relationship that would interfere with the exercise of independent judgment in carrying out the responsibilities of a director. Our Board of Directors has determined that Jeff Conroy, Gregg Givens, Jeff Hargroves, Curt Medeiros, and Peter J. Werth are "independent directors" as such term is defined by Nasdaq Marketplace Rule 5605(a)(2). Due to Laidlaw & Company (UK) Ltd. acting as co-lead book-running underwriter for our IPO and Patrick Gallagher's position as Senior Managing Director at Laidlaw & Co and as Managing Partner at Laidlaw Venture Partners, our Board of Directors determined that Mr. Gallagher is not an independent director. In addition, Shane Schaffer is not an independent director due to his position as Chief Executive Officer of the Company. We have established an Audit Committee, a Compensation Committee and a Nominating and Corporate Governance Committee, each of which are comprised of independent directors.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Principal Accountant Fees and Services

Our independent registered public accounting firm is KPMG LLP, Kansas City, MO, Auditor Firm ID: 185. The following table summarizes the fees billed by KPMG for audit and other services provided to the Company for the fiscal years ended December 31, 2021 and 2020:

	2021	2020
Audit Fees (1)	\$ 1,100,000	\$ 57,500
Audit-Related Fees	—	—
Tax Fees (2)	527,040	85,656
All Other Fees	—	—
Total	\$ 1,627,040	\$ 143,156

(1) Audit fees consist of fees for our quarterly reviews and audits of our financial statements, and fees relating to our IPO (registration statement reviews and comfort letters).

(2) Tax fees consist of fees for tax compliance services, including preparation and review of tax returns and general tax consulting services.

Pre-Approval Policy

The Audit Committee or its Chairman pre-approves audit and non-audit services to be rendered to the Company and establishes a dollar limit on the amount of fees the Company will pay for each category of services. Generally, management will submit to the Audit Committee a list of services that it recommends the Audit Committee engage the independent registered public accounting firm to provide for the fiscal year. The Audit Committee is informed from time to time of the non-audit services provided pursuant to the pre-approval process. During the year, the Audit Committee periodically reviews the types of services and dollar amounts approved and adjusts such amounts, as it deems appropriate. Unless a service to be provided by the independent registered public accounting firm has received general pre-approval, it will require specific pre-approval by the Audit Committee or its Chairman. Any service pre-approved by the Chairman will be presented to the Audit Committee at its next regularly scheduled meeting. The Audit Committee also periodically reviews all non-audit services to ensure such services do not impair the independence of the Company's independent registered public accounting firm. All fees incurred after our IPO in December 2021 have been pre-approved by our Audit Committee.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors

Cingulate Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Cingulate Inc. (the Company) as of December 31, 2021 and 2020, the related consolidated statements of operations and comprehensive loss, changes in stockholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2021, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2021, in conformity with U.S. generally accepted accounting principles.

Going Concern

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has incurred losses and negative cash flows from operations since inception and has stated that substantial doubt exists about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company's auditor since 2019.

CINGULATE INC.
Notes to Consolidated Financial Statements
For the Years Ended December 31, 2021 and 2020

(1) Nature of the Business and Liquidity

Organization

Cingulate Inc. is a clinical stage biopharmaceutical company focused on the development of products utilizing its drug delivery platform technology that enables the formulation and manufacture of once-daily tablets of multi-dose therapies, with an initial focus on the treatment of Attention Deficit/Hyperactivity Disorder (ADHD). The Company is developing two proprietary, first-line stimulant medications, CTx-1301 (dexamethylphenidate) and CTx-1302 (dextroamphetamine), for the treatment of ADHD intended for all patient segments: children, adolescents, and adults. CTx-1301 and CTx-1302 utilize a flexible core tableting technology with target product profile designed to deliver a rapid onset and last the entire active day with a controlled descent of plasma drug level and have favorable tolerability. The Company is preparing to start Phase 3 clinical trials for CTx-1301 in the second quarter of 2022. In addition, the Company has a third product to treat anxiety, CTx-2103, in a proof-of-concept stage.

On November 14, 2012, Cingulate Therapeutics LLC (CTx), a Delaware limited liability company, was formed. CTx's equity owners were referred to as "Members." On May 1, 2019, Cingulate Inc., a Delaware corporation and wholly-owned subsidiary of CTx, was formed to provide employee services to CTx. On May 6, 2021, Cingulate Inc. changed its name to Cingulate Works Inc.

On May 10, 2021, Cingulate Inc. (Cingulate, or the Company), a Delaware corporation and wholly-owned subsidiary of CTx, was formed to serve as a holding company and, on August 16, 2021, Cingulate Pharma LLC (Merger Sub), a Delaware LLC and wholly-owned subsidiary of Cingulate was formed in connection with planned organizational transactions. Effective September 29, 2021, Cingulate acquired CTx through the merger of Merger Sub with and into CTx, with CTx as the surviving entity (the Reorganization Merger). After the Reorganization Merger, CTx remains the entity through which the Company conducts operations. As a result of the Reorganization Merger, CTx become a wholly-owned subsidiary of Cingulate and all outstanding Units of CTx immediately prior to the Reorganization Merger, including Profits Interest Units (PIU's), and after reflecting the stock dividend and reverse stock splits described below, were converted into 7,142,746 shares of Cingulate common stock pursuant to the terms of the merger agreement. In addition, the Company recognized a noncash modification charge equal to \$12,738,088 in connection with the conversion of the PIU's into shares of Cingulate common stock, as further described in Note 8.

On December 10, 2021, the Company completed its initial public offering (IPO), in which the Company issued and sold 4,166,666 shares of its common stock, at a public offering price of \$6.00 per share, or aggregate gross proceeds of \$25.0 million. The Company received approximately \$20.4 million in net proceeds after deducting underwriting discounts and offering expenses paid by the Company.

In conjunction with the Company's IPO, common stock purchase warrants were issued as described in Note 11 below.

Prior to the consummation of the Reorganization Merger, the Company refers to CTx and on or following the consummation of Reorganization Merger, the Company refers to Cingulate.

CTx is the predecessor of Cingulate for financial reporting purposes. The consolidated financial statements and notes for the year ended December 31, 2021 represent the full consolidation of Cingulate and its subsidiaries, including CTx and all references to the Company represent this full consolidation. For periods prior to the year ended December 31, 2021, the consolidated financial statements and notes represent the full consolidation of CTx and its subsidiaries.

Liquidity

The Company has incurred losses and negative cash flows from operations since inception. As a pre-revenue entity, the Company is dependent on the ability to raise capital to support operations until such time as the product candidates under development are FDA approved, manufactured, commercially available to the marketplace and produce revenues. The IPO, which was completed in 2021, provided the Company the ability to continue its research and development activities; however, the Company will need additional funding for operations and development in order to meet its obligations in the longer term. Management is evaluating various strategies to obtain additional funding for operations and development beyond that time which may include additional offerings of common stock, issuance of debt, potential strategic research and development partners, and licensing and/or marketing arrangements with pharmaceutical companies. Successful implementation of these plans involves both the Company's efforts and factors that are outside its control, such as market factors and FDA approval of product candidates. The Company can give no assurance that its plans will be effectively implemented in such a way that they will sufficiently alleviate or mitigate the conditions and events noted above, which results in substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are issued. The accompanying consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. The consolidated financial statements do not reflect any adjustments that might result from the outcome of this uncertainty.

(2) Summary of Significant Accounting Policies

(a) Basis of Presentation and Principles of Consolidation

The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP"). The consolidated financial statements include the accounts of Cingulate and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

(b) Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of expenses during a reporting period. Actual results could differ from estimates.

Estimates and assumptions are periodically reviewed and the effects of revisions are reflected in the consolidated financial statements in the period they are determined to be necessary.

(c) Concentration of Credit Risk

The Company maintains cash equivalent deposits, which at various times throughout the fiscal year exceeded the amounts insured by the Federal Deposit Insurance Corporation limit of \$250,000 (without regard to reconciling items). Management monitors the soundness of these financial institutions and does not believe the Company is subject to any material credit risk relative to the uninsured portion of the deposits.

(d) Cash and Cash Equivalents

Bank demand deposit accounts and short-term liquid investments with an initial maturity of three months or less are considered cash and cash equivalents. Cash and cash equivalents as of December 31, 2021 and 2020 consisted of bank deposits and short-term money market funds. Cash and cash equivalents are carried at cost which is indicative of fair value.

(e) Short-term Investments

Short-term investments are recorded at fair value with unrealized gains and losses recorded in other comprehensive income (loss) in the period in which they arise. Short-term investments are comprised of short-term bond funds and are classified by the Company as available for sale securities. Gains and losses on the sale of securities, determined using the specific identification method, are recorded on the date of trade. Unrealized gains and losses for the years ended December 31, 2021 and 2020 were \$0 and (\$133), respectively.

(f) Miscellaneous Receivables

Miscellaneous receivables consist of payroll tax credits generated from the Company's 2020 and 2019 federal income tax returns, which have not yet been received, as well as employee retention tax credits for payroll costs incurred in 2020 and the first three quarters of 2021. As of December 31, 2021 and 2020, the Company determined that there was no allowance necessary relating to these receivables.

(g) Property and Equipment, net

Property and equipment, net are stated at cost, less accumulated depreciation. Maintenance and repairs are charged to expense when incurred. Property and equipment are depreciated using the straight-line method over the estimated remaining useful lives or, for leasehold improvements or leased assets under a financing lease, the life of the lease if shorter.

(h) Leases

The Company is a lessee in two noncancellable operating leases, relating to office space at the Kansas City headquarters office and the New Jersey office and two finance leases, for certain furniture and equipment, one of which the lease term ended on December 31, 2021.

The Company determines if an arrangement is or contains a lease at contract inception. The Company recognizes a ROU asset and a lease liability at the lease commencement date. For operating leases, the lease liability is initially and subsequently measured at the present value of the unpaid lease payments at the lease commencement date. For finance leases, the lease liability is initially measured in the same manner and date as for operating leases and is subsequently measured at amortized cost using the effective-interest method.

The Company determines the discount rate it uses to discount the unpaid lease payments to present value, which requires management judgement. ASC 842 requires a lessee to discount its unpaid lease payments using the interest rate implicit in the lease or, if that rate cannot be readily determined, its incremental borrowing rate. The implicit rate was stated in the agreement for one of the Company's leases; however, for the others, the implicit rate was not determinable as the Company did not have access to the lessor's estimated residual value or the amount of the lessor's deferred initial direct costs. Therefore, the Company uses its incremental borrowing rate as the discount rate for these leases. The Company's incremental borrowing rate for a lease is the rate of interest it would have to pay on a collateralized basis to borrow an amount equal to the lease payments under similar terms. Because the Company has not been able to borrow on a collateralized basis, it has determined a synthetic credit rating based on factors that a credit rating agency would typically analyze when establishing an entity's credit rating. Due to the fact that the Company is a pre-revenue developmental entity, the Company determined that its incremental borrowing rate should be based on the composite CCC and lower bond spreads at the lease measurement dates plus a risk-free rate based on specific lease maturities.

The ROU asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for lease payments made at or before the lease commencement date, plus any initial direct costs incurred less any lease incentives received.

For operating leases, the ROU asset is subsequently measured throughout the lease term at the carrying amount of the lease liability, plus initial direct costs, plus (minus) any prepaid (accrued) lease payments, less the unamortized balance of cumulative lease incentives received. Lease expense is recognized on a straight-line basis over the lease term which includes the accretion of the lease liability and amortization of the ROU asset.

For finance leases, the ROU asset is subsequently amortized using the straight-line method from the lease commencement date to the earlier of the end of its useful life or the end of the lease term unless the lease transfers ownerships of the underlying asset to the Company or the Company is reasonably certain to exercise an option to purchase the underlying asset. In those cases, the ROU asset is amortized over the useful life of the underlying asset. Amortization of the ROU asset is recognized and presented separately from interest expense on the lease liability.

ROU assets for operating and finance leases are evaluated for impairment losses. The Company uses the long-lived assets impairment guidance in ASC Subtopic 360-10, *Property and Equipment-Overall*. The ROU asset is assessed for impairment with the asset group within which it resides.

Operating lease ROU assets are presented as operating lease right-of-use assets on the consolidated balance sheet. The current portion of operating lease liabilities is included in other current liabilities and the long-term portion is presented separately as operating lease liabilities on the consolidated balance sheet. Finance lease ROU assets are included in property, plant, and equipment. The current portion of finance lease liabilities is included in current installments of obligations under finance leases on the consolidated balance sheets.

(i) Impairment of Long-lived Assets

The Company assesses the carrying value of its long-lived assets, including property and equipment, as well as lease ROU assets, when events or circumstances indicate that the carrying value of such assets may not be recoverable. These events or changes in circumstances may include a significant deterioration of operating results, changes in business plans, or changes in anticipated future cash flows. If an impairment indicator is present, the Company evaluates recoverability by a comparison of the carrying amount of the assets to future undiscounted cash flows expected to be generated by the assets. If the sum of the expected future cash flows is less than the carrying amount, the Company would recognize an impairment loss. An impairment loss would be measured by comparing the amount by which the carrying value exceeds the fair value of the long-lived asset groups. No impairment was recognized during the years ended December 31, 2021 or 2020.

(j) Research and Development

Research and development costs are expensed as incurred and include all direct and indirect costs associated with the development of the Company's product candidates. These expenses include payments to third parties for research, development and manufacturing services, personnel costs and depreciation on manufacturing equipment. At the end of the reporting period, the Company compares payments made to third party service providers to the estimated progress toward completion of the research or development objectives. Such estimates are subject to change as additional information becomes available. Depending on the timing of payments to service providers and the progress that the Company estimates has been made as a result of the service provided, the Company may record net prepaid or accrued expense relating to these costs.

(k) Stock-Based Compensation

The Company measures employee and director stock-based compensation expense for all stock-based awards based on their grant date fair value using the Black-Scholes option-pricing model. For stock-based awards with service conditions, stock-based compensation expense is recognized over the requisite service period using the straight-line method. Forfeitures are recognized as they occur. See additional information in Note 10.

(l) Paycheck Protection Program

On March 27, 2020, the U.S. federal government enacted the Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”). The CARES Act includes a provision for a Paycheck Protection Program (“PPP”) administered by the U.S. Small Business Administration (“SBA”) and further amended by the Paycheck Protection Program Flexibility Act of 2020 (“PPP Flexibility Act”), which was enacted on June 5, 2020. In April 2020, the Company received a PPP Loan of \$312,500. In February 2021, the Company received a second PPP loan of \$236,457. In accordance with the requirements of the CARES Act, as amended by the PPP Flexibility Act, the PPP Loans may be fully forgiven if proceeds are used to pay eligible payroll costs, rent, mortgage interest and utilities. As of December 31, 2020, the Company believed that all of the requirements of the CARES Act had been met and that it was probable that the entire balance of the PPP Loans would be forgiven. As such, there is no liability for the PPP Loans reflected in the consolidated financial statements as the relevant expense accounts were adjusted to reflect the amounts covered under the loan.

In July 2021, the Company was notified that the first PPP loan was forgiven by the SBA and in October 2021, the Company was notified that the second PPP loan was forgiven by the SBA.

(m) Segments

Operating segments are components of a Company for which separate financial information is available and is evaluated regularly by the Company’s chief operating decision-maker in deciding how to allocate resources and in assessing performance. The Company currently operates in one operating business segment—drug development.

(n) Income Taxes

Cingulate Inc. is taxed as a C corporation under the Internal Revenue Code. Cingulate Inc. records deferred income taxes to reflect the impact of temporary differences between the recorded amounts of assets and liabilities for financial reporting purposes and such amounts as measured by tax laws and regulations. As of December 31, 2021, CTx is a wholly-owned disregarded entity of Cingulate Inc., and all of the activity for CTx, along with its wholly-owned subsidiary Cingulate Works Inc., is included in the calculation of the current and deferred tax assets and liabilities for Cingulate Inc. The Company determined that it was more likely than not that it would not realize its deferred tax assets, based on historical levels of income and future forecasts of taxable income, among other items, therefore a full valuation allowance is recorded.

The Company has not identified any uncertain tax positions. There have been no interest or penalties recognized in the consolidated financial statements related to uncertain tax positions. In addition, no tax positions exist for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase or decrease within the next 12 months.

The Company files income tax returns in the federal and various state jurisdictions. These federal income taxes are immaterial. The Company is no longer subject to U.S. federal income tax examinations by tax authorities for years before 2018.

(o) Common Stock Purchase Warrants

The Company issued warrants in connection with its IPO in December 2021. These equity instruments are valued at the fair value of the instrument issued. See additional information in Note 11.

(p) Net Loss per Share

Basic net loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding during the period, without consideration to potential dilutive securities. Diluted net loss per common share is computed by dividing the net loss by the sum of the weighted average number of common shares outstanding during the period plus the number of potential dilutive instruments outstanding during the period using the simplified method. Diluted net loss per share is the same as basic net loss per share since the effect of potentially dilutive securities is anti-dilutive.

(3) Fair Value of Assets and Liabilities

The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. The Company determines fair values based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. When considering market participant assumptions in fair value measurements, the following fair value hierarchy distinguishes between observable and unobservable inputs, which are categorized in one of the following levels:

Level 1—Inputs represent unadjusted quoted prices for identical assets exchanged in active markets.

Level 2—Inputs include directly or indirectly observable inputs other than Level 1 inputs such as quoted prices for similar assets exchanged in active or inactive markets; quoted prices for identical assets exchanged in inactive markets; other inputs that are considered in fair value determinations of the assets, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3—Inputs include unobservable inputs used in the measurement of assets. Management is required to use its own assumptions regarding unobservable inputs because there is little, if any, market activity in the assets or related observable inputs that can be corroborated at the measurement date. Measurements of certain investments carried at fair value are based primarily on valuation models, discounted cash flow models or other valuation techniques that are believed to be used by market participants. Unobservable inputs require management to make certain projections and assumptions about the information that would be used by market participants in pricing assets.

The categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company's policy is to recognize significant transfers between the levels at the actual date of the event. For the year ended December 31, 2021 and 2020, there were no transfers in or out of Levels 1, 2, or 3.

The Company has no Level 2 or Level 3 investments. The cash and short-term investments held by the Company are categorized as Level 1 investments as quoted market prices are readily available for these investments.

Assets measured and carried at fair value on a recurring basis are summarized below:

	December 31, 2021					
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value of Current Assets	Fair Value of Non- Current Assets	Fair Value of Total Assets
Equity investments						
Mutual funds	\$ 933	\$ -	\$ -	\$ -	\$ -	\$ 933

	December 31, 2020					
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value of Current Assets	Fair Value of Non- Current Assets	Fair Value of Total Assets
Equity investments						
Mutual Funds	\$ 920	\$ 13	\$ -	\$ 933	\$ -	\$ 933

(4) Property and Equipment

Property and equipment, net consists of the following at December 31, 2021 and 2020:

	Estimated Useful Life (in years)	2021	2020
Equipment	2-7	\$ 2,509,126	\$ 1,988,598
Furniture and fixtures	7	145,754	131,278
Computer equipment	5	41,898	41,898
Leasehold improvements	5	471,505	471,505
Construction-in-process	-	1,643,150	1,363,418
		4,811,433	3,996,697
Less: accumulated depreciation		(1,666,055)	(957,738)
		<u>\$ 3,145,378</u>	<u>\$ 3,038,959</u>

Depreciation expense was \$708,317 and \$666,029 for the years ended December 31, 2021 and 2020, respectively.

(5) Accrued Expenses

Accrued expenses consisted of the following at December 31, 2021 and 2020:

	2021	2020
Payroll and related costs	\$ —	\$ 1,082,643
Professional and consulting fees	15,000	15,000
Research and development	250,000	18,944
CIP- Equipment	279,730	—
Interest	—	64,105
Other	56,570	34,867
	<u>\$ 601,300</u>	<u>\$ 1,215,559</u>

Payroll was deferred for a number of the Company's employees in 2020 and 2021 and was paid in full in December 2021.

(6) Notes Payable

Notes payable consisted of the following as of December 31, 2021 and 2020:

	<u>2021</u>	<u>2020</u>
\$100,000, unsecured note payable to a member of CTx, principal and interest of 8% due in full on February 24, 2022 ⁽¹⁾	\$ —	\$ 100,000
\$354,000, unsecured note payable to a member of CTx, principal and interest of 8% due in full on February 24, 2022 ⁽¹⁾	—	254,000
\$500,000, unsecured note payable to a member of CTx', principal and interest of 8% due in full on February 1, 2022 ⁽²⁾	—	146,335
	<u>\$ —</u>	<u>\$ 500,335</u>

(1) Prior to the Reorganization Merger, principal and interest was convertible upon lenders' notice into Preferred Units of CTx at a 25% discount to the offered unit prices at the time of conversion.

(2) Prior to the Reorganization Merger, principal and interest was convertible upon lender's notice into Preferred units of CTx at the offered unit prices at the time of conversion. \$353,665 was converted to 246,096 Preferred Units of CTx at the current unit price in accordance with the terms of the note payable agreement in 2020.

Interest expense for these notes payable was \$33,407 and \$54,605 for the years ended December 31, 2021 and 2020, respectively. Note payable balances were paid in full in December 2021 with proceeds from the Company's IPO.

(7) Members' Capital

Prior to the Reorganization Merger, the Company had multiple classes of Members' capital, comprised of Founders Units, Class B, D, E, F and G Preferred Units, and Class C Profits Interests. Class B, E, F and G Preferred Units had similar rights specifically related to cash distributions as a return of invested capital. Class D Preferred Units had all the rights of Founders and the other Classes of Preferred Units plus some additional rights noted below. All classes of Members' capital had voting rights. The Company maintained capital accounts for each Member. 3,243,201 Units of Class F and Class G were issued during the year ended December 31, 2021, prior to the Reorganization Merger.

Class F Preferred Units

The CTx Board authorized 6,984,985 Class F Preferred Units in two tranches; all authorized Class F Units were issued prior to the Reorganization Merger. The Company raised a total of \$11.3 million from issuance of Class F Units. The newly created Class F Units as authorized by the CTx Board and as reflected in the 3rd Amended and Restated Operating Agreement to reflect the creation of the Class F Units became effective on December 14, 2018.

Class G Preferred Units

The CTx Board authorized 12,000,000 Class G Preferred Units; 2,998,184 were issued prior to the Reorganization Merger. The Company raised a total of \$6.7 million from issuance of Class G Units. The newly created Class G Units as authorized by the CTx Board became effective on February 9, 2021.

Distributions, if any, from the Company were to be made first to the holders of Class B, D, E, F and G Preferred Units, pro rata in proportion to each such Member's unreturned capital contributions. Distributions were then to be made to all Members including Founders Units, pro rata in proportion to the number of units held by each Member, with consideration given to the applicable distribution thresholds for Class C Profits Interests at which each was issued and as disclosed in each Profits Interest Unit agreement, as further described in Note 8.

Costs associated with issuance of the Units is immaterial. Pursuant to the terms of the Reorganization Merger, all Units were converted into shares of common stock of Cingulate, as further described in Note 1.

(8) Profits Interest Plan

During 2017, the CTx Board established and adopted the Cingulate Therapeutics LLC Equity Incentive Plan (the "Plan") to provide for issuance of Class C PIU's to employees, CTx Members, Board members and service providers of the Company, as defined in the Plan, eligible to receive PIU's as an incentive under the Plan. PIU's were granted at the discretion of the Board of Managers of the Company and in some cases at the discretion of the Chief Executive Officer of the Company based upon Board authorization. The PIU's were issued at a Distribution Threshold equal to the pre-money fair market valuation of the Company at the date of issuance. The Distribution Threshold was the amount by which a cash distribution, made pro rata to all Members, if any, must have been exceeded in order for a particular PIU holder to participate in the allocated distribution beyond that threshold. Based on the terms of the award, the Distribution Threshold was treated as a performance condition for purposes of financial statement recognition. The PIU's vesting period with respect to the service condition was defined in the PIU award agreement and ranged from 30 days to three years with an average vesting period for all PIU's granted of 107 days. As defined in the Company's Operating Agreement, all PIU's issued under the Plan entitled the holder to participate pro rata in the profits, if any, of the Company over the stated Distribution Threshold, assuming a cash distribution was generally made to all Members, subject to any preference or priorities of the other classes of Units. The Class C PIU's also held voting rights on a one-for-one basis.

Immediately prior to the Reorganization Merger and as of December 31, 2020, the Company had granted and issued 8,500,000 and 8,142,461 PIU's, net of forfeitures, respectively. The Company accounted for these awards under FASB ASC Topic 718, *Compensation – Stock Compensation*, as equity classified awards. No compensation expense was recorded prior to the Reorganization Merger related to the PIU's as the future achievement of the thresholds and targets (the performance condition) to achieve payout was not deemed probable. This assessment was made based on the Company's history of operating losses and continued challenges in raising necessary equity capital to fund operations. In connection with the Reorganization Merger, as further described in Note 1, 8.5 million PIU's were exchanged for 1,158,008 shares of Cingulate common stock. The exchange of PIU's for common stock created a modification of the terms, character and rights of the PIU's and achievement of performance was considered probable. This resulted in the Company recognizing a noncash modification charge equal to \$12.7 million, which charge was calculated based on the Company's assessment of the fair value of the shares of Cingulate common stock on the date of the modification. \$8.2 million of this charge was recorded to general and administrative expense and \$4.5 million was recorded to research and development expense.

The following summarizes the activity of the Company's Plan:

	Profits Interest Units	Distribution Thresholds (stated in millions)
Oustanding at January 1, 2020	6,616,781	\$25-\$120
Issued	1,525,680	\$80-\$120
Forfeited	-	
Oustanding at December 31, 2020	8,142,461	
Issued	357,539	
Forfeited	-	
Converted to common shares upon Reorganization Merger	(8,500,000)	
Oustanding at December 31, 2021	-	

Prior to the Reorganization Merger, the Company had issued all units available under the Plan and all units had vested based upon the vesting period as outlined in the PIU agreement.

PIUs issued and outstanding prior to the Reorganization Merger, which was also the modification date, at the various distribution thresholds were as follows:

Year Granted	Distribution Threshold \$ (in millions):							Total
	\$25	\$40	\$75	\$80	\$90	\$120	\$160	
2017	4,753,000	125,200	-	-	-	-	-	4,878,200
2018	-	661,525	217,725	22,883	-	-	-	902,133
2019	-	-	-	-	377,524	458,924	-	836,448
2020	-	-	-	1,476,126	-	49,554	-	1,525,680
2021	-	-	-	-	-	-	357,539	357,539
Total	<u>4,753,000</u>	<u>786,725</u>	<u>217,725</u>	<u>1,499,009</u>	<u>377,524</u>	<u>508,478</u>	<u>357,539</u>	<u>8,500,000</u>

(9) Stockholders' Equity

The Company has authorized 240,000,000 shares of \$0.0001 par value common stock and 10,000,000 shares of \$0.0001 par value preferred stock at December 31, 2021 of which 11,309,412 shares of common stock were issued and outstanding. The Company has not issued any shares of preferred stock.

7,142,746 shares of common stock issued and outstanding at December 31, 2021 were issued in connection with the Reorganization Merger to convert Units of CTx outstanding immediately prior to the Reorganization Merger and reflects the stock dividend and reverse stock splits described below.

4,166,666 shares of common stock were issued at a price to the public of \$6.00 per share in connection with the Company's IPO, which was completed in December 2021. The Company received net proceeds of approximately \$20.4 million, after deducting underwriting discounts and commissions and other offering expenses.

The holders of common stock are entitled to one vote for each share of common stock. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Company, after the payment or provision for payment of all debts and liabilities of the Company, the holders of common stock shall be entitled to share in the remaining assets of the Company available for distribution, if any. Holders of the shares of common stock are entitled to dividends when, as and if declared by the Board of Directors.

Stock Dividend

On September 30, 2021, the Company effected a stock dividend of 0.029 shares of common stock for each share of common stock outstanding (the "Stock Dividend"), or an aggregate of 448,045 shares of common stock. No fractional shares of common stock were issued in connection with the Stock Dividend, and all such fractional interests were rounded down to the nearest whole number.

No other dividends had been declared as of December 31, 2021.

Reverse Stock Splits

On October 12, 2021, Cingulate effected a reverse stock split of its issued and outstanding shares of common stock at a ratio of 0.699-for-1, and on November 29, 2021, Cingulate effected a second reverse stock split of its issued and outstanding shares of common stock at a ratio of 0.64259-for-1 (the "Reverse Stock Splits"). No fractional shares of common stock were issued in connection with either of the Reverse Stock Splits, and all such fractional interests were rounded down to the nearest whole number. All share data, per share data and related information for all periods presented in the accompanying consolidated financial statements have been retrospectively adjusted to reflect the effect of the Reverse Stock Splits.

(10) Stock-Based Compensation

In September 2021, the Company's board of directors and stockholders adopted the 2021 Equity Incentive Plan (the "2021 Plan"), which provides for the grant of incentive stock options and non-qualified stock options to purchase shares of the Company's common stock, stock appreciation rights, restricted stock units, restricted or unrestricted shares of common stock, performance shares, performance units, incentive bonus awards, other stock-based awards and other cash-based awards. No awards may be made under the 2021 Plan on or after September 24, 2031, but the 2021 Plan will continue thereafter while previously granted awards remain outstanding.

The initial number of shares of common stock available for issuance in connection with options and other awards granted under the 2021 Plan was 1,086,160. The number of shares of common stock available for issuance under the 2021 Plan will automatically increase on January 1st of each year commencing with January 1, 2022 and on each January 1 thereafter until the expiration date, in an amount equal to 5% percent of the total number of shares of our common stock outstanding on December 31st of the preceding calendar year, on a fully diluted basis, unless the board of directors takes action prior thereto to provide that there will not be an increase in the share reserve for such year or that the increase in the share reserve for such year will be of a lesser number of shares of common stock than would otherwise occur. The shares of common stock underlying any awards that are forfeited, cancelled, held back upon exercise or settlement of an award to satisfy the exercise price or tax withholding, repurchased or are otherwise terminated by the Company under the 2021 Plan will be added back to the shares of common stock available for issuance under the 2021 Plan.

The Company recorded stock-based compensation expense of \$43,835 during the year ended December 31, 2021, relating to options issued in connection with the Company's IPO. As of December 31, 2021, there was \$2,637,895 of unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the 2021 Plan, which is expected to be recognized over 4 years.

A summary of option activity under the Plan during the year ended December 31, 2021 was as follows:

	<u>Shares</u>	<u>Weighted-Average Exercise Price</u>	<u>Weighted-Average Remaining Contractual Term</u>	<u>Aggregate Intrinsic Value</u>
Outstanding at December 31, 2020	—			
Grants	523,285	\$ 6.00	6.25 years	-
Exercised	—			
Forfeitures or expirations	—			
Outstanding at December 31, 2021	<u>523,285</u>			
Vested and expected to vest at December 31, 2021	<u>-</u>			
Exercisable at December 31, 2021	<u>-</u>			

The Company's stock options issued in 2021 qualify for equity accounting treatment under ASC 718 and are measured at fair value as of their grant date accordingly. The fair value of the options were estimated using a Black-Scholes model. The assumptions that the Company used to estimate the grant-date fair value of stock options granted to employees and directors were as follows:

	<u>December 31, 2021</u>
Risk-free interest rate	0.012%
Expected term (in years)	6.25
Expected volatility	1.134
Expected dividend yield	0%

Risk-Free Interest Rate: The Company based the risk-free interest rate over the expected term of the options based on the constant maturity of U.S. Treasury securities with similar maturities as of the date of grant.

Expected Term: The expected term represents the period that the options granted are expected to be outstanding and is determined using the simplified method (based on the mid-point between the vesting dates and the end of the contractual term.)

Expected Volatility: The Company uses an average historical stock price volatility of comparable public companies within the biotechnology and pharmaceutical industry that were deemed to be representative of future stock price trends as the Company does not have sufficient trading history for its common stock. The Company will continue to apply this process until a sufficient amount of historical information regarding volatility of its own stock price becomes available.

Expected Dividend Yield: The Company has not paid and does not anticipate paying any dividends in the near future. Therefore, the expected dividend yield was zero.

The grant-date fair value of options granted during the year ended December 31, 2021 was \$5.125.

The aggregate intrinsic value of stock options is calculated as the difference between the exercise price of the stock options and the fair value of the Company's common stock. Because there were no stock options with exercise prices lower than the fair value of the Company's common stock, the aggregate intrinsic value is zero.

(11) Common Stock Purchase Warrants

For each of the 4,166,666 shares of common stock issued in connection with the Company's IPO, one common stock purchase warrant was also issued and included in the unit price of \$6.00. These warrants were immediately separable and tradeable. Although the underwriters did not exercise their fifteen percent over-allotment option to purchase additional shares of common stock, they did purchase 624,999 additional common stock purchase warrants for \$.001 per warrant less underwriting discounts and commissions. These 4,791,665 common stock purchase warrants have an exercise price of \$6.00 per share and provide for a cashless exercise feature if there is no effective registration statement or current prospectus for the issuance of common stock upon exercise of the warrants. These warrants are exercisable from December 10, 2021 through December 10, 2026. Upon the termination date, these warrants will be automatically exercised via a cashless exercise.

In addition to the common stock purchase warrants noted above, the Company issued 208,333 common stock purchase warrants to the underwriters for the Company's IPO pursuant to the underwriting agreement. These warrants have an exercise price of \$7.50 per share and provide for a cashless exercise feature. These warrants are exercisable from June 7, 2022 through December 10, 2026.

The warrants were valued using a Black-Scholes model with a risk-free rate of .0082%, a term of 5.0 years, and a volatility of 1.24. The estimated volatility of the Company's common stock at the date of measurement is based on an average historical stock price volatility of comparable public companies within the biotechnology and pharmaceutical industry that were deemed to be representative of future stock price trends as the Company does not have sufficient trading history for its common stock. The risk-free rate is based on the expected term of the warrants based on the constant maturity of U.S. Treasury securities with similar maturities as of the date of grant. The expected term has been estimated using the contractual term of the warrants.

The following table summarizes the Company's outstanding warrants as of December 31, 2021:

	Number of Warrants	Exercise Price	Grant Date Fair Value per Warrant	Grant Date Fair Value Total
Balance- December 31, 2020				
Underwritten public offering	4,791,665	\$ 6.00	\$ 4.77	\$ 22,856,242
Issuance of underwriter warrants	208,333	\$ 7.50	\$ 4.64	966,665
Balance- December 31, 2021	<u>4,999,998</u>			<u>\$ 23,822,907</u>

The Company has accounted for these warrants as equity-classified instruments under ASU 2020-06, *Accounting for Convertible Instruments and Contracts in an Entity's Own Equity*, as they are indexed to the Company's common stock, and they meet all other conditions as defined in ASU 2020-06 for equity classification. The gross proceeds of the IPO transaction was allocated to the common stock and common stock purchase warrants using the relative fair value method shown as follows. Fair value of the warrants was recorded to Additional Paid-in- Capital on the Company's balance sheet.

	Fair Value	Percent of Total Fair Value	Amount Allocated
Common Stock	\$ 25,000,000	51.2%	\$ 12,800,000
Common Stock Purchase Warrants	23,822,907	48.8%	12,200,000
Total	<u>\$ 48,822,907</u>	<u>100%</u>	<u>\$ 25,000,000</u>

(12) Income Taxes

Cingulate Inc. is taxed as a C corporation under the Internal Revenue Code. Cingulate Inc. records deferred income taxes to reflect the impact of temporary differences between the recorded amounts of assets and liabilities for financial reporting purposes and such amounts as measured by tax laws and regulations. As of December 31, 2021, CTx is a wholly-owned disregarded entity of Cingulate Inc., and all of the activity for CTx, along with its wholly-owned subsidiary Cingulate Works Inc., is included in the calculation of the current and deferred tax assets and liabilities for Cingulate Inc. No deferred income tax benefit or expense was recorded as of December 31, 2021, for federal or state income taxes.

Evaluating the need for, and amount of, a valuation allowance for deferred tax assets often requires significant judgment and extensive analysis of all available evidence on a jurisdiction-by-jurisdiction basis. Such judgments require the Company to interpret existing tax law and other published guidance as applied to its circumstances. As part of this assessment, the Company considers both positive and negative evidence about its profitability and tax situation. A valuation allowance is provided if, based on available evidence, it is more likely than not that all or some portion of a deferred tax asset will not be realized. The Company determined that it was more likely than not that it would not realize its deferred tax assets, based on historical levels of income and future forecasts of taxable income, among other items. The Company recorded a valuation allowance of its net deferred tax assets totaling \$847,269 at December 31, 2021, which was recorded as a component of income tax expense on the accompanying consolidated statements of operations and other comprehensive loss.

The Company files income tax returns in the U.S. federal and various state jurisdictions. The Companies are not subject to U.S. federal and state income tax examinations by tax authorities for years before 2018.

The Company follows the provisions of FASB ASC 740, *Income Taxes*, to evaluate uncertain tax positions. This topic prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Company has not identified any material uncertain tax positions requiring recognition in the consolidated financial statements as of December 31, 2021.

	December 31, 2021
Deferred income tax assets:	
Current:	
Accrual to cash	\$ 4,050
Non-current:	
Patents	90,480
Net operating losses	1,201,974
Other	61,441
Gross deferred income tax assets	1,357,945
Less: valuation allowance	(847,269)
Net deferred income tax asset	510,676
Deferred income tax liabilities:	
Current:	
Accrual to cash	(105,075)
Non-current	
Property and equipment	(405,601)
Gross deferred income tax liabilities	(510,676)
Net deferred tax asset (liability)	\$ -

(13) Leases

In late December 2017, the Company entered into a 36-month noncancelable lease agreement for office space with rent commencing February 1, 2018. The base rent for this lease ranged from \$9,479 to \$9,625 per month. On June 4, 2019, this lease was superseded as a new lease for this office space was executed to expand the square footage leased by the Company. The term of the new lease is for a period of five years commencing on the date of receipt of a Certificate of Occupancy for the expanded space, which occurred on May 1, 2020. Under this new expanded lease, total rent ranges from \$30,453 to \$33,145 per month. The new lease provided for a lease incentive by the lessor of tenant improvements totaling \$201,600.

The Company leases office space for its New Jersey based employees from a related party, as further described in Note 16. The base rent for this lease was \$3,000 per month in 2020 and 2019 and it was entered into in January 2018, for a three-year lease agreement which ended as of December 31, 2020. On January 1, 2021, this lease was renewed for an additional three years with a base rent of \$3,000 per month.

In 2018, the Company entered into an 18-month operating lease for manufacturing equipment. Interim rent was incurred during installation of the equipment with the lease commencing in June 2018. Monthly lease payments for this leased equipment were \$61,786. In December 2019, this lease was extended for a period of twenty-four months with a monthly lease payment of \$37,072. At this date, this lease was modified for accounting purposes and its classification was assessed as a financing type lease as management determined the lessor to have no alternative future use of the leased asset. The ROU asset associated with the leased machinery was amortized over the lease term. In December 2021, the end of the lease term, the Company entered into a purchase agreement with the lessor to purchase the manufacturing equipment.

In April 2020, the Company entered into a 60-month lease agreement for office furniture under a lease classified as a financing lease as title of the furniture transfers to the Company at the end of the lease term. Monthly lease payments are \$1,491. The leased furniture is amortized on a straight-line basis over 7 years. The imputed interest rate relating to the lease obligation is 6.12% and the maturity date is March 2025.

The components of lease cost for the years ended December 31, 2021 and 2020 were as follows:

	<u>2021</u>	<u>2020</u>
Operating lease cost	\$ 338,787	\$ 338,787
Finance lease cost:		
Amortization of right-of-use assets	409,927	408,180
Interest on lease liabilities	26,504	72,374
Total finance lease cost	<u>436,431</u>	<u>480,554</u>
 Total lease cost	 <u>\$ 775,218</u>	 <u>\$ 819,341</u>

Amounts reported in the consolidated balance sheets as of December 31, 2021 and 2020 were as follows:

	<u>2021</u>	<u>2020</u>
Operating Leases:		
Operating lease right-of-use assets	\$ 858,600	\$ 958,724
Other current liabilities	295,595	234,168
Operating lease liabilities	<u>828,503</u>	<u>1,057,441</u>
Total operating lease liabilities	<u>1,124,098</u>	<u>1,291,609</u>
Finance leases:		
Property and equipment	76,928	874,803
Accumulated amortization	<u>(29,602)</u>	<u>(407,180)</u>
Property and equipment, net	<u>47,326</u>	<u>467,623</u>
Current installments of obligations under finance leases	15,096	436,259
Long-term portion of obligations under finance leases	<u>37,534</u>	<u>52,630</u>
Total finance lease liabilities	<u>\$ 52,630</u>	<u>\$ 488,889</u>

Other information relating to leases as of December 31, 2021 and 2020 was as follows:

Supplemental cash flow information:	<u>2021</u>	<u>2020</u>
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flow from operating leases	\$ 433,172	\$ 299,953
Operating cash flow from finance leases	26,504	72,374
Financing cash flow from finance leases	436,259	385,917
ROU assets obtained in exchange for lease obligations:		
Operating leases	-	-
Finance leases	-	76,928
Reductions to ROU assets resulting from reductions to lease obligations:		
Operating leases	196,245	176,324
Finance leases	409,927	407,180
Weighted average remaining lease term:		
Operating leases	39 months	52 months
Finance leases	39 months	17 months
Weighted average discount rate:		
Operating leases	11.57%	11.76%
Finance leases	6.12%	10.85%

Maturities of lease liabilities under noncancellable leases as of December 31, 2021 are as follows:

	Operating leases	Finance leases
2022	406,400	17,900
2023	414,800	17,900
2024	393,005	17,900
2025	132,580	4,473
Thereafter	-	-
Total undiscounted lease payments	1,346,785	58,173
Less imputed interest	(222,687)	(5,543)
Total lease liabilities	<u>\$ 1,124,098</u>	<u>\$ 52,630</u>

(14) Net Loss Per Share

The following table sets forth the computation of the basic and diluted net loss per share for the year ended December 31, 2021:

	2021
Numerator:	
Net loss	\$ (20,709,991)
Denominator:	
Weighted average common shares outstanding	7,413,579
Net loss per share, basic and diluted	<u>\$ (2.79)</u>

Potentially dilutive securities that were not included in the diluted per share calculations because they would be anti-dilutive were as follows:

	2021
Stock options issued under the 2021 Equity Incentive Plan	523,285
Common stock purchase warrants outstanding	4,999,998
Total	<u>5,523,283</u>

(15) License Agreement

CTx has a licensing agreement with a company related to the patents and licensed know-how for use in the development of CTx-1301, CTx-1302, and CTx-2103. CTx will pay the following upon the occurrence of the following milestone events:

- \$250,000 Milestone payment upon dosing of first patient in a Phase 3 Clinical Trial for each product in the field, payable on a per product basis.
- \$250,000 Milestone payment upon licensee filing of new drug application for each product in the field, payable on a per product basis.
- \$250,000 Milestone payment for CTx-1301 and CTx-1302 and \$500,000 Milestone payment for CTx-2103 upon receipt of first marketing approval from the FDA, payable on a per product basis.
- \$250,000 Milestone payment for CTx-2103 upon receipt of first marketing approval from the EMA (European Medicines Agency)

The Company has accrued the \$250,000 milestone for CTx-1301 related to dosing of first patient in a Phase 3 Clinical Trial as management has deemed this milestone to be probable. The Company has not recorded any expense relating to the other milestones for either product as it has not deemed them probable of occurring as of December 31, 2021.

(16) Related Party Transactions

The general counsel of the Company is a partner with a law firm providing office facilities space that is leased by the Company. Rental expense incurred by the Company to the law firm was \$36,000 in 2021 and 2020. As of December 31, 2021 and 2020, the Company owed \$0 and \$27,000, respectively on this lease.

A member of the Company's Board of Directors, is a Senior Managing Director at Laidlaw & Company (UK) Ltd. Laidlaw & Company (UK) Ltd. acted as co-lead book-running underwriter for the Company's IPO. The discounts and commissions paid to Laidlaw & Company (UK) Ltd. in connection with the IPO were approximately \$500,000 in 2021.

The Company had three loans outstanding with related parties as of December 31, 2020, all three of which were Members of CTx and one was also on the Board of Managers of CTx. (See Note 6) These loans were paid in full in 2021.

(17) Subsequent Events

Management evaluated events that occurred subsequent to December 31, 2021 through March 28, 2022, which is the date the financial statements were issued.

The First State

I, JEFFREY W. BULLOCK, SECRETARY OF STATE OF THE STATE OF DELAWARE, DO HEREBY CERTIFY THE ATTACHED IS A TRUE AND CORRECT COPY OF THE RESTATED CERTIFICATE OF "CINGULATE INC.", FILED IN THIS OFFICE ON THE EIGHTH DAY OF DECEMBER, A.D. 2021, AT 9:40 O`CLOCK A.M.

5909041 8100
SR# 20214016276

You may verify this certificate online at corp.delaware.gov/authver.shtml

A handwritten signature in black ink, appearing to read "JBULLOCK", is written over a horizontal line. Below the line, the text "Jeffrey W. Bullock, Secretary of State" is printed.

Authentication: 204904718
Date: 12-08-21

AMENDED AND RESTATED
CERTIFICATE OF INCORPORATION OF
CINGULATE INC.

Cingulate Inc., a corporation organized and existing under the General Corporation Law of the State of Delaware (the "DGCL"), hereby certifies as follows:

1. The name of this corporation is Cingulate Inc. The date of the filing of its original certificate of incorporation with the Secretary of State of the State of Delaware was May 10, 2021.

2. This Amended and Restated Certificate of Incorporation, which restates, integrates and further amends the certificate of incorporation of this corporation as heretofore amended and restated, has been duly adopted by the corporation in accordance with Sections 242 and 245 of the DGCL and has been adopted by the requisite vote of the stockholders of the corporation, acting by written consent in lieu of a meeting in accordance with Section 228 of the DGCL.

3. The certificate of incorporation of this corporation is hereby amended and restated in its entirety to read as follows:

ARTICLE I

The name of the corporation is "Cingulate Inc." (hereinafter called the "Corporation").

ARTICLE II

The address of the Corporation's registered office in the State of Delaware is Corporation Service Company, 251 Little Falls Drive, city of Wilmington, county of New Castle, Delaware 19808. The name of its registered agent at such address is Corporation Service Company.

ARTICLE III

The purpose of the Corporation is to engage in any lawful act or activity for which corporations may be organized under the General Corporation Law of the State of Delaware or any applicable successor act thereto, as the same may be amended from time to time (the "DGCL").

ARTICLE IV

(A) Classes of Stock. The total number of shares of all classes of capital stock that the Corporation is authorized to issue is two hundred fifty million (250,000,000) shares which shall be divided into two classes of stock to be designated "Common Stock" and "Preferred Stock". The total number of shares of Common Stock that the Corporation is authorized to issue is two hundred forty million (240,000,000) shares, par value \$0.0001 per share. The total number of shares of Preferred Stock that the Corporation is authorized to issue is ten million (10,000,000)

shares, par value \$0.0001 per share. Subject to the rights of the holders of any series of Preferred Stock, the number of authorized shares of any of the Common Stock or Preferred Stock may be increased or decreased (but not below the number of shares thereof then outstanding) by the affirmative vote of the holders of a majority in voting power of the stock of the Corporation entitled to vote thereon irrespective of the provisions of Section 242(b)(2) of the DGCL, and no vote of the holders of any of the Common Stock or Preferred Stock voting separately as a class shall be required therefor.

(B) Common Stock. The powers, preferences and relative participating, optional or other special rights, and the qualifications, limitations and restrictions of the Common Stock are as follows:

1. Ranking. The voting, dividend and liquidation rights of the holders of the Common Stock are subject to and qualified by the rights of the holders of the Preferred Stock of any series as may be designated by the Board of Directors of the Corporation (the "Board") upon any issuance of the Preferred Stock of any series.

2. Voting. Except as otherwise provided by law or by the resolution or resolutions providing for the issue of any series of Preferred Stock, the holders of outstanding shares of Common Stock shall have the exclusive right to vote for the election and removal of directors and for all other purposes. Notwithstanding any other provision of this Amended and Restated Certificate of Incorporation (as the same may be amended and/or restated from time to time, including by the terms of any Preferred Stock Designation (as defined below), this "Certificate of Incorporation") to the contrary, except as required by law the holders of Common Stock shall not be entitled to vote on any amendment to this Certificate of Incorporation (including any Preferred Stock Designation) that relates solely to the terms of one or more outstanding series of Preferred Stock if the holders of such affected series are entitled, either separately or together as a class with the holders of one or more other such series, to vote thereon pursuant to this Certificate of Incorporation (including any Preferred Stock Designation) or the DGCL.

3. Dividends. Subject to the rights of the holders of Preferred Stock, holders of shares of Common Stock shall be entitled to receive such dividends and distributions and other distributions in cash, stock or property of the Corporation when, as and if declared thereon by the Board from time to time out of assets or funds of the Corporation legally available therefor.

4. Liquidation. Subject to the rights of the holders of Preferred Stock, shares of Common Stock shall be entitled to receive the assets and funds of the Corporation available for distribution in the event of any liquidation, dissolution or winding up of the affairs of the Corporation, whether voluntary or involuntary. A liquidation, dissolution or winding up of the affairs of the Corporation, as such terms are used in this Section B(4), shall not be deemed to be occasioned by or to include any consolidation or merger of the Corporation with or into any other person or a sale, lease, exchange or conveyance of all or a part of its assets.

(C) Preferred Stock.

Shares of Preferred Stock may be issued from time to time in one or more series. The Board is hereby authorized to provide by resolution or resolutions from time to time for the issuance, out of the unissued shares of Preferred Stock, of one or more series of Preferred Stock, without stockholder approval, by filing a certificate pursuant to the applicable law of the State of Delaware (the "Preferred Stock Designation"), setting forth such resolution and, with respect to each such series, establishing the number of shares to be included in such series, and fixing the voting powers, full or limited, or no voting power of the shares of such series, and the designation, preferences and relative, participating, optional or other special rights, if any, of the shares of each such series and any qualifications, limitations or restrictions thereof. The powers, designation, preferences and relative, participating, optional and other special rights of each series of Preferred Stock, and the qualifications, limitations and restrictions thereof, if any, may differ from those of any and all other series at any time outstanding. The authority of the Board with respect to each series of Preferred Stock shall include, but not be limited to, the determination of the following:

- (a) the designation of the series, which may be by distinguishing number, letter or title;
- (b) the number of shares of the series, which number the Board may thereafter (except where otherwise provided in the Preferred Stock Designation) increase or decrease (but not below the number of shares thereof then outstanding);
- (c) the amounts or rates at which dividends will be payable on, and the preferences, if any, of shares of the series in respect of dividends, and whether such dividends, if any, shall be cumulative or noncumulative;
- (d) the dates on which dividends, if any, shall be payable;
- (e) the redemption rights and price or prices, if any, for shares of the series;
- (f) the terms and amount of any sinking fund, if any, provided for the purchase or redemption of shares of the series;
- (g) the amounts payable on, and the preferences, if any, of shares of the series in the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Corporation;
- (h) whether the shares of the series shall be convertible into or exchangeable for, shares of any other class or series, or any other security, of the Corporation or any other corporation, and, if so, the specification of such other class or series or such other security, the conversion or exchange price or prices or rate or rates, any adjustments thereof, the date or dates at which such shares shall be convertible or exchangeable and all other terms and conditions upon which such conversion or exchange may be made;

(i) restrictions on the issuance of shares of the same series or any other class or series;

(j) the voting rights, if any, of the holders of shares of the series generally or upon specified events; and

(k) any other powers, preferences and relative, participating, optional or other special rights of each series of Preferred Stock, and any qualifications, limitations or restrictions thereof, all as may be determined from time to time by the Board and stated in the resolution or resolutions providing for the issuance of such Preferred Stock.

Without limiting the generality of the foregoing, the resolutions providing for the issuance of any series of Preferred Stock may provide that such series shall be superior or rank equally or be junior to any other series of Preferred Stock to the extent permitted by law.

ARTICLE V

This Article V is inserted for the management of the business and for the conduct of the affairs of the Corporation.

(A) General Powers. The business and affairs of the Corporation shall be managed by or under the direction of the Board, except as otherwise provided by this Certificate of Incorporation or the DGCL.

(B) Number of Directors; Election of Directors. Subject to the rights of holders of any series of Preferred Stock to elect directors, the number of the directors of the Corporation shall be fixed from time to time solely by resolution of the Board. Subject to the rights of holders of any series of Preferred Stock with respect to the election of directors, each director of the Corporation shall hold office until the expiration of the term for which he or she is elected and until his or her successor has been duly elected and qualified or until his or her earlier resignation, death or removal.

(C) Classes of Directors. Subject to the rights of holders of any series of Preferred Stock to elect directors, the Board shall be divided into three classes, designated Class I, Class II and Class III. Each class shall consist, as nearly as may be practicable, of one third of the total number of directors constituting the entire Board. The Board is authorized to assign members of the Board already in office to Class I, Class II or Class III at the time such classification becomes effective.

(D) Terms of Office. Subject to the rights of holders of any series of Preferred Stock to elect directors, each director shall serve for a term ending on the date of the third annual meeting of stockholders following the annual meeting of stockholders at which such director was elected; provided that each director initially assigned to Class I shall serve for a term expiring at the Corporation's first annual meeting of stockholders held following the time at which the initial classification of the Board becomes effective; each director initially assigned to Class II shall

serve for a term expiring at the Corporation's second annual meeting of stockholders held following the time at which the initial classification of the Board becomes effective; and each director initially assigned to Class III shall serve for a term expiring at the Corporation's third annual meeting of stockholders held following the time at which the initial classification of the Board becomes effective; provided further, that the term of each director shall continue until the election and qualification of his or her successor and be subject to his or her earlier death, disqualification, resignation or removal.

(E) Vacancies. Subject to the rights of holders of any series of Preferred Stock, any newly created directorship that results from an increase in the number of directors or any vacancy on the Board that results from the death, disability, resignation, disqualification or removal of any director or from any other cause shall be filled solely by the affirmative vote of a majority of the total number of directors then in office, even if less than a quorum, or by a sole remaining director and shall not be filled by the stockholders. Any director elected in accordance with the preceding sentence shall, in the case of a newly created directorship, hold office for the full term of the class in which the newly created directorship was created or, in the case of a vacancy, hold office for the remaining term of his or her predecessor and in each case until his or her successor shall be elected and qualified, subject to his or her earlier death, disqualification, resignation or removal.

(F) Removal. Subject to the rights of the holders of any series of Preferred Stock, any director or the entire Board may be removed from office at any time, but only for cause.

(G) Committees. Pursuant to the Amended and Restated Bylaws of the Corporation (as the same may be amended and/or restated from time to time, the "Bylaws"), the Board may establish one or more committees to which may be delegated any or all of the powers and duties of the Board to the fullest extent permitted by law.

(H) Stockholder Nominations and Introduction of Business. Advance notice of stockholder nominations for election of directors and other business to be brought by stockholders before a meeting of stockholders shall be given in the manner provided by the Bylaws.

(I) Preferred Stock Directors. During any period when the holders of any series of Preferred Stock have the right to elect additional directors as provided for or fixed pursuant to the provisions of Article IV hereof or any Preferred Stock Designation, then upon commencement and for the duration of the period during which such right continues: (i) the then otherwise total number of authorized directors of the Corporation shall automatically be increased by such specified number of directors, and the holders of such Preferred Stock shall be entitled to elect the additional directors so provided for or fixed pursuant to said provisions, and (ii) each such additional director shall serve until such director's successor shall have been duly elected and qualified, or until such director's right to hold such office terminates pursuant to said provisions, whichever occurs earlier, subject to his earlier death, disqualification, resignation or removal. Except as otherwise provided for or fixed pursuant to the provisions of Article IV hereof or any Preferred Stock Designation, whenever the holders of any series of Preferred Stock having such right to elect additional directors are divested of such right pursuant to the

provisions of such stock, all such additional directors elected by the holders of such stock, or elected to fill any vacancies resulting from the death, resignation, disqualification or removal of such additional directors, shall cease to qualify to serve as directors and shall automatically cease to be a director, the terms of office of all such directors shall forthwith terminate and the total authorized number of directors of the Corporation shall be reduced accordingly.

ARTICLE VI

Unless and except to the extent that the Bylaws shall so require, the election of directors of the Corporation need not be by written ballot.

ARTICLE VII

To the fullest extent permitted by the DGCL as the same exists or as may hereafter be amended, a director of the Corporation shall not be personally liable to the Corporation or its stockholders for monetary damages for breach of fiduciary duty as a director; provided, however, that nothing contained in this Article VII shall eliminate or limit the liability of a director (i) for any breach of the director's duty of loyalty to the Corporation or its stockholders, (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (iii) pursuant to the provisions of Section 174 of the DGCL, or (iv) for any transaction from which the director derived an improper personal benefit. No repeal or modification of this Article VII shall apply to or have any adverse effect on any right or protection of, or any limitation of the liability of, a director of the Corporation existing at the time of such repeal or modification with respect to acts or omissions occurring prior to such repeal or modification.

ARTICLE VIII

The Corporation may indemnify, and advance expenses to, to the fullest extent permitted by law, any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative by reason of the fact that such person is or was a director, officer, employee or agent of the Corporation, or is or was serving at the request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise.

ARTICLE IX

Subject to the terms of any series of Preferred Stock, any action required or permitted to be taken by the stockholders of the Corporation must be effected at an annual or special meeting of the stockholders and may not be effected by written consent in lieu of a meeting.

ARTICLE X

Special meetings of stockholders for any purpose or purposes may be called at any time by the Board, the Chairman of the Board or the Chief Executive Officer of the Corporation, and may not be called by any other person or persons. Business transacted at any special meeting of

stockholders shall be limited to matters relating to the purpose or purposes stated in the notice of meeting.

ARTICLE XI

The Corporation reserves the right at any time from time to time to amend, alter, change or repeal any provision contained in this Certificate of Incorporation, and any other provisions authorized by the DGCL may be added or inserted, in the manner now or hereafter prescribed by law; and all rights, preferences and privileges of whatsoever nature conferred upon stockholders, directors or any other persons whomsoever by and pursuant to this Certificate of Incorporation in its present form or as hereafter amended are granted subject to the right reserved in this Article XI. Notwithstanding any other provision of this Certificate of Incorporation or any provision of law that might otherwise permit a lesser vote or no vote, but in addition to any affirmative vote of the holders of any series of Preferred Stock required by law, by this Certificate of Incorporation or by any Preferred Stock Designation, the affirmative vote of the holders of at least sixty-six and two-thirds percent (66 2/3%) in voting power of the stock of the Corporation entitled to vote thereon shall be required to amend, alter, change or repeal, or adopt any provision inconsistent with, any of Article V, Article VII, Article VIII, Article IX, Article X, Article XII, Article XIII, and this sentence of this Certificate of Incorporation, or in each case, the definition of any capitalized terms used therein or any successor provision (including, without limitation, any such article or section as renumbered as a result of any amendment, alteration, change, repeal or adoption of any other provision of this Certificate of Incorporation). Any amendment, repeal or modification of any of Article VII, Article VIII and this sentence shall not adversely affect any right or protection of any person existing thereunder with respect to any act or omission occurring prior to such repeal or modification.

ARTICLE XII

In furtherance and not in limitation of the powers conferred upon it by law, the Board is expressly authorized and empowered to adopt, amend and repeal the Bylaws. Notwithstanding any other provision of this Certificate of Incorporation or any provision of law that might otherwise permit a lesser vote, but in addition to any affirmative vote of the holders of any series of Preferred Stock required by law, by this Certificate of Incorporation or by any Preferred Stock Designation, the Bylaws may also be amended, altered or repealed and new Bylaws may be adopted by the stockholders of the Corporation by the affirmative vote of the holders of at least sixty-six and two-thirds percent (66 2/3%) in voting power of the outstanding stock of the Corporation entitled to vote thereon.

ARTICLE XIII

Unless the Corporation consents in writing to the selection of an alternative forum, (A) (i) any derivative action or proceeding brought on behalf of the Corporation, (ii) any action asserting a claim of breach of a fiduciary duty owed by any current or former director, officer, other employee or stockholder of the Corporation to the Corporation or the Corporation's stockholders, (iii) any action asserting a claim arising pursuant to any provision of the DGCL, this Certificate of Incorporation or the Bylaws (as either may be amended or restated) or as to

which the DGCL confers jurisdiction on the Court of Chancery of the State of Delaware or (iv) any action asserting a claim governed by the internal affairs doctrine of the law of the State of Delaware shall, to the fullest extent permitted by law, be exclusively brought in the Court of Chancery of the State of Delaware or, if such court does not have subject matter jurisdiction thereof, the federal district court of the State of Delaware; and (B) the federal district courts of the United States shall be the exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act of 1933, as amended. Notwithstanding the foregoing, this Article XIII shall not apply to claims seeking to enforce any liability or duty created by the Securities Exchange Act of 1934, as amended. To the fullest extent permitted by law, any person or entity purchasing or otherwise acquiring or holding any interest in shares of capital stock of the Corporation shall be deemed to have notice of and consented to the provisions of this Article XIII.

IN WITNESS WHEREOF, this Amended and Restated Certificate of Incorporation has been executed this 8th day of December, 2021.

CINGULATE INC.

By: /s/ Shane J. Schaffer
Name: Shane J. Schaffer
Title: Chief Executive Officer

**AMENDED AND RESTATED BYLAWS
OF
CINGULATE INC.**

ARTICLE I STOCKHOLDERS

1.1 Place of Meetings. All meetings of stockholders shall be held at such place, if any, as may be designated from time to time by the Board of Directors (the "Board") of Cingulate Inc. (the "Corporation"), the Chairman of the Board or the Chief Executive Officer or, if not so designated, at the principal office of the Corporation. The Board may, in its sole discretion, determine that a meeting shall not be held at any place, but may instead be held solely by means of remote communication in accordance with Section 211(a)(2) of the General Corporation Law of the State of Delaware (the "DGCL").

1.2 Annual Meeting. The annual meeting of stockholders for the election of directors to succeed those whose terms expire and for the transaction of such other business as may properly be brought before the meeting shall be held on a date and at a time designated by the Board, the Chairman of the Board or the Chief Executive Officer. The Board may postpone, recess, reschedule or cancel any previously scheduled annual meeting of stockholders.

1.3 Special Meetings. Special meetings of stockholders for any purpose or purposes may be called in the manner set forth in the Certificate of Incorporation. The Board may postpone, recess, reschedule or cancel any previously scheduled special meeting of stockholders. Business transacted at any special meeting of stockholders shall be limited to matters relating to the purpose or purposes stated in the notice of meeting.

1.4 Notice of Meetings. Except as otherwise provided by law, notice of each meeting of stockholders, whether annual or special, shall be given not less than ten (10) nor more than sixty (60) days before the date of the meeting to each stockholder entitled to vote at such meeting as of the record date for determining the stockholders entitled to notice of the meeting. The notices of all meetings shall state the place, if any, date and time of the meeting, the means of remote communications, if any, by which stockholders and proxyholders may be deemed to be present in person and vote at such meeting, and the record date for determining the stockholders entitled to vote at the meeting (if such date is different from the record date for stockholders entitled to notice of the meeting). The notice of a special meeting shall state, in addition, the purpose or purposes for which the meeting is called.

1.5 Voting List. The Corporation shall prepare, at least ten (10) days before every meeting of stockholders, a complete list of the stockholders entitled to vote at the meeting (provided, however, if the record date for determining the stockholders entitled to vote is less than ten (10) days before the date of the meeting, the list shall reflect the stockholders entitled to vote as of the tenth day before the meeting date), arranged in alphabetical order, and showing the address of each stockholder and the number of shares registered in the name of each stockholder. Such list shall be open to the examination of any stockholder, for any purpose germane to the meeting, for a period of at least ten (10) days prior to the meeting: (a) on a reasonably accessible electronic network, provided that the information required to gain access to such list is provided with the notice of the meeting, or (b) during ordinary business hours, at the principal place of business of the Corporation. If the meeting is to be held at a place, then the list shall also be produced and kept at the time and place of the meeting during the whole time thereof, and may be inspected by any stockholder who is present. If the meeting is to be held solely by means of

remote communication, then the list shall also be open to the examination of any stockholder during the whole time of the meeting on a reasonably accessible electronic network, and the information required to access such list shall be provided with the notice of the meeting. Except as otherwise provided by law, the list shall presumptively determine the identity of the stockholders entitled to vote at the meeting and the number of shares held by each of them.

1.6 Quorum. Except as otherwise provided by law, the Certificate of Incorporation or these Bylaws, the holders of one third of the voting power of the shares of the capital stock of the Corporation issued and outstanding and entitled to vote at the meeting, present in person, present by means of remote communication in a manner, if any, authorized by the Board in its sole discretion, or represented by proxy, shall constitute a quorum for the transaction of business; provided, however, that where a separate vote by a class or classes or series of capital stock is required by law or the Certificate of Incorporation, the holders of a majority in voting power of the shares of such class or classes or series of the capital stock of the Corporation issued and outstanding and entitled to vote on such matter, present in person, present by means of remote communication in a manner, if any, authorized by the Board in its sole discretion, or represented by proxy, shall constitute a quorum entitled to take action with respect to the vote on such matter. A quorum, once established at a meeting, shall not be broken by the withdrawal of enough votes to leave less than a quorum.

1.7 Adjournments. Any meeting of stockholders, annual or special, may be adjourned from time to time to any other time and to any other place at which a meeting of stockholders may be held under these Bylaws by the Board, the chairman of the meeting or, if directed to be voted on by the chairman of the meeting, by the stockholders present or represented at the meeting and entitled to vote thereon, although less than a quorum. If the adjournment is for more than thirty (30) days, a notice of the adjourned meeting shall be given to each stockholder of record entitled to vote at the meeting. If after the adjournment a new record date for determination of stockholders entitled to vote is fixed for the adjourned meeting, the Board shall fix as the record date for determining stockholders entitled to notice of such adjourned meeting the same or an earlier date as that fixed for determination of stockholders entitled to vote at the adjourned meeting, and shall give notice of the adjourned meeting to each stockholder of record as of the record date so fixed for notice of such adjourned meeting. At the adjourned meeting, the Corporation may transact any business which might have been transacted at the original meeting.

1.8 Proxies. Each stockholder of record entitled to vote at a meeting of stockholders may vote in person (including by means of remote communications, if any, by which stockholders may be deemed to be present in person and vote at such meeting) or may authorize another person or persons to vote for such stockholder by a proxy executed or transmitted in a manner permitted by applicable law. No such proxy shall be voted upon after three years from the date of its execution, unless the proxy expressly provides for a longer period. A proxy shall be irrevocable if it states that it is irrevocable and if, and only as long as, it is coupled with an interest sufficient in law to support an irrevocable power. A stockholder may revoke any proxy which is not irrevocable by attending the meeting and voting in person or by delivering to the Secretary of the Corporation a revocation of the proxy or a new proxy bearing a later date.

1.9 Action at Meeting. When a quorum is present at any meeting, any matter other than the election of directors to be voted upon by the stockholders at such meeting shall be decided by the vote of the holders of shares of stock having a majority in voting power of the votes cast by the holders of all of the shares of stock present or represented at the meeting and voting affirmatively or negatively on such matter (or if there are two or more classes or series of stock entitled to vote as separate classes, then in the case of each such class or series, the holders of a majority in voting power of the shares of stock of that class or series present or represented at the meeting and voting affirmatively or negatively on such matter), except when a different vote is required by express provision of applicable law, regulation applicable to the Corporation or its securities, the rules or regulations of any stock exchange applicable to the Corporation, the Certificate of Incorporation or these Bylaws, in which case such express provisions shall govern. Voting at meetings of stockholders need not be by written ballot. At all meetings of stockholders for the election of directors at which a quorum is present a plurality of the votes cast shall be sufficient to elect.

1.10 Notice of Stockholder Business and Nominations.

(A) Annual Meetings of Stockholders. (1) Nominations of persons for election to the Board and the proposal of other business to be considered by the stockholders may be made at an annual meeting of stockholders only (a) pursuant to the Corporation's notice of meeting (or any supplement thereto), (b) by or at the direction of the Board or any committee thereof or (c) by any stockholder of the Corporation who was a stockholder of record of the Corporation at the time the notice provided for in this Section 1.10 is delivered by such stockholder to the Secretary of the Corporation, who is entitled to vote at the meeting upon such election of directors or upon such other business, as the case may be, and who complies with the notice procedures set forth in this Section 1.10.

(2) For any nominations or other business to be properly brought before an annual meeting by a stockholder pursuant to clause (c) of paragraph (A)(1) of this Section 1.10, the stockholder must have given timely notice thereof in writing to the Secretary of the Corporation (and must timely provide any updates or supplements to such notice at such times and in such forms provided by this Section 1.10) and any such proposed business (other than the nominations of persons for election to the Board) must constitute a proper matter for stockholder action. To be timely, a stockholder's notice shall be delivered to the Secretary at the principal executive offices of the Corporation not later than the close of business on the ninetieth (90th) day, nor earlier than the close of business on the one hundred twentieth (120th) day, prior to the first anniversary of the preceding year's annual meeting (provided, however, that in the event that the date of the annual meeting is more than thirty (30) days before or more than seventy (70) days after such anniversary date, notice by the stockholder must be so delivered not earlier than the close of business on the one hundred twentieth (120th) day prior to such annual meeting and not later than the close of business on the later of the ninetieth (90th) day prior to such annual meeting or the tenth (10th) day following the day on which public announcement of the date of such meeting is first made by the Corporation). For purposes of the first annual meeting following the initial public offering of the Common Stock of the Corporation, the date of the first anniversary of the preceding year's annual meeting shall be deemed to be June 15, 2021. In no event shall the public announcement of an adjournment, postponement or recess of an annual meeting commence a new time period (or extend any time period) for the giving of a

stockholder's notice as described above. The number of nominees a stockholder may nominate for election at the annual meeting (or in the case of a stockholder giving the notice on behalf of a beneficial owner, the number of nominees a stockholder may nominate for election at the annual meeting on behalf of such beneficial owner) shall not exceed the number of directors to be elected at such annual meeting. To be in proper form for purposes of this Section 1.10, such stockholder's notice shall set forth: (a) as to each person whom the stockholder proposes to nominate for election as a director (i) the name, age, business and residence address, and principal occupation or employment of the nominee, (ii) all other information relating to such nominee that is required to be disclosed in solicitations of proxies for election of directors in an election contest, or is otherwise required, in each case pursuant to and in accordance with Section 14(a) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the rules and regulations promulgated thereunder, (iii) a reasonably detailed description of any compensatory, payment or other financial agreement, arrangement or understanding that such nominee has with any other person or entity other than the Corporation including the amount of any payment or payments received or receivable thereunder, in each case in connection with candidacy or service as a director of the Corporation, (iv) such person's written consent to being named in the Corporation's proxy statement and associated proxy card as a nominee of the stockholder and to serving as a director if elected and (v) all information with respect to such nominee that would be required to be set forth in a stockholder's notice pursuant to this Section 1.10 if such nominee were the stockholder giving notice hereunder; (b) as to any other business that the stockholder proposes to bring before the meeting, (i) a brief description of the business desired to be brought before the meeting, (ii) the text of the proposal or business (including the text of any resolutions proposed for consideration and in the event that such business includes a proposal to amend the Bylaws of the Corporation, the language of the proposed amendment), (iii) the reasons for conducting such business at the meeting, (iv) any direct or indirect material interest in such business of such stockholder and the beneficial owner, if any, on whose behalf the proposal is made and any other person or persons with whom such stockholder or beneficial owner, if any, has any agreement, arrangement or understanding in connection with such proposal and (v) such other information relating to any proposed item of business as the Corporation may reasonably require to determine whether such proposed item of business is a proper matter for stockholder action; and (c) as to the stockholder giving the notice and the beneficial owner, if any, on whose behalf the nomination or proposal is made (i) the name and address of such stockholder, as they appear on the Corporation's books, and of such beneficial owner, (ii) the class or series and number of shares of capital stock of the Corporation which are, directly or indirectly, owned beneficially (within the meaning of Rule 13d-3 under the Exchange Act) or of record by such stockholder and such beneficial owner (provided, that such stockholder and the beneficial owner, if any, on whose behalf the nomination or proposal is made shall in all events be deemed to beneficially own any shares of any class or series and number of shares of capital stock of the Corporation as to which such stockholder or beneficial owner, if any, has a right to acquire beneficial ownership at any time in the future), (iii) a description of any agreement, arrangement or understanding with respect to the nomination or proposal between or among such stockholder and/or such beneficial owner, any of their respective affiliates or associates, and any others acting in concert with any of the foregoing (including their names), including, in the case of a nomination, the nominee, (iv) a description of any agreement, arrangement or understanding (including any derivative or short positions, profit interests, options, warrants, convertible securities, stock appreciation or similar rights, hedging

transactions, and borrowed or loaned shares) that has been entered into as of the date of the stockholder's notice by, or on behalf of, such stockholder and such beneficial owners, whether or not such instrument or right shall be subject to settlement in underlying shares of capital stock of the Corporation, the effect or intent of which is to mitigate loss to, manage risk or benefit of share price changes for, or increase or decrease the voting power of, such stockholder or such beneficial owner, with respect to securities of the Corporation, (v) a representation that the stockholder is a holder of record of stock of the Corporation entitled to vote at such meeting upon such business or nomination, as the case may be, and intends to appear in person or by proxy at the meeting to propose such business or nomination, (vi) a representation as to whether the stockholder or the beneficial owner, if any, intends or is part of a group which intends (a) to deliver a proxy statement and/or form of proxy to holders of at least the percentage of the Corporation's outstanding capital stock required to approve or adopt the proposal or elect the nominee and/or (b) otherwise to solicit proxies or votes from stockholders in support of such proposal or nomination, and (vii) any other information relating to such stockholder and beneficial owner, if any, required to be disclosed in a proxy statement or other filings required to be made in connection with solicitations of proxies for, as applicable, the proposal and/or for the election of directors in an election contest pursuant to and in accordance with Section 14(a) of the Exchange Act and the rules and regulations promulgated thereunder. The foregoing notice requirements of this paragraph (A) of this Section 1.10 shall be deemed satisfied by a stockholder with respect to business other than a nomination if the stockholder has notified the Corporation of his, her or its intention to present a proposal at an annual meeting in compliance with applicable rules and regulations promulgated under the Exchange Act and such stockholder's proposal has been included in a proxy statement that has been prepared by the Corporation to solicit proxies for such annual meeting. The Corporation may require any proposed nominee to furnish such other information as the Corporation may reasonably require to determine the eligibility of such proposed nominee to serve as a director of the Corporation. If requested by the Corporation, the information required by clause (c) of this paragraph (A)(2) shall be supplemented by such stockholder and any such beneficial owner not later than ten (10) days after the record date for the meeting to disclose such information as of the record date. In addition, a stockholder seeking to nominate a director candidate or bring other business before the annual meeting shall promptly provide any other information reasonably requested by the Corporation.

(3) Notwithstanding anything in the second sentence of paragraph (A)(2) of this Section 1.10 to the contrary, in the event that the number of directors to be elected to the Board at the annual meeting is increased effective after the time period for which nominations would otherwise be due under paragraph (A)(2) of this Section 1.10 and there is no public announcement by the Corporation naming the nominees for the additional directorships at least one hundred (100) days prior to the first anniversary of the preceding year's annual meeting, a stockholder's notice required by this Section 1.10 shall also be considered timely, but only with respect to nominees for the additional directorships, if it shall be delivered to the Secretary at the principal executive offices of the Corporation not later than the close of business on the tenth (10th) day following the day on which such public announcement is first made by the Corporation.

(B) Special Meetings of Stockholders. Only such business shall be conducted at a special meeting of stockholders as shall have been brought before the meeting pursuant to

the Corporation's notice of meeting. Nominations of persons for election to the Board may be made at a special meeting of stockholders at which directors are to be elected pursuant to the Corporation's notice of meeting (1) by or at the direction of the Board or any committee thereof or (2) provided that the Board has determined that directors shall be elected at such meeting, by any stockholder of the Corporation who is a stockholder of record at the time the notice provided for in this Section 1.10 is delivered to the Secretary of the Corporation, who is entitled to vote at the meeting and upon such election and who complies with the notice procedures set forth in this Section 1.10. The number of nominees a stockholder may nominate for election at the special meeting (or in the case of a stockholder giving the notice on behalf of a beneficial owner, the number of nominees a stockholder may nominate for election at the special meeting on behalf of such beneficial owner) shall not exceed the number of directors to be elected at such special meeting. In the event the Corporation calls a special meeting of stockholders for the purpose of electing one or more directors to the Board, any such stockholder entitled to vote in such election of directors may nominate a person or persons (as the case may be) for election to such position(s) as specified in the Corporation's notice of meeting, if the stockholder's notice required by paragraph (A)(2) of this Section 1.10 shall be delivered to the Secretary at the principal executive offices of the Corporation not earlier than the close of business on the one hundred twentieth (120th) day prior to such special meeting and not later than the close of business on the later of the ninetieth (90th) day prior to such special meeting or the tenth (10th) day following the day on which the public announcement is first made of the date of the special meeting and of the nominees proposed by the Board to be elected at such meeting. In no event shall the public announcement of an adjournment, postponement or recess of a special meeting commence a new time period (or extend any time period) for the giving of a stockholder's notice as described above.

(C) General. (1) Except as otherwise expressly provided in any applicable rule or regulation promulgated under the Exchange Act, only such persons who are nominated in accordance with the procedures set forth in this Section 1.10 shall be eligible to be elected at an annual or special meeting of stockholders of the Corporation to serve as directors and only such business shall be conducted at a meeting of stockholders as shall have been brought before the meeting in accordance with the procedures set forth in this Section 1.10. Except as otherwise provided by law, the chairman of the meeting shall have the power and duty (a) to determine whether a nomination or any business proposed to be brought before the meeting was made or proposed, as the case may be, in accordance with the procedures set forth in this Section 1.10 (including whether the stockholder or beneficial owner, if any, on whose behalf the nomination or proposal is made, solicited (or is part of a group which solicited) or did not so solicit, as the case may be, proxies or votes in support of such stockholder's nominee or proposal in compliance with such stockholder's representation as required by clause (A)(2)(c)(vi) of this Section 1.10) and (b) if any proposed nomination or business was not made or proposed in compliance with this Section 1.10, to declare that such nomination shall be disregarded or that such proposed business shall not be transacted. Notwithstanding the foregoing provisions of this Section 1.10, unless otherwise required by law, if the stockholder (or a qualified representative of the stockholder) does not appear at the annual or special meeting of stockholders of the Corporation to present a nomination or proposed business, such nomination shall be disregarded and such proposed business shall not be transacted, notwithstanding that proxies in respect of such vote may have been received by the Corporation. For purposes of this Section 1.10, to be considered a qualified representative of the stockholder, a person must be a duly authorized

officer, manager or partner of such stockholder or must be authorized by a writing executed by such stockholder or an electronic transmission delivered by such stockholder to act for such stockholder as proxy at the meeting of stockholders and such person must produce such writing or electronic transmission, or a reliable reproduction of such writing or electronic transmission, at the meeting of stockholders.

(2) For purposes of this Section 1.10, "public announcement" shall include disclosure in a press release reported by the Dow Jones News Service, Associated Press or other national news service or in a document publicly filed by the Corporation with the Securities and Exchange Commission pursuant to Section 13, 14 or 15(d) of the Exchange Act and the rules and regulations promulgated thereunder.

(3) Notwithstanding the foregoing provisions of this Section 1.10, a stockholder shall also comply with all applicable requirements of the Exchange Act and the rules and regulations promulgated thereunder with respect to the matters set forth in this Section 1.10; provided however, that any references in these Bylaws to the Exchange Act or the rules and regulations promulgated thereunder are not intended to and shall not limit any requirements applicable to nominations or proposals as to any other business to be considered pursuant to this Section 1.10 (including paragraphs (A)(1)(c) and (B) hereof), and compliance with paragraphs (A)(1)(c) and (B) of this Section 1.10 shall be the exclusive means for a stockholder to make nominations or submit other business (other than, as provided in the paragraph (A)(2), business other than nominations brought properly under and in compliance with Rule 14a-8 of the Exchange Act, as may be amended from time to time). Nothing in this Section 1.10 shall be deemed to affect any rights (a) of stockholders to request inclusion of proposals or nominations in the Corporation's proxy statement pursuant to applicable rules and regulations promulgated under the Exchange Act or (b) of the holders of any series of Preferred Stock to elect directors pursuant to any applicable provisions of the Certificate of Incorporation.

1.11 Conduct of Meetings; Inspectors of Election.

(A) Meetings of stockholders shall be presided over by the Chairman of the Board, if any, or in the Chairman's absence by the Vice Chairman of the Board, if any, or in the Vice Chairman's absence by the Chief Executive Officer, or in the Chief Executive Officer's absence, by the President, or in the President's absence by a Vice President, or in the absence of all of the foregoing persons by a chairman designated by the Board. The Secretary shall act as secretary of the meeting, but in the Secretary's absence the chairman of the meeting may appoint any person to act as secretary of the meeting.

(B) The Board may adopt by resolution such rules, regulations and procedures for the conduct of any meeting of stockholders of the Corporation as it shall deem appropriate including, without limitation, such guidelines and procedures as it may deem appropriate regarding the participation by means of remote communication of stockholders and proxyholders not physically present at a meeting. Except to the extent inconsistent with such rules, regulations and procedures as adopted by the Board, the chairman of any meeting of stockholders shall have the right and authority to convene and (for any or no reason) to recess and/or adjourn the meeting, to prescribe such rules, regulations and procedures and to do all such acts as, in the judgment of such chairman, are appropriate for the proper conduct of the meeting. Such rules,

regulations or procedures, whether adopted by the Board or prescribed by the chairman of the meeting, may include, without limitation, the following: (i) the establishment of an agenda or order of business for the meeting; (ii) rules and procedures for maintaining order at the meeting and the safety of those present; (iii) limitations on attendance at or participation in the meeting to stockholders of record of the Corporation, their duly authorized and constituted proxies or such other persons as shall be determined; (iv) restrictions on entry to the meeting after the time fixed for the commencement thereof; and (v) limitations on the time allotted to questions or comments by participants. Unless and to the extent determined by the Board or the chairman of the meeting, meetings of stockholders shall not be required to be held in accordance with the rules of parliamentary procedure.

(C) The chairman of the meeting shall announce at the meeting when the polls for each matter to be voted upon at the meeting will be opened and closed. After the polls close, no ballots, proxies or votes or any revocations or changes thereto may be accepted.

(D) The Corporation may, and if required by law, shall, in advance of any meeting of stockholders, appoint one or more inspectors of election to act at the meeting and make a written report thereof. One or more other persons may be designated as alternate inspectors to replace any inspector who fails to act. If no inspector or alternate is able to act at a meeting of stockholders, the chairman of the meeting shall appoint one or more inspectors to act at the meeting. Unless otherwise required by law, inspectors may be officers, employees, agents or representatives of the Corporation. Each inspector, before entering upon the discharge of such inspector's duties, shall take and sign an oath faithfully to execute the duties of inspector with strict impartiality and according to the best of such inspector's ability. The inspector shall have the duties prescribed by law and, when the vote is completed, shall certify the inspector's determination of the result of the vote taken and of such other facts as may be required by law. Every vote taken by ballots shall be counted by a duly appointed inspector or duly appointed inspectors.

ARTICLE II DIRECTORS

2.1 General Powers. The business and affairs of the Corporation shall be managed by or under the direction of the Board, which may exercise all of the powers of the Corporation except as otherwise provided by law or the Certificate of Incorporation.

2.2 Number, Election; Term and Qualification. The total number of directors constituting the Board shall be as fixed in, or in the manner provided by, the Certificate of Incorporation. Election of directors need not be by written ballot. The term of office of each director shall be as specified in the Certificate of Incorporation. Directors need not be stockholders of the Corporation.

2.3 Chairman of the Board; Vice Chairman of the Board. The Board may appoint from its members a Chairman of the Board and a Vice Chairman of the Board, neither of whom need be an employee or officer of the Corporation. If the Board appoints a Chairman of the Board, such Chairman shall perform such duties and possess such powers as are assigned by the Board and, if the Chairman of the Board is also designated as the Corporation's Chief Executive

Officer, shall have the powers and duties of the Chief Executive Officer prescribed in Section 3.7 of these Bylaws. If the Board appoints a Vice Chairman of the Board, such Vice Chairman shall perform such duties and possess such powers as are assigned by the Board. Unless otherwise provided by the Board, the Chairman of the Board or, in the Chairman's absence, the Vice Chairman of the Board, if any, shall preside at all meetings of the Board.

2.4 Quorum. The greater of (a) a majority of the directors at any time in office and (b) one-third of the whole Board shall constitute a quorum of the Board. If at any meeting of the Board there shall be less than a quorum, a majority of the directors present may adjourn the meeting from time to time without further notice other than announcement at the meeting, until a quorum shall be present.

2.5 Action at Meeting. Every act or decision done or made by a majority of the directors present at a meeting duly held at which a quorum is present shall be regarded as the act of the Board, unless a greater number is required by law or by the Certificate of Incorporation.

2.6 Removal. Subject to the rights of holders of any series of Preferred Stock, directors of the Corporation may be removed only as expressly provided in the Certificate of Incorporation.

2.7 Newly Created Directorships; Vacancies. Any newly created directorship that results from an increase in the number of directors or any vacancy on the Board that results from the death, disability, resignation, disqualification or removal of any director or from any other cause shall be filled in accordance with the Certificate of Incorporation.

2.8 Resignation. Any director may resign by delivering a resignation in writing or by electronic transmission to the Corporation at its principal office or to the Chairman of the Board, the Chief Executive Officer, the President or the Secretary. Such resignation shall be effective upon delivery unless it is specified to be effective at some later time or upon the happening of some later event.

2.9 Regular Meetings. Regular meetings of the Board may be held without notice at such time and place as shall be determined from time to time by the Board; provided that any director who is absent when such a determination is made shall be given notice of the determination. A regular meeting of the Board may be held without notice immediately after and at the same place as the annual meeting of stockholders.

2.10 Special Meetings. Special meetings of the Board may be called by the Chairman of the Board, the Chief Executive Officer, a majority of the directors then in office, or one director in the event that there is only a single director in office.

2.11 Notice of Special Meetings. Notice of the date, place and time of any special meeting of the Board shall be given to each director (a) in person or by telephone at least twenty-four (24) hours in advance of the meeting, (b) by sending written notice by reputable overnight courier, teletype, electronic mail, facsimile or other means of electronic transmission, or delivering written notice by hand, to such director's last known business, home or means of electronic transmission address at least twenty-four (24) hours in advance of the meeting, or (c) by sending written notice by first-class mail to such director's last known business or home

address at least seventy-two (72) hours in advance of the meeting. Such notice may be given by the Secretary or by the Chairman of the Board, the Chief Executive Officer or one of the directors calling the meeting. A notice or waiver of notice of a meeting of the Board need not specify the purposes of the meeting.

2.12 Meetings by Conference Communications Equipment. Directors may participate in meetings of the Board or any committee thereof by means of conference telephone or other communications equipment by means of which all persons participating in the meeting can hear each other, and participation by such means shall constitute presence in person at such meeting.

2.13 Action by Consent. Any action required or permitted to be taken at any meeting of the Board or of any committee thereof may be taken without a meeting, if all members of the Board or committee, as the case may be, consent to the action in writing or by electronic transmission. After an action is taken, the consent or consents relating thereto shall be filed with the minutes of proceedings of the Board, or the committee thereof, in the same paper or electronic form as the minutes are maintained.

2.14 Committees. The Board may designate one or more committees, each committee to consist of one or more of the directors of the Corporation with such lawfully delegable powers and duties as the Board thereby confers, to serve at the pleasure of the Board. The Board may designate one or more directors as alternate members of any committee, who may replace any absent or disqualified member at any meeting of the committee. In the absence or disqualification of a member of a committee, the member or members of the committee present at any meeting and not disqualified from voting, whether or not such member or members constitute a quorum, may unanimously appoint another member of the Board to act at the meeting in the place of any such absent or disqualified member. Any such committee, to the extent provided in the resolution of the Board and subject to the provisions of law, shall have and may exercise all the powers and authority of the Board in the management of the business and affairs of the Corporation and may authorize the seal of the Corporation to be affixed to all papers which may require it. Each such committee shall keep minutes and make such reports as the Board may from time to time request. Except as otherwise provided in the Certificate of Incorporation, these Bylaws, or the resolution of the Board designating the committee, a committee may create one or more subcommittees, each subcommittee to consist of one or more members of the committee, and delegate to a subcommittee any or all of the powers and authority of the committee.

2.15 Compensation of Directors. Directors may be paid such compensation for their services and such reimbursement for expenses of attendance at meetings as the Board may from time to time determine. No such payment shall preclude any director from serving the Corporation or any of its parent or subsidiary entities in any other capacity and receiving compensation for such service.

ARTICLE III OFFICERS

3.1 Titles. The officers of the Corporation may consist of a Chief Executive Officer, a President, a Chief Financial Officer, a Treasurer and a Secretary and such other officers with

such other titles as the Board shall from time to time determine. The Board may appoint such other officers, including one or more Vice Presidents and one or more Assistant Treasurers or Assistant Secretaries, as it may deem appropriate from time to time. The only individuals who shall be considered the officers of the Corporation shall be those individuals who have been appointed or elected as an officer of the Corporation by the Board.

3.2 Appointment. The officers of the Corporation shall be appointed by the Board.

3.3 Qualification. No officer need be a stockholder. Any two or more offices may be held by the same person.

3.4 Tenure. Except as otherwise provided by law, by the Certificate of Incorporation or by these Bylaws, each officer shall hold office until such officer's successor is duly elected and qualified, unless a different term is specified in the resolution electing or appointing such officer, or until such officer's earlier death, resignation, disqualification or removal.

3.5 Resignation and Removal. Any officer may resign by delivering a resignation in writing or by electronic transmission to the Corporation at its principal office or to the Board, the Chief Executive Officer, the President or the Secretary. Such resignation shall be effective upon receipt unless it is specified to be effective at some later time or upon the happening of some later event. Any officer may be removed at any time, with or without cause, by the affirmative vote of a majority of the directors then in office. Except as the Board may otherwise determine, no officer who resigns or is removed shall have any right to any compensation as an officer for any period following such officer's resignation or removal, or any right to damages on account of such removal, whether such officer's compensation be by the month or by the year or otherwise, unless such compensation is expressly provided for in a duly authorized written agreement with the Corporation.

3.6 Vacancies. The Board may fill any vacancy occurring in any office for any reason and may, in its discretion, leave unfilled, for such period as it may determine, any offices. Each such successor shall hold office for the unexpired term of such officer's predecessor and until a successor is duly elected and qualified, or until such officer's earlier death, resignation, disqualification or removal.

3.7 President; Chief Executive Officer. Unless the Board has designated another person as the Corporation's Chief Executive Officer, the President shall be the Chief Executive Officer of the Corporation. The Chief Executive Officer shall have general charge and supervision of the business of the Corporation subject to the direction of the Board, and shall perform all duties and have all powers that are commonly incident to the office of chief executive or that are delegated to such officer by the Board. The President shall perform such other duties and shall have such other powers as the Board or the Chief Executive Officer (if the President is not the Chief Executive Officer) may from time to time prescribe. In the event of the absence, inability or refusal to act of the Chief Executive Officer or the President (if the President is not the Chief Executive Officer), the Vice President (or if there shall be more than one, the Vice Presidents in the order determined by the Board) shall perform the duties of the Chief Executive Officer and when so performing such duties shall have all the powers of and be subject to all the restrictions upon the Chief Executive Officer.

3.8 Vice Presidents/Other Officers. Each Vice President and any other officer designated by the Board shall perform such duties and possess such powers as the Board or the Chief Executive Officer may from time to time prescribe. The Board may assign to any Vice President the title of Executive Vice President or Senior Vice President, and may assign to any Vice President or other officer any other title selected by the Board.

3.9 Secretary and Assistant Secretaries. The Secretary shall perform such duties and shall have such powers as the Board or the Chief Executive Officer may from time to time prescribe. In addition, the Secretary shall perform such duties and have such powers as are incident to the office of the secretary, including without limitation the duty and power to give notices of all meetings of stockholders and special meetings of the Board, to attend all meetings of stockholders and the Board (other than executive sessions of the Board) and keep a record of the proceedings, to maintain a stock ledger and prepare lists of stockholders and their addresses as required, to be custodian of corporate records and the corporate seal and to affix and attest to the same on documents.

Any Assistant Secretary shall perform such duties and possess such powers as the Board, the Chief Executive Officer or the Secretary may from time to time prescribe. In the event of the absence, inability or refusal to act of the Secretary, the Assistant Secretary (or if there shall be more than one, the Assistant Secretaries in the order determined by the Board) shall perform the duties and exercise the powers of the Secretary.

The chairman of any meeting of the Board or of stockholders may designate a temporary secretary to keep a record of any meeting.

3.10 Treasurer and Assistant Treasurers. The Treasurer shall perform such duties and shall have such powers as may from time to time be assigned by the Board or the Chief Executive Officer. In addition, the Treasurer shall perform such duties and have such powers as are incident to the office of treasurer, including without limitation the duty and power to keep and be responsible for all funds and securities of the Corporation, to deposit funds of the Corporation in depositories selected in accordance with these Bylaws, to disburse such funds as ordered by the Board, to make proper accounts of such funds, and to render as required by the Board statements of all such transactions and of the financial condition of the Corporation.

The Assistant Treasurers shall perform such duties and possess such powers as the Board, the Chief Executive Officer or the Treasurer may from time to time prescribe. In the event of the absence, inability or refusal to act of the Treasurer, the Assistant Treasurer (or if there shall be more than one, the Assistant Treasurers in the order determined by the Board) shall perform the duties and exercise the powers of the Treasurer.

3.11 Salaries. Officers of the Corporation shall be entitled to such salaries, compensation or reimbursement as shall be fixed or allowed from time to time by the Board.

3.12 Delegation of Authority. The Board may from time to time delegate the powers or duties of any officer to any other officer or agent, notwithstanding any provision hereof.

ARTICLE IV CAPITAL STOCK

4.1 Issuance of Stock. Subject to the provisions of the Certificate of Incorporation, the whole or any part of any unissued balance of the authorized capital stock of the Corporation or the whole or any part of any shares of the authorized capital stock of the Corporation held in the Corporation's treasury may be issued, sold, transferred or otherwise disposed of by vote of the Board in such manner, for such lawful consideration and on such terms as the Board may determine.

4.2 Stock Certificates; Uncertificated Shares. The shares of the Corporation shall be represented by certificates, provided that the Board may provide by resolution or resolutions that some or all of any or all classes or series of the Corporation's stock shall be uncertificated shares. Every holder of stock of the Corporation represented by certificates shall be entitled to have a certificate, in such form as may be prescribed by law and by the Board, representing the number of shares held by such holder registered in certificate form. Each such certificate shall be signed in a manner that complies with Section 158 of the DGCL and each of the Chief Executive Officer, the President, a Vice President, the Secretary, an Assistant Secretary, the Chief Financial Officer, the Treasurer or an Assistant Treasurer are duly authorized to sign such certificates by, or in the name of, the Corporation, unless otherwise expressly provided in the resolution of the Board electing such officer.

Each certificate for shares of stock which are subject to any restriction on transfer pursuant to the Certificate of Incorporation, these Bylaws, applicable securities laws or any agreement among any number of stockholders or among such holders and the Corporation shall have conspicuously noted on the face or back of the certificate either the full text of the restriction or a statement of the existence of such restriction.

If the Corporation shall be authorized to issue more than one class of stock or more than one series of any class, the powers, designations, preferences and relative participating, optional or other special rights of each class of stock or series thereof and the qualifications, limitations or restrictions of such preferences and/or rights shall be set forth in full or summarized on the face or back of each certificate representing shares of such class or series of stock, provided that in lieu of the foregoing requirements there may be set forth on the face or back of each certificate representing shares of such class or series of stock a statement that the Corporation will furnish without charge to each stockholder who so requests the powers, designations, preferences and relative, participating, optional or other special rights of each class of stock or series thereof and the qualifications, limitations or restrictions of such preferences and/or rights.

Within a reasonable time after the issuance or transfer of uncertificated shares, the registered owner thereof shall be given a notice, in writing or by electronic transmission, containing the information required to be set forth or stated on certificates pursuant to Sections 151, 156, 202(a) or 218(a) of the DGCL or, with respect to Section 151 of DGCL, a statement that the Corporation will furnish without charge to each stockholder who so requests the powers, designations, preferences and relative participating, optional or other special rights of each class of stock or series thereof and the qualifications, limitations or restrictions of such preferences and/or rights.

4.3 Transfers. Shares of stock of the Corporation shall be transferable in the manner prescribed by law, the Certificate of Incorporation and in these Bylaws. Transfers of shares of stock of the Corporation shall be made only on the books of the Corporation or by transfer agents designated to transfer shares of stock of the Corporation. Subject to applicable law, shares of stock represented by certificates shall be transferred only on the books of the Corporation by the surrender to the Corporation or its transfer agent of the certificate representing such shares properly endorsed or accompanied by a written assignment or power of attorney properly executed, and with such proof of authority or the authenticity of signature as the Corporation or its transfer agent may reasonably require. Except as may be otherwise required by law, by the Certificate of Incorporation or by these Bylaws, the Corporation shall be entitled to treat the record holder of stock as shown on its books as the owner of such stock for all purposes, including the payment of dividends and the right to vote with respect to such stock, regardless of any transfer, pledge or other disposition of such stock until the shares have been transferred on the books of the Corporation in accordance with the requirements of these Bylaws.

4.4 Lost, Stolen or Destroyed Certificates. The Corporation may issue a new certificate or uncertificated shares in place of any previously issued certificate alleged to have been lost, stolen or destroyed, upon such terms and conditions as the Board may prescribe, including the presentation of reasonable evidence of such loss, theft or destruction and the giving of such indemnity and posting of such bond sufficient to indemnify the Corporation against any claim that may be made against it on account of the alleged loss, theft or destruction of any such certificate or the issuance of such new certificate or uncertificated shares.

4.5 Record Date. In order that the Corporation may determine the stockholders entitled to notice of any meeting of stockholders or any adjournment thereof, the Board may fix a record date, which record date shall not precede the date upon which the resolution fixing the record date is adopted by the Board, and which record date shall, unless otherwise required by law, not be more than sixty (60) nor less than ten (10) days before the date of such meeting. If the Board so fixes a date, such date shall also be the record date for determining the stockholders entitled to vote at such meeting unless the Board determines, at the time it fixes such record date, that a later date on or before the date of the meeting shall be the date for making such determination. If no record date is fixed by the Board, the record date for determining stockholders entitled to notice of or to vote at a meeting of stockholders shall be at the close of business on the day next preceding the day on which notice is given, or, if notice is waived, at the close of business on the day next preceding the day on which the meeting is held. A determination of stockholders of record entitled to notice of or to vote at a meeting of stockholders shall apply to any adjournment of the meeting; provided, however, that the Board may fix a new record date for determination of stockholders entitled to vote at the adjourned meeting, and in such case shall also fix as the record date for stockholders entitled to notice of such adjourned meeting the same or an earlier date as that fixed for determination of stockholders entitled to vote in accordance herewith at the adjourned meeting.

In order that the Corporation may determine the stockholders entitled to receive payment of any dividend or other distribution or allotment of any rights, or entitled to exercise any rights in respect of any change, conversion or exchange of stock or for the purpose of any other lawful action, the Board may fix a record date, which shall not be more than sixty (60) days prior to such action. If no such record date is fixed, the record date for determining stockholders for any

such purpose shall be at the close of business on the day on which the Board adopts the resolution relating thereto.

4.6 Regulations. The issue and registration of shares of stock of the Corporation shall be governed by such other regulations as the Board may establish.

ARTICLE V GENERAL PROVISIONS

5.1 Fiscal Year. Except as from time to time otherwise designated by the Board, the fiscal year of the Corporation shall begin on the first day of January of each year and end on the last day of December in each year.

5.2 Corporate Seal. The corporate seal shall be in such form as shall be approved by the Board.

5.3 Waiver of Notice. Whenever notice is required to be given by law, by the Certificate of Incorporation or by these Bylaws, a written waiver signed by the person entitled to notice, or a waiver by electronic transmission by the person entitled to notice, whether before, at or after the time of the event for which notice is to be given, shall be deemed equivalent to notice required to be given to such person. Neither the business nor the purpose of any meeting need be specified in any such waiver. Attendance of a person at a meeting shall constitute a waiver of notice of such meeting, except when the person attends a meeting for the express purpose of objecting at the beginning of the meeting, to the transaction of any business because the meeting is not lawfully called or convened.

5.4 Voting of Securities. Except as the Board may otherwise designate, the Chief Executive Officer, the President, the Chief Financial Officer or the Treasurer may waive notice, vote, consent, or appoint any person or persons to waive notice, vote or consent, on behalf of the Corporation, and act as, or appoint any person or persons to act as, proxy or attorney-in-fact for the Corporation (with or without power of substitution and re-substitution), with respect to the securities of any other entity which may be held by this Corporation.

5.5 Evidence of Authority. A certificate by the Secretary, or an Assistant Secretary, or a temporary Secretary, as to any action taken by the stockholders, directors, a committee or any officer or representative of the Corporation shall as to all persons who rely on the certificate in good faith be conclusive evidence of such action.

5.6 Certificate of Incorporation. All references in these Bylaws to the Certificate of Incorporation shall be deemed to refer to the Certificate of Incorporation of the Corporation, as amended and/or restated and in effect from time to time.

5.7 Severability. Any determination that any provision of these Bylaws is for any reason inapplicable, illegal or ineffective shall not affect or invalidate any other provision of these Bylaws.

5.8 Pronouns. All pronouns used in these Bylaws shall be deemed to refer to the masculine, feminine or neuter, singular or plural, as the identity of the person or persons may require.

5.9 Manner of Notice. Without limiting the manner by which notice otherwise may be given effectively to stockholders, any notice to stockholders given by the Corporation under any provision of the DGCL, the Certificate of Incorporation or these Bylaws may be given in writing directed to the stockholder's mailing address (or by electronic transmission directed to the stockholder's electronic mail address, as applicable) as it appears on the records of the Corporation. Notice shall be given (i) if mailed, when deposited in the United States mail, (ii) if delivered by courier service, the earlier of when the notice is received or left at the stockholder's address, or (iii) if given by electronic mail, when directed to such stockholder's electronic mail address (unless the stockholder has notified the Corporation in writing or by electronic transmission of an objection to receiving notice by electronic mail or such notice is prohibited by the DGCL to be given by electronic transmission). A notice by electronic mail must include a prominent legend that the communication is an important notice regarding the Corporation. A notice by electronic mail shall be deemed to include any files attached thereto and any information hyperlinked to a website if such electronic mail includes the contact information of an officer or agent of the Corporation who is available to assist with accessing such files or information. Any notice to stockholders under any provision of the DGCL, the Certificate of Incorporation or these Bylaws provided by electronic transmission (other than any such notice given by electronic mail) may only be given in a form consented to by such stockholder, and any such notice by electronic transmission shall be deemed to be given as provided by the DGCL.

5.10 Electronic Transmission. For purposes of these Bylaws, "electronic transmission" means any form of communication, not directly involving the physical transmission of paper, including the use of, or participation in, one or more electronic networks or databases (including one or more distributed electronic networks or databases), that creates a record that may be retained, retrieved, and reviewed by a recipient thereof, and that may be directly reproduced in paper form by such a recipient through an automated process.

ARTICLE VI AMENDMENTS

These Bylaws may be altered, amended or repealed, in whole or in part, or new Bylaws may be adopted by the Board or by the stockholders as expressly provided in the Certificate of Incorporation.

ARTICLE VII INDEMNIFICATION AND ADVANCEMENT

7.1 Power to Indemnify in Actions, Suits or Proceedings other than Those by or in the Right of the Corporation. Subject to Section 7.3, the Corporation shall indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the Corporation) by reason of the fact that such person is or was a

director or officer of the Corporation, or, while a director or officer of the Corporation, is or was serving at the request of the Corporation as a director, officer, employee or agent of another Corporation, partnership, joint venture, trust, employee benefit plan or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the Corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe such person's conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, in and of itself, create a presumption that the person did not act in good faith and in a manner which such person reasonably believed to be in or not opposed to the best interests of the Corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that such person's conduct was unlawful.

7.2 Power to Indemnify in Actions, Suits or Proceedings by or in the Right of the Corporation. Subject to Section 7.3, the Corporation shall indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the Corporation to procure a judgment in its favor by reason of the fact that such person is or was a director or officer of the Corporation, or, while a director or officer of the Corporation, is or was serving at the request of the Corporation as a director, officer, employee or agent of another Corporation, partnership, joint venture, trust, employee benefit plan or other enterprise against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the Corporation; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable to the Corporation unless and only to the extent that the Court of Chancery or the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability but in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which the Court of Chancery or such other court shall deem proper.

7.3 Authorization of Indemnification. Any indemnification under this Article VII (unless ordered by a court) shall be made by the Corporation only as authorized in the specific case upon a determination that indemnification of the director or officer is proper in the circumstances because such person has met the applicable standard of conduct set forth in Section 7.1 or Section 7.2, as the case may be. Such determination shall be made, with respect to a person who is a director or officer at the time of such determination, (i) by a majority vote of the directors who are not parties to such action, suit or proceeding, even though less than a quorum, or (ii) by a committee of such directors designated by a majority vote of such directors, even though less than a quorum, or (iii) if there are no such directors, or if such directors so direct, by independent legal counsel in a written opinion or (iv) by the stockholders. Such determination shall be made, with respect to former directors and officers, by any person or persons having the authority to act on the matter on behalf of the Corporation. To the extent, however, that a present or former director or officer of the Corporation has been successful on the merits or otherwise in defense of any action, suit or proceeding set forth in Section 7.1 or Section 7.2 or in defense of any claim, issue or matter therein, such person shall be indemnified

against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection therewith, without the necessity of authorization in the specific case.

7.4 Good Faith Defined. For purposes of any determination under Section 7.3, a person shall be deemed to have acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the Corporation, or, with respect to any criminal action or proceeding, to have had no reasonable cause to believe such person's conduct was unlawful, if such person's action is based on good faith reliance on the records or books of account of the Corporation or another enterprise, or on information supplied to such person by the officers of the Corporation or another enterprise in the course of their duties, or on the advice of legal counsel for the Corporation or another enterprise or on information or records given or reports made to the Corporation or another enterprise by an independent certified public accountant or by an appraiser or other expert selected with reasonable care by the Corporation or another enterprise. The term "another enterprise" as used in this Section 7.4 shall mean any other corporation or any partnership, joint venture, trust, employee benefit plan or other enterprise of which such person is or was serving at the request of the Corporation as a director, officer, employee or agent. The provisions of this Section 7.4 shall not be deemed to be exclusive or to limit in any way the circumstances in which a person may be deemed to have met the applicable standard of conduct set forth in Section 7.1 or 7.2, as the case may be.

7.5 Right of Claimant to Bring Suit. Notwithstanding any contrary determination in the specific case under Section 7.3, and notwithstanding the absence of any determination thereunder, if a claim under Sections 7.1 or 7.2 of the Article VII is not paid in full by the Corporation within (i) ninety (90) days after a written claim for indemnification has been received by the Corporation, or (ii) thirty (30) days after a written claim for an advancement of expenses has been received by the Corporation, the claimant may at any time thereafter (but not before) bring suit against the Corporation in the Court of Chancery in the State of Delaware to recover the unpaid amount of the claim, together with interest thereon, or to obtain advancement of expenses, as applicable. It shall be a defense to any such action brought to enforce a right to indemnification (but not in an action brought to enforce a right to an advancement of expenses) that the claimant has not met the standards of conduct which make it permissible under the DGCL (or other applicable law) for the Corporation to indemnify the claimant for the amount claimed, but the burden of proving such defense shall be on the Corporation. Neither a contrary determination in the specific case under Section 7.3 nor the absence of any determination thereunder shall be a defense to such application or create a presumption that the claimant has not met any applicable standard of conduct. If successful, in whole or in part, the claimant shall also be entitled to be paid the expense of prosecuting such claim, including reasonable attorneys' fees incurred in connection therewith, to the fullest extent permitted by applicable law.

7.6 Expenses Payable in Advance. Expenses, including without limitation attorneys' fees, incurred by a current or former director or officer in defending any civil, criminal, administrative or investigative action, suit or proceeding shall be paid by the Corporation in advance of the final disposition of such action, suit or proceeding upon receipt of an undertaking by or on behalf of such current or former director or officer to repay such amount if it shall ultimately be determined that such person is not entitled to be indemnified by the Corporation as authorized in this Article VII.

7.7 Nonexclusivity of Indemnification and Advancement of Expenses. The rights to indemnification and advancement of expenses provided by or granted pursuant to this Article VII shall not be deemed exclusive of any other rights to which those seeking indemnification or advancement of expenses may be entitled under the Certificate of Incorporation, any agreement, vote of stockholders or disinterested directors or otherwise, both as to action in such person's official capacity and as to action in another capacity while holding such office, it being the policy of the Corporation that, subject to Section 7.11, indemnification of the persons specified in Sections 7.1 and 7.2 shall be made to the fullest extent permitted by law. The provisions of this Article VII shall not be deemed to preclude the indemnification of any person who is not specified in Section 7.1 or 7.2 but whom the Corporation has the power or obligation to indemnify under the provisions of the DGCL, or otherwise.

7.8 Insurance. The Corporation may purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the Corporation, or is or was serving at the request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise against any liability asserted against such person and incurred by such person in any such capacity, or arising out of such person's status as such, whether or not the Corporation would have the power or the obligation to indemnify such person against such liability under the provisions of this Article VII.

7.9 Certain Definitions. For purposes of this Article VII, references to "the Corporation" shall include, in addition to the resulting corporation, any constituent corporation (including any constituent of a constituent) absorbed in a consolidation or merger which, if its separate existence had continued, would have had power and authority to indemnify its directors, officers, employees or agents so that any person who is or was a director, officer, employee or agent of such constituent corporation, or is or was serving at the request of such constituent corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise, shall stand in the same position under the provisions of this Article VII with respect to the resulting or surviving corporation as such person would have with respect to such constituent corporation if its separate existence had continued. For purposes of this Article VII, references to "fines" shall include any excise taxes assessed on a person with respect of any employee benefit plan; and references to "serving at the request of the Corporation" shall include any service as a director, officer, employee or agent of the Corporation which imposes duties on, or involves services by, such director, officer, employee or agent with respect to an employee benefit plan, its participants or beneficiaries; and a person who acted in good faith and in a manner such person reasonably believed to be in the interest of the participants and beneficiaries of an employee benefit plan shall be deemed to have acted in a manner "not opposed to the best interests of the Corporation" as referred to in this Article VII.

7.10 Survival of Indemnification and Advancement of Expenses. The indemnification and advancement of expenses provided by, or granted pursuant to, this Article VII shall, unless otherwise provided when authorized or ratified, continue as to a person who has ceased to be a director or officer and shall inure to the benefit of the heirs, executors and administrators of such a person.

7.11 Limitation on Indemnification. Notwithstanding anything contained in this Article VII to the contrary, except for proceedings to enforce rights to indemnification (which shall be governed by Section 7.5), the Corporation shall not be obligated to indemnify any director, officer, employee or agent in connection with an action, suit proceeding (or part thereof) initiated by such person unless such action, suit or proceeding (or part thereof) was authorized by the Board.

7.12 Contract Rights. The obligations of the Corporation under this Article VII to indemnify, and advance expenses to, a person who is or was a director or officer of the Corporation shall be considered a contract between the Corporation and such person, and no modification or repeal of any provision of this Article VII shall affect, to the detriment of such person, such obligations of the Corporation in connection with a claim based on any act or failure to act occurring before such modification or repeal.

DESCRIPTION OF SECURITIES

The following description summarizes the most important terms of our capital stock. It is subject to and qualified in its entirety by reference to our amended and restated certificate of incorporation (“Certificate of Incorporation”) and restated bylaws (“Bylaws”), which are included as exhibits to our annual report, of which this Exhibit 4.7 is a part. We encourage you to read our Certificate of Incorporation, our Bylaws and the applicable provisions of the General Corporation Law of the State of Delaware (the “DGCL”) for additional information.

Authorized Capitalization

We have 250,000,000 shares of capital stock authorized under our Certificate of Incorporation, consisting of 240,000,000 shares of common stock with a par value of \$0.0001 per share and 10,000,000 shares of preferred stock with a par value of \$0.0001 per share.

As of March 21, 2022 there were 11,309,412 shares of common stock outstanding, and no shares of preferred stock outstanding.

Common Stock

Holders of our common stock are entitled to such dividends as may be declared by our board of directors out of funds legally available for such purpose. The shares of common stock are neither redeemable nor convertible. Holders of common stock have no preemptive or subscription rights to purchase any of our securities.

Each holder of our common stock is entitled to one vote for each such share outstanding in the holder’s name. No holder of common stock is entitled to cumulate votes in voting for directors.

In the event of our liquidation, dissolution or winding up, the holders of our common stock are entitled to receive a pro rata share of our assets, which are legally available for distribution, after payments of all debts and other liabilities. All of the outstanding shares of our common stock are fully paid and non-assessable.

Preferred Stock

Our board of directors has the authority, without further action by our stockholders, to issue up to 10,000,000 shares of preferred stock in one or more classes or series and to fix the designations, rights, preferences, privileges and restrictions thereof, without further vote or action by the stockholders. These rights, preferences and privileges could include dividend rights, conversion rights, voting rights, terms of redemption, liquidation preferences, sinking fund terms and the number of shares constituting, or the designation of, such class or series, any or all of which may be greater than the rights of common stock. The issuance of our preferred stock could adversely affect the voting power of holders of common stock and the likelihood that such holders will receive dividend payments and payments upon our liquidation. In addition, the issuance of preferred stock could have the effect of delaying, deferring or preventing a change in control of our company or other corporate action. No shares of preferred stock are outstanding, and we have no present plan to issue any shares of preferred stock.

Warrants

The following summary of certain terms and provisions of our Common Stock Purchase Warrants (“Warrants”) is not complete and is subject to, and qualified in its entirety by the provisions of the Warrant Agent Agreement and form of Warrant which are filed as exhibits to this annual report of which this Exhibit 4.5 is a part. We encourage you to review the terms and provisions set forth in the Warrant Agent Agreement and form of Warrant. The Warrants are administered by Computershare Trust Company, N.A., as warrant agent.

Exercisability

The Warrants were exercisable immediately upon issuance and expire December 10, 2026. The Warrants are exercisable, at the option of each holder, in whole or in part by delivering to us and the warrant agent a duly executed exercise notice accompanied by payment in full for the number of common stock purchased upon such exercise. If a registration statement registering under the Securities Act of 1933, as amended (the "Securities Act") the issuance of the shares of common stock underlying the Warrants is not effective or available, the holder may, in its sole discretion, elect to exercise the Warrant through a cashless exercise, in which case the holder would receive upon such exercise the net number of shares of common stock determined according to the formula set forth in the Warrant. Unless otherwise specified in the Warrant, the holder will not have the right to exercise the Warrants, in whole or in part, if the holder (together with its affiliates and any persons acting as a group together with the holder or any of the holder's affiliates) would beneficially own in excess of 4.99% of the number of our ordinary shares outstanding immediately after giving effect to the exercise, as such percentage is determined in accordance with the terms of the Warrant. However, any holder may increase or decrease such percentage to any other percentage not in excess of 9.99% upon at least 61 days' prior notice from the holder to us.

Exercise Price

The initial exercise price per share of common stock purchasable upon exercise of the Warrants is equal to \$6.00 and is subject to adjustments for stock splits or combinations, stock dividends and distributions, reclassifications, subdivisions, and other similar transactions. No fractional shares will be issued in connection with the exercise of a Warrant. In lieu of fractional shares, we will pay the holder an amount in cash equal to the fractional amount multiplied by the exercise price.

Fundamental Transaction

If, at any time while the Warrants are outstanding, (1) we consolidate or merge with or into another corporation whether or not the Company is the surviving corporation, (2) we sell, lease, license, assign, transfer, convey or otherwise dispose of all or substantially all of our assets, or any of its significant subsidiaries (as defined in Rule 1-02 of Regulation S-X) (3) any purchase offer, tender offer or exchange offer (whether by us or another individual or entity) is completed pursuant to which holders of the ordinary shares are permitted to sell, tender or exchange their ordinary shares for other securities, cash or property and has been accepted by the holders of 50% or more of the ordinary shares, (4) we consummate a securities purchase agreement or other business combination with another person or entity whereby such other person or entity acquires at least 50% of the outstanding ordinary shares, (5) we effect any reclassification or recapitalization of the ordinary shares or any compulsory exchange pursuant to which the ordinary shares are converted into or exchanged for other securities, cash or property, or each, a "Fundamental Transaction," then upon any subsequent exercise of the Warrants, the holders thereof will have the right to receive the same amount and kind of securities, cash or property as it would have been entitled to receive upon the occurrence of such Fundamental Transaction if it had been, immediately prior to such Fundamental Transaction, the holder of the number of ordinary shares then issuable upon exercise of those Warrants, and any additional consideration payable as part of the Fundamental Transaction.

Transferability

Subject to applicable laws, the Warrants may be transferred at the option of the holders upon surrender of the to the warrant agent, together with the appropriate instruments of transfer.

Warrant Agent and Listing

The Warrants were issued in registered form under the Warrant Agent Agreement between us and the warrant agent. The Warrants are listed on Nasdaq under the symbol "CINGW." The Warrants are represented only by one or more global warrants deposited with the warrant agent, as custodian on behalf of The Depository Trust Company, or DTC, and registered in the name of Cede & Co., a nominee of DTC, or as otherwise directed by DTC.

Rights as a Stockholder

Except as otherwise provided in the Warrant Agent Agreement or by virtue of such holder's ownership of common stock, holders of the Warrants do not have rights or privileges of holders of common stock, including any voting rights, until a holder exercises a Warrant.

Governing Law

The Warrants and the Warrant Agent Agreement are governed by New York law.

As of March 21, 2022 there were Warrants to purchase 4,166,666 shares of common stock outstanding.

We issued to the underwriters of our initial public offering, warrants (the “Underwriter Warrants”) to purchase 208,333 shares of our common stock as additional consideration to the underwriters. The Underwriter Warrants have an exercise price equal to \$7.50, expire on December 7, 2026 and contain customary “cashless” exercise and registration rights provisions. The Underwriter Warrants are not exercisable until June 7, 2022.

Anti-Takeover Effects of Delaware law and Our Certificate of Incorporation and Bylaws

The provisions of Delaware law, our Certificate of Incorporation and our Bylaws described below may have the effect of delaying, deferring or discouraging another party from acquiring control of us.

Section 203 of the Delaware General Corporation Law

We are subject to Section 203 of the Delaware General Corporation Law, which prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years after the date that such stockholder became an interested stockholder, with the following exceptions:

- before such date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon completion of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction began, excluding for purposes of determining the voting stock outstanding (but not the outstanding voting stock owned by the interested stockholder) those shares owned (i) by persons who are directors and also officers and (ii) employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or
- on or after such date, the business combination is approved by the board of directors and authorized at an annual or special meeting of the stockholders, and not by written consent, by the affirmative vote of at least 66 2/3% of the outstanding voting stock that is not owned by the interested stockholder.

In general, Section 203 defines business combination to include the following:

- any merger or consolidation involving the corporation and the interested stockholder;
- any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested stockholder;
- subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder;
- any transaction involving the corporation that has the effect of increasing the proportionate share of the stock or any class or series of the corporation beneficially owned by the interested stockholder; or
- the receipt by the interested stockholder of the benefit of any loss, advances, guarantees, pledges or other financial benefits by or through the corporation.

In general, Section 203 defines an “interested stockholder” as an entity or person who, together with the person’s affiliates and associates, beneficially owns, or within three years prior to the time of determination of interested stockholder status did own, 15% or more of the outstanding voting stock of the corporation.

Certificate of Incorporation and Bylaws

Our Certificate of Incorporation and Bylaws, to become effective upon completion of the offering, provide for:

- classifying our board of directors into three classes;
- authorizing the issuance of “blank check” preferred stock, the terms of which may be established and shares of which may be issued without stockholder approval;
- limiting the removal of directors by the stockholders;
- requiring a supermajority vote of stockholders to amend our Bylaws or certain provisions our Certificate of Incorporation;
- prohibiting stockholder action by written consent, thereby requiring all stockholder actions to be taken at a meeting of our stockholders;
- eliminating the ability of stockholders to call a special meeting of stockholders;
- establishing advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted upon at stockholder meetings; and
- establishing Delaware as the exclusive jurisdiction for certain stockholder litigation against us.

Potential Effects of Authorized but Unissued Stock

Pursuant to our Certificate of Incorporation, we have shares of common stock and preferred stock available for future issuance without stockholder approval. We may utilize these additional shares for a variety of corporate purposes, including future public offerings to raise additional capital, to facilitate corporate acquisitions or payment as a dividend on the capital stock.

The existence of unissued and unreserved common stock and preferred stock may enable our board of directors to issue shares to persons friendly to current management or to issue preferred stock with terms that could render more difficult or discourage a third-party attempt to obtain control of us by means of a merger, tender offer, proxy contest or otherwise, thereby protecting the continuity of our management. In addition, the board of directors has the discretion to determine designations, rights, preferences, privileges and restrictions, including voting rights, dividend rights, conversion rights, redemption privileges and liquidation preferences of each series of preferred stock, all to the fullest extent permissible under the Delaware General Corporation Law and subject to any limitations set forth in our Certificate of Incorporation. The purpose of authorizing the board of directors to issue preferred stock and to determine the rights and preferences applicable to such preferred stock is to eliminate delays associated with a stockholder vote on specific issuances. The issuance of preferred stock, while providing desirable flexibility in connection with possible financings, acquisitions and other corporate purposes, could have the effect of making it more difficult for a third-party to acquire, or could discourage a third-party from acquiring, a majority of our outstanding voting stock.

Choice of Forum

Unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware shall be the sole and exclusive forum for any stockholder to bring (i) any derivative action or proceeding brought on behalf of the Company, (ii) any action asserting a claim of breach of fiduciary duty owed by any director, officer or other employee of the Company or the Company's stockholders, (iii) any action asserting a claim against the Company or any director or officer of the Company arising pursuant to, or a claim against the Company or any director or officer of the Company, with respect to the interpretation or application of any provision of the DGCL, our Certificate of Incorporation or Bylaws, or (iv) any action asserting a claim governed by the internal affairs doctrine, except for, in each of the aforementioned actions, any claims to which the Court of Chancery of the State of Delaware determines it lacks jurisdiction. This provision will not apply to claims arising under the Exchange Act, or for any other federal securities laws which provide for exclusive federal jurisdiction. However, the exclusive forum provision provides that unless we consent in writing to the selection of an alternative forum, the federal district courts of the United States of America will be the exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act. Therefore, this provision could apply to a suit that falls within one or more of the categories enumerated in the exclusive forum provision and that asserts claims under the Securities Act, inasmuch as Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all suits brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder. There is uncertainty as to whether a court would enforce such an exclusive forum provision with respect to claims under the Securities Act.

We note that there is uncertainty as to whether a court would enforce the provision and that investors cannot waive compliance with the federal securities laws and the rules and regulations thereunder. Although we believe this provision benefits us by providing increased consistency in the application of Delaware law in the types of lawsuits to which it applies, the provision may have the effect of discouraging lawsuits against our directors and officers.

Transfer Agent

The transfer agent of our common stock is Computershare Trust Company, N.A.

Subsidiaries of Registrant

Cingulate Therapeutics LLC, a Delaware limited liability company

Cingulate Works Inc., a Delaware corporation

Power of Attorney

KNOW ALL MEN BY THESE PRESENTS:

That the undersigned Director of Cingulate Inc. (the "Company") does hereby constitute and appoint Shane J. Schaffer and Jeff Bennett, and each of them severally, his lawful attorneys and agents, for his and in his name and in his capacity as a Director of the Company, with full power and authority to do any and all acts and things and to execute any and all instruments that said attorneys and agents determine may be necessary, advisable, or required to enable the Company to comply with the Securities Exchange Act of 1934, as amended, and any rules, regulations, or requirements of the Securities and Exchange Commission in connection with the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2021 (the "Form 10-K"), the powers granted include the power and authority to execute and file the Form 10-K, any and all amendments as a part of or in conjunction with the Form 10-K and any and all instruments or documents submitted as a part of or in conjunction with the Form 10-K. The undersigned hereby ratifies and confirms his signature as it may be signed by said attorneys and all that said attorneys and agents shall do or cause to be done by virtue hereof.

IN WITNESS WHEREOF, the undersigned has executed this Power of Attorney as of the date indicated below.

<u>/s/ Shane J. Schaffer</u> Shane J. Schaffer	February 24, 2022
<u>/s/ Jeff Conroy</u> Jeff Conroy	February 12, 2022
<u>/s/ Patrick Gallagher</u> Patrick Gallagher	February 28, 2022

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER PURSUANT
TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Shane J. Schaffer, certify that:

1. I have reviewed this annual report on Form 10-K for the period ended December 31, 2021 of Cingulate Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) (Paragraph omitted pursuant to SEC Release Nos. 33-8238/34-47986 and 33-8392/34-49313);
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
